Dear Bidder:

Welcome to Long Beach! This is Heritage's third and last visit to the Long Beach Expo for 2012, and we have put together a great auction to finish the year and build momentum for the three Long Beach events in 2013. This U.S. Coins auction has more than 2,100 lots in its Floor Sessions that will be available for lot viewing alongside more than 3,000 further coins in our Non-Floor Sessions.

Close to 200 consignors contributed lots to this auction. Among them are continuations of two Featured Collections from our successful Philadelphia auction, Selections From The Kirk Aberg Collection, Part Two and The R.M. Phillips Collection, Part Two, as well as four new Featured Collections. We invite you to read about them below.

The Phillip Clover Collection of U.S. Large Cents

Phillip W. Clover first became interested in coins at age seven, sorting through half dollars from the cash drawer of his father's gas station. Later, his mother gave him a coin album and some Indian and Lincoln cents to get him started. By sixth grade, he had a near-complete set of Lincoln cents from 1909 to 1945, and luck was on his side. He found a 1909-S VDB cent while sorting through change collected for a classroom drive.

A young neighbor's date set of large cents also inspired Mr. Clover, but they were out of his reach at the time. He went on to Indian cents instead as he grew up, joined the U.S. Navy, and married; coins his new wife's family had given her helped fill out that set. While in the Navy, he collected quarters and smaller denominations, as half dollars and dollars were too expensive to collect on Navy pay. A friendship struck up in the late 1950s proved fruitful; the friend collected money from vending machines in northern California, and in exchange for occasional fishing trips at a cabin in the Sierras, the friend let him search through up to \$2,000 in change every weekend, replacing coins such as Buffalo nickels and Standing Liberty quarters at face value.

As Mr. Clover sailed with the Navy, he collected world coins, focusing on coins of the Philippines while stationed there. Back in San Diego, he became a customer of Harlan White, who had opened up the Old Coin Shop in 1960, and began selling items from his other great collecting passion, seashells. One of his best mail-order customers was Rear Admiral Worthington S. Bitler of "Admiral W.S. Bitler Collection" large cent fame, who gave him his collecting records.

After retiring from the Navy, Mr. Clover upgraded his various sets, later pursuing large cents in earnest after meeting Tom Reynolds and learning about the Early American Coppers club. With the aid of the records from the Admiral W.S. Bitler Collection, he completed a date set and then a full run of 1797 Sheldon varieties before tackling the full set. The Phillip W. Clover Collection of U.S. Large Cents is 99% complete by Sheldon variety, omitting only the S-15, S-37, and S-79.

Mr. Clover continues to travel the world in pursuit of seashell collecting. Closer to home, he still enjoys the Sierras, snowmobiling in the winter and hiking, biking, camping, and fishing for trout in the summer.

The Fred Yee Collection

Fred Yee was an American success story. At age 13, he immigrated to the United States from Canton province, China. After getting married, he moved to Los Angeles from San Francisco and opened a grocery in the South Central neighborhood, which he ran with his family.

Mr. Yee's three sons began collecting coins first, filling coin albums from change that they handled while working at the grocery. Later, he set out to buy coins as birthday presents for his sons to finish out their albums, and he became fascinated by how much "key" coins could be worth. After taking his sons to local coin shows, he began to collect for himself.

Mr. Yee studied coins extensively, and though he was a blue-collar immigrant entrepreneur with a high-school education, he was an avid reader of numismatic literature who could converse fluently with American-born dealers and collectors about coin history and the latest trends. He completed high grade sets of Indian and Lincoln cents, Barber and Mercury dimes, Walking Liberty and commemorative half dollars, and Peace dollars, as well as starting sets of Morgan dollars and gold type. The prides of his collection were his Buffalo nickels and his copper and silver type sets.

After Mr. Yee sold his grocery store and retired, he continued to collect, sometimes selling a finished set to start a new one, though he slowed down to devote time to his grandchildren. He passed away in 2008 at the age of 82. He is survived by his wife of 60 years, Emily, adult sons Jim and Stan, and four grandchildren.

The Dr. Charles Nelson Collection

Dr. Charles Nelson began collecting coins in childhood. Over the past 12 to 15 years, he has taken the hobby more seriously, resulting in this impressive and broad collection that stretches from Massachusetts silver to 20th century Lincoln cent key dates. To a history enthusiast such as Dr. Nelson, every coin provides a tangible link to the time when it was struck. Dr. Nelson's collecting approach of buying the best coin possible for the grade has served him well, especially on coins such as his 1856 Flying Eagle cent, PR64 NGC.

The William R. Green Collection

William R. Green began collecting coins in childhood alongside his father. While he favored silver dollars in his youth, an interest reflected in his proof Seated dollars and other coins of that denomination, his more recent focus (and collection strength) lies with the Southern gold coins produced in Charlotte and Dahlonega. One of the last coins produced in the latter city, an 1861-D half eagle graded XF40 PCGS, is a standout highlight.

The full range of Heritage bidding options is available to you. Before the auction, we can accept your bids through our website, HA.com, as well as by mail, fax, and e-mail. For live bidding wherever you are in the world, you can arrange to bid by telephone or log on to our award-winning proprietary online bidding platform, Heritage LIVE!™ No technology, of course, can replace the time-tested method of bidding and winning right on the auction floor. If you are attending the Long Beach Expo, make sure to stop by our booth on the Bourse and say hello.

Good luck!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

LAST CALL! DALLAS ANA

THE ANA NATIONAL MONEY SHOWSM

Consignment Deadlines:

Coins: September 4, 2012 | Currency: August 28, 2012

Ten Reasons Why You Should Consign to Heritage's Official Auctions of the Fall 2012 ANA National Money ShowSM in DALLAS

1. Higher prices realized are the focus of everything Heritage does. Proven prices realized leadership means more dollars for YOU at settlement.
2. YOU benefit from selling in Dallas, the numismatic capital of America.
3. Unparalleled management continuity is why YOU can completely trust Heritage to deliver.
4. Nothing matters more than our financial stability when YOUR check is due.
5. Heritage's commitment to transparency inspires a worldwide level of trust that benefits YOU.
6. Leading sell-through statistics define bidder success on YOUR lots.
7. More clients and more Internet visitors at HA.com focus more demand on YOUR lots.
8. HERITAGE Live! puts YOUR lots in front of a new generation of collectors.
9. YOU benefit directly from Heritage's highly effective – and global – marketing programs.
10. Heritage has sold more than \$350 million at our 42 record-setting prior Official ANA Auctions – experience YOU will benefit from!

THE PHILLIP CLOVER COLLECTION OF U.S. LARGE CENTS

1793 S-1, B-1 AMERI. Cent, VG10
Early Die State

3001 1793 Chain AMERI. VG10 PCGS. S-1, B-1, R.4. An early die state with the usual bulge over the U in UNITED. Faint clash marks are noted but no die cracks are present. The Chain cents were the first large cents issued for circulation early in 1793, and the AMERI was the first variety of the design. This early state piece was one of the first AMERI cents, therefore, it was one of the first large cents ever minted in Philadelphia.

This lovely specimen has pleasing light olive surfaces with hints of tan. A few old scratches and handling marks are noted on each side, especially at 10 o'clock on the reverse. Our EAC grade VG7. Purchased from Chris Victor-McCawley (2/2001).
From The Phillip Clover Collection of U.S. Large Cents. (#35432)

1793 S-2, B-2 Cent, Fine 15
Chain AMERICA

3002 1793 Chain AMERICA Fine 15 NGC. S-2, B-2, R.4. A bulge is noted through the date of this late die state specimen with prominent obverse clash marks and wavy fields. Aside from the non-collectible NC-1, the S-2 Chain cent is the scarcest of four varieties for the type. This lovely olive and tan representative has a short old scratch in the field near the chin, and a few minor rim bruises on each side. Otherwise, both sides are exceptional with only minimal, scattered handling marks that are expected for the grade. Our EAC grade VG10.

Purchased (10/1986).

From The Phillip Clover Collection of U.S. Large Cents. (#35435)

1793 S-3, B-4 Cent, AG3
The Common Chain AMERICA Variety

3003 1793 Chain AMERICA AG3 NGC. S-3, B-4, R.3. The obverse has a full date and readable LIBERTY with some hair detail visible in the individual strands. The reverse has a complete chain and denomination, with slight peripheral weakness of some letters. However, it is clearly finer than the grade NGC assigned. Intermingled tan and olive surfaces have a few trivial rim bruises, but are otherwise problem-free. Previously certified Good 6 PCGS. Our EAC grade Good 4.

Purchased from Howard Whitaker (2/1999).

From The Phillip Clover Collection of U.S. Large Cents. (#35438)

1793 S-4, B-5 Cent, Good 4
With Periods Obverse

3004 1793 Chain Periods Good 4 NGC. S-4, B-5, R.3. LIBERTY is bold and the date is faint, with extensive wear precluding determination of the die state of this specimen. The reverse has a bold chain and denomination, with the legend indistinct. Intermingled olive and steel surfaces show a few scattered and mostly insignificant marks. Our EAC grade Good 4.

Purchased from Doug Bird (1/1998).

From The Phillip Clover Collection of U.S. Large Cents. (#35444)

1793 S-5, B-6 Wreath Cent, AU Details
Vine and Bars Edge
Large LIBERTY

3005 1793 Wreath Cent, Vine and Bars — Corrosion — NGC Details. AU. S-5, B-6, R.4. There are no visible die defects on this early die state specimen. Both sides have charcoal surfaces with hints of tan. The surfaces are moderately corroded with a few trivial rim bruises. Our EAC grade Fine 15.

Purchased from Jack Beymer (3/1997).

From The Phillip Clover Collection of U.S. Large Cents.

1793 S-6, B-7 Wreath Cent, VG10
Unsprung Die State

3006 1793 Wreath Cent, Vine and Bars VG10 PCGS. S-6, B-7, R.3. The Sprung Die feature is barely visible on this early state cent as the bulge in the left obverse field ends at the hair. Splashes of dark green verdigris appear on the smooth olive and tan surfaces of this cent, with only a few small rim bruises and other minuscule marks. Our EAC grade VG7.

Purchased from Tom Reynolds (9/1995).

From The Phillip Clover Collection of U.S. Large Cents. (#35450)

1793 S-7, B-8 Wreath Cent, Good Details
A Collectible 1793 Rarity

3007 1793 Wreath Cent, Vine and Bars — Environmental Damage — NGC Details. Good. S-7, B-8, R.6. An intermediate die state showing the usual arc-like die failure through the date. The olive and maroon surfaces are lightly and evenly corroded, although few other blemishes are evident on this still attractive cent. Only about two dozen examples of this rare variety are known. Our EAC grade Good 4.

Purchased from Tom Reynolds (7/1997).

From The Phillip Clover Collection of U.S. Large Cents.

1793 S-8, B-13 Cent, Fine Details
Vine and Bars Edge

3008 1793 Wreath Cent, Vine and Bars — Environmental Damage — NGC Details. Fine. S-8, B-13, R.3. A faint diagonal bulge is evident at the central reverse of this early die state specimen. Both sides show light and even corrosion with light vertical scratches at the center of the obverse. Minor scrapes are noted at the upper reverse border. Our EAC grade VG10.

Purchased from Doug Bird (9/1996).

From The Phillip Clover Collection of U.S. Large Cents.

**1793 S-9, B-12 Wreath Cent, VF Details
Vine and Bars Edge
Early Die State**

- 3009 1793 Wreath Cent, Vine and Bars — Obverse Scratched — NGC Details. VF. S-9, B-12, R.2.** A light reverse die crack through CA to the stem is noted on this early die state example. The obverse has a few old scratches that are mostly blended with the surrounding dark olive patina. Minor porosity on each side is only evident with a glass. Our EAC grade Fine 12.
Purchased from Tom Reynolds (12/1995).
From The Phillip Clover Collection of U.S. Large Cents.

- 3010 1793 Wreath Cent, Vine and Bars — Damaged, Corrosion — NGC Details. Fine. S-10, B-10, R.4.** Both sides of this dark olive cent have moderate to heavy corrosion, with a few small reverse surface scrapes, at the T of UNITED, the C of CENT, and over the N of ONE. Those marks must have occurred decades ago, as the dark patina is undisturbed. Our EAC grade Good 6.
Purchased from Howard Whitaker (2/1999).
From The Phillip Clover Collection of U.S. Large Cents.

- 3011 1793 Wreath Cent, Vine and Bars — Obverse Repaired — NGC Details. Fine. S-11a, B-16a, R.4.** The combination of deep steel and reddish-brown clearly indicates a coin that has been cleaned and recolored, and the surfaces, especially on the obverse, show evidence of burnishing. Both sides also show minor rim bruises. Our EAC grade Good 5.
Ex: Joe Flynn, Sr., Rare Coins (4/1973); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5011.
From The Phillip Clover Collection of U.S. Large Cents.

- 3012 1793 Wreath Cent, Lettered Edge — Environmental Damage — PCGS Genuine. AG Details. S-11b, B-16b, R.4.** The head and LIBERTY are sharp and the date is faint on this two-tone piece with tan devices and steel fields. The reverse is mostly indistinct, showing a large area of steel patina over its lighter tan color. Our EAC grade AG3.
Purchased from Doug Bird (1/1998).
From The Phillip Clover Collection of U.S. Large Cents.

- 3013 1793 Wreath Cent, Lettered Edge — Environmental Damage — PCGS Genuine. Fine Details. S-11c, B-16c, Low R.3.** Old corrosion on each side blurs the design definition on this cent. However, it is still a pleasing example with tan devices and steel fields, exhibiting the coveted two-tone appearance that so many collectors appreciate. Our EAC grade Good 5.
Purchased from Doug Bird (9/1996).
From The Phillip Clover Collection of U.S. Large Cents.

- 3014 1793 Liberty Cap — Environmental Damage — PCGS Genuine. AG Details. S-12, B-21, R.6.** The usual bulged reverse is evident on this heavily porous example. The sharpness is that of a full Good. However, the date and LIBERTY are both reengraved. Perhaps two dozen examples of S-12 survive, and most are finer than this piece. Our EAC grade Fair 2.
Purchased from Doug Bird (7/2001).
From The Phillip Clover Collection of U.S. Large Cents.

1793 S-13, B-20 Liberty Cap Cent, VF Details

- 3015 1793 Liberty Cap — Plugged, Face Repaired — NGC Details. VF. S-13, B-20, R.3.** While the bad news is that this piece has been plugged, visible at the 79 in the date and between the S and O on the reverse, and the face has been smoothed to eliminate other detracting marks, the good news is that the existing details are considerable, and the fields are otherwise smooth and medium brown. For many collectors, this piece offers an opportunity to acquire a nicely detailed 1793 Liberty Cap cent. Our EAC grade Good 5.
Purchased from Sheridan Downey (1/1987).
From The Phillip Clover Collection of U.S. Large Cents.

**1793 S-14, B-17 Liberty Cap Cent, Fine Details
Bisecting Crack Obverse**

- 3016 1793 Liberty Cap — Environmental Damage — NGC Details. Fine. S-14, B-17, R.5.** The bisecting vertical die crack, present on all known examples of S-14, is immediately recognizable and provides instant attribution. The deep olive surfaces of this nicely detailed cent show minor porosity in places, with insignificant handling marks. Our EAC grade Good 5.
Purchased from Steven K. Ellsworth (8/1995). Ex: Chapman Brothers (7/1901), lot 3.
From The Phillip Clover Collection of U.S. Large Cents.

**1793 S-16, B-19 Liberty Cap Cent, Good Details
Repaired Beyond Detection**

- 3017 1793 Liberty Cap — Environmental Damage — NGC Details. Good. S-16, B-19, R.6.** The 1997 Superior catalog offering this piece provides information about the coin: “two small holes in the central area of the coin have been plugged with such consummate skill that the repair is almost undetectable.” In fact, the workmanship was done so well that even NGC failed to detect the repair. This piece combines ebony fields with tan devices. Our EAC grade AG3.
Ex: Michael Matthews; James E. Long, Jr., who had Larry Hartley plug the holes; Larry Briggs Rare Coins; James E. Long, Jr.; Early Copper Auction #9 (7/1993), lot 533; Chris Victor-McCawley (10/1993); Dr. Willard J. Carmel, Jr. (Superior, 9/1997), lot 154.
From The Phillip Clover Collection of U.S. Large Cents.

- 3018 1794 Head of 1793 Good 4 NGC. S-17a, B-1a, R.5.** Joseph Wright's Liberty Cap design, introduced in 1793, carried over for the first few varieties of 1794. This pleasing two-tone piece has the sharpness of a VG cent with minor surface roughness and a small pit mark at the upper right branch of the wreath. However, none of those defects discouraged NGC from grading this specimen. Tan highlights appear on the devices with dark olive fields. Our EAC grade Good 6.
Ex: Charles M. Williams (Numismatic Gallery, 11/1950), lot 16; Dr. Charles L. Ruby (Superior, 2/1974), lot 340; Dr. Donald B. Moore; Pine Tree Auctions (3/1976), lot 2348; Hiram T. Ward (8/1978); G. Lee Kuntz (Superior, 10/1991), lot 21; Tom Reynolds (2/1994).
From The Phillip Clover Collection of U.S. Large Cents. (#35504)

- 3019 1794 Head of 1793 — Environmental Damage — PCGS Genuine. AG Details. S-18a, B-2a, R.6.** Both sides have intermingled tan and dark brown toning with minor surface marks and apparent lamination on the obverse. The reverse has myriad dark green and deep red pit marks. Our EAC grade Fair 2.
Purchased from Dan Trollan (11/2000).
From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-18b, B-2b Cent, Fine 12
Head of 1793**

- 3020 1794 Head of 1793 Fine 12 NGC. S-18b, B-2b, R.4.** Intermingled tan, olive, and charcoal surfaces host slight roughness with a single pit mark on the leaf below the E in UNITED, and with minuscule rim nicks on each side. Minor handling marks on each side are consistent with the grade. A pleasing example of the most plentiful Head of 1793 variety. Our EAC grade VG10.
Purchased from Tom Reynolds (7/1991).
From The Phillip Clover Collection of U.S. Large Cents. (#35513)
- 3021 1794 Head of 1793 — Corrosion — NGC Details. Fine. S-19a, B-3a, R.5.** The surface quality precludes a specific die state determination. This dark steel specimen has considerable sharpness, with moderate porosity on both sides. A reverse rim bruise is evident from 8 to 9 o'clock, apparently occurring when this piece was a relatively young cent. Our EAC grade Good 4.
Purchased from Denis W. Loring (4/1997). Ex: EAC Sale (4/1997), lot 95.
From The Phillip Clover Collection of U.S. Large Cents.
- 3022 1794 Head of 1793 — Environmental Damage — NGC Details. Fine. S-19b, B-3b, R.4.** A nicely detailed charcoal-brown specimen with old green and maroon corrosion that appears inactive. A few singular pits are evident on each side. The dark appearance is typical of this variety that is almost always found with rough surfaces. Our EAC grade VG8.
Purchased from Doug Bird (1/1991).
From The Phillip Clover Collection of U.S. Large Cents.

1794 S-20b, B-4b Cent, Fine Details
Head of 1793
Edge of 1794

- 3023 1794 Head of 1793 — Corroded — NGC Details. Fine. S-20b, B-4b, R.4.** Rather sharply detailed with chestnut and dark brown surfaces that host scattered pit marks on each side. The reverse patina is slightly darker than that of the obverse. This piece was assigned a VF20 sharpness grade, net VG10, in the 2002 EAC catalog. Our EAC grade VG8.
Ex: Col. Steven Ellsworth; EAC Sale (4/2002), lot 112.
From The Phillip Clover Collection of U.S. Large Cents.

- 3024 1794 Head of 1794 VF25 NGC. S-21, B-5, R.3.** An early die state showing a delicate crack through the B in LIBERTY to the cap. Called the Flat Pole variety with the end of the pole wide and merged into the surrounding field. While a patch of reddish corrosion is evident along the right obverse border, the surfaces of this chestnut and dark brown cent are smooth, showing only a few scattered marks on each side. Our EAC grade Fine 15.
Purchased from Doug Bird (5/1998).
From The Phillip Clover Collection of U.S. Large Cents. (#35528)

- 3025 1794 Head of 1794 — Smoothed — PCGS Genuine. XF Details. S-22, B-6, R.1.** A prominent raised die bulge at the upper right branch of the wreath is the inspiration for the Mounds Reverse nomenclature given this variety. Both sides are sharply detailed with excellent eye appeal. The surfaces exhibit intermingled steel, chestnut, and reddish-brown, with minor corrosion on each side. The obverse is glossy, resulting from delicate burnishing. Our EAC grade VF20.
Purchased from Doug Bird (8/1988).
From The Phillip Clover Collection of U.S. Large Cents.

1794 S-23, B-7 Cent, XF Details
Tied for 10th Finest in Bland Census

- 3026 1794 Head of 1794 — Environmental Damage — NGC Details. XF. S-23, B-7, R.4.** A late die state showing all of the obverse die cracks, but no evidence of the reverse bulge at NT. The right obverse field is slightly raised due to the cracks joining the throat and nose. An additional raised area near the right obverse border appears to be a post-striking imperfection. Sharply detailed with finely granular dark brown surfaces; cleaned and recolored. Graded VF20 and tied for 10th finest in the Bland census. Our EAC grade Fine 15.
Ex: Thomas J. Wass, III (2/1972); Dr. Dane B. Nielsen; Tom Morley; Libertas Americana Galleries; George E. Ewing, Jr.; Del Bland; Jack H. Robinson (7/1983); G. Lee Kuntz (Superior, 10/1991), lot 30; Tom Reynolds (12/1995).
From The Phillip Clover Collection of U.S. Large Cents.

- 3027 1794 Head of 1794 VF30 NGC. S-24, B-8, R.1.** The fully rounded cheek is diagnostic of the variety, and this specimen is a later die state with both obverse cracks and a bulge obliterating ENT on the reverse. Pleasing golden-tan, chestnut, and dark brown surfaces show only minimal handling marks on each side. Minor verdigris and faint roughness is inconsequential. Our EAC grade Fine 15.
Ex: Stack's (10/1991), lot 510.
From The Phillip Clover Collection of U.S. Large Cents. (#35537)

- 3028 1794 Head of 1794 VF25 NGC. S-25, B-15, R.3.** Both sides show clash marks, but no evidence of the reverse die crack. This pleasing specimen has scattered marks and a few trivial dents, but overall is attractive with light chocolate surfaces and faint blue overtones. Our EAC grade Fine 15.
Ex: Henry J. Berube (New England Coin Co., 11/1965); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5029; Early Copper Auction (1/1991), lot 35.
From The Phillip Clover Collection of U.S. Large Cents. (#35540)

- 3029 1794 Head of 1794 — Cleaning — PCGS Genuine. XF Details. S-26, B-16, R.2.** The reverse is cracked through the first S and the E in STATES, the first of those cracks extending through the wreath, ending in die failure at the C in CENT. Faint corrosion and maroon patina appears in the left obverse field, while considerable greenish patina is noted on the reverse. Our EAC grade Fine 15.
Ex: Stack's (10/1991), lot 510.
From The Phillip Clover Collection of U.S. Large Cents.

- 3030 1794 Head of 1794 Fine 12 PCGS. S-27, B-9, R.5.** An early die state, showing only faint traces of the buckled obverse die. This pleasing two-tone cent combines dark steel fields with lighter brown devices. The sharpness is slightly finer than the net grade, with slight surface roughness and a faint scratch from the ribbon bow to the right branch of the wreath. Our EAC grade VG8.
Ex: Tom Reynolds (6/3/1990); Robinson S. Brown, Jr. (Superior, 1/1996), lot 40.
From The Phillip Clover Collection of U.S. Large Cents. (#35546)

- 3031 1794 Head of 1794 VF25 NGC. S-28, B-10, R.2.** The surfaces of this early die state specimen are lightly stippled from old corrosion. Both sides are pleasing light olive with a linear splash of darker brown across the reverse. Faint porosity is noted behind the cap. Our EAC grade Fine 15.
Purchased (1/1989).
From The Phillip Clover Collection of U.S. Large Cents. (#35549)

- 3032 1794 Head of 1794 — Altered Surface — PCGS Genuine. AU Details. S-29, B-11, R.2.** This late die state specimen has cracks through the 4 and the R in AMERICA, along with other obverse cracks that appeared in its earlier use with S-28. The obverse alternated between two different reverse dies to form remarriages of S-28 and S-29. Faint bulges appear at the upper reverse. Strong details remain although the glossy steel surfaces show slight roughness with hidden reverse scratches. Our EAC grade VF20.
Ex: Phil Ralls; Del Bland (2/1985).
From The Phillip Clover Collection of U.S. Large Cents.

1794 S-30, B-12 Cent, XF40
Chipped Obverse Die

- 3033 1794 Head of 1794 XF40 NGC. S-30, B-12, R.1.** This intermediate state has the usual crack through R of AMERICA and prominent clash marks. A single prominent die chip and faint secondary chip are evident in the left obverse field. A smooth dark brown cent, this piece has lovely surfaces with hints of tan. Our EAC grade VF20.
Purchased from Tom Reynolds (1/1990).
From The Phillip Clover Collection of U.S. Large Cents. (#35555)

1794 S-31, B-13 Cent, AU50
Chipped Obverse Die

- 3034** 1794 Head of 1794 AU50 NGC. S-31, B-13, R.1. Prominent die chips in the left obverse field immediately identify the obverse die that was used with six different reverse dies. Only S-30 and S-31 are common, while the other four are rarities among 1794 cents. This lovely specimen has excellent details with hints of cartwheel on its intermingled tan and steel-blue surfaces. Faint obverse scratches and trivial pitting is only visible with a glass. Our EAC grade VF30. Purchased from Tom Reynolds (5/1989).
From The Phillip Clover Collection of U.S. Large Cents. (#35558)

1794 S-32, B-18 Cent, AU Details
Intermediate Die State

- 3035** 1794 Head of 1794 — Reverse Corrosion — NGC Details. AU. S-32, B-18, R.3. This intermediate die state specimen has a rim break over the LI of LIBERTY, with a radial die crack through the first S in STATES. The reverse is rotated a quarter turn counterclockwise. Sharp details with dark olive surfaces and traces of cartwheel. The reverse has insignificant dark green and red corrosion. Our EAC grade VF30. Purchased from Jack Beymer (3/2000).
From The Phillip Clover Collection of U.S. Large Cents.

1794 S-33, B-19 Cent, Fine Details
Famous Wheelspoke Reverse
The Twice Robinson Brown Specimen

- 3036** 1794 Head of 1794 — Corrosion — NGC Details. Fine. S-33, B-19, R.6. This famous variety has several radial die cracks inward from the border, resembling spokes of a wheel. The central reverse die bulge, obliterating the denomination, is usual for this variety. In the order they first appeared, the following die cracks are evident on the reverse, each extending in from the border: 1. At I of UNITED; 2. to the first A of AMERICA; 3. to the right ribbon end; 4. below the U in UNITED; and 5. from the rim between the A and T of STATES.

Both sides of this ebony toned specimen have light roughness spread evenly across the surfaces. A few old reverse scratches are blended with the surrounding surface. Only about two dozen examples are known, and various die states ensure a high level of demand. Our EAC grade Good 5.

Ex: James F. Ruddy; Del Bland (1967); Robinson S. Brown, Jr. (Superior, 1/1986), lot 44; Robinson S. Brown, Jr. (Superior, 1/1996), lot 48; Dan Trollan (10/2001).

From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-34, B-20 Cent, VF Details
Terminal Die State**

- 3037 1794 Head of 1794 — Corrosion — NGC Details. VF. S-34, B-20, R.5.** The prominent obverse die crack has now broken away, forming the terminal die state of the variety with a full rim break covering the top of the cap, with a secondary rim break over the neighboring L. Extremely rare in this die state with only about 10 known. Lightly corroded olive and steel surfaces show slightly lighter tan on the obverse design motifs. The right obverse border is indistinct, although all other peripheral details are complete. Our EAC grade VG8.
Ex: Norman Stack Collection; Herman Halpern (Stack's, 3/1988), lot 47; J.R. Frankenfield (Superior, 2/2001), lot 229.
From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-35, B-21 Cent, VF Details
Intermediate Die State**

- 3038 1794 Head of 1794 — Corrosion, Scratched — NGC Details. VF. S-35, B-21, R.5.** The obverse die is cracked at the 4, and from the head to the right side of the E in LIBERTY, although the crack is indistinct in places due to the light corrosion on this dark olive cent. Both sides have myriad scratches, many that are nearly invisible without a glass. Our EAC grade VG10.
Purchased from Tom Reynolds (7/1997). Ex: C. Douglas Smith.
From The Phillip Clover Collection of U.S. Large Cents.
- 3039 1794 Head of 1794 — Obverse Repaired — NGC Details. Fine. S-36, B-23, R.5.** The reddish-brown obverse and steel-blue reverse suggest that this piece has been cleaned and recolored. Smoothing of the upper right obverse is also evident as NGC indicates. A rim bruise is noted below the 9. Minor porosity is also evident on this rare variety. Our EAC grade Good 4.
Purchased from Dan Trollan (4/2000).
From The Phillip Clover Collection of U.S. Large Cents.
- 3040 1794 Head of 1794 — Environmental Damage — NGC Details. VF. S-38, B-25, R.5.** Both obverse field chips are plainly visible on this sharply detailed specimen. The surfaces show a few scattered pit marks, mostly on the obverse. Otherwise smooth surfaces exhibit intermingled olive and maroon patina, with an old scratch on Liberty's neck. Our EAC grade VG8.
Purchased from Tom Reynolds (12/1991).
From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-39, B-27 Cent, VF Details
The Reiver Specimen**

- 3041 1794 Head of 1794 — Corrosion — NGC Details. VF. S-39, B-27, R.6.** Both sides of this example have noticeable corrosion on medium brown surfaces with lighter tan high points and rims. Hints of maroon are present in the fields. A pleasing example despite its shortcomings. Del Bland assigns a sharpness grade of VF25 and a net grade of VG7, tied for 11th finest in his census. Our EAC grade VG7.
Ex: George Ramont (4/13/1971); Jules Reiver (Heritage, 1/2006), lot 19200; Chris Victor-McCawley (7/2008).
From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-40, B-28 Cent, VG10
Late Die State**

- 3042 1794 Head of 1794 VG10 NGC. S-40, B-28, R.6.** All of the cracks described by Breen are present on this late state specimen, although the obverse crack through the cap is indistinct. This pleasing olive specimen is unevenly struck with weak borders at the lower right obverse and upper right reverse. The denomination is also weak due to die buckling. Our EAC grade Good 6.
Ex: Darwin Palmer; Dan Trollan (4/2000).
From The Phillip Clover Collection of U.S. Large Cents. (#35585)
- 3043 1794 Head of 1794 VF25 NGC. S-41, B-30, R.3.** An intermediate die state showing both reverse die cracks and central bulging, but offering no evidence of the late state obverse crack. Golden-tan surfaces host microscopic roughness near the borders, with myriad handling marks consistent with the grade. Our EAC grade VG10.
Purchased from Henry Hettger (1/1991).
From The Phillip Clover Collection of U.S. Large Cents. (#35588)
- 3044 1794 Head of 1794 VF25 NGC. S-42, B-29, R.4.** Faint obverse clash marks are noted. A smooth light brown specimen with border weakness at the upper left reverse. This piece exhibits a few small marks on the neck, with other minuscule handling marks. Our EAC grade Fine 12.
Ex: Superior (1/1993), lot 42.
From The Phillip Clover Collection of U.S. Large Cents. (#35591)

3045 1794 Head of 1794 — Smoothed — PCGS Genuine. VF Details. S-43, B-32, R.2. The reverse is cracked through the U, up to the wreath, reaching the leaf left of ONE. This dark steel specimen shows minor surface roughness that has been diminished through light burnishing. The reverse die appears to be on two different planes on either side of the crack at the U, with that letter distorted. Our EAC grade Fine 12.

Ex: *Superior (5/1989)*, lot 174; not part of the Robert Matthews Collection.

From *The Phillip Clover Collection of U.S. Large Cents.*

3046 1794 Head of 1794 — Environmental Damage — NGC Details. XF S-44, B-33, R.1. A late die state showing all obverse and reverse die cracks, two branches of the reverse crack extended through the E in CENT, and to the right ribbon bow. Only little evident corrosion appears on each side. However, this piece was likely buried and now has subdued design features that lack their original crisp appearance. It retains considerable eye appeal with deep steel surfaces and faint greenish overtones. Our EAC grade Fine 15.

Purchased from *Tom Reynolds (2/1994)*.

From *The Phillip Clover Collection of U.S. Large Cents.*

3047 1794 Head of 1794 VG10 PCGS. S-45, B-35, High R.5. A die chip inside the left ribbon bow identifies the reverse die that appears on S-45 and NC-5. The obverse shows the separated locks of S-45. This piece shows the late state reverse die crack through IC of AMERICA. The dark chocolate surfaces show minor scratches, pits, and handling marks expected for the grade. Our EAC grade Good 6.

Purchased from *Tom Reynolds (10/1992)*.

From *The Phillip Clover Collection of U.S. Large Cents. (#35601)*

3048 1794 Head of 1794 Fine 15 NGC. S-46, B-36, R.3. A heavy diagonal die chip on the reverse extends from the right base of the N in ONE, through the E in CENT, and nearly reaches the C. That feature is diagnostic. Always with a die crack at the lower right obverse, but this early state specimen shows no evidence of other die cracks. Reddish-brown patina hosts darker steel-brown toning on each side of this smooth cent that shows only trivial surface marks. Our EAC grade VG10.

Purchased (10/1995).

From *The Phillip Clover Collection of U.S. Large Cents. (#35603)*

3049 1794 Head of 1794 — Environmental Damage — NGC Details. VF S-47, B-39, R.4. Probably an intermediate die state, although the dark brown surfaces and even roughness on both sides precludes an exact determination. Despite the surface quality, this is an attractive cent with no other obvious imperfections. Our EAC grade VG8.

Ex: *EAC Sale (5/1995)*, lot 163.

From *The Phillip Clover Collection of U.S. Large Cents.*

1794 S-48, B-38 Cent, Fine Details The Famous Starred Reverse

3050 1794 Starred Reverse — Environmental Damage — NGC Details. Fine. S-48, B-38, R.5. Enough specimens have been discovered in recent years that the Starred Reverse is about to fall to R.4. However, it remains arguably the most famous variety among all early cents. Sheldon noted that collectors speak of the Starred Reverse with “religious awe.” The variety was discovered 135 years ago, and about two years pass between each new example.

This example, like all Starred Reverse cents, has strong obverse details and weak reverse details, although at least two thirds of the stars are visible. The reverse border is especially strong below, and to the left, like most known specimens. Cleaned and recolored, the obverse is dark brown with old verdigris, and the slightly porous reverse is a trifle lighter brown. Our EAC grade VG7.

Ex: *Gordon J. Wrubel; Bowers and Ruddy (11/1977)*, lot 2076; *Kenneth Goldman and Denis W. Loring (5/1978)*; *Dr. Thomas S. Chalkley (Superior, 1/1990)*, lot 208; *Tom Reynolds (12/1990)*.

From *The Phillip Clover Collection of U.S. Large Cents.*

- 3051 1794 Head of 1794 — Environmental Damage — NGC Details.** VF. S-49, B-41, R.2. This late die state specimen shows the prominent crack through the upright of the E in LIBERTY and a faint bulge in the right obverse field. Steel-brown surfaces show lighter tan corrosion near the borders, but the remainder is attractive with few blemishes, including a minor old scratch in the lower right obverse field. Our EAC grade Fine 12. Purchased (5/1987).
From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-50, B-43 Cent, XF Details
Broken Lowest Lock**

- 3052 1794 Head of 1794 — Environmental Damage — PCGS Genuine.** XF Details. S-50, B-43, R.5. The lowest lock is broken on this rare Closed Wreath cent variety. There is no evidence of the late state obverse die crack. Both sides have attractive medium olive patina with a few splashes of darker toning. The surfaces are slightly rough, although no other imperfections appear on either side. Bill Noyes grades this piece VF20 sharpness, net VG8, with average minus surfaces, and ranks it 13th (tied) in his census. Our EAC grade VG10.
Ex: EAC Sale (4/2002), lot 151.
From The Phillip Clover Collection of U.S. Large Cents.

**1794 S-51, B-42 Cent, VF25
Just Outside the Condition Census**

- 3053 1794 Head of 1794 VF25 NGC.** S-51, B-42, R.5. This early die state specimen shows perfect dies. Both sides are smooth and attractive dark chocolate with trivial marks consistent with the grade. The reverse shows slight peripheral weakness. This piece just misses the condition census, but will make a nice addition to any specialized cabinet. Our EAC grade Fine 12. Purchased from Walter Husak (2/1996). Ex: Superior (1/1993), lot 46.
From The Phillip Clover Collection of U.S. Large Cents. (#35615)

**1794 S-52, B-44 Cent, VF Details
Ex: Newcomb Collection**

- 3054 1794 Head of 1794 — Burnished — NGC Details.** VF. S-52, B-44, R.6. The later die state with an obverse crack from the rim to upper part of the cap. The S-52 is one of the important rarities in the 1794 series, and this piece would be in the condition census had it not been burnished. The sharpness is at least Fine 12, or perhaps finer. The tell-tale glossy surfaces and slightly indistinct detail that result from the burnishing process are clearly evident on this dark brown specimen. Both sides still show remnants of the old corrosion that was present before burnishing. However, the overall appearance is by no means objectionable. Our EAC grade Good 6. Purchased from Tom Morley (7/2008). Ex: Howard R. Newcomb.
From The Phillip Clover Collection of U.S. Large Cents.
- 3055 1794 Head of 1794 Good 6 NGC.** S-53, B-45, R.6. The usual die state, with the right and top reverse border weakly defined. This pleasing piece has medium to dark brown surfaces with faint roughness and a few scattered marks, including an obverse rim scrape at 1 o'clock and a reverse rim bruise near 4 o'clock. An important opportunity to acquire this rare variety. Our EAC grade Good 4. Ex: Chris Victor-McCawley (2/1993); Dr. Willard Carmel (Superior, 9/1997), lot 169.
From The Phillip Clover Collection of U.S. Large Cents. (#35621)
- 3056 1794 Head of 1794 — Environmental Damage — NGC Details.** XF. S-54, B-46, R.3. Faint clash marks are mostly visible on the reverse of this early die state cent. Both sides have excellent details with minor roughness and scattered handling marks on steel-brown surfaces with greenish overtones. The S-54 is the final appearance of the Closed Wreath reverse die, and is the second commonest variety from that workhorse reverse behind S-49. Our EAC grade VF20. Purchased from Tom Reynolds (8/1991).
From The Phillip Clover Collection of U.S. Large Cents.
- 3057 1794 Head of 1794 VF30 PCGS.** S-55, B-47, R.2. A die crack in the left obverse field, known on all examples of S-55, is nearly invisible due to wear on this early state example. This pleasing olive-brown specimen has splashes of deep maroon patina, with the slightly rough surfaces that are typical of the grade. Our EAC grade Fine 12.
Ex: Paul Sutton (Stack's, 5/1973), lot 4; later, Stack's (4/1983), lot 1033; Jack H. Robinson (Superior, 1/1989), lot 96.
From The Phillip Clover Collection of U.S. Large Cents. (#35627)
- 3058 1794 Head of 1794 — Environmental Damage — NGC Details.** AU. S-56, B-48, R.2. The die crack in the left obverse field is always present on this variety. Both sides lack clash marks, while indistinct reverse details suggest a late die state. Dark chocolate-brown surfaces show minor roughness over most of the obverse and reverse of this sharply detailed specimen. With perfect surfaces this piece would easily qualify for the condition census. Our EAC grade VF25. Henry A. Sternberg (M.H. Bolender, 3/1956), lot 1553; Robert J. Kissner (Stack's, 6/1975), lot 254; Kenneth D. Pines; Dr. C.R. Chambers (2/10/1983); Jack H. Robinson (Superior, 1/1989), lot 98; Robinson S. Brown, Jr. (Superior, 1/1996), lot 79.
From The Phillip Clover Collection of U.S. Large Cents.

- 3059 1794 Head of 1794 XF45 NGC. S-57, B-55, R.1.** Light clash marks are mostly visible on the reverse of this cent. The details are sharp with trivial surface marks on each side of this dark brown cent. A small die dot on the lower corner of the cap resembles a button, giving this variety its Button Cap nomenclature. Our EAC grade VF25.

Purchased from Tom Reynolds (7/1992).

From The Phillip Clover Collection of U.S. Large Cents. (#35634)

- 3060 1794 Head of 1794 VF25 NGC. S-58, B-56, R.3.** A late die state with a retained cud over NIT, before the full rim break of the latest state developed. Although faint roughness is evident on each side, this is an attractive two-tone cent of the kind the late Tom Morley would have appreciated. The fields and shallow parts of the devices are deep steel-gray, with the rims and high points light tan. A tiny reverse rim bruise is evident at 12 o'clock. Our EAC grade Fine 12.

Purchased from Doug Bird (9/1998).

From The Phillip Clover Collection of U.S. Large Cents. (#35636)

1794 S-59, B-57 Cent, VF35

Early Die State

- 3061 1794 Head of 1794 VF35 NGC. S-59, B-57, R.3.** This early die state piece has faint clash marks, but no evidence of die cracks appearing in later states. A pleasing specimen, this cent has golden-brown surfaces with splashes of steel blue on the obverse. Both sides have moderate handling marks consistent with the grade. Our EAC grade Fine 12.

Purchased from Doug Bird (1/1996).

From The Phillip Clover Collection of U.S. Large Cents. (#35642)

1794 S-60, B-52 Cent, VF30

Early Die State

Strong Clash Marks

- 3062 1794 Head of 1794 VF30 NGC. S-60, B-52, R.3.** Heavy clash marks are visible above the back of the head as usual, with additional heavy clash marks in the upper part of the wreath. Despite those clash marks, this piece represents an early die state of S-60. Both sides of this attractive chestnut and dark brown example have scattered handling marks. Our EAC grade Fine 15.

Purchased from Tom Reynolds (1/1990).

From The Phillip Clover Collection of U.S. Large Cents. (#35645)

1794 S-61, B-53 Cent, AU Details

A Coin of Paradoxes

Long Provenance

- 3063 1794 Head of 1794 — Environmental Damage — NGC Details. AU. S-61, B-53, R.4.** An early die state, this piece retains exceptional design definition with slight surface roughness, combining medium olive and dark steel patina. John W. Adams calls this piece "A coin of paradoxes" on his envelope, writing: "not worn but not sharp; porous but rich in color. From such is woven the fabric of our mania." In response, Denis Loring wrote on his envelope: "Heavy, Man, Heavy." Our EAC grade VF30.

Ex: Ed Frossard; Garrett Collection; Johns Hopkins University (Stack's, 3/1976), lot 25; John Adams; Denis Loring; Jack Robinson (8/23/1984); later, EAC Sale (4/2002), lot 162.

From The Phillip Clover Collection of U.S. Large Cents.

1794 S-62, B-54 Cent, XF Details

Important Early Die State

- 3064 1794 Head of 1794 — Environmental Damage — NGC Details. XF. S-62, B-54, R.4.** An early die state without the obverse rim break, and elusive with the perfect obverse. The variety is rated High R.4, meaning about 100 survivors, and Breen wrote that about 80% were the later die state, implying that only about 20 examples are known from the perfect obverse. This two-tone piece has light tan devices with charcoal fields. Minor verdigris on the reverse is probably removable, and a small reverse rim scrape appears at 4 o'clock. Our EAC grade VF20.

Ex: Stack's (1/1993), lot 1094.

From The Phillip Clover Collection of U.S. Large Cents.

- 3065 1794 Head of 1794 VF20 NGC. S-62, B-54, R.4.** The usual late die state, this piece has a prominent rim break at the left obverse. Both sides have light brown devices with deep steel-brown fields. Myriad handling marks limit the grade. Our EAC grade VG8.

Ex: Henry C. Colvin (French's, 10/1962), lot 55; Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior, 5/1989), lot 195.

From The Phillip Clover Collection of U.S. Large Cents. (#35648)

**1794 S-63, B-37 Cent, XF40
Distinctive 'Fallen 4' Variety**

- 3066 1794 Head of 1794 XF40 NGC. S-63, B-37, R.3.** The Fallen 4 variety, and an early die state example with a bold shoulder loop and no evidence of clash marks that appear in later states. Pleasing medium olive surfaces exhibit the usual quota of minor surface marks consistent with the grade. A few insignificant rim bruises are evident. Our EAC grade VF20.
Purchased from Tom Reynolds (7/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#35651)

**1794 S-64, B-50 Cent, XF45
No Fraction Bar**

- 3067 1794 No Fraction Bar XF45 NGC. S-64, B-50, R.5.** An early die state with a die crack through the D in UNITED to the wreath, but with no evidence of the central reverse buckling seen in later states. Traces of verdigris remain on the smooth surfaces of this splendid specimen. Both sides have deep brown toning intermingled with chestnut and mahogany. A lovely example of an elusive variety, just missing the condition census. Our EAC grade VF25.
Purchased from Doug Bird (9/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#35708)

**1794 S-65, B-51 Cent, XF40
Popular Shield Hair Obverse**

- 3068 1794 Head of 1794 XF40 NGC. S-65, B-51, R.1.** This late die state has all the cracks mentioned in Breen's *Encyclopedia of United States Large Cents*. The vertical reverse crack between ES is heavy, and the final S is weak as the die surface was on two different planes left and right of that crack. Attractive tan surfaces show moderate marks, with some original planchet roughness remaining in the left obverse field. A few small ebony corrosion spots on the reverse are inactive and unlikely to advance. Our EAC grade VF20.
Ex: EAC Sale (4/1989), lot 44.
From The Phillip Clover Collection of U.S. Large Cents. (#35654)

- 3069 1794 Head of 1794 — Burnished — NGC Details. VG. S-66, B-58, R.5.** The distinctive "Split Pole" feature, where a die crack connects the lower edge of the pole to the rim, is clearly visible. However, other die state features are indistinct on this dark steel-brown example. Both sides are burnished to diminish old corrosion with a vertical scratch at the upper left obverse. Our EAC grade VF20.
Purchased from Dan Trollan (3/1997).
From The Phillip Clover Collection of U.S. Large Cents.

- 3070 1794 Head of 1795 VF35 NGC. S-67, B-59, R.3.** The usual small triangular clash mark at the forehead is visible along with minor cracks on this intermediate die state specimen. Both sides have strong details with a few scattered marks of note. The strike is nicely centered with full borders. Our EAC grade VG10.
Ex: Stuart "Mac" MacDonald (Heritage, 9/1997), lot 5079.
From The Phillip Clover Collection of U.S. Large Cents. (#35685)

- 3071 1794 Head of 1795 — Damaged — NGC Details. Fine. S-68, B-60, R.5.** This late die state specimen has the bisecting obverse crack visible in the lower left and upper right fields. Both sides of this light tan example show noticeable roughness, with curved scratches on Liberty that are blended with the surrounding surface and only apparent with a glass. Our EAC grade Good 6.
Purchased from Darwin Palmer (4/1997).
From The Phillip Clover Collection of U.S. Large Cents.

- 3072 1794 Head of 1795 VF25 NGC. S-69, B-61, R.3.** An early die state showing only faint clash marks on each side. This attractive cent has smooth dark brown surfaces with scattered marks including one over Liberty's head and a faint scratch in the right obverse field. Our EAC grade Fine 12.
Purchased from Tom Reynolds (4/1997).
From The Phillip Clover Collection of U.S. Large Cents. (#35690)

- 3073 1794 Head of 1795 VF30 NGC. S-70, B-62, R.2.** The usual die crack between TY is nearly invisible on this early die state cent. Both sides show minor blemishes in the mahogany and dark olive surfaces, including faint scratches below the E in LIBERTY and near the right ribbon end. Our EAC grade Fine 12.
Purchased (10/1990).
From The Phillip Clover Collection of U.S. Large Cents. (#35693)

- 3074 1794 Head of 1795 — Burnished — NGC Details. XF. S-71, B-63, R.2.** This intermediate die state piece was struck before the obverse crack formed between RT. The surfaces are unevenly burnished with some corrosion and verdigris remaining on the reverse. The surfaces are medium tan with faint maroon overtones. Our EAC grade VF25.
Ex: Lucius S. Ruder (Stack's, 9/1987), lot 346; Robinson, Victor-McCawley (11/4/1987); Robinson S. Brown, Jr. (Superior, 1/1996), lot 101.
From The Phillip Clover Collection of U.S. Large Cents.

- 3075 1794 Head of 1795 VF30 NGC. S-72, B-65, R.2.** This late die state specimen has heavy die cracks and clash marks both sides. The crack through the forelock has a bold oval die chip, while the reverse has a slightly raised area beneath the D in UNITED. The S-72 die marriage is the only true Head of '95 variety with no shoulder loop on the obverse. Pleasing deep steel surfaces are smooth and host only minimal surface marks. Our EAC grade VG10.
Ex: Stack's (4/1983), lot 1103; Jack H. Robinson (Superior, 1/1989), lot 131.
From The Phillip Clover Collection of U.S. Large Cents. (#35699)

1795 S-73, B-1 Cent, VF Details
Lettered Edge

- 3076** 1795 Lettered Edge — Environmental Damage — PCGS Genuine. VF Details. S-73, B-1, Low R.5. An intermediate die state, bulged below ER and cracked at UNITED. Dark steel surfaces with lighter olive on the devices, showing uniform roughness on each side. A nicely centered impression showing no other blemishes except for a small rim bruise over the F in OF. Del Bland grades this coin VG10 and tied for 11th in his census. Noyes grades this piece VG8, also tied for 11th finest. Our EAC grade VG10.
Ex: Christian M. Petersen; Hollinbeck Coin Co. (12/21/1956); Harold Bareford (9/13/1985); Herman Halpern (Stack's, 3/1988), lot 107; Robinson S. Brown, Jr. (privately, 8/5/1992); March Wells (Goldberg Coins, 2/2009), lot 554.
From The Phillip Clover Collection of U.S. Large Cents.

1795 S-74, B-2 Cent, XF40
Lettered Edge

- 3077** 1795 Lettered Edge XF40 NGC. S-74, B-2, R.3. The obverse has a crack through the 9 and a bulge at the 7, and the reverse has cracks through TES and OF A, with faint clash marks. Pleasing chestnut and chocolate-brown surfaces are mostly smooth, with a faint old scratch in the left obverse field, and another on the neck. Other trivial contact marks are expected for the grade. Our EAC grade Fine 15.
Ex: Kagin's (1/1989), lot 1140; Chris Victor-McCawley; Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 104.
From The Phillip Clover Collection of U.S. Large Cents. (#35715)

1795 S-75, B-3 Cent, AU53
Lettered Edge

- 3078** 1795 Lettered Edge AU53 NGC. S-75, B-3, R.3. This late die state has all of the cracks and clash marks described in the Breen Encyclopedia, with buckling in the left obverse field. A lovely specimen with smooth mahogany and light olive surfaces that are mostly free of blemishes, although a few tiny contact marks are visible between the head and the I of LIBERTY. Our EAC grade VF35.
Purchased from Phil Ralls (4/1985).
From The Phillip Clover Collection of U.S. Large Cents. (#35717)

- 3079** 1795 Lettered Edge — Environmental Damage — NGC Details. Fine. S-76a, B-4a, R.5. There are no visible clash marks on this early die state piece. Both sides have dark olive and steel patina with a few splashes of tan on the obverse and minor reddish corrosion on the reverse. Our EAC grade VG8.
Ex: Doug Bird; Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 105; Tom Reynolds (10/1996).
From The Phillip Clover Collection of U.S. Large Cents.

- 3080** 1795 Plain Edge Fine 12 NGC. S-76b, B-4b, R.1. Light clash marks are noted on each side of this dark olive and tan specimen, with pleasing surfaces showing only minimal handling marks. The upper obverse and lower reverse borders are indistinct, suggesting an uneven strike. Our EAC grade Fine 12.
Purchased (1/1984).
From The Phillip Clover Collection of U.S. Large Cents. (#35723)

- 3081** 1795 Plain Edge Fine 12 NGC. S-77, B-6, R.3. A late die state with STA nearly invisible due to a die bulge. This lovely specimen has smooth light tan surfaces with minimal handling marks on each side. An important opportunity to acquire a problem free example. Our EAC grade VG10.
Purchased from Tom Reynolds (7/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#35726)

- 3082** 1795 Plain Edge — Double Struck — Fine 12 NGC. S-77, B-6, R.3. Both strikes were centered, showing a few degrees of rotation between impressions. The bust tip is clearly doubled and so is the cap, with an L from LIBERTY superimposed. A splendid double strike with pleasing olive-brown surfaces showing few imperfections for the grade. Our EAC grade Fine 12.
Purchased (8/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#35726)

1795 NC-3, B-7 Cent, Poor 1
The Jack Beymer Discovery Coin

- 3083** 1795 Plain Edge Poor 1 NGC. NC-3, B-7, High R.7. Jack Beymer discovered the NC-3 die combination in April 1980, and since that time, five additional pieces have been located. This example is the original discovery coin, and the lowest grade of all six examples. However, despite extensive wear, it is extremely attractive with smooth medium brown surfaces. The head of Liberty is nearly completely outlined with a few hair strands visible, as well as LIB of LIBERTY and the 5 in the date. About half of the reverse details are also visible. The finest example grades just Good 4, based on EAC standards, so all known specimens are “rather uninspiring” as Bob Grellman wrote in the Dan Holmes catalog.
Ex: Washington, D.C. coin show (7/1979); Jack Beymer who discovered the variety on April 5, 1980; Dr. Robert J. Shalowitz (5/1981); R.E. Naftzger, Jr. (2/23/1992); Eric Streiner (3/20/1992); Robinson S. Brown, Jr. (Superior, 1/1996), lot 109; Chris Victor-McCawley (FPL, 3/1997); later, to Phil Clover.
From The Phillip Clover Collection of U.S. Large Cents.

1795 S-78, B-8 Cent, AU50
Plentiful Plain Edge Variety

- 3084** 1795 Plain Edge AU50 NGC. S-78, B-8, R.1. This early die state shows several sets of clashmarks, especially on the reverse. A hint of blue appears on the mahogany-brown surfaces of this attractive cent, with minimal surface corrosion and a few splashes of darker patina on each side. Our EAC grade VF20.
Ex: Coin Galleries (11/1990), lot 2675.
From The Phillip Clover Collection of U.S. Large Cents. (#35729)

First U.S. Mint Building, ca. 1903

**1795 S-80 Jefferson Head Cent, VF Details
The Downing-Rasmussen Specimen**

- 3085 1795 Jefferson Head, Plain Edge — Environmental Damage — NGC Details. VF S-80, B-11b, R.5.** The Jefferson Head cent was first described by coin dealer Ebenezer Locke Mason, Jr. in 1869, referring to a coin in the J. Colvin Randall Collection. Over more than 140 years since its discovery, the variety is rated R.5, with only about 50 to 60 examples known. This lightly corroded specimen has ebony patina on the obverse, with intermingled olive-tan and steel on the reverse. Our EAC grade VG8.

Ex: Homer K. Downing (1952 ANA, New Netherlands, 8/1952), lot 1714; M.L. Kaplan; Dr. Kenneth J. Sartoris (5/1972); Del Bland; Dr. Dane B. Nielsen; Dr. Willard J. Carmel, Jr. (10/2/1981); G. Lee Kuntz (Superior, 10/1991), lot 91; Wes Rasmussen (Heritage, 1/2005), lot 3092.

From The Phillip Clover Collection of U.S. Large Cents.

- 3086 1796 Liberty Cap VF25 NGC. S-81, B-2, R.3.** An early die state with no obverse cracks or visible bulges. This pleasing piece has dark brown surfaces with slightly lighter color on the portrait. Although the surfaces are not perfectly smooth, both sides are attractive with no major imperfections. The left obverse and reverse borders are indistinct. Our EAC grade Fine 12.
Ex: Dr. Robert J. Shalowitz (2/1983); Jack H. Robinson (Superior, 1/1989), lot 149; Tom Reynolds (12/1990).
From The Phillip Clover Collection of U.S. Large Cents. (#35750)

- 3087 1796 Liberty Cap VF30 NGC. S-82, B-3, R.4.** No bulges or clash marks are visible on either side of this scarce cent. A few minor surface marks are noted on each side, but the overall appearance is attractive, with dark brown patina. Our EAC grade VG10.
Purchased from Chris Victor-McCawley (9/2000).
From The Phillip Clover Collection of U.S. Large Cents. (#35753)

- 3088 1796 Liberty Cap — Environmental Damage — PCGS Genuine. VF Details. S-83, B-4, R.4.** Only a faint trace of the crack through ERTY is evident on this intermediate die state specimen. Dark olive surfaces exhibit splashes of tan on each side, with uniform roughness over the obverse and reverse. A few old scratches and trivial handling marks are also visible. Our EAC grade VG10.
Purchased from Tom Reynolds (7/1989).
From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-84, B-5 Cent, VF30
Attractive Liberty Cap Specimen**

- 3089 1796 Liberty Cap VF30 NGC. S-84, B-5, R.3.** An early die state with a slight die bulge at the 96, and a light crack to the tops of O and F. Although slightly weak at the central reverse, most other design motifs are sharp for the grade. Both sides have smooth and essentially problem free surfaces with dark olive and steel toning. An attractive cent. Our EAC grade VF20.
Purchased from Bertram Cohen (3/1987). Ex: J. Wade (6/22/1943).
From The Phillip Clover Collection of U.S. Large Cents. (#35759)

- 3090 1796 Liberty Cap — Environmental Damage — NGC Details. Fine. S-85, B-6, R.5.** An early die state before the reverse was reground. Light reddish corrosion is visible on both sides of this dark brown cent. A couple short marks are evident at the high point of the obverse. Our EAC grade Good 6.
Ex: 1975 EAC (Pine Tree, 2/1975), lot 667; Dennis Mendelson; Robert Shalowitz (1/1990).
From The Phillip Clover Collection of U.S. Large Cents.

- 3091 1796 Liberty Cap — Environmental Damage — NGC Details. VF. S-86, B-7, R.5.** The die state is impossible to determine due to minor corrosion on each side, with a slight reddish appearance. The obverse is a little sharper than the reverse, and the surfaces are dark steel-brown, but this is still an acceptable example of a scarce variety. Our EAC grade VG7.
Ex: Dr. Charles L. Ruby (Superior, 2/1975), lot 82; Robert Shalowitz (1/1990).
From The Phillip Clover Collection of U.S. Large Cents.

- 3092 1796 Liberty Cap — Environmental Damage — NGC Details. VF. S-87, B-8, R.3.** The obverse has delicate tan on the high points, with steel-blue patina, showing microscopic roughness. The reverse is darker brown at the center, within hard green corrosion from the wreath outward. Our EAC grade VG8.
Ex: Superior (5/1990), lot 664.
From The Phillip Clover Collection of U.S. Large Cents.

- 3093 1796 Liberty Cap Fine 15 NGC. S-88, B-9, R.4.** A delicate crack appears from the rim to the 7 and shoulder loop. Both sides have a few shallow scrapes, but the hard surfaces are free of corrosion. Steel-brown patina has a small splash of tan at the lower left obverse. Our EAC grade VG10.
Purchased from Doug Bird (10/1990).
From The Phillip Clover Collection of U.S. Large Cents. (#35771)

**1796 S-89, B-10 Cent, Fine 15
Low Overall Census**

- 3094 1796 Liberty Cap Fine 15 NGC. S-89, B-10, R.3.** No clash marks are apparent on either side of this dark brown cent. The surfaces are generally smooth, with only microscopic roughness, and just a few grade-consistent handling marks. Although a relatively common variety, the S-89 has a low census with the finest known just VF30. This example is probably among the top 20 for the variety. Our EAC grade Fine 12.
Purchased from Tom Reynolds (12/1993).
From The Phillip Clover Collection of U.S. Large Cents. (#35774)

**1796 S-90, B-11 Cent, Fine 12
Just Below the Census**

- 3095 1796 Liberty Cap Fine 12 NGC. S-90, B-11, R.5.** An early die state of a rare variety with only 35 to 45 examples known in all grades. This pleasing specimen has dark steel surfaces with minor corrosion and a few faint scratches at the lower reverse. However, still an attractive example that just misses the condition census. Our EAC grade VG8.
Purchased from Tom Reynolds (9/1995). Ex: Robinson S. Brown, Jr.
From The Phillip Clover Collection of U.S. Large Cents. (#35777)

- 3096 1796 Liberty Cap VF30 NGC. S-91, B-1, R.3.** Sheldon placed this variety at the end of his emission sequence, and Breen placed it at the beginning. The obverse has horizontal scaling and die bulges in this intermediate die state. Deep steel-brown surfaces have splashes of ebony patina on each side with minimal surface roughness. Our EAC grade Fine 15.
Purchased from Chris Victor-McCawley (9/1990).
From The Phillip Clover Collection of U.S. Large Cents. (#35780)

- 3097 1796 Draped Bust, Reverse of 1796 — Whizzed — NGC Details. VF. S-92, B-28, R.3.** A light die crack connects the bases of RTY on this early die state example. Both sides of this medium brown cent have myriad handling marks, and the surfaces are a tad glossy. However, we disagree with the assessment that this piece has been whizzed. We fail to see any of the tell-tale signs of mechanical metal movement that suggests such a process, and there was no mention of any mis-treatment in the Jack Robinson catalog. Our EAC grade VG10.
Ex: Robert J. Shalowitz (1/1984); Jack H. Robinson (Superior, 1/1989), lot 167.
From The Phillip Clover Collection of U.S. Large Cents.

**1796 NC-1, B-29 Cent, Fine Details
Tied for Fourth Finest Known**

- 3098 1796 Draped Bust, Reverse of 1797 — Obverse Rim Damage — NGC Details. Fine. NC-1, B-29, R.6.** Del Bland lists nine examples that he grades VG8 in his census, with only three finer coins, from a total population of less than two dozen examples. This piece, with no evidence of an obverse die crack, has a noticeable rim dent at 7 o'clock on the obverse. A few other handling marks of varying size are noted. Both sides display light tan devices, with dark steel toning in the fields. Our EAC grade VG7.
Ex: John P. Young Collection (M.H. Bolender, 9/1951), lot 74; R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 412; Robinson S. Brown, Jr. (Superior, 9/1986), lot 122; Robinson S. Brown, Jr. (Superior, 1/1996), lot 128; John Whitney Walter (Stack's, 5/1999), lot 1724; Stack's (10/2000), lot 72; Chris Victor-McCawley (1/2001).
From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-93, B-34 Cent, AU Details
Early Die State**

- 3099 1796 Draped Bust, Reverse of 1796 — Environmental Damage — PCGS Genuine. AU Details. S-93, B-34, R.3.** Light clash marks are evident on this early die state specimen. Deep steel surfaces have uniform, moderate roughness with a slightly glossy appearance. Sharp design definition is evident on each side. Del Bland assigns a sharpness grade of XF45 and a net grade of VF30 in his census, placing this piece in a tie for 13th finest. Our EAC grade VF30.
Purchased (8/1983). Ex: Borcky Collection; Willard C. Blaisdell; Myles Z. Gerson; 1983 EAC (5/1983), lot 165.
From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-94, B-30 Cent, Fine 15
Just Outside the Census**

- 3100 1796 Draped Bust, Reverse of 1797 Fine 15 NGC. S-94, B-30, R.5.** Heavy obverse clash marks are noted on this early cent rarity. Both sides have dark brown surfaces with microscopic roughness but no handling marks of any significance. An important opportunity to acquire a rarity in the 1796 series, just missing the census. Bill Noyes grades this piece VG10 and tied for seventh finest. Our EAC grade VG8.

Ex: William Sleicher (S.H. Chapman, 10/1919), lot 956; Henry C. Hines; Dr. William H. Sheldon (2/14/1949); Judge Thomas L. Gaskill; New Netherlands (privately, 1956); Dorothy Paschal; Eugene Exman; Denis W. Loring (8/1978); G. Lee Kuntz (Superior, 10/1991), lot 106; Doug Bird (9/1997).

From The Phillip Clover Collection of U.S. Large Cents. (#35843)

**1796 S-95, B-35 Cent, XF Details
Ninth Finest Known**

- 3101 1796 Draped Bust, Reverse of 1796 — Environmental Damage — NGC Details. XF. S-95, B-35, R.5.** Clash marks appear visible over ERTY on this lightly corroded specimen. Both sides are dark olive with ebony splashes on the reverse. A small obverse rim bruise is evident at 9 o'clock. The sharpness would qualify this piece as second finest known, although the net grade suggests ninth finest. Bland grades this piece Fine 15 and Noyes suggests VG10. We are in the middle. Our EAC grade Fine 12.

Ex: Richard Picker (12/1964); Jackson C. Storm (7/31/1984); Jack Robinson (Superior, 1/1989), lot 173; J.R. Frankenfield (Superior, 2/2001), lot 306.

From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-96, B-32 Cent, Good Details
Reverse of 1796 Rarity**

- 3102 1796 Draped Bust, Reverse of 1796 — Surface Damage — PCGS Genuine. Good Details. S-96, B-32, R.6.** With a net grade of Fair 2, Bill Noyes lists this piece as the 22nd finest of 23 known specimens. The edges of been flattened from repeated tapping against a hard surface. However, the central areas inside the unusually wide borders are smooth and essentially problem free, showing only slight surface roughness under a glass. Still an important opportunity as most collectors are missing the S-96. Our EAC grade Fair 2.

Purchased from Tom Reynolds (10/2004). Ex: Superior (9/2004), lot 254.

From The Phillip Clover Collection of U.S. Large Cents.

- 3103 1796 Draped Bust, Reverse of 1796 — Improperly Cleaned — NGC Details. Fine. S-97, B-20, R.3.** Apparently an early die state, although the specifics are unidentifiable. Lightly corroded steel-brown surfaces show myriad light scratches at the lower obverse. Traces of lighter tan may be the feature that led to the Improperly Cleaned designation. Our EAC grade Good 5.

Purchased from Darwin Palmer (4/1997).

From The Phillip Clover Collection of U.S. Large Cents.

- 3104 1796 Draped Bust, Reverse of 1796 — Improperly Cleaned — NGC Details. Fine. S-98, B-21, R.3.** Lightly clashed obverse and reverse dies are evident on this olive and steel-brown specimen. Probably cleaned and recolored, yet still appealing. Our EAC grade VG7.

Ex: 1995 EAC Sale, lot 184.

From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-99, B-22 Cent, VG Details
Terminal Die State
Massive Retained Cud**

- 3105 1796 Draped Bust, Reverse of 1796 — Environmental Damage — NGC Details. VG. S-99, B-22, R.5.** A wonderful example of the latest die state, with a massive retained cud at the upper left obverse, limited by the die crack that developed earlier from the rim to the B, hair ribbon, and back to the rim about 8 o'clock. Although 50 to 60 examples of the variety are known, probably no more than 10 to 12 exist in the latest die state. Olive and dark brown surfaces are evenly granular on both sides, though with no other imperfections. A fully attractive and important early cent. Our EAC grade Good 5.

Purchased from Chris Victor-McCawley (12/1994).

From The Phillip Clover Collection of U.S. Large Cents.

- 3106 1796 Draped Bust, Reverse of 1796 — Reverse Damage — NGC Details. Good. NC-4, B-23, R.5.** Likely cracked through the tops of TES, although impossible to know for sure, as there is considerable wear at that location. A single prominent scrape is located at the right ribbon end. Otherwise, this is a pleasing and completely problem free two-tone cent, with light brown devices and dark brown fields. Our EAC grade AG3.

Ex: McCawley-Grellman (1/1995), lot 350; Stuart "Mac" MacDonald (Heritage, 9/1997), lot 5109.

From The Phillip Clover Collection of U.S. Large Cents.

- 3107 1796 Draped Bust, Reverse of 1797 — Obverse Graffiti — NGC Details. Fine. S-100, B-24, R.5.** This early state cent has light reverse die cracks. An X scratch in the right obverse field and a faint scratch over ONE are the only problems on this otherwise attractive reddish-tan specimen. Trivial handling marks on each side are consistent with the grade. Our EAC grade Good 5.

Purchased from Tom Reynolds (1/2000).

From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-101, B-25 Cent, XF Details
Tied for 11th Finest**

- 3108 1796 Draped Bust, Reverse of 1794 — Environmental Damage — NGC Details. XF. S-101, B-25, R.5.** No clash marks or die cracks are evident on either side. Bill Noyes and Del Bland each assign a sharpness grade of VF30, and they assign net grades of Fine 12 and Fine 15, respectively. Each places this piece in the 11th position in their census records. This sharply detailed piece has deep olive and steel surfaces with hints of mahogany patina. The surfaces are lightly corroded with a few pit marks. Our EAC grade Fine 12.

Ex: Charles M. Williams (Numismatic Gallery, 11/1950), lot 106; Willard C. Blaisdell; Del Bland; Jack H. Beymer; Joseph H. Rose (Harmer Rooke, 3/1990), lot 65; Robinson S. Brown, Jr. (Superior, 1/1996), lot 142.

From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-102, B-26 Cent, AU Details
Ex: Downing; Smith; Brown**

- 3109 1796 Draped Bust, Reverse of 1794 — Improperly Cleaned — NGC Details. AU. S-102, B-26, R.4.** This early die state specimen has a faint reverse crack at AM. A sharply detailed piece with deep steel-brown surfaces. Old corrosion is evident, and the left obverse field has been burnished. A small edge dent is noted below the date and another edge dent right of the Y in LIBERTY is covered by the tab on the holder. Still an attractive cent that was good enough for Homer Downing, Doug Smith, and Robinson Brown, Jr. Our EAC grade VF20.

Ex: New Netherlands #30 (5/1950), lot 391; Homer K. Downing (1952 ANA, New Netherlands, 8/1952), lot 1739; C. Douglas Smith (1970); Robinson S. Brown, Jr. (Superior, 1/1996), lot 143; Chris Victor-McCawley; Walter Husak (2/2001).

From The Phillip Clover Collection of U.S. Large Cents.

- 3110 1796 LIHERTY VG8 NGC. S-103, B-27, R.4.** The famous LIHERTY obverse with the B first inverted, then corrected. This pleasing two-tone example has light brown devices with deeper steel-brown fields. Handling marks on each side are consistent with the grade. Our EAC grade Good 6.

Ex: A & A Coins (7/1967); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5110; Doug Bird (4/1996).

From The Phillip Clover Collection of U.S. Large Cents. (#35880)

- 3111 1796 LIHERTY — Burnished — NGC Details. VF. S-104, B-45, R.3.** The mahogany obverse is noticeably burnished and the dark steel reverse is lightly burnished. Both sides show considerable detail, with a small patch of corrosion at the upper right reverse. Our EAC grade Fine 12.

Ex: Stack's (4/1988), lot 2098.

From The Phillip Clover Collection of U.S. Large Cents.

- 3112 1796 Draped Bust, Reverse of 1797 — Obverse Scratched — NGC Details. Good. S-105, B-44, R.5.** Light obverse clash marks are intermingled with handling marks on the obverse of this light olive specimen. The obverse is quartered by faint horizontal and vertical scratches. Other marks are consistent with the grade. Our EAC grade Good 4.

Ex: William Van Roden; Stack's (5/1968), lot 203; Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior, 5/1989), lot 24; Chris Victor-McCawley (9/1989).

From The Phillip Clover Collection of U.S. Large Cents.

- 3113 1796 Draped Bust, Reverse of 1794 — Environmental Damage — NGC Details. Fine. S-106, B-14, R.5.** Apparently an early die state with no clash marks or die cracks evident. The dark olive-brown surfaces show myriad scattered pit marks on the obverse, and light surface roughness on the reverse. Our EAC grade Good 6.

Ex: 1995 EAC, lot 190.

From The Phillip Clover Collection of U.S. Large Cents.

- 3114 1796 Draped Bust, Reverse of 1794 Good 6 NGC. S-107, B-13, R.5.** This early die state specimen has a perfect obverse die. Hints of golden-tan appear on the high points of this uniformly rough dark brown example. The lower left obverse and upper left reverse are indistinct. However, still a pleasing example of this rare variety. Our EAC grade Good 5.

Purchased from Tom Reynolds (4/1993).

From The Phillip Clover Collection of U.S. Large Cents. (#35792)

- 3115 1796 Draped Bust, Reverse of 1794 — Environmental Damage — NGC Details. VF. S-108, B-12, R.3.** The uniformly rough obverse and reverse surfaces preclude die state determination on this dark greenish-brown example. Both sides show considerable design definition with a somewhat glossy appearance. Our EAC grade Fine 12.

Purchased from Tom Reynolds (4/1989).

From The Phillip Clover Collection of U.S. Large Cents.

**1796 S-109, B-15 Cent, VF20
Early Die State**

- 3116 1796 Draped Bust, Reverse of 1794 VF20 NGC. S-109, B-15, R.3.** An early die state with no evidence of the crack through the date, but with lapping evident on the reverse. A two-tone example with steel toning in the fields, and lighter brown on the devices. The surfaces show slight scaling and roughness, although this example is clearly finer than usual. Previously certified VF30 PCGS. Our EAC grade Fine 15.

Purchased from Doug Bird (1/1998).

From The Phillip Clover Collection of U.S. Large Cents. (#35798)

- 3117 1796 Draped Bust, Reverse of 1794 Fine 15 NGC. S-110, B-16, R.2.** A light die crack appears through the tops of ERTY. An additional delicate die crack crosses the T in LIBERTY to the forelock. Mostly dark olive surfaces show reddish-brown splashes on the obverse of this cent, with minuscule handling marks expected for the grade. Our EAC grade VG10.
*Purchased from Tom Reynolds (7/1989).
From The Phillip Clover Collection of U.S. Large Cents. (#35801)*

**1796 S-111, B-17 Cent, VF20
Reverse of 1794**

- 3118 1796 Draped Bust, Reverse of 1794 VF20 NGC. S-111, B-17, R.5.** The crack through the I in LIBERTY to the hair is faintly visible, but mostly lost in the slightly rough surfaces, showing deep steel patina. The lumps under E of UNITED are minimal, suggesting that this piece was struck before S-110. A highly attractive example showing faint reverse corrosion. Our EAC grade Fine 12.
*Ex: Hollinbeck Stamp & Coin Co. (12/1949), lot 1006; C. Douglas Smith (1970); Robinson S. Brown, Jr. (Superior, 1/1996), lot 153.
From The Phillip Clover Collection of U.S. Large Cents. (#35804)*

**1796 NC-5, B-18 Cent, AG3
Only Eight Known**

- 3119 1796 Draped Bust, Reverse of 1794 AG3 NGC. NC-5, B-18, R.7.** Just eight examples of the NC-5 are known, and the finest is in the ANS collection. Only one of the other seven grades better than Good. The present piece is tied for sixth finest in the Bland census. Both sides show substantial wear but with no problems aside from faint hairlines. An important example of an elusive and rarely offered variety. Our EAC grade AG3.
*Ex: Chuck Furjanic (10/1971); Denis W. Loring (5/1974); Dr. Robert J. Shalowitz; John W. Adams (8/1980); Dr. C.R. Chambers; Dennis Mendelson (7/1991); Robinson S. Brown, Jr. (Superior, 1/1996), lot 154; John Whitney (Stack's, 5/1999), lot 1747; Purchased (7/2005).
From The Phillip Clover Collection of U.S. Large Cents. (#35804)*

- 3120 1796 Draped Bust, Reverse of 1794 — Improperly Cleaned — NGC Details. Fine. S-112, B-19, R.5.** The left branch of the wreath and much of ONE CENT is obliterated due to a die bulge on this later die state piece. Pleasing olive and bluish-brown surfaces have a few splashes of maroon patina with trivial handling marks, mostly on the obverse. Our EAC grade VG8.
*Purchased from Tom Reynolds (12/1994).
From The Phillip Clover Collection of U.S. Large Cents.*

**1796 S-113, B-41 Cent, VF Details
Latest Die State**

- 3121 1796 Draped Bust, Reverse of 1797 — Environmental Damage — NGC Details. VF. S-113, B-41, R.5.** The die is failing below the crack through the 17, appearing as a retained cud, on this late die state example. Lightly corroded steel and tan surfaces suggest that this piece has been cleaned and recolored. A minor planchet clip at 10 o'clock is mostly covered by the tab from the NGC holder. Our EAC grade VG10.
*Purchased from Chris Victor-McCawley (6/1997).
From The Phillip Clover Collection of U.S. Large Cents.*

- 3122 1796 Draped Bust, Reverse of 1797 Good 6 PCGS. S-114, B-42, Low R.5.** The terminal die state with a narrow rim break left of the L, and a heavy rim break on TY of LIBERTY. Attractive dark olive and steel surfaces show slight roughness expected for the grade. However, this is a pleasing example and extremely important for die state collectors. Our EAC grade Good 6.
*Ex: Early Copper Auction (8/1991), lot 83.
From The Phillip Clover Collection of U.S. Large Cents. (#35858)*

- 3123 1796 Draped Bust, Reverse of 1797 VG8 NGC. S-115, B-43, R.3.** This variety is normally seen with an arcing die crack through the date that is absent on the present example. The obverse has a narrow rim break in the dentils at 3 o'clock. Both sides have dark steel patina, with lighter tan devices. Our EAC grade Good 6.
*Purchased from Tom Reynolds (9/1996).
From The Phillip Clover Collection of U.S. Large Cents. (#35861)*

- 3124 1796 Draped Bust, Reverse of 1796 — Environmental Damage — NGC Details. VF. S-116, B-36, R.5.** No visible clash marks appear on either side. The charcoal surfaces have light corrosion with no other imperfections. Nicely detailed, this S-116 cent falls just below the condition census. Our EAC grade Fine 12.
*Purchased from Chris Victor-McCawley (6/2003).
From The Phillip Clover Collection of U.S. Large Cents.*

- 3125 1796 Draped Bust, Reverse of 1797 — Graffiti — NGC Details. VF. S-117, B-37, R.5.** This early die state specimen has a faint crack through TY, and a minor crack through the D of UNITED. Letters are lightly scratched in the obverse field, with a smoothed depression above the hair ribbon. The otherwise smooth surfaces have intermingled chestnut and steel-brown toning. Our EAC grade Good 4.
*Purchased from Tom Reynolds (9/1996).
From The Phillip Clover Collection of U.S. Large Cents.*

- 3126 1796 Draped Bust, Reverse of 1797 — Environmental Damage — PCGS Genuine. Good Details. NC-3, B-33, R.6.** Die state early but unknown. This piece has the sharpness of Good 5 or slightly better, but has corroded steel-brown surfaces and it is slightly bent. As one of only 10 or 20 examples known, it is still an important piece for early large cent specialists. The date, LIBERTY, legend, and denomination are all readable despite the surfaces. Our EAC grade Fair 2.
*Ex: Henry Hettger; Grant Reed; Superior (9/1998), lot 1156.
From The Phillip Clover Collection of U.S. Large Cents.*

**1796 S-118, B-39 Cent, VF Details
Important Provenance
Sixth Finest Known**

- 3127 1796 Draped Bust, Reverse of 1797 — Environmental Damage — NGC Details. VF. S-118, B-39, R.5.** A narrow rim break is noted below the left ribbon end. Dark chocolate-brown surfaces exhibit moderate corrosion on both sides, but with no other imperfections. This is an attractive cent with an important provenance. Del Bland grades this piece VG10 and Bill Noyes calls it VG8. Both place it in the sixth position. Our EAC grade VG10. Ex: Henry C. Hines; William Rabin; Dr. Charles L. Ruby (*Superior*, 2/1974), lot 459; Charles A. Blood; EAC Sale (4/1999), lot 186; Chris Victor-McCawley; Dr. Wallace Lee (*Superior*, 5/2003), lot 414; Walter Husak (*Heritage*, 2/2008), lot 2119. From The Phillip Clover Collection of U.S. Large Cents.

- 3128 1796 Draped Bust, Reverse of 1797 — Corrosion — NGC Details. XF. S-119, B-40, R.3.** The first of three Nichols Find cent varieties, often found in Mint State grades, and less frequently seen in circulated grades. This dark brown example has sharp details with several pit marks and light green corrosion. Our EAC grade Fine 12. Purchased from Darwin Palmer (4/1997). From The Phillip Clover Collection of U.S. Large Cents.

**1797 NC-1, B-1 Cent, Good Details
Fifth Finest of Eight Known**

- 3129 1797 Reverse of 1797, Plain Edge — Environmental Damage — NGC Details. Good. NC-1, B-1, R.7.** Current census records show a total population of only eight examples of the 1797 NC-1 cent. This specimen has medium olive-brown surfaces that show noticeable porosity as do most of the known pieces. The finest known example grades VF20, and the second finest is just Good 6, according to the Noyes census. This piece appears in the Noyes census as fifth finest, with a grade of AG3. Our EAC grade AG3. Ex: James E. Long; John R. Grellman; Denis W. Loring (8/2002). From The Phillip Clover Collection of U.S. Large Cents.

- 3130 1797 Reverse of 1796, Plain Edge VF20 NGC. S-120a, B-2a, R.3.** An early die state with smooth light steel surfaces showing splashes of chestnut-brown on the reverse. A nicely centered impression with wide obverse and reverse borders. Our EAC grade VG10. Ex: Frank H. Masters, Jr. (RARCOA, 5/1971), lot 102; Mel Robinson; W.R.T. Smith (12/1974); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5127. From The Phillip Clover Collection of U.S. Large Cents. (#35894)

- 3131 1797 Reverse of 1796, Grippled Edge — Environmental Damage — NGC Details. VF. S-120b, B-2b, R.2.** Die crumbling blurs the profile on this later state example. Both sides have rough, charcoal surfaces, although with no other blemishes of note. Our EAC grade VG8. Purchased (9/1986). From The Phillip Clover Collection of U.S. Large Cents.

- 3132 1797 Reverse of 1796, Grippled Edge — Environmental Damage — NGC Details. VF. S-121b, B-3b, R.3.** The left obverse field has a diagonal die crack from the hair ribbon to the border. Patches of corrosion are noted with minor scratches and minor field smoothing. Our EAC grade Fine 15. Ex: W.E. Johnson (12/1965); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5130; Stack's (9/1987), lot 363. From The Phillip Clover Collection of U.S. Large Cents.

- 3133 1797 Reverse of 1797, Stems — Environmental Damage — NGC Details. VG. S-122, B-9, R.5.** This early die state example has a delicate crack through the tops of MERI. Mostly steel-brown surfaces show a splash of reddish-brown on the obverse with the usual light roughness on each side. Our EAC grade Good 5. Ex: Ray Chatham (1973); Robinson S. Brown, Jr. (*Superior*, 9/1986), lot 172. From The Phillip Clover Collection of U.S. Large Cents.

- 3134 1797 Reverse of 1797, Stems — Environmental Damage — NGC Details. VG. NC-2, B-10, R.6.** A rim break appears over D ST, although other die state characteristics are lost in the heavily porous surfaces of this steel and medium brown cent. Just over 20 examples of the NC-2 are known, but the finest is only VF20 and the second finest is just VG10. This example is tied for 17th out of 21 specimens known, according to Noyes. Our EAC grade Good 5. Ex: Los Colinas Sale (Steve Ivy, 9/1981), lot 19; later, Chris Victor-McCawley (2/1999). From The Phillip Clover Collection of U.S. Large Cents.

- 3135 1797 Reverse of 1797, Stems Good 4 NGC. NC-3, B-11, R.6.** Light clash marks are present on the obverse of this early state specimen. The pleasing surfaces are light steel-blue with only a few minor marks, including a faint old scratch at the center of the reverse. Del Bland grades this piece Good 5, and tied for seventh finest of 20 pieces listed in his census. Our EAC grade Good 5. Ex: Lee G. Lahrman (Abe Kosoff, 2/1963), lot 186; Willard C. Blaisdell; Del Bland; Richard H. Wright; Valley Plaza Coins (FPL, Fall 1976), lot 164; Bowers and Ruddy (10/1977), lot 784; Dr. Thomas S. Chalkley (*Superior*, 1/1990), lot 329; Robinson S. Brown, Jr. (*Superior*, 1/1996), lot 175. From The Phillip Clover Collection of U.S. Large Cents. (#35906)

- 3136 1797 Reverse of 1797, Stems — Environmental Damage — NGC Details. VF. S-123, B-12, R.4.** The second of three Nichols Find varieties, seldom found in circulated grades. This late die state piece has a delicate crack at the denominator. Intermingled steel and tan surfaces show minor roughness, especially on the reverse. Our EAC grade Fine 12. Ex: W.E. Johnson (4/1967); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5134. From The Phillip Clover Collection of U.S. Large Cents.

- 3137 1797 Reverse of 1797, Stems VG8 NGC. NC-5, B-13, R.6.** The reverse of this early die state piece has light clash marks. A pleasing example with medium steel surfaces and lighter brown devices. Minor handling marks are evident on both sides, with some old scratches on the obverse. Our EAC grade Good 4. Purchased from Tom Reynolds (1/2003). From The Phillip Clover Collection of U.S. Large Cents. (#35909)

1797 S-124, B-14 Cent, Fine Details
Early Die State

- 3138 1797 Reverse of 1797, Stems — Smoothed — PCGS Genuine. Fine Details. S-124, B-14, High R.5.** This intermediate die state has obverse clash marks, and a die bulge through the date and right to the drapery. The S-124 is one of the important Sheldon numbers in the 1797 series, and this olive and steel toned specimen is a pleasing representative. Minor surface roughness appears on this still attractive early cent.

Its provenance includes several prominent past members of the early copper community, including Sheldon who wrote on his envelope: "From the Smith colln, '56, by trade. A sunlight coin, and the only example seen of this variety with perfect surface and natural color. Probably 6 examples known." Today, only eight examples are listed in the Bland census above VG. Our EAC grade VG8.

Ex: William Rabin (12/1949); C. Douglas Smith; Dr. William H. Sheldon; C. Douglas Smith (8/1969); Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior, 5/1989), lot 273.

From The Phillip Clover Collection of U.S. Large Cents.

- 3139 1797 Reverse of 1797, Stems — Improperly Cleaned — NGC Details. Fine. S-125, B-15, R.5.** Bulged at the date and drapery with heavy obverse clash marks. This light steel-brown specimen exhibits reddish-tan from an old cleaning that occurred prior to 1987. An old friend of the cataloger who purchased this piece unattributed at the February 1987 Long Beach convention and sold it to Jack Robinson the same day. This piece ranks among the top dozen examples known, according to Del Bland who grades it VG10. Our EAC grade VG8.

Ex: Mark Borckardt (2/12/1987); Jack H. Robinson (Superior, 1/1989), lot 238.

From The Phillip Clover Collection of U.S. Large Cents.

- 3140 1797 Reverse of 1797, Stems VF25 NGC. S-126, B-16, R.3.** The die crack from the rim to the throat has widened for half its length with die chips in the field. Other obverse and reverse cracks are about equal to the Breen Large Cent Encyclopedia plate coin, an example of Die State V in that reference. This pleasing steel-brown example has light olive devices with attractive surfaces. Our EAC grade VF20.

Purchased from Chris Victor-McCawley (12/2002). Ex: 1992 ANA (Heritage, 8/1992), lot 72.

From The Phillip Clover Collection of U.S. Large Cents. (#35918)

- 3141 1797 Reverse of 1797, Stems Fine 15 PCGS. S-127, B-17, R.4.** Faint obverse bulges appear on this early state piece, struck before the die crack appeared at the left obverse. Delightful olive-brown surfaces show only trivial handling marks and other imperfections. A splendid specimen. Our EAC grade VG7.

Ex: John D. Wright (10/1967); Philip Van Cleave Collection (Kagin's, 1/1986), lot 5138.

From The Phillip Clover Collection of U.S. Large Cents. (#35921)

- 3142 1797 Reverse of 1797, Stems VF30 NGC. S-128, B-30, R.3.** An early die state, this cent shows cracks across the drapery and from the rim to the lower curls. Myriad handling marks appear on the chocolate-brown surfaces of this cent. Our EAC grade Fine 15.

Purchased from Tom Reynolds (4/1989).

From The Phillip Clover Collection of U.S. Large Cents. (#35924)

1797 S-129, B-24 Cent, XF Details
Low Census Level

- 3143 1797 Reverse of 1797, Stems — Damaged — NGC Details. XF. S-129, B-24, R.5.** Two faint cracks in the upper left obverse field outline the break that appears on S-130 and S-131. This example has a dent in the lower left obverse with a few small edge dents and a planchet defect over ME, but otherwise exceptional medium steel surfaces. Del Bland calls this piece VF20 sharpness, net VG8 and tied for 10th finest. Bill Noyes grades the coin VF25 sharpness, net Fine 12, and sixth finest. Our EAC grade VG10.

Purchased from Chris Victor-McCawley (2/1997). Ex: John A. Schreuder (4/1970); Del Bland; C. Douglas Smith (9/1970); Denis W. Loring (9/24/1970); Philip Van Cleave (Kagin's, 1/1986), lot 5140; Jack H. Robinson; Chris Victor-McCawley; Dr. Robert J. Shalowitz.

From The Phillip Clover Collection of U.S. Large Cents.

- 3144 1797 Reverse of 1797, Stems — Altered Surface — PCGS Genuine. AU Details. S-130, B-25, R.2.** A heavy break appears inside the obverse border at 10 o'clock, seen on some examples of S-129, and all examples of S-130 and 131. This piece has bold details with deep steel patina, showing only slight roughness and trivial surface marks. Our EAC grade VF25.

Purchased (12/1985).

From The Phillip Clover Collection of U.S. Large Cents.

1797 S-131, B-27 Cent, XF45
Stemless Wreath
Near Census Level

- 3145 1797 Reverse of 1797, No Stems XF45 NGC. S-131, B-27, R.3.** A faint vertical die crack appears in the right obverse field, along with the ubiquitous die break at the upper left. Pleasing medium olive surfaces exhibit minimal handling marks on each side. Del Bland grades this coin VF30, tied for 11th finest in his census. Bill Noyes suggests VF25 and tied for 12th finest. Our EAC grade VF25.

Ex: Hollinbeck Kagin Coin Co.; Hollinbeck Kagin (8/1964), lot 157; Hollinbeck Kagin Coin Co.; Art Kagin (10/6/1989); Chris Victor-McCawley; Dr. Philip W. Ralls (6/12/1996); Dr. Willard J. Carmel (Superior, 9/1997), lot 212.

From The Phillip Clover Collection of U.S. Large Cents. (#35981)

1797 S-132, B-28 Cent, VF20
Stemless Reverse

- 3146** 1797 Reverse of 1797, No Stems VF20 NGC. S-132, B-28, R.5. An early die state with no evidence of the reverse rim break over IC. This dark olive cent has splashes of maroon and steel toning with minor handling marks of little consequence. The dies were slightly misaligned in the press. Faint pinscratches appear at the central reverse. Our EAC grade VG10.
Ex: Jack H. Beymer (3/1982); Jack H. Robinson (Superior, 1/1989), lot 259.
From The Phillip Clover Collection of U.S. Large Cents. (#35984)

1797 S-133, B-29 Cent, AU Details
Near Census Level
Important Provenance

- 3147** 1797 Reverse of 1797, No Stems — Environmental Damage — NGC Details. AU. S-133, B-29, R.5. This late state piece has all the cracks and clash marks described by Breen, with the crack left of the 1 in the date faintly visible. A sharply detailed cent with pleasing olive surfaces that show splashes of maroon, including minor obverse pitting and an area of corrosion inside the left branch of the wreath. Del Bland grades this cent Fine 12 and tied for seventh finest in his census. Bill Noyes also grades this piece Fine 12, and places it eighth in his roster. Our EAC grade Fine 12.
Ex: Howard Newcomb (J.C. Morgenthau & Co., 2/1945), lot 159; Milton A. Holmes (Stack's, 10/1960), lot 1395; later, Superior (2/1976), lot 1424; Del Bland; C. Douglas Smith; Jerry A. Bobbe; R.E. Naftzger, Jr. (12/11/1986); Herman Halpern (Stack's, 3/1988), lot 134.
From The Phillip Clover Collection of U.S. Large Cents.

1797 S-134, B-4 Cent, XF45
Late Die State

- 3148** 1797 Reverse of 1797, Stems XF45 NGC. S-134, B-4, R.3. A chip in the right obverse field identifies the variety. A late die state with two cracks through the E in AMERICA, the area between them raised to form a retained cud. This splendid specimen is sharply detailed with splendid olive and chestnut-brown surfaces. Weakness at the left reverse is typical of late die state specimens. Our EAC grade VF25.
Ex: Wyatt Collection (Superior, 9/1985), lot 244.
From The Phillip Clover Collection of U.S. Large Cents. (#35933)

- 3149** 1797 Reverse of 1797, Stems VF30 NGC. S-135, B-5, R.3. This is the third Nichols Find variety and, like the others (1796 S-119, 1797 S-123), the S-135 is difficult to locate in circulated grades. An early die state, with no evidence of cracks, breaks, or clash marks. Lovely olive-brown surfaces with a few scattered marks on each side. Our EAC grade Fine 15.
Ex: Bradbury K. Thurlow (Mayflower Coin Auctions, 12/1967), lot 159; Philip Van Cleave Collection (Kagin's, 1/1986), lot 5146.
From The Phillip Clover Collection of U.S. Large Cents. (#35936)

- 3150** 1797 Reverse of 1797, Stems VF25 NGC. S-136, B-7, R.3. An early die state, and extremely rare from perfect dies. This lovely olive-brown example has light tan outlining the devices. The surfaces are smooth and problem free. Our EAC grade VF20.
Purchased (4/1985).
From The Phillip Clover Collection of U.S. Large Cents. (#35939)

- 3151** 1797 Reverse of 1797, Stems — Environmental Damage — NGC Details. XF. S-137, B-8, R.2. An early intermediate die state. This example exhibits mahogany surfaces with splashes of maroon patina, considerable on the reverse. Both sides show light corrosion and verdigris. Our EAC grade Fine 15.
Purchased (6/1983).
From The Phillip Clover Collection of U.S. Large Cents.

- 3152** 1797 Reverse of 1797, Stems — Damaged, Off Center — NGC Details. VG. S-138, B-20, R.1. Struck about 5% off-center at 10 o'clock. A late die state showing prominent reverse bulges. This pleasing olive-brown specimen has light tan intermingled with olive and steel. Minor porosity is evident on each side, although we are uncertain about the damage. Our EAC grade Good 5.
Purchased (1/1986).
From The Phillip Clover Collection of U.S. Large Cents.

- 3153** 1797 Reverse of 1797, Stems — Environmental Damage — PCGS Genuine. VF Details. S-138, B-20, R.1. Heavy bulges appear on the reverse of this intermediate die state specimen. Both sides are olive and steel, darker at the peripheries and outlining the devices. Faint surface roughness and minuscule marks are consistent with the grade. Our EAC grade Fine 12.
Purchased from Tom Reynolds (9/1985).
From The Phillip Clover Collection of U.S. Large Cents.

1797 S-139, B-21 Cent, AU53

- 3154 1797 Reverse of 1797, Stems AU53 NGC. S-139, B-21, R.1.** Two obverse die cracks begin at the same dentil of the border at the left, one upward to the middle curls, the other downward to the low curls, forming a triangle. Traces of cartwheel luster remain on the pleasing olive and chocolate-brown surfaces of this lovely cent. Our EAC grade VF30.
*Purchased (3/1987). Ex: 1981 ANA (Bowers and Ruddy, 8/1981), lot 1776.
From The Phillip Clover Collection of U.S. Large Cents. (#35948)*

- 3155 1797 Reverse of 1797, Stems — Burnished — NGC Details. AU. S-140, B-22, R.1.** An early die state showing only minor cracks and bulges. This sharply detailed piece is nearly Mint State, but the surfaces show old corrosion. Pleasing olive-brown patina with hints of cartwheel luster. The NGC description of Burnished is a bit harsh, in our opinion. This is quite an attractive cent. Our EAC grade VF25.
*Ex: EAC Sale (4/1987), lot 150.
From The Phillip Clover Collection of U.S. Large Cents.*

1797 S-141, B-18 Cent, XF40
Late Die State

- 3156 1797 Reverse of 1797, Stems XF40 NGC. S-141, B-18, R.4.** Heavy clash marks are noted on the reverse, with a vertical die crack through the left ribbon and stem. Smooth surfaces show intermingled steel and tan with a few scattered marks. Unevenly struck with weakness at the upper obverse and lower reverse. Our EAC grade Fine 12.
*Purchased from Chris Victor-McCawley (12/1994).
From The Phillip Clover Collection of U.S. Large Cents. (#35954)*

1797 S-142, B-32 Cent, VF30
A Census Level Specimen

- 3157 1797 Reverse of 1797, Stems VF30 NGC. S-142, B-32, R.5.** No obverse die rust is noted on this early die state specimen. The surfaces are light olive-brown with splashes of maroon patina. Myriad surface marks include many original planchet marks and other post-strike blemishes. Del Bland grades this piece VG10, in a tie for ninth finest known. Bill Noyes also says VG10, tied for fifth finest of the variety.

Doug Smith bought this cent in 1950 and was unable to upgrade the variety over the next 35 years. He writes on his envelope: "This variety has a very low CC and is prohibitively scarce in the high grades." Our EAC grade VG10.

Ex: Elmer's Stamp and Coin Shop (2/4/1950); C. Douglas Smith; Robert Schuman; Superior (6/2000), lot 167; Chris Victor-McCawley (9/2000).

From The Phillip Clover Collection of U.S. Large Cents. (#35957)

1797 S-143, B-31 Cent, AU Details
Stemless Reverse

- 3158 1797 Reverse of 1797, No Stems — Environmental Damage — NGC Details. AU. S-143, B-31, R.5.** Light clash marks on both sides are mostly obscured by the porosity on the dark greenish-steel surfaces of this sharply detailed cent. The lower curls and UNITED STATES show weakness due to an uneven strike. Del Bland calls this piece XF40 sharpness, net Fine 12, and tied for 15th finest. Our EAC grade Fine 15.

Ex: F. Dabney Caldwell, Jr.; Stack's (4/1988), lot 2102.

From The Phillip Clover Collection of U.S. Large Cents.

- 3159 1798 First Hair Style AG3 NGC. S-144, B-1, High R.5.** A die bulge crossing the wreath from TA to ER may have contributed to the low grade that NGC assigned. This piece has a full date and LIBERTY, along with a complete legend and fraction on the reverse. Only the central reverse shows weakness. Cleaned and recolored with pale orange and steel on the obverse, olive-brown on the reverse. Our EAC grade AG3.

Purchased from Tom Reynolds (1/1998).

From The Phillip Clover Collection of U.S. Large Cents. (#36011)

3160 1798 First Hair Style — Environmental Damage — PCGS Genuine. XF Details. S-145, B-2, R.3. The reverse has slight buckling at OF with clash marks above and right of the F, and minor die crumbling on the bottom of the O in ONE. Intermingled olive, tan, and steel-brown surfaces are slightly rough with a number of surface marks. Our EAC grade Fine 12.
*Purchased from Chris Victor-McCawley (12/1990).
From The Phillip Clover Collection of U.S. Large Cents.*

3161 1798 First Hair Style VG10 NGC. S-146, B-3, R.5. Considerable lapping is evident on the obverse, with the top of the head fragmented. Olive-brown surfaces show light tan borders with faint scratches, trivial surface marks, and minimal corrosion. Our EAC grade VG7.
*Ex: EAC Sale (4/1995), lot 204.
From The Phillip Clover Collection of U.S. Large Cents. (#36017)*

3162 1798 First Hair Style VF20 NGC. S-147, B-4, R.5. No evidence of the reverse die crack appears on this early state piece. The surfaces provide a pleasing mix of tan, olive, and steel-brown toning with trivial handling marks and a few faint scratches in the right obverse field. Called VG10 in the Jack Robinson catalog, and listed in Del Bland's census as tied for 10th finest. Our EAC grade VG8.
*Ex: San Francisco Coin Show (9/1982); Jack H. Robinson (Superior, 1/1989), lot 296; Tom Reynolds (5/1992).
From The Phillip Clover Collection of U.S. Large Cents. (#36020)*

3163 1798 First Hair Style VF30 NGC. S-148, B-11, R.2. This early die state specimen has a faint die crack through UNITED STATES, but no other die cracks on either side. Despite trivial surface marks on each side, this attractive cent has excellent eye appeal, with a mixture of olive and maroon toning. Our EAC grade Fine 12.
*Ex: Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior, 5/1989), lot 302; Tom Reynolds (8/2002).
From The Phillip Clover Collection of U.S. Large Cents. (#36023)*

3164 1798 First Hair Style — Environmental Damage — NGC Details. Good. S-149, B-5, High R.4. This intermediate die state has reverse buckling at S OF A. The S-149 die marriage has dropped substantially in rarity, called High R.5 a dozen years ago, and now High R.4, or perhaps Low R.5, with about 75 examples known. Attractive medium olive surfaces show light corrosion on each side, especially in the obverse fields and near the left reverse border. Our EAC grade Good 5.
*Purchased from Tom Reynolds (7/1992).
From The Phillip Clover Collection of U.S. Large Cents.*

3165 1798/7 VG8 NGC. S-150, B-6, R.5. A slight die bulge appears at OF AMER. This is the first of two overdated obverse dies, here combined with two reverse dies. A few tiny marks appear on Liberty, although otherwise the steel-blue surfaces are exceptional for the grade. Our EAC grade VG7.
*Purchased from Robert Shalowitz (4/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#35993)*

3166 1798/7 — Environmental Damage — NGC Details. Fine. S-151, B-7, R.3. Minutely off-center at 9 o'clock, typical for the variety. This late die state has extensive obverse and reverse die cracks and buckling, with the crack through the E in AMERICA broken above that letter through the dentils. Pleasing mahogany surfaces show minor pitting and some greenish corrosion at the top of the head. A large number of similarly graded Fine 12 pieces are recorded, although only seven coins in the Bland census grade finer. Our EAC grade Fine 12.
*Ex: Stack's (9/1987), lot 368.
From The Phillip Clover Collection of U.S. Large Cents.*

**1798/7 S-152, B-13 Cent, VF35
Second Overdate Obverse**

3167 1798/7 VF35 NGC. S-152, B-13, R.2. A little imagination is required to see the obverse die crack of Breen's Die State II on this example. Earlier perfect dies coins are extremely rare. This piece has myriad dark maroon and steel toning spots on attractive light olive surfaces. Scattered surface marks are consistent with the grade. Our EAC grade VF20.
*Purchased from Tom Reynolds (7/1992).
From The Phillip Clover Collection of U.S. Large Cents. (#35999)*

3168 1798 First Hair Style Fine 15 PCGS. S-153, B-12, R.3. An important late state specimen, this piece has a rim break at the end of the drapery. Uniformly rough olive surfaces show a few tiny obverse rim nicks at 10 to 11 o'clock, with a faint old scrape at the lower reverse. Our EAC grade VG10.
*Purchased from Doug Bird (9/1992).
From The Phillip Clover Collection of U.S. Large Cents. (#36029)*

3169 1798 First Hair Style VF20 NGC. S-154, B-8, R.4. Reverse die bulges at ED and AMER are plainly visible on this scarce cent. The same die also shows prominent clash marks above the wreath to OF. Both sides have wonderful olive-brown with trivial handling marks and a narrow depression at the upper left obverse. Our EAC grade Fine 12.
*Ex: George Ramont; Bill Noyes; Tom Reynolds (12/1992).
From The Phillip Clover Collection of U.S. Large Cents. (#36032)*

3170 1798 Reverse of 1796 — Reverse Damage — NGC Details. VF. S-155, B-9, R.3. An early die state with no evidence of the crack through the 7. The central reverse has been tooled, probably smoothing to diminish the appearance of scratches or corrosion. A two-tone cent with light olive-tan devices, and charcoal toning in the fields. Our EAC grade VG10.
*Purchased from Chris Victor-McCawley (2/1997).
From The Phillip Clover Collection of U.S. Large Cents.*

**1798 S-156, B-10 Cent, VF Details
First Hair Style; Reverse of 1796**

3171 1798 Reverse of 1796 — Burnished — NGC Details. VF. S-156, B-10, High R.5. Apparently an early die state, although the surface condition precludes an exact determination. Both sides have intermingled olive, charcoal, and maroon, with surface smoothing to diminish porosity, including minor tooling lines at the central reverse. A few dots of green and red corrosion remain on the reverse. We agree with the VF20 sharpness grade that Bill Noyes assigns, but disagree with his net grade of Good 4. Our EAC grade VG8.
*Ex: FUN Sale (Heritage, 1/1998), lot 5045; Chris Victor-McCawley (9/1999); James E. Long (12/2003).
From The Phillip Clover Collection of U.S. Large Cents.*

**1798 NC-1, B-14 Cent, Fine Details
Fourth Finest of Six Known
Ex: Howard Newcomb**

- 3172 1798 First Hair Style — Corrosion — NGC Details. Fine. NC-1, B-14, R.7.** Intermingled dark olive-brown and steel surfaces show light porosity. A few other tiny marks include minor rim nicks at the upper obverse. However, a fully pleasing example and extremely rare, with just six examples identified in all grades. Del Bland grades this piece VG7 and tied for fourth finest known. An exceptional provenance accompanies this specimen. Our EAC grade VG7.
Ex: Howard R. Newcomb (J.C. Morgenthau & Co., 2/1945), lot 203; James G. Macallister; David O. Hughes (10/1946); R.E. Naftzger, Jr. (6/1972); Denis W. Loring (5/1974); Dr. Robert J. Shalowitz (6/1974); John W. Adams (6/1974); Denis W. Loring (6/1974); Richard H. Wright; Del Bland (11/1975); C. Douglas Smith (2/1977); Philip Van Cleave (Kagin's, 1/1986), lot 5169; C. Douglas Smith; Dr. Robert A. Schuman; Superior (5/2003), lot 491.
From The Phillip Clover Collection of U.S. Large Cents.

- 3173 1798 First Hair Style — Environmental Damage — NGC Details. VF. S-157, B-15, R.2.** A rough die crack or line of rust extends from the throat to the rim, with crumbling along the profile. Additional die rust appears on this specimen, with light corrosion on the intermingled olive and steel-brown surfaces. Our EAC grade Fine 12.
Purchased (8/1988).
From The Phillip Clover Collection of U.S. Large Cents.

**1798 NC-2, B-16 Cent, Good 4
Sixth Finest of Seven Known**

- 3174 1798 First Hair Style Good 4 NGC. NC-2, B-16, R.7.** The late die state of NC-2, with rim breaks over R and Y of LIBERTY, connected by a heavy die crack through the base of the T. Until recently, this was the only known die state for the variety, represented by five pieces that were located between the initial 1931 discovery and 1978. Since then, a perfect dies piece was discovered in 2008, and an intermediate sale, offered elsewhere in the present sale, was discovered earlier this year.
This important example has pleasing two-tone surfaces with steel-brown fields, and lighter chestnut-brown devices. The surfaces show faint roughness, but are exceptionally nice for the grade. This is the sixth finest of seven known specimens. Our EAC grade Good 5.
Purchased from Tom Reynolds (12/2003).
From The Phillip Clover Collection of U.S. Large Cents. (#36035)

**1798 S-158, B-17 Cent, AU Details
Intermediate Die State**

- 3175 1798 First Hair Style — Reverse Damage — NGC Details. AU. S-158, B-17, R.4.** Faint cracks are barely visible in the left obverse field, while the reverse has a heavy crack from the T of UNITED to AT of STATES. Other minor cracks are also evident. The strike is weak along the reverse border outside the die crack, with associated weakness on the obverse. Pleasing medium olive surfaces show splashes of reddish-brown at the lower reverse, and a gouge through the M of AMERICA, to the leaves below that letter. Our EAC grade VF20.
Purchased from Tom Reynolds (6/1997).
From The Phillip Clover Collection of U.S. Large Cents.

- 3176 1798 First Hair Style Fine 12 NGC. S-159, B-18, R.3.** Vertical cracks in the left obverse field are always present on this die marriage. Additional obverse and reverse die cracks appear on this intermediate die state piece. Both sides have reddish-tan and steel-blue toning with scattered, grade-consistent handling marks. Our EAC grade VG10.
Purchased from Tom Reynolds (4/1989).
From The Phillip Clover Collection of U.S. Large Cents. (#36041)

- 3177 1798 First Hair Style — Obverse Scratched — NGC Details. Fine. S-160, B-21, R.4.** The obverse of this early die state piece is scratched, mostly near the upper left border. Both sides are lightly marked. Medium olive surfaces with reddish-brown on the reverse. Our EAC grade VG8.
Ex: Robert W. Miller, Sr.; Del Bland (6/1986); Robert E. Vail (11/21/1988); Del Bland; Superior (9/1997), lot 233; Jack Wadlington; Chris Victor-McCawley (7/2005).
From The Phillip Clover Collection of U.S. Large Cents.

- 3178 1798 First Hair Style — Obverse Planchet Flaw — NGC Details. XF. S-161, B-22, R.2.** An intermediate die state; the reverse is cracked but there is no evidence of the late state reverse rim break. The entire obverse is covered with myriad lamination lines slanting up to the left. The reverse is smooth with only trivial marks. Both sides are steel-blue with traces of maroon and charcoal patina. Our EAC grade VF20.
Ex: Bowers and Merena (9/1985), lot 1860.
From The Phillip Clover Collection of U.S. Large Cents.

- 3179 1798 First Hair Style — Repaired — NGC Details. Fine. S-162, B-23, R.4.** This late die state piece has all of the cracks mentioned by Breen, although they are all quite faint. Light clash marks are also noted. The surfaces are cleaned and recolored in mahogany and medium olive with evidence of smoothing especially visible in the right obverse field. Both sides have myriad handling marks. Our EAC grade VG10.
Ex: Las Vegas Coin Show (3/1982); Jack H. Robinson (Superior, 1/1989), lot 326.
From The Phillip Clover Collection of U.S. Large Cents.

- 3180 1798 First Hair Style VG10 NGC. S-163, B-19, R.4.** An intermediate die state with several die cracks and light clash marks on each side. This piece has probably been cleaned and recolored with medium olive surfaces and reddish-tan around the devices. Numerous trivial marks are noted. Our EAC grade VG10.
Ex: Tom Reynolds; Chris Victor-McCawley (9/1996).
From The Phillip Clover Collection of U.S. Large Cents. (#36053)

- 3181 1798 First Hair Style VF35 NGC. S-164, B-20, R.4.** This piece has light buckling at the date and drapery with a diagonal line of die chips in the right obverse field. A nicely detailed specimen, the dark olive-brown surfaces show a few splashes of maroon patina. Both sides have grade-consistent handling marks. A small pit mark appears below the date and a small rim bruise is noted above the L. Our EAC grade VF20.
Ex: Gordon J. Wrubel; Darwin B. Palmer, Jr.; Ray Chatham (1973); Robinson S. Brown, Jr. (Superior, 9/1986), lot 231; Tom Reynolds (12/1992).
From The Phillip Clover Collection of U.S. Large Cents. (#36056)
- 3182 1798 Second Hair Style — Scratched — PCGS Genuine. VF Details. S-165, B-31, R.4.** Light clash marks are evident on each side. Dark olive surfaces show maroon patina at the lower obverse, and dark green at the lower reverse. A few old scratches are blended with the surrounding surface, with a couple visible hairlines on the obverse. Our EAC grade Fine 15.
Purchased from Chris Victor-McCawley (4/2002).
From The Phillip Clover Collection of U.S. Large Cents.
- 3183 1798 Second Hair Style VF35 NGC. S-166, B-32, R.1.** This variety is usually recognized by the arcing die crack at the lower left reverse. A late die state, this piece has all of the cracks mentioned by Breen, although the short crack from the top of the first T in STATES resembles a flowline. Both sides have chestnut-brown surfaces with a few splashes of darker brown and traces of lighter tan on the reverse. The usual quota of circulation marks are present. Our EAC grade VF25.
Purchased (9/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36068)
- 3184 1798 Second Hair Style — Smoothed — PCGS Genuine. XF Details. S-167, B-33, R.1.** This nicely detailed specimen represents an early die state with die chips on the reverse, but no evidence of the die cracks seen in later states. Both sides have old green patina over olive-brown surfaces. Slight smoothing is apparent in the left obverse field. Our EAC grade VF25.
Ex: Paramount (2/1973), lot 141; Tom Reynolds (6/1985).
From The Phillip Clover Collection of U.S. Large Cents.
- 3185 1798 Second Hair Style — Scratched — PCGS Genuine. VF Details. S-168, B-27, R.3.** Extensive reverse die cracks are evident on this late die state specimen, including a crack joining the terminal leaves of the wreath. Steel-brown surfaces host slightly lighter reddish-brown on the portrait, with old obverse scratches that are mostly blended with the surrounding surface. Otherwise glossy surfaces with a few grade-consistent handling marks. Our EAC grade VF20.
Purchased from Tom Reynolds (5/1992).
From The Phillip Clover Collection of U.S. Large Cents.
- 3186 1798 Second Hair Style VF25 NGC. S-169, B-28, R.3.** A short crack joins the right top of the E in ONE to the wreath. Light clash marks are also noted on the reverse. Both sides combine olive and steel brown with a few light scratches on the reverse from IC into the right side of the wreath. Our EAC grade Fine 15.
Purchased from Tom Reynolds (7/1989).
From The Phillip Clover Collection of U.S. Large Cents. (#36077)
- 3187 1798 Second Hair Style XF40 NGC. S-170, B-29, R.3.** Light clash marks appear below the chin, with no evidence of the arcing die crack usually seen in the left obverse field. This pleasing piece has a medium olive-brown obverse and a mostly tan reverse with some darker peripheral patina. Both sides have the usual circulation marks expected for the grade, with a trivial rim nick over the O in OF. Our EAC grade VF30.
Purchased from Chris Victor-McCawley (9/2000).
From The Phillip Clover Collection of U.S. Large Cents. (#36080)
- 3188 1798 Second Hair Style — Environmental Damage — NGC Details. VF S-171, B-30, R.4.** The usual rim break left of LIBERTY is clearly visible. However, the charcoal surfaces and rather heavy porosity prevent a further die state determination. The corrosion on this piece has blurred most of the reverse details, although there are no other imperfections on either side. Our EAC grade Fine 12.
Purchased from Chris Victor-McCawley (1/1999).
From The Phillip Clover Collection of U.S. Large Cents.
- 3189 1798 Second Hair Style — Reverse Corrosion — NGC Details. VF S-172, B-34, R.2.** The latest die state with a reverse rim break joining the tops of ICA. Attractive olive-brown and steel surfaces show lighter tan on the reverse, with a few small areas of minor corrosion at the upper reverse. Our EAC grade VF20.
Ex: FUN Convention (1/1984); Robert E. Matthews (Superior, 5/1989), lot 335, but illustrated over lot 339 in that catalog.
From The Phillip Clover Collection of U.S. Large Cents.
- 3190 1798 Second Hair Style VF35 NGC. S-173, B-38, R.3.** The rim break on this intermediate die state covers all of RTY in LIBERTY, but extends no further left or right. Both sides are pleasing and essentially problem free, combining olive-brown and steel color with minimal surface marks. Our EAC grade VF20.
Ex: EAC Sale (4/1989), lot 104.
From The Phillip Clover Collection of U.S. Large Cents. (#36089)
- 3191 1798 Second Hair Style — Cleaned — PCGS Genuine. VF Details. S-174, B-35, R.2.** This intermediate die state specimen has heavy clash marks at the lower reverse, equal to Breen Die State III. Cleaned and recolored with steel-blue surfaces and traces of reddish-brown color. A thin scratch is visible at the upper left obverse, and both sides have minor handling marks. Our EAC grade VF30.
Ex: C. Douglas Smith; Tom Reynolds (8/1993).
From The Phillip Clover Collection of U.S. Large Cents.
- 3192 1798 Second Hair Style VF25 NGC. S-175, B-36, R.4.** This piece shows the rim break over the U of UNITED, but no later die cracks are present. Intermingled tan, olive, and steel-brown toning appears on both sides with scattered surface marks, as expected for the grade. A minuscule gouge appears right of the 8, and slight verdigris is visible on the reverse. Our EAC grade VF20.
Ex: Coin Galleries (5/1989), lot 1611.
From The Phillip Clover Collection of U.S. Large Cents. (#36095)
- 3193 1798 Second Hair Style — Environmental Damage — NGC Details. VF S-176, B-24, R.4.** A vertical obverse crack is beginning to form, with no evidence of later die defects. This early die state example has greenish patina over chestnut and olive surfaces with light corrosion, mostly on the reverse. Our EAC grade VF20.
Purchased from Chris Victor-McCawley (4/2002).
From The Phillip Clover Collection of U.S. Large Cents.
- 3194 1798 Second Hair Style — Corrosion — NGC Details. XF S-177, B-25, High R.4.** The vertical obverse crack ends in the field below the Y, and the reverse has clash marks at OF A. This sharply detailed example has noticeable corrosion on its greenish-brown and tan surfaces. Bill Noyes records this piece as 18th finest, with the sharpness of VF35 and the net grade of VG10. Our EAC grade Fine 12.
Purchased from Chris Victor-McCawley (1/2001). *Ex: Superior (2/1998), lot 947.*
From The Phillip Clover Collection of U.S. Large Cents.
- 3195 1798 Second Hair Style, Reverse of 1795 — Corrosion — NGC Details. Fine. S-178, B-26, High R.5.** A late die state with parallel cracks through the date. This example has the sharpness close to Fine, with dark green and ebony surfaces showing heavy corrosion on both sides, as usual for the variety. Our EAC grade Good 4.
Ex: Enoch Blackwell (12/5/1973); Denis W. Loring; Rich Olson; Phil Ralls; Chris Victor-McCawley (9/1996).
From The Phillip Clover Collection of U.S. Large Cents.

**1798 S-179, B-37 Cent, XF45
Intermediate Die State**

- 3196** 1798 Second Hair Style XF45 NGC. S-179, B-37, R.2. An intermediate die state showing die flaws below LIB and near the final S in STATES. This attractive olive-brown specimen has minuscule handling marks consistent with the grade. Our EAC grade VF35. Purchased from Robert Shalowitz (4/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36104)

**1798 S-180, B-41 Cent, Fine Details
Single Reverse Rim Break**

- 3197** 1798 Second Hair Style — Environmental Damage — NGC Details. Fine. S-180, B-41, High R.5. An intermediate die state, this rare cent has a rim break over the ATE of STATES, joining the top of that T. A horizontal crack in the left obverse field is apparently found on all known specimens. The olive, steel, and reddish-brown surfaces show light corrosion on each side. Only about 40 examples of the S-180 cent are known in all grades. Graded VG7 in the 1996 Brown catalog and called Good 6 by Bill Noyes who ranks this piece as tied for 18th finest. Our EAC grade Good 6.
Ex: Ernest Davis (11/1957); Admiral Worthington S. Bitler (8/1960); A. Kosoff; Hiram T. Ward (6/1978); Dr. Thomas S. Chalkley (Superior, 1/1990), lot 370; Robinson S. Brown, Jr. (Superior, 1/1996), lot 247.
From The Phillip Clover Collection of U.S. Large Cents.

- 3198** 1798 Second Hair Style — Scratches — NGC Details. XF S-181, B-42, R.3. This variety is always seen with the heavy horizontal crack in the left obverse field. This late die state has all of the cracks mentioned by Breen, although it was struck before the rim break developed right of the date. Several vertical scratches appear on the obverse, and two diagonal scratches across the reverse meet at the center. Sharply detailed. Our EAC grade Fine 15. Purchased from Doug Bird (4/2007).
From The Phillip Clover Collection of U.S. Large Cents.

- 3199** 1798 Second Hair Style VF35 NGC. S-182, B-43, R.3. A single clash mark appears below the chin. This dark steel-brown example has a few faint hairlines and minor circulation marks as expected for the grade. A couple rim nicks are barely worth mentioning. Noyes grades this piece Fine 15 and tied for 14th finest. Our EAC grade VF20.
Ex: Tom Reynolds (9/18/1992); EAC Sale (4/2002), lot 275.
From The Phillip Clover Collection of U.S. Large Cents. (#36113)

- 3200** 1798 Second Hair Style — Environmental Damage — NGC Details. Fine. S-183, B-44, R.5. Cleaned and recolored, the obverse is reddish-brown and the reverse is tan. Both sides have light corrosion with minor handling marks. A still attractive example of the rare S-183 die marriage. Our EAC grade VG7. Purchased from Tom Reynolds (7/1998).
From The Phillip Clover Collection of U.S. Large Cents.

- 3201** 1798 Second Hair Style XF40 NGC. S-184, B-45, R.2. An early die state with barely visible die chips on the obverse. The pleasing surfaces exhibit chestnut-brown, dark steel, and pinkish-maroon, the latter especially on the reverse. Minor handling marks appear on both sides, with a small dent below the E in ONE. Our EAC grade VF30.
Purchased from Chris Victor-McCawley (4/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36119)

- 3202** 1798 Second Hair Style — Environmental Damage — PCGS Genuine. XF Details. S-185, B-46, R.2. The terminal die state, according to Breen, with extensive die cracks and a rim break on the I of AMERICA. Intermingled olive and chestnut-brown surfaces exhibit splashes of deep steel on the obverse and maroon patina on the reverse. Minor reverse corrosion is also visible. Our EAC grade VF25.
Purchased from Tom Reynolds (9/2000).
From The Phillip Clover Collection of U.S. Large Cents.

- 3203** 1798 Second Hair Style VF20 NGC. S-186, B-39, R.2. The curved die crack through the lower right reverse is seen on all examples of this die variety. However, the same reverse die, without that crack, was used to strike the 1799/8 overdate cents, S-188. The die crack terminates in a small rim break below the fraction on this early-intermediate die state specimen. Both sides have pleasing walnut-brown patina with the usual small handling marks, none of any consequence. Our EAC grade VF20.
Ex: Jack H. Beymer; Dan Gibson; Jack H. Beymer (4/1984); Jack H. Robinson (Superior, 1/1989), lot 387.
From The Phillip Clover Collection of U.S. Large Cents. (#36125)

- 3204** 1798 Second Hair Style XF40 NGC. S-187, B-40, R.1. Cracked through TY to the right rim as always, although an early die state for this marriage. Since the obverse is a later state here than with S-186, and since all S-186 cents were struck after the 1799 overdates, it is apparent that this variety was also struck after the 1799-dated cents. Dark steel-brown surfaces show scattered marks and a few insignificant corrosion spots on each side. This cent and the 1810/09 S-281, both purchased in January 1983, were the first two cents that Phil Clover purchased for his collection. Our EAC grade VF25. Purchased (1/1983).
From The Phillip Clover Collection of U.S. Large Cents. (#36128)

**1799/8 NC-1, B-1 Cent, AG3
Fifth Finest of Seven Known**

- 3205** 1799/8 AG3 NGC. NC-1, B-1, R.7. The two 1799/8 overdate varieties share an obverse die, and their reverse dies are similar. For that reason, one of the eight pieces listed in the Bland and Noyes census lists turned out to be an S-188, and there are only seven examples known. The present piece, which Del Bland grades Good 5, is tied for third finest of the seven. Bill Noyes assigns a lower grade and records this piece in a fifth place tie. Regardless of its grade, this is an important opportunity to acquire an extremely rare variety, with few new discoveries. Three of the seven were first identified between 1947 and 1972, and four others were found in the 1990s.
The present piece is one of the four pieces found in the 1990s, exhibiting light brown on the obverse and darker brown on the reverse, both sides with microscopic roughness. The date and LIBERTY are complete, and the legend is mostly readable. Our EAC grade AG3.
Ex: Evan Kopald, who purchased this piece unattributed on 4/21/1997; Chris Victor-McCawley; later, Chris Victor McCawley (7/2005).
From The Phillip Clover Collection of U.S. Large Cents. (#36131)

**1799/8 S-188, B-2 Cent, Fine Details
Early Die State
No Obverse Cracks**

- 3206 1799/8 — Scratches — NGC Details. Fine. S-188, B-2, R.4.** This early die state has faint clash marks on both sides. A few light scratches on each side accompany minor surface roughness on this olive, steel, and maroon toned specimen. The date and LIBERTY are both sharp, and the legend is complete. The obverse border is partially strong and the reverse border is nearly complete. Our EAC grade Good 6.
Ex: Stack's (2/1982), lot 421; Coin Galleries (2/1985), lot 1612; Stack's (6/1985), lot 6.
From The Phillip Clover Collection of U.S. Large Cents.

**1799 S-189, B-3 Cent, VG Details
Full Date and LIBERTY**

- 3207 1799 — Environmental Damage — NGC Details. VG. S-189, B-3, R.2.** The combination of wear, poor centering, and surface roughness makes it impossible to accurately determine the die state of this piece. Hard greenish corrosion appears on charcoal-gray surfaces with a few ancient scratches. The sharpness is at least VG, with a full date and LIBERTY, and a complete legend and denomination. Our EAC grade Good 6.
Purchased from Tom Reynolds (7/1997).
From The Phillip Clover Collection of U.S. Large Cents.

**1800/1798 S-190, B-5 Cent, XF40
First Hair Style**

- 3208 1800/1798 First Hair Style XF40 NGC. S-190, B-5, R.2.** A late die state with clash marks and extensive die rust. This pleasing piece has intermingled olive, chocolate-brown, and steel toning on each side, with a pair of dents on the upper bust line, but otherwise showing only a few scattered surface marks. Our EAC grade VF20.
Ex: ANA Sale (Bowers and Merena, 8/1987), lot 37.
From The Phillip Clover Collection of U.S. Large Cents. (#36143)

- 3209 1800/1798 First Hair Style VF25 NGC. S-191, B-2, R.3.** The reverse has heavy die cracks, bulges, and clash marks in this late die state. Both sides show myriad grade-consistent marks with dark olive surfaces, lighter on the devices. Our EAC grade Fine 12.
Purchased from Chris Victor-McCawley (1/1991).
From The Phillip Clover Collection of U.S. Large Cents. (#36146)

**1800/1798 NC-6, B-4 Cent, AG Details
Only 13 Known**

- 3210 1800/1798 First Hair Style — Corrosion — NGC Details. AG. NC-6, B-4, High R.6.** This is an extremely rare instance where a third-party certification service grades an early copper coin lower than either Bland or Noyes. Del Bland grades this coin Good 5 and tied for seventh finest of 13 known examples. Bill Noyes places it ninth in his roster of 13, with a grade one point less. The olive-brown surfaces show the fine granularity often seen on low grade early cents, and we feel that the description of Corrosion on this coin is extremely harsh. Our EAC grade Good 4.
Purchased as S-191 at a coin show on 8/11/1996 by David Palmer (3/1997); Denis W. Loring (4/1997); later, Chris Victor McCawley (7/2005).
From The Phillip Clover Collection of U.S. Large Cents.

- 3211 1800/79 — Smoothed — Genuine PCGS. VF Details. S-192, B-6, R.4.** There is no evidence of an arcing reverse die crack on this early state piece. Old greenish patina resides on steel-brown surfaces with a small mark near the jaw and another mark crossing the bust. The obverse has a tiny rim nick at 10 o'clock. However, the Smoothing that PCGS mentions is not visible. Our EAC grade Fine 12.
Purchased (1/1986).
From The Phillip Clover Collection of U.S. Large Cents.

**1800/79 S-193, B-7 Cent, XF Details
The Norweb Specimen
Fourth Finest**

- 3212 1800/79 — Damage — PCGS Genuine. XF Details. S-193, B-7, R.4.** The reverse has a die crack across the fraction bar and left ribbon to UN. Steel-blue and mahogany surfaces host moderate porosity on both sides. A hidden cut across the low curls is the only other blemish on this sharply detailed specimen. Del Bland grades this piece XF45 sharpness, net VF30, and ranks it as the third finest known example. We feel that the deduction should be slightly greater, and our grade would rank it fourth in Bland's census. Either way, it is an extremely important piece for advanced collectors. Our EAC grade VF25.
Ex: Anderson Dupont Sale (Stack's, 5/1954), lot 288; Norweb Collection (Bowers and Merena, 11/1988), lot 2785; Tom Reynolds (12/1988).
From The Phillip Clover Collection of U.S. Large Cents.

- 3213 1800/79 — Altered Surfaces — Genuine PCGS. XF Details. S-194, B-8, R.3.** This intermediate die state has rim breaks at the bottom of the reverse, below the fraction and the final A, and over the C in AMERICA. The obverse is mostly steel-brown, and the reverse is lighter olive-brown. A patch of porosity appears at the right obverse and a few faint scratches are evident on the reverse. Our EAC grade VF20.

Ex: McLaughlin & Robinson (12/1987), lot 234; J.R. Frankenfield (Superior, 2/2001), lot 453.

From The Phillip Clover Collection of U.S. Large Cents.

- 3214 1800/79 — Burnished — NGC Details. XF. S-195, B-9, R.5.** This early die state has the lower reverse cracked and clashed, with traces of a die crack through RTY. The reddish steel-brown surfaces are somewhat glossy from light burnishing, with faint scratches and handling marks on each side. Our EAC grade Fine 15.

Ex: Early Copper Auction (8/1991), lot 108.

From The Phillip Clover Collection of U.S. Large Cents.

- 3215 1800/79 XF40 NGC. S-196, B-10, R.1.** An intermediate die state with reverse clash marks at OF A and elsewhere, contributing to the strike weakness at the upper obverse and lower reverse. Pleasing dark olive-brown and steel surfaces exhibit a few scattered marks on each side. Our EAC grade VF30.

Purchased from Tom Reynolds (4/2002).

From The Phillip Clover Collection of U.S. Large Cents. (#36167)

**1800/79 NC-2, B-11 Cent, VF Details
The Second Holmes Coin**

- 3216 1800/79 — Corrosion — NGC Details. VF. NC-2, B-11, High R.6.** An obverse rim break appears at the lower right on this late state piece. The surfaces have been cleaned and recolored, with a mix of tan, reddish-brown, and steel, showing moderate, patchy corrosion over much of the obverse and reverse. Del Bland grades this coin Sharpness of VF30, net VG8, and third finest. Our EAC grade VG8.

This example is the second Dan Holmes coin, lot 369 in the September 2009 sale of that collection. However, the photo in that catalog was a different coin, and the provenance information received with this specimen was from that other coin illustrated in the Holmes catalog (ex: Superior, 9/1998, lot 1213), certainly creating much confusion. For that reason, no envelopes or other documentation are available for this example.

Ex: James Picanzo (5/4/1983); Phil Abel (5/1983); Denis Loring (6/1983); Jack Robinson; McLaughlin & Robinson (2/1988), lot 88; James E. Long, Jr. (10/3/1988); Daniel W. Holmes (Goldberg Coins, 9/2009), lot 369.

From The Phillip Clover Collection of U.S. Large Cents.

- 3217 1800 — Damaged — NGC Details. XF. S-197, B-12, R.1.** The “Q” variety is one of the most plentiful 1800 varieties, and one of the most recognizable. The obverse has heavy die chips at IB, and through the first 0, giving that digit the appearance of a Q. This late die state has heavy field chips below the hair ribbon. The latest state has a rim break over AT, that if present, is covered by the NGC holder. Dark steel-brown surfaces show slightly lighter tan on the high points, with minor cuts across the hair, and a slight bend near an obverse rim bruise at 9 o'clock. Our EAC grade Fine 15.

Purchased from Henry Hettger (4/1991).

From The Phillip Clover Collection of U.S. Large Cents.

- 3218 1800 Good 6 NGC. S-198, B-19, High R.5.** An intermediate or late die state, the crack through ICA is visible while characteristics of later die states are obscured. Recently adjusted from Low R.6 to High R.5, the S-198 remains a condition rarity, as the finest known is still just VG10. Deeply toned in steel-brown, the devices show splashes of reddish-brown and tan, with microscopic surface roughness on each side, and only a few other blemishes. Our EAC grade Good 5.

Purchased from Tom Reynolds (4/1991).

From The Phillip Clover Collection of U.S. Large Cents. (#36182)

- 3219 1800 — Surface Tooled — PCGS Genuine. Fine. S-199, B-14, R.4** Perhaps a bit of a stretch, but the reverse rim break at the right top of the F in OF is slightly reminiscent of our home state of Texas. Several die cracks, clash marks, and die bulges suggest a late die state. Slight tooling is noted on this piece, but the eye appeal remains strong, with dark steel fields and tan devices. Our EAC grade Fine 12.

Ex: Del Bland; Chris Victor-McCawley; Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 188.

From The Phillip Clover Collection of U.S. Large Cents.

- 3220 1800 Fine 15 NGC. S-200, B-15, R.3.** The date elements are thin on this lapped obverse die. This early die state has little evidence of bulges, clash marks, or die cracks. The steel-brown surfaces have delicate pale blue overtones with minimal circulation marks. Our EAC grade Fine 15.

Purchased from Doug Bird (1/1996).

From The Phillip Clover Collection of U.S. Large Cents. (#36188)

- 3221 1800 AG3 NGC. NC-3, B-16, Low R.6.** Although well worn, this is a splendid example of the NC-3 of 1800. The surfaces are medium to dark steel-brown, with all lettering readable and devices outlined. The high points are lighter brown. A lovely example with excellent eye appeal. Just under 30 examples are known. Our EAC grade AG3.

Purchased from Tom Reynolds (1/1997).

From The Phillip Clover Collection of U.S. Large Cents. (#36188)

- 3222 1800 — Scratches — NGC Details. VG. S-201, B-17, R.5.** An advanced state showing bulges and other die defects, this piece represents an intermediate die state with traces of die cracks in the obverse fields. Both sides have several noticeable scratches on the medium olive-brown surfaces. Called VG7 in the Robinson Brown Catalog, Noyes grades this piece as we do, and ranks it as 20th best. Our EAC grade Good 6.

Ex: Robinson, Victor-McCawley (12/1988); Robinson S. Brown, Jr. (Superior, 1/1996), lot 280.

From The Phillip Clover Collection of U.S. Large Cents.

**1800 S-202, B-18 Cent, VF20
Usual Bulged Dies**

- 3223 1800 VF20 NGC. S-202, B-18, R.4.** Both dies are bulged, cracked, and clashed, on this intermediate die state specimen. A small rim bruise at 1 o'clock gives the false appearance of a rim break over TY. Both sides have pleasing walnut-brown surfaces with trivial handling marks. Previously certified VF25 PCGS. Only eight pieces in Bland's census grade VF or better. Our EAC grade Fine 15.

Purchased from Tom Reynolds (3/2001).

From The Phillip Clover Collection of U.S. Large Cents. (#36194)

1800 S-203, B-29 Cent, XF40
Late Die State

- 3224** 1800 XF40 NGC. S-203, B-29, R.3. This late die state piece has a die bulge through the date and low curls, with heavy clash marks at the upper reverse that distort TES OF. A lovely specimen with delicate blue overtones on steel-brown surfaces. Trivial circulation marks are noted on each side. Our EAC grade VF25.
*Purchased from Chris Victor-McCawley (1/2001).
From The Phillip Clover Collection of U.S. Large Cents. (#36197)*

- 3225** 1800 — Burnished — NGC Details. VF. S-204, B-25, R.3. An early die state with minor clash marks and die failing right of RTY. Dark steel surfaces show slight granularity with a glossy appearance from light burnishing. Our EAC grade Fine 12.
*Purchased (6/1983).
From The Phillip Clover Collection of U.S. Large Cents.*

- 3226** 1800 — Environmental Damage — NGC Details. XF. S-205, B-26, R.4. A horizontal die crack is visible in the left obverse field, with heavy clash marks and die failure over ERTY. The reverse has light clash marks and a crack through ICA. This is the usual die state. Cleaned and retoned with medium brown surfaces showing faint bluish overtones with minor porosity in the fields. Few other imperfections are noted on this still attractive cent. Our EAC grade Fine 12.
*Ex: Robert Batchelder; Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior, 5/1989), lot 377; Tom Reynolds (8/1989).
From The Phillip Clover Collection of U.S. Large Cents.*

- 3227** 1800 VF30 NGC. S-206, B-27, R.3. An intermediate die state cracked at the left obverse and at the lower right reverse. A pleasing olive-brown example with splashes of steel toning. The surfaces are smooth and mostly problem free with only a few trivial rim bruises. Our EAC grade Fine 15.
*Purchased (4/2002). Ex: Dorothy I. Paschal; Ray Chatham (1972); Robinson S. Brown, Jr. (Superior, 9/1986), lot 301.
From The Phillip Clover Collection of U.S. Large Cents. (#36206)*

- 3228** 1800 — Smoothed — PCGS Genuine. XF Details. S-207, B-28, R.3. An early die state with light obverse clash marks, the triangular rim break at the lower reverse failing to encroach upon the first 0 in 100. Old greenish patina appears over steel-brown surfaces with glossy fields from minor burnishing. Our EAC grade VF20.
*Ex: Art Kagin (privately, 1/1985); Michael Kramer; Garry Ruttenberg (10/1990).
From The Phillip Clover Collection of U.S. Large Cents.*

1800 S-208, B-21 Cent, AU Details
Ex: Robinson S. Brown, Jr.
Third Finest in Bland Census

- 3229** 1800 — Environmental Damage — NGC Details. AU. S-208, B-21, R.3. An early die state with a heavy break through TY, still showing the dentils above those letters. This sharply detailed example has light corrosion over olive toning with splashes of steel on the obverse. The reverse is entirely dark steel with moderate corrosion. Del Bland grades this outstanding example VF30 and tied for third finest known. Our EAC grade VF30.
*Ex: F. Dabney Caldwell, Jr.; Stack's (4/1988), lot 2110; Robinson S. Brown, Jr. (Superior, 1/1996), lot 288; Jack H. Beymer (3/2000).
From The Phillip Clover Collection of U.S. Large Cents.*

1800 NC-4, B-22 Cent, Fair Details
Fifth Finest of Eight Known
Breen Encyclopedia Plate Coin

- 3230** 1800 — Scratches — NGC Details. Fair. NC-4, B-22, R.7. The plate coin in Breen's Large Cent Encyclopedia. This amazing intermediate die state has two separate die breaks at the left obverse, the lower break behind the lowest curls massive. A few light scratches on the obverse are expected for the low grade. Pleasing olive-brown surfaces. Eight examples of this variety are known and the present piece is tied for fifth place in the Bland census. Our EAC grade AG3.
From The Phillip Clover Collection of U.S. Large Cents.

- 3231** 1800 Fine 15 NGC. S-209, B-23, R.3. The obverse has prominent clash marks and the reverse has a crack through ICA. Light tan appears on the high points with dark steel-brown fields showing subtle bluish-gray overtones. Scattered marks are consistent with the grade. Our EAC grade Fine 15.
*Purchased from Doug Bird (11/2005).
From The Phillip Clover Collection of U.S. Large Cents. (#36215)*

1800 S-210, B-24 Cent, Fine Details**Ex: Dan Holmes Collection**

- 3232 1800 — Environmental Damage — NGC Details. Fine. S-210, B-24, High R.5.** A later intermediate die state with an obverse crack through ER, nearly reaching the right rim, and a reverse crack through the tops of AM. The sharpness approaches VF20, with dark olive and mahogany surfaces showing a few small spots of pinkish-orange patina. A small rim nick is evident below the 1 in 100. Del Bland grades this piece Fine 12 and tied for sixth finest known. Our EAC grade Fine 12.

Ex: David Proskey; Henry C. Hines; Dr. William H. Sheldon; Dorothy Paschal; Thomas Wolf; McCawley & Grellman (2/2008), lot 1240; Dan Holmes (Goldberg, 9/2009), lot 398.

From The Phillip Clover Collection of U.S. Large Cents.

1800 S-211, B-13 Cent, VF35**The Downing-Smith-Brown Specimen**

- 3233 1800 VF35 NGC. S-211, B-13, R.3.** Bulged and clashed without die cracks, an intermediate die state. This historic cent has pleasing olive surfaces with splashes of maroon at the lower reverse. Inconsequential handling marks are consistent with the grade. Del Bland grades this piece VF25 and tied for eighth finest in his census. Our EAC grade VF20.

Ex: Henry C. Hines; Homer K. Downing (1952 ANA, New Netherlands, 8/1952), lot 1868; C. Douglas Smith; Denis Loring (1971); Robinson S. Brown, Jr. (Superior, 9/1986), lot 309; Doug Bird (2/1997).

From The Phillip Clover Collection of U.S. Large Cents. (#36221)

- 3234 1800 VF30 NGC. S-212, B-20, R.3.** An early die state showing rust marks around STAT and with other die defects, before the dies were resurfaces. Lovely medium olive and chestnut surfaces host minimal circulation marks. Our EAC grade VF20.

Purchased from Doug Bird (4/1985).

From The Phillip Clover Collection of U.S. Large Cents. (#36224)

- 3235 1801 — Smoothed — PCGS Genuine. XF Details. S-213, B-1, R.2.** This intermediate die state has the usual four die cracks at the upper right obverse, with a faint crack through the I into the hair. Sharply detailed with glossy, dark greenish-steel surfaces showing minor reverse roughness. Our EAC grade VF25.

Purchased from Phil Ralls (4/1985).

From The Phillip Clover Collection of U.S. Large Cents.

- 3236 1801 — Improperly Cleaned — NGC Details. VF. S-214, B-2, R.3.** An intermediate die state with the tops of RTY weakened. Cleaned and retoned with unusual but attractive bluish-green color, lighter tan on the obverse devices, and with reddish-brown splashes on the reverse. Our EAC grade VF20.

Purchased from Tom Reynolds (4/1989).

From The Phillip Clover Collection of U.S. Large Cents.

- 3237 1801 AG3 NGC. NC-1, B-3, Low R.6.** The heavy clash mark at S OF is seen on all known examples of this variety, and also on certain other 1801 varieties. This piece shows extensive wear with microscopic roughness, but without defects of any kind. A splendid low grade example. The 1801 NC-1 is clearly collectible, and about to drop into the R.5 level. About 27 or 28 examples are known today. Our EAC grade Good 4.

Purchased from Tom Reynolds (9/1995).

From The Phillip Clover Collection of U.S. Large Cents. (#36239)

1801 S-215, B-4 Cent, XF Details**Ex: Homer Downing**

- 3238 1801 — Corrosion — NGC Details. XF. S-215, B-4, High R.4.** Three separate die cracks meet in the lower hair curls, creating extensive die sinking inside the lower left obverse border on this late-intermediate die state example. The reverse has heavy clash marks at STATES OF. Medium olive-brown surfaces exhibit light corrosion on the obverse, while the reverse has mere traces of corrosion. A splendid example with a long and historic provenance. Del Bland grades this piece VF20 and ninth finest in his census. Our EAC grade VF20.

Ex: Homer K. Downing (1952 ANA, New Netherlands, 8/1952), lot 1879; M.L. Kaplan (8/1952); C. Douglas Smith; Dorothy Paschal (3/1977); Robinson S. Brown, Jr. (Superior, 9/1986), lot 317; Robinson S. Brown, Jr. (Superior, 1/1996), lot 298; Stuart MacDonald (Heritage, 9/1997), lot 5151.

From The Phillip Clover Collection of U.S. Large Cents.

- 3239 1801 VF30 NGC. S-216, B-6, R.2.** An early die state, this example has been cleaned and retoned with reddish-brown and tan surfaces showing minor surface marks on each side. Our EAC grade VF20.

Purchased (8/1989).

From The Phillip Clover Collection of U.S. Large Cents. (#36245)

1801 S-217, B-7 Cent, Good Details**One of the Four Rarest Sheldon Numbers**

- 3240 1801 — Obverse Graffiti — NGC Details. Good. S-217, B-7, R.6.** Minor obverse and reverse die bulges are evident on this rarity. Only 16 or 17 examples of the S-217 are known in all grades, with just seven of those in grades better than VG. This is one of the important Sheldon numbers, missing from most collections. Other similar rarities include S-15, S-37, and S-79, the only three numbers missing from the Clover collection.

The obverse has a large letter A scratched in the left field. LIBERTY is weak due to a die bulge, but all other letters and devices are fully present on this dark brown specimen. The reverse has a small rim nick over the E of UNITED. Our EAC grade Good 4.

Ex: Kenneth W. Rendell (8/1957); Dorothy Paschal (1977); William R.T. Smith (2/1/1978); Jules Reiver (Heritage, 1/2006), lot 19492.

From The Phillip Clover Collection of U.S. Large Cents. (#36248)

- 3241 1801 3 Errors AG3 NGC. S-218, B-8, R.5.** The Three Errors reverse is combined with an obverse having LIBERTY far to the right, although on this low grade piece, that word is barely visible. The surfaces are pleasing for the grade, with a combination of olive and steel toning. Our EAC grade AG3.
Ex: Doug Bird; Tom Reynolds (2/1997).
From The Phillip Clover Collection of U.S. Large Cents. (#36269)

**1801 NC-2, B-10 Cent, AG Details
Only Eight Known**

- 3242 1801 — Corrosion — NGC Details. AG. NC-2, B-10, R.7.** An intriguing die state with a retained cud at ES O, and with clash marks from the date visible on top of the cud. Medium brown surfaces show trivial hairlines and surface marks, with corrosion at the lower left reverse. Only eight examples of 1801 NC-2 are known, including three VG coins, and five lower grade pieces. Our EAC grade AG3.
Purchased from Tom Reynolds (7/2006).
From The Phillip Clover Collection of U.S. Large Cents.

**1801 S-219, B-11 Cent, VF Details
Three Errors Reverse**

- 3243 1801 3 Errors — Obverse Improperly Cleaned — NGC Details. VF. S-219, B-11, R.2.** A later die state, the reverse showing two arcing die cracks at the lower left. The Three Errors Reverse is one of the highly popular *Guide Book* varieties among early cents with all three errors occurring at the lower reverse. Cleaned and retoned with a slightly glossy obverse from that cleaning. The reverse has more of a natural appearance with dark olive and steel-brown on both sides. Our EAC grade VF20.
Purchased (2/1987).
From The Phillip Clover Collection of U.S. Large Cents.

- 3244 1801 1/000 XF40 NGC. S-220, B-12, R.3.** An early die state, the obverse has clash marks and the reverse has a crack across the top right leaf pair. A trifle weak at the central reverse, this pleasing piece has medium olive surfaces with splashes of lighter tan. Scattered marks are noted on each side. Our EAC grade VF20.
Purchased from Chris Victor-McCawley (3/2002).
From The Phillip Clover Collection of U.S. Large Cents. (#36275)

- 3245 1801 1/000 VF35 NGC. S-221, B-5, R.2.** The reverse has a rim break on the first T in STATES. This steel-brown example has splashes of tan on the obverse, and considerable tan and olive on the reverse. A few minor rim nicks are evident. Our EAC grade VF20.
Ex: Stack's (6/1990), lot 1198.
From The Phillip Clover Collection of U.S. Large Cents. (#36284)

- 3246 1801 XF45 PCGS. S-222, B-16, R.1.** A small rim break appears over the B in LIBERTY on this later die state example. Pleasing deep olive surfaces have a few splashes of lighter brown with trivial handling marks. Our EAC grade VF25.
Purchased from Doug Bird (9/2000).
From The Phillip Clover Collection of U.S. Large Cents. (#36251)

- 3247 1801 1/000 XF40 NGC. S-223, B-17, R.1.** This intermediate die state has a rim break at RT that just misses the left top of the Y. This lovely example has smooth medium brown surfaces with a few splashes of lighter tan. Trivial handling marks on each side are inconsequential. Our EAC grade VF25.
Purchased from Tom Reynolds (2/1987).
From The Phillip Clover Collection of U.S. Large Cents. (#36278)

- 3248 1801 VF25 NGC. S-224, B-13, R.1.** There is no evidence of a reverse rim break on this early die state specimen. Medium olive and dark steel-brown are blended on the smooth surfaces of this pleasing specimen. Scattered marks on each side are consistent with the grade. Our EAC grade VF20.
Purchased (4/1983).
From The Phillip Clover Collection of U.S. Large Cents. (#36254)

**1801 NC-4, B-14 Cent, Good 4
Third Finest of Eight Known**

- 3249 1801 Good 4 NGC. NC-4, B-14, R.7.** Six of the eight known examples of 1801 NC-4 grade less than VG, and this piece is the finest of those six lower grade examples, the third finest of the variety. Both sides have pleasing medium olive-brown surfaces showing grade-consistent handling marks but no other defects. The date and LIBERTY are complete with some hair detail, and all lettering and leaves are complete on the reverse. Del Bland and Bill Noyes agree that this piece is the third finest 1801 NC-4 cent. Our EAC grade Good 5.
Purchased unattributed by Hugh Bodell; later, purchased from Chris Victor-McCawley (7/2005).
From The Phillip Clover Collection of U.S. Large Cents. (#36254)

- 3250 1801 1/000 — Obverse Graffiti — NGC Details. Fair. NC-3, B-15, High R.6.** Heavy cuts appear in the left and right obverse field, with a single small rim nick on the reverse at 9 o'clock. Both sides have smooth dark olive-brown surfaces with good eye appeal aside from the obverse graffiti. Just over a dozen examples of this variety survive today. Our EAC grade Fair 2.
Purchased from Chris Victor-McCawley (1/1999).
From The Phillip Clover Collection of U.S. Large Cents.

1802 S-225, B-1 Cent, XF Details
Middle Die State

- 3251 1802 — Altered Surfaces — PCGS Genuine. XF Details. S-225, B-1, R.3.** A narrow rim break is evident below the date on this intermediate die state specimen. Pleasing olive-brown surfaces show faint traces of luster, with splashes of steel toning, and minor evidence of reddish corrosion. Minor tooling is apparent at the forehead and upper hair strands behind the forehead. Our EAC grade VF30. Purchased (10/1990).
From The Phillip Clover Collection of U.S. Large Cents.

- 3252 1802 VF30 PCGS. S-226, B-2, R.3.** The moderately worn design elements retain significant interior detail, while the obverse surfaces show a few long thin scratches in the fields. The evenly toned brown surfaces exhibit a long die crack at Liberty's nose, indicating a late state of the die. Our EAC grade VF20.
Ex: Hillcrest Enterprises (Mail Bid Sale #2, 10/1970), lot 9; Robinson S. Brown, Jr. (Superior, 9/1986), lot 334.
From The Phillip Clover Collection of U.S. Large Cents. (#36293)

- 3253 1802 AG3 NGC. NC-1, B-3, High R.5.** The vertical obverse die crack normally present on this NC variety is visible at the upper obverse on this example. Both sides are well-worn, with hints of blue patina on the olive-brown surfaces. The 1802 NC-1 has fallen in rarity over the years, and today there are about 35 pieces known, but only two of those grade better than Fine. Our EAC grade Good 4. Purchased from Tom Reynolds (9/1996).
From The Phillip Clover Collection of U.S. Large Cents. (#36293)

- 3254 1802 — Smoothed — PCGS Genuine. AU Details. S-227, B-5, R.2.** The clash marks at Liberty's chin and the die crack through F AMERICA indicate Breen Die State II. The design elements retain much original detail and the chocolate-brown surfaces have a pleasing texture. Our EAC grade VF25.
Ex: Tom Reynolds; Doug Bird (4/1988).
From The Phillip Clover Collection of U.S. Large Cents.

- 3255 1802 1/000 — Smoothed — PCGS Genuine. AU Details. S-228, B-4, R.2.** The die break at D in UNITED and the clash marks at STA indicate an early die state. The design elements retain most of their original detail and the glossy brown surfaces show only minor abrasions. Our EAC grade VF25. Purchased (4/1986).
From The Phillip Clover Collection of U.S. Large Cents.

- 3256 1802 — Smoothed — PCGS Genuine. VF Details. S-229, B-6, R.2** An intermediate die state, the obverse has an arc crack through ERTY, but without the rim break of later states. Light corrosion appears on the obverse of this steel-brown cent, with trivial handling marks on each side. Our EAC grade VF20. Purchased from Doug Bird (4/2000).
From The Phillip Clover Collection of U.S. Large Cents.

- 3257 1802 Fair 2 NGC. NC-2, B-7, R.6.** With only about 21 or 22 examples known, the NC-2 is clearly the rarer of two 1802 NC varieties. As the grade suggests, this medium olive-brown example is well worn, but it is essentially problem free, with only the usual small circulation marks expected on a low grade cent. Faint bluish overtones enhance the overall pleasing appearance. Our EAC grade AG3.

Ex: Bryan C. Wilbur; Superior (2/1999), lot 2114.

From The Phillip Clover Collection of U.S. Large Cents. (#36299)

- 3258 1802 — Smoothed — Genuine PCGS. XF Details. S-230, B-8, R.1.** This is a late die state, but not the terminal state, with cracks, but no evidence of die breaks on either side. Considerable maroon patina appears on the olive-brown surfaces, especially on the reverse. Slight evidence of burnishing is noted on each side. Our EAC grade VF20. Purchased (8/1988).
From The Phillip Clover Collection of U.S. Large Cents.

- 3259 1802 No Stems — Cleaning — PCGS Genuine. VF Details. S-231, B-9, R.1.** This early die state has a delicate crack through the base of the date, extending to the rim right of the date. Cleaned and nicely retined to medium olive, showing trivial corrosion patches on each side. Our EAC grade VF25. Purchased (10/1986).
From The Phillip Clover Collection of U.S. Large Cents.

- 3260 1802 VF25 NGC. S-232, B-12, R.1.** A later die state with a cud clearly evident above ATE. This is one of two varieties that show the interesting mispunched TY over YY obverse, and is easily attributable as such. Each side is deep brown with a number of smaller abrasions, the only one worthy of individual mention is an angling mark that connects the two Ns in the center of the reverse. Our EAC grade VF20. Purchased from J.J. Teaparty (9/1987).
From The Phillip Clover Collection of U.S. Large Cents. (#36305)

- 3261 1802 VF35 NGC. S-233, B-13, R.2.** This middle die state piece shows rounding of the rim break below 18 and the reverse shows a faint crack from the left upright of U to the left ribbon to the knot. Second variety of the interesting mispunched TY/YY obverse. Deep brown patina is seen over each side with light field marks. The only defect worthy of mention is a triangular planchet flaw to the left of the 1 in denomination. Our EAC grade VF20.
Ex: R.K. "Knox" Ivey (10/1983); Jack H. Robinson (Superior, 1/1989), lot 509; Tom Reynolds (7/1990).
From The Phillip Clover Collection of U.S. Large Cents. (#36308)

- 3262 1802 XF40 NGC. S-234, B-14, R.3.** A later die state that shows rim crumbling directly below the lowest right leaf, and a rim break on the obverse above BERT. This variety is distinguished by the point of the curl that points toward the upright of the B in LIBERTY. Numerous light abrasions are scattered over both obverse and reverse, but the only one of individual significance is located below ST in STATES. Deep brown patina. Our EAC grade VF25. Purchased from Tom Reynolds (9/2000).
From The Phillip Clover Collection of U.S. Large Cents. (#36311)

- 3263 1802 VF25 PCGS. S-235, B-15, R.3.** This early die state shows only faint evidence of clashing on the obverse. Subtly different from S-234, this die pairing has the curl pointing to the middle of the B rather than the upright (as seen on S-234). The surfaces are charcoal-gray with slightly lighter accents over the high points of the design. Lightly marked, a couple of irregular planchet flakes are noted in the reverse fields and there is a straight strike-through depression in the right obverse field. Our EAC grade Fine 15. Purchased (4/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36314)

1802 S-236, B-16 Cent, AU58

Early Die State

3264 1802 AU58 NGC. S-236, B-16, R.1. The reverse of this early state piece is cracked between ES and the right branch to the I in AMERICA, apparently as always. A bulge is visible behind the low curls, and a faint crack passes between the F and A to the top right berry. No other die defects are evident on either side of this near-Mint example. The surfaces are splendid with chestnut-brown toning and some darker steel on the obverse. Considerable luster is still visible. An outstanding example. Our EAC grade AU50. Purchased from Tom Reynolds (1/2003). From The Phillip Clover Collection of U.S. Large Cents. (#36317)

3265 1802 — Smoothed — PCGS Genuine. AU Details. S-237, B-10, R.2. This later die state example shows most of the diagnostics of Die States VIII and IX. The date is widely spaced and the reverse berries are distinctively large, as expected from this variety. The obverse strike is strong, and the surfaces are deep in color. Lightly marked. Our EAC grade XF40. Ex: Stack's (9/1987), lot 384. From The Phillip Clover Collection of U.S. Large Cents.

3266 1802 — Environmental Damage — NGC Details. XF. S-238, B-11, R.4. This Die State II coin shows pronounced reverse cracking, as indicated in the Breen reference. The surfaces are dark and evenly matched on each side with light corrosion evident. Well-defined. Our EAC grade VF20. Purchased from Tom Reynolds (2/2002). From The Phillip Clover Collection of U.S. Large Cents.

3267 1802 — Obverse Damage — NGC Details. AU. S-239, B-17, R.3. Early die state example with only nine berries, and prominent die clashing seen on the lower reverse. The obverse was intentionally damaged, especially evident on the upper portion of that side. Deep brown patina overall, relatively well struck on the figure of Liberty. Our EAC grade VF20. Ex: Anderson Dupont Sale (Stack's, 9/1954), lot 401; Dorothy I. Paschal; Ray Chatham (1972); Robinson S. Brown, Jr. (Superior, 9/1986), lot 355. From The Phillip Clover Collection of U.S. Large Cents.

3268 1802 VF25 NGC. S-240, B-18, R.3. Interesting pie-configured reverse cracks give this variety distinction. Also heavily clashed just before the throat. The deep brown surfaces are free from most of the abrasions one would expect, except each side has a shallow scratch. Our EAC grade VF20. Purchased from Doug Bird (4/2000). From The Phillip Clover Collection of U.S. Large Cents. (#36329)

3269 1802 No Stems XF45 NGC. S-241, B-20, R.1. One of only two No Stems reverses for the date, this later die state shows a clear cud above and to the right of the F in OF. Each side is generally clean, but close examination shows planchet depressions between UNITED and STATES, and a scratch on the lower reverse. Deep steel-gray and glossy brown surfaces. Our EAC grade VF20. Purchased (1/1986). From The Phillip Clover Collection of U.S. Large Cents. (#36347)

3270 1802 — Smoothed — PCGS Genuine. AU Details. S-242, B-19, R.2. This distinctive variety shows a very wide fraction and the E in LIBERTY nearly rests on top of the hair of Liberty. This is a later die state with faint evidence of die clashing below the Y in LIBERTY and below the chin of Liberty. Deep brown patina. Our EAC grade VF25. Purchased (4/1988). From The Phillip Clover Collection of U.S. Large Cents.

3271 1803 No Stems XF40 NGC. S-243, B-1, R.2. This No Stems reverse also has the distinctive double fraction bar. Seen here in an early die state with no obvious clashing or cracking. The steel-gray and brown surfaces are generally clean, except for a small cluster of marks on the lower left of the obverse. Our EAC grade VF25. Purchased from Doug Bird (3/1987). From The Phillip Clover Collection of U.S. Large Cents. (#36419)

3272 1803 Small Date, Small Fraction XF40 PCGS. S-244, B-3, R.4. This Small Date, Small Fraction cent has a distinctive berry "floating" to the right of the T in CENT. While the obverse is termed "unfinished," in reality it has been drastically reground. Clashed as usual with the strand of hair below the R in LIBERTY broken from die polishing. The dark brown surfaces are peppered with light marks and a couple of areas of die flaking at the top of Liberty's head and adjacent field. Our EAC grade VF25. Purchased from Chris Victor-McCauley (9/2000). From The Phillip Clover Collection of U.S. Large Cents. (#36350)

3273 1803 Small Date, Small Fraction — Cleaning — PCGS Genuine. XF Details. S-245, B-2, R.3. Clear leaf impression to the right of Liberty's neck on the obverse, die break at the tops of RICA on the reverse. An example of the scarce pairing of obverse 3 and reverse C, the sole uses of each. Olive and pink overtones visit medium-brown surfaces affected by cleaning. Our EAC grade VF25. Purchased (4/1983). From The Phillip Clover Collection of U.S. Large Cents.

3274 1803 Small Date, Small Fraction VF25 NGC. S-246, B-4, R.3. The first of three pairings between Obverse 4 and a reverse, this one Reverse D. A rose overtone graces luminous deep brown surfaces that show several scattered marks but also retains considerable eye appeal. Our EAC grade VF20. Purchased from Patrick (12/1991). From The Phillip Clover Collection of U.S. Large Cents. (#36356)

3275 1803 Small Date, Small Fraction XF40 NGC. S-247, B-5, R.3. Second of three die pairs for the Obverse 4, wavy line through denominator on reverse and clash marks from head nearby. Though abraded in the fields, this cinnamon-brown example has remarkably smooth devices. Our EAC grade VF25. Purchased from J.J. Teaparty (9/1987). From The Phillip Clover Collection of U.S. Large Cents. (#36359)

3276 1803 Small Date, Small Fraction, S-248, B-6, R.4 — Environmental Damage — PCGS Genuine. XF Details. Third and final pairing of Obverse 4, this time with Reverse F, faintly clashed with die lump near the I of UNITED. Blue-brown surfaces remain luminous despite patches of environmental damage in the obverse fields. Our EAC grade VF20. Purchased from Doug Bird (10/1990). From The Phillip Clover Collection of U.S. Large Cents.

3277 1803 100/000 — Reverse Scratched — NGC Details. AU. S-249, B-7, R.2. The classic "null denomination" blunder happened again with this reverse die, but at least it was corrected. This rose-tinged example displays well obverse-up but shows several long reverse scratches. Our EAC grade VF25. Purchased from Jack Beymer (3/2000). From The Phillip Clover Collection of U.S. Large Cents.

3278 1803 Small Date, Small Fraction, S-250, B-10, R.3 — Cleaning — PCGS Genuine. AU Details. An earlier-state piece, bluntly struck but with little actual wear. The green-gold overtones on this coin are ghostly from cleaning, perhaps the side-effect of a misguided attempt to remove several carbon spots on the obverse. Our EAC grade XF45. Purchased from Doug Bird (4/2000). From The Phillip Clover Collection of U.S. Large Cents.

- 3279 1803 Small Date, Small Fraction — Improperly Cleaned — NGC Details. XF S-251, B-8, R.2.** Well-struck with blue-brown surfaces that are a touch too luminous from a past cleaning. A long depression between the ER of AMERICA is of indeterminate origin. Our EAC grade VF20.
*Purchased from Bob's Coins (5/1988).
From The Phillip Clover Collection of U.S. Large Cents.*

**1803 NC-1, B-9 Cent, VG10
Early Die State**

- 3280 1803 Small Date, Small Fraction VG10 NGC. NC-1, B-9, High R.5.** This example shows no evidence of the revery crack that develops through NITE. Here is another NC variety that has fallen considerably in rarity, and is now rated High R.5 with just over 30 examples known. Like some of the others, most of the newly identified examples are in low grades, and there are still less than half a dozen that grade better than VG. Del Bland grades this piece VG8 and tied for seventh finest. Noyes says VG7 and tied for 12th finest.
With the sharpness of Fine, this example has microscopic roughness on each side. The dark brown surfaces show faint green patina with splashes of deep maroon on each side. Our EAC grade VG7.
*Ex: Jim Payette (New Hampshire Numismatics); Doug Bird (2/20/1983); Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 240.
From The Phillip Clover Collection of U.S. Large Cents. (#36368)*
- 3281 1803 Small Date, Small Fraction VF30 NGC. S-252, B-11, R.2.** The sole use of Obverse 6, a long-tenured die nonetheless. Blue and violet overtones grace rich walnut-brown surfaces that show abrasions clustered in the space between Liberty's hair ribbon and the curls at her neck. Our EAC grade VF20.
*Purchased (8/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36371)*
- 3282 1803 Small Date, Small Fraction VF35 NGC. S-253, B-12, R.2.** The sole appearance of Reverse J, which is cracked on the reverse through STATES and the wreath below. Glossy with an overtone that ranges from violet-brown to blue to peach depending on the angle to the light. Our EAC grade VF25.
*Ex: Early Copper Auction (8/1991), lot 119.
From The Phillip Clover Collection of U.S. Large Cents. (#36374)*
- 3283 1803 Small Date, Small Fraction VF35 NGC. S-254, B-13, R.1.** Clashed on the reverse but not cracked on the obverse. Blue-violet touches enhance the glossy chocolate-brown surfaces. Only a few old abrasions affect each side. Our EAC grade VF30.
*Ex: Willard C. Blaisdell; Del N. Bland (9/1978); Robert Vail (11/21/1988); Del N. Bland; Robert Vail; Dr. Willard Carmel (Superior, 9/1997), lot 307; Jack Beymer (3/2000).
From The Phillip Clover Collection of U.S. Large Cents. (#36377)*
- 3284 1803 Small Date, Small Fraction VF35 NGC. S-255, B-14, R.1.** Reverse with clashes lapped away, cud at first part of STATES. A generally smooth midrange example of this accessible die pair with cinnamon and violet overtones. Our EAC grade VF20.
*Purchased from Tom Reynolds (4/1989). Ex: Stack's (12/6/1978).
From The Phillip Clover Collection of U.S. Large Cents. (#36380)*

- 3285 1803 Small Date, Small Fraction, S-256, B-15, R.3 XF45 NGC.** A smooth Choice XF example of this scarce die pair in a relatively early state. Rosy overtones are visible on the olive-brown surfaces and the reverse adds a touch of gold. Our EAC grade VF30.
*Purchased from Tom Reynolds (4/2002). Ex: 1987 EAC, lot 208; J.R. Frankenfield (Superior, 2/2001), lot 564.
From The Phillip Clover Collection of U.S. Large Cents. (#36383)*
- 3286 1803 Small Date, Large Fraction — Smoothed — VF20 PCGS Genuine. VF Details. S-257, B-16, R.2.** An early die state from so-called "perfect dies" with a faint clash mark inside the wreath. This dark steel-brown example, with lighter brown devices, shows light corrosion, with evidence of obverse burnishing. Our EAC grade Fine 15.
*Purchased from Tom Reynolds (12/1988).
From The Phillip Clover Collection of U.S. Large Cents.*
- 3287 1803 Small Date, Large Fraction — Altered Surface — VF20 PCGS Genuine. VF Details. S-258, B-17, R.1.** The usual arcing die crack at the lower left obverse is faint but visible. Bluish-brown surfaces have lighter tan devices with myriad circulation marks on each side. Our EAC grade VF20.
*Purchased from Mark B. Hotz (7/1990).
From The Phillip Clover Collection of U.S. Large Cents.*
- 3288 1803 Small Date, Large Fraction — Cleaning — XF40 PCGS Genuine. XF Details. S-259, B-18, R.4.** An intermediate die state before the reverse rim break appears, this piece has pale blue patina over olive-brown surfaces. A small obverse rim bruise is located at 3 o'clock. Our EAC grade Fine 12.
*Purchased from Chris Victor-McCawley (3/1997).
From The Phillip Clover Collection of U.S. Large Cents.*
- 3289 1803 Small Date, Large Fraction — Bent — NGC Details. VF. S-260, B-19, R.1.** Both sides have smooth medium brown surfaces with trivial marks and a tiny rim nick over the B in LIBERTY. Lighter tan color hugs the devices. Our EAC grade Fine 15.
*Purchased from Tom Reynolds (4/1988).
From The Phillip Clover Collection of U.S. Large Cents.*
- 3290 1803 Small Date, Large Fraction VF30 NGC. S-261, B-20, R.2.** A heavy arc die crack is visible at the lower left obverse with a die bulge near the rim at 7 o'clock. This die crack is similar to that seen on S-258. Pleasing medium olive and steel-brown surfaces only show the usual handling marks expected for the grade. Our EAC grade Fine 15.
*Ex: Norm Pullen (3/1983); Jack H. Robinson (Superior, 1/1989), lot 583.
From The Phillip Clover Collection of U.S. Large Cents. (#36407)*
- 3291 1803 Small Date, Small Fraction — Environmental Damage — VF20 PCGS Genuine. S-262, B-21, R.3.** An intermediate die state showing the obverse crack across the bust, but with no evidence of the reverse crack through STATE. Old green patina resides on steel-brown surfaces that show faint porosity but few other blemishes. Our EAC grade Fine 12.
*Purchased from Tom Reynolds (9/2000).
From The Phillip Clover Collection of U.S. Large Cents.*
- 3292 1803 Small Date, Small Fraction VF30 NGC. S-263, B-22, R.3.** A late die state, nearly terminal, although without the crack from the second T in STATES down to the leaf. This lovely piece has the rim break below the date. Attractive deep olive surfaces with light tan outlining the devices. Our EAC grade VF25.
*Purchased from Tom Reynolds (9/1990). Ex: B. Smith; Jim McGuigan (5/1981); Dr. Thomas S. Chalkley (Superior, 1/1990), lot 478.
From The Phillip Clover Collection of U.S. Large Cents. (#36389)*

**1803 S-264, B-24 Cent, Fine Details
Large Date, Small Fraction**

- 3293 1803 Large Date, Small Fraction — Burnished — NGC Details. Fine. S-264, B-24, High R.4.** Once considered one of the “Big Four” of the early date cents, the S-264 has fallen in rarity during recent years due to the discovery of several lower grade examples. When Sheldon published his first edition, *Early American Cents*, this variety was called R.6 with only about 15 pieces known. Today, nearly 100 exist. Even with that population, less than 10 examples grade better than VG, so collectors will have to accept any piece that is available. Noticeably corroded at one time, this dark steel example has been burnished to diminish the rough appearance, and now exhibits a glossy look. Our EAC grade AG3.
Ex: Anderson Dupont (*Stack's*, 9/1954), lot 476; Dr. Charles L. Ruby (*Superior*, 2/1974), lot 623; Fred Werner; *Superior* (11/1976), lot 62; Dr. Willard J. Carmel, Jr.; Del Bland; New England Rare Coin Auctions (4/1978), lot 587; Roger S. Cohen, Jr. (*Superior*, 2/1992), lot 1011; Chris Victor-McCawley (9/2002).
From The Phillip Clover Collection of U.S. Large Cents.

**1803 S-265, B-23 Cent, XF Details
Ex: Dr. George French Collection**

- 3294 1803 Large Date, Large Fraction — Environmental Damage — NGC Details. XF. S-265, B-23, R.4.** Several die cracks are noted at the upper reverse of this late die state example. A distinctive cent exhibiting a blend of steel, olive, maroon, and orange patina on each side with minor corrosion on the reverse. Our EAC grade Fine 12.
Ex: Dr. George P. French (B. Max Mehl, 1929 FPL), lot 331; T. James Clark; R.E. Naftzger, Jr. (*New Netherlands Coin Co.*, 11/1973), lot 581; Doug Bird; Gary Ruttenberg (McCawley and Grellman, 8/1996), lot 260.
From The Phillip Clover Collection of U.S. Large Cents.
- 3295 1804 AG3 NGC. S-266a, B-1, R.2.** The early die state with no rim breaks on either side. This example is well worn, with medium olive surfaces and only a few trivial handling marks that are associated with the grade. Our EAC grade AG3.
Ex: Robert Woods; Charles W. Woodruff (11/1991); Dr. Willard Carmel (*Superior*, 9/1997), lot 346.
From The Phillip Clover Collection of U.S. Large Cents. (#36422)

- 3296 1804 Good 6 NGC. S-266b, B-1, R.2.** The intermediate die state has a rim break on RTY of LIBERTY, but no reverse rim break. This piece shows considerable wear, although retains all design elements, including the date and lettering. Steel-blue field toning accompanies lighter brown devices with pleasing surfaces showing only microscopic roughness and scattered marks. Our EAC grade Good 6.
Purchased from Howard Whitaker (2/1999).
From The Phillip Clover Collection of U.S. Large Cents. (#36422)

**1804 S-266c, B-1 Cent, Fine 12
Obverse and Reverse Rim Breaks**

- 3297 1804 Fine 12 NGC. S-266c, B-1, R.2.** The popular late die state with an obverse rim break on RTY of LIBERTY and a reverse rim break on MERI, just missing the left top of the C. This attractive and nicely detailed cent has deep steel-brown patina in the fields with chocolate-brown devices. A glass reveals slight surface roughness with a trivial rim nick below the date, but the overall appearance is quite acceptable. Our EAC grade Fine 12.
Purchased from River Hollow Coins (5/1984). Ex: Howard Whitaker.
From The Phillip Clover Collection of U.S. Large Cents. (#36422)
- 3298 1804 Restrike MS63 Brown NGC.** The so-called Restrike was actually a private issue struck from mismatched coinage dies that originated in a scrap iron sale at the Mint in 1833. The obverse die was altered from 1803 Sheldon 261; the reverse die had struck 1820 cents. It is believed that these pieces were struck in the 1860s, or perhaps as late as the 1870s. Both sides are lustrous with emerald-green and iridescent toning. Our EAC grade MS60.
Purchased (3/1984).
From The Phillip Clover Collection of U.S. Large Cents. (#45344)
- 3299 1805 XF40 NGC. S-267, B-1, R.1.** An early die state showing only faint clash marks. This dark steel example has carefully burnished with associated gloss apparent on the obverse. Minor contact marks are evident on each side. Our EAC grade VF25.
Ex: *Stack's* (9/1987), lot 395.
From The Phillip Clover Collection of U.S. Large Cents. (#36427)
- 3300 1805 VF35 NGC. S-268, B-2, R.3.** A faint bulge is evident in the left obverse field of this pleasing specimen. The obverse has light chocolate-brown with traces of maroon, and the reverse has darker olive-brown with hints of greenish toning. Scattered marks are expected but the surfaces are attractive. Our EAC grade VF25.
Purchased from Tom Reynolds (12/1987).
From The Phillip Clover Collection of U.S. Large Cents. (#36430)
- 3301 1805 — Improperly Cleaned — NGC Details. XF. S-269, B-3, R.1.** This late die state specimen has a faint crack through the base of the date with heavy clash marks around the bust. Cleaned and recolored with mostly deep steel-blue surfaces that show trivial marks. Our EAC grade VF25.
Purchased (3/1985).
From The Phillip Clover Collection of U.S. Large Cents.
- 3302 1806 — Smoothed — PCGS Genuine. AU Details. S-270, B-1, R.1.** The obverse is clashed, cracked, and bulged on this late die state specimen. The surfaces have been lightly burnished to diminish corrosion. Deep steel-blue on both sides with hints of olive on the profile. Our EAC grade VF30.
Ex: Jack Beymer; Doug Bird (4/1988).
From The Phillip Clover Collection of U.S. Large Cents.

- 3303 1807 Comet VF30 NGC. S-271, B-1, R.1.** The Comet-like die flaw is faint but visible on this heavily clashed early die state cent. Cleaned and recolored, both sides have light porosity with tan devices. A few minor marks include a small dent on the obverse rim at 9 o'clock. Our EAC grade Fine 15.
Purchased from Jack Beymer (3/2001).
From The Phillip Clover Collection of U.S. Large Cents. (#36454)

**1807/6 S-272, B-2 Cent, VG Details
Small 7 over 6**

- 3304 1807/6 Small 7 — Obverse Scratched — NGC Details. VG. S-272, B-2, High R.4.** There is no evidence of clash marks or die cracks on this early die state example. The obverse has a heavy scratch in the hair below the ribbon, but otherwise, the surfaces are attractive with only trivial circulation marks. The medium olive-brown surfaces exhibit microscopic roughness that is expected on a lower grade copper. Darker field patina provides a pleasing two-tone appearance. Our EAC grade Good 5.
Purchased from Doug Bird (5/1998).
From The Phillip Clover Collection of U.S. Large Cents. (#36439)

- 3305 1807/6 Large 7 — Improperly Cleaned — NGC Details. VF. S-273, B-3, R.1.** An early die state showing no clash marks, die bulges, or cracks, this piece has been cleaned and recolored with dark brown surfaces and reddish-brown devices. Our EAC grade VF20.
Purchased (3/1984).
From The Phillip Clover Collection of U.S. Large Cents.

- 3306 1807 Small Fraction VF20 NGC. S-274, B-4, R.2.** A late die state, this piece shows a reverse bulge at STA that nearly obliterates those letters. When we describe a bulge or die bulge, that means the actually die was sinking at that area, so that the level of the die, and thus the elements engraved in the die, was below the planchet surface so that those portions failed to appear on the coin when it was struck. A pleasing two-tone specimen with nice surfaces, the fields are dark mahogany and the devices are lighter brown. Our EAC grade VF20.
Purchased from Robinson, Victor-McCawley (9/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36445)

- 3307 1807 Large Fraction XF40 PCGS. S-275, B-5, R.3.** The obverse has light clash marks, but otherwise both sides are free of die anomalies. The smooth surfaces show scattered marks that are expected for the grade. Both sides have intermingled olive, steel, tan, and maroon toning. Our EAC grade VF25.
Purchased from Tom Reynolds (2/1989).
From The Phillip Clover Collection of U.S. Large Cents. (#36448)

- 3308 1807 Large Fraction XF40 NGC. S-276, B-6, R.1.** Minor clash marks and die bulges are evident on this piece, with the reverse rotated to medal-turn die alignment. The surfaces only show a few inconsequential marks with lovely steel-blue toning. Our EAC grade VF30.
Purchased (6/1983).
From The Phillip Clover Collection of U.S. Large Cents. (#36451)

**1808 S-277, B-1 Cent, XF40
Latest Die State**

- 3309 1808 XF40 NGC. S-277, B-1, R.2.** Star 1 at the lower left is extremely weak although fully visible on this example, while many others have that star entirely invisible. The reverse has heavy cracks and clash marks on this late state specimen with the usual arcing crack from the D to the wreath and final S. Another crack extends through the upright of that D to the wreath, and a third crack begins at a clash mark inside the wreath through ON to the border between AM. This is one of the latest die states known for S-277. Trivial marks appear on the surfaces with light brown toning on the obverse and medium brown on the reverse. Our EAC grade VF30.
Ex: Stack's (4/1988), lot 2129.
From The Phillip Clover Collection of U.S. Large Cents. (#36457)

**1808 S-278, B-2 Cent, XF40
Early Die State**

- 3310 1808 XF40 NGC. S-278, B-2, R.3.** This piece appears to be an early die state with light flowlines and few clash marks, if any. Only about half of the border dentils appear on the obverse, and less than half on the reverse. Both sides show light brown and tan, with darker toning on the devices, and dark olive at the lower reverse. Our EAC grade VF35.
Ex: Stack's (4/1988), lot 2130.
From The Phillip Clover Collection of U.S. Large Cents. (#36460)

- 3311 1808 — Cleaning — PCGS Genuine. AU Details. S-279, B-3, R.1.** This early die state specimen has perfect dies with a slightly uneven strike missing the border dentils at the right side of the obverse. Both sides have deep steel-blue surfaces with scattered marks. Our EAC grade XF40.
Purchased from Jack Beymer (9/1984).
From The Phillip Clover Collection of U.S. Large Cents.

**1809 S-280, B-1 Cent, AU53
Only Known Variety**

- 3312 1809 AU53 NGC. S-280, B-1, R.2.** The S-280 is the only variety known for 1809, and it is in high demand by date and type collectors, as well as variety specialists. The only other single-variety dates are 1804 and 1806. This intermediate die state has a single crack through the E in STATES to the wreath, branching into two cracks within the top leaves. Traces of luster are visible on both sides, with a blend of olive and steel-brown toning. A highly attractive Classic Head cent. Our EAC grade VF35.
Purchased from Jack Beymer (4/1985). Ex: Kagin's (1/1985); Del N. Bland (4/1985).
From The Phillip Clover Collection of U.S. Large Cents. (#36466)

- 3313 1810/09 — Environmental Damage — NGC Details. AU. S-281, B-1, R.1.** Faint clash marks are noted on both sides of this intermediate die state cent. The deep steel-brown surfaces show scattered marks and minor corrosion. Probably cleaned and recolored. This cent and the 1798 S-187 were the first two pieces that Phil Clover purchased for his collection. Our EAC grade VF25.
Purchased (1/1983).
From The Phillip Clover Collection of U.S. Large Cents.

- 3314 1810 — Environmental Damage — Genuine PCGS. VF Details. S-282, B-3, R.2.** This early die state cent shows no clash marks or die cracks. Both sides are deep steel with light porosity but no other imperfections. Cleaned and recolored with light tan on the devices. Our EAC grade VF20.
Purchased (8/1988).
From The Phillip Clover Collection of U.S. Large Cents.

- 3315 1810 VF30 NGC. S-283, B-4, R.2.** An intermediate die state showing a gap between the rim and dentils at the upper left obverse. This piece has been cleaned and retoned with deep steel surfaces that show hints of coppery-tan color. Our EAC grade VF25.
Purchased (5/1984).
From The Phillip Clover Collection of U.S. Large Cents. (#36478)

- 3316 1810 — Environmental Damage — PCGS Genuine. XF Details. S-284, B-5, R.3.** Several narrow rim breaks are evident on the reverse. The dark steel surfaces of this sharply detailed cent show microscopic roughness but are otherwise problem free. Our EAC grade VF25.
Ex: Bowers and Merena (9/1988), lot 3266.
From The Phillip Clover Collection of U.S. Large Cents.

- 3317 1810 VF30 NGC. S-285, B-2, R.2.** A faint die crack is noted through 10 and the stars at the right. Attractive dark olive and steel surfaces with minimal handling marks. Our EAC grade VF20.
Purchased from Doug Bird (1/1998).
From The Phillip Clover Collection of U.S. Large Cents. (#36484)

- 3318 1811/0 — Environmental Damage — PCGS Genuine. XF Details. S-286, B-2, R.3.** A pleasing example of the overdate, this piece has steel-blue surfaces with lighter brown on the devices, showing faint roughness. Our EAC grade Fine 15.
Purchased from Doug Bird (1/1991).
From The Phillip Clover Collection of U.S. Large Cents.

- 3319 1811 — Surfaces Tooled — PCGS Genuine. AU Details. S-287, B-1, R.2.** Minor tooling shows along the left obverse border, outside the first few stars on this otherwise attractive and scarce cent. Sharply detailed with medium to dark olive-brown. Our EAC grade VF25.
Purchased (3/1984).
From The Phillip Clover Collection of U.S. Large Cents.

- 3320 1812 Large Date — Obverse Repaired — NGC Details. XF. S-288, B-3, R.2.** Faint clash marks are noted within the wreath. The obverse shows minor smoothing or tooling in the left field to diminish an unknown blemish. The surfaces are otherwise attractive with light olive on the obverse and bluish-brown on the reverse. Our EAC grade VF20.
Purchased from Tom Reynolds (7/1987).
From The Phillip Clover Collection of U.S. Large Cents.

- 3321 1812 Large Date XF40 NGC. S-289, B-4, R.1.** This early die state has minor clash marks but no flow lines or other die defects. A pleasing olive-brown specimen with splashes of tan and pale blue. Our EAC grade VF20.
Purchased from J.J. Teaparty (9/1987).
From The Phillip Clover Collection of U.S. Large Cents. (#36508)

- 3322 1812 Small Date — Altered Surfaces — PCGS Genuine. XF Details. S-290, B-2, R.1.** Light clash marks are evident within the wreath. Both sides of this sharply detailed cent show light porosity on deep steel-brown surfaces, retaining excellent eye appeal for the quality. Our EAC grade VF30.
Purchased from Jack Beymer (3/1984).
From The Phillip Clover Collection of U.S. Large Cents.

- 3323 1812 Small Date VF30 NGC. S-291, B-1, R.2.** The tops of TES OF are merged with the rim and a crack joins the date and stars on this late state specimen. The pleasing surfaces have trivial marks, blending olive and steel. Our EAC grade VF20.
Purchased from Chris Victor-McCawley (8/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36502)

**1813 S-292, B-2 Cent, AU Details
Middle Die State**

- 3324 1813 — Cleaning — PCGS Genuine. AU Details. S-292, B-2, R.2.** This intermediate die state specimen shows flowlines but few clash marks. The tops of STATES are separated from the border. The pinkish-brown edge confirms that this piece has been cleaned and retoned, but it has traces of luster, and pleasing surfaces with yellowish-brown and light blue color on both sides. Our EAC grade XF40.
Purchased from Denis W. Loring (4/1984). Ex: Herbert Silberman.
From The Phillip Clover Collection of U.S. Large Cents.

- 3325 1813 VF35 NGC. S-293, B-1, R.2.** An earlier die state with light clash marks, although the 3 over 2 feature of the earliest state is not visible. An attractive example with medium olive surfaces showing few marks. Our EAC grade VF20.
Ex: Stack's (4/1988), lot 147.
From The Phillip Clover Collection of U.S. Large Cents. (#36514)

3326 1814 Crosslet 4 AU53 NGC. S-294, B-1, R.1. A perfect dies specimen without clash marks, this lovely cent has splashes of tan, faded from mint red, on olive-brown surfaces with excellent surfaces. Our EAC grade VF35.
Purchased from Tom Reynolds (1/1988).
From The Phillip Clover Collection of U.S. Large Cents. (#36520)

3327 1814 Plain 4 — Environmental Damage — PCGS Genuine. AU Details. S-295, B-2, R.1. An intermediate die state, this piece is sharply detailed with deep steel surfaces that show minor porosity and some hard green patina. Our EAC grade VF35.
Purchased (4/1986).
From The Phillip Clover Collection of U.S. Large Cents.

3328 1823 Copper Restrike MS62 Brown NGC. N-3, R.2. An attractive example of the circa 1860s so-called Restrike, this is a muling of mismatched dies sold by the Mint as scrap iron. The reverse die was used to strike 1813 cents, hence the inclusion of the present lot within the Clover collection. The rim break at the upper left obverse is bold and in high relief. Attractive tan and steel-blue surfaces. Our EAC grade AU50.
Purchased (3/1987).
From The Phillip Clover Collection of U.S. Large Cents. (#81627)

COLONIALS

1652 Pine Tree Threepence, XF40 Noe-34, Seldom-Seen Denomination

3329 1652 Pine Tree Threepence XF40 PCGS. Noe-34, Salmon 1-A, R.4. Pellets at trunk. 17.1 gn. A slate-gray and silver-blue example of this scarce Pine Tree denomination. The tree is bold throughout. A mint-made straight clip is noted at 3 o'clock, and the obverse is misaligned several degrees toward 12 o'clock. Thin, flat areas left of the tree roots and above the 52 in the date suggest a straightened bend. Both sides display a few wispy hairlines. Listed on page 39 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#21)

Large Planchet 1652 Pine Tree Shilling Choice VF, Noe-9

3330 1652 Pine Tree Shilling, Large Planchet VF35 NGC. Noe-9, W-750, Salmon 7a-Diii, R.6. 69.2 gn. No pellets at trunk. Reversed first N in ENGLAND. A cream-gray representative with complete legends and nearly ideal centering. Mildly wavy from rocker press emission, and the lowest branches are faint, as usual for Noe-9. One straight small Mint clip at 9 o'clock. Listed on page 39 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#23)

VF30 Small Planchet 1652 Pine Tree Shilling Noe-29, Salmon 11-F

3331 1652 Pine Tree Shilling, Small Planchet VF30 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 71.0 gn. The D in ENGLAND is entered over a retrograde D. This middle-grade cream-gray example is well defined aside from uneven wear near a brief flan split at 6:30. Nicely centered overall with a portion of the uppermost legends off the flan. There are no mentionable marks. Listed on page 39 of the 2013 *Guide Book*. (#24)

Choice VF Pine Tree Shilling Small Planchet, Noe-16

3332 1652 Pine Tree Shilling, Small Planchet VF35 PCGS. Noe-16, W-835, Salmon 2-B, R.2. 65.90 gns. A late die state with a break merging the two lowest left branches. A pearl-gray shilling with a consistent strike and pleasing detail. There are no noticeable marks. The obverse is mildly uncentered toward 5 o'clock and the reverse moderately uncentered toward 11 o'clock though all legends are fully intact. Listed on page 39 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#24)

Choice AU London Elephant Token Scarce Thin Planchet Variety

3333 (1694) London Elephant Token, Thin Planchet AU55 PCGS. Hodder 2-B, W-12040. Much more elusive than its Thick Planchet counterpart. An essentially unabraded mahogany-brown representative. The left sides are softly struck, retaining the planchet surface in selected areas, while the right border has a normal strike. Listed on page 46 of the 2013 *Guide Book*. Population: 2 in 55, 6 finer (7/12).
Ex: Long Beach Signature (Heritage, 5/2008), lot 2094, which realized \$6,900. (#58)

- 3334** (1694) London Elephant Token, Thick Planchet AU50 NGC. Hodder 2-B, W-12040, R.2. A medium to dark brown example of this popular variety, ostensibly English but die linked to very rare Carolina and New England varieties. Void of relevant marks though the rims show scattered minor crimping. Listed on page 46 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#55)

AU Betts-519 1766 Pitt Halfpenny

- 3335** 1766 Pitt Halfpenny AU50 PCGS. Betts-519, W-8350, R.3. A numismatic tribute to "The Great Commoner" for his work in repealing the hated Stamp Act that hindered trade between Mother England and her colonies. The present medium brown halfpenny has light wear on the cheek and shoulder but is smooth save for a pair of small obverse field depressions near 3 o'clock. Listed on page 50 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#236)

- 3336** 1773 Virginia Halfpenny, Period MS63 Brown PCGS. N. 20-X, W-1670, R.3. Luminous surfaces are largely mahogany with a few flickers of cinnamon. Though lightly marked in places, the surfaces are never-worn. Listed on page 43 of the 2013 *Guide Book*. (#240)

- 3337** 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 27-J, W-1585, R.2. Orange-red peers from the legends and portions of the shield, though most of this Choice halfpenny is medium brown with one small spot on the lower left border of the crown. Abrasions are absent aside from faded marks on the obverse exergue. Listed on page 45 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#241)

- 3338** 1788 Massachusetts Half Cent AU58 NGC. Ryder 1-B, W-6010, R.2. An early die state without the vertical break through the second 8 in the date. A deep brown near-Mint example with smooth surfaces aside from a couple of minor marks near the W in WEALTH. Listed on page 59 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#308)

- 3339** 1787 Nova Eborac Copper, Large Head — Damaged — NGC Details. XF. Breen-985, W-5750, R.6. Much rarer than the usually seen "Normal Head" W-5755. This chocolate-brown example is somewhat wavy and has a number of small roundish digs on the portrait. Another dig is beneath the left (facing) shoulder, the rims show a few tiny dings, the cheek has a vertical gouge, and a pinscratch crosses the chin. Listed on page 68 of the 2013 *Guide Book*.

- 3340** 1787 New Jersey Copper, Outlined Shield AU50 PCGS. Maris 32-T, W-5100, R.2. A splendid representative with dusky mahogany-brown toning, unmarked surfaces, and an even strike. The obverse displays scattered minute mint-made strike-throughs. Listed on page 66 of the 2012 *Guide Book*.
From The Dr. Charles Nelson Collection. (#503)

- 3341** 1786 Vermont Copper, VERMONTENSIVM VF30 PCGS. RR-6, Bressett 4-D, W-2020, R.2. The variety with a "leaping" tree left of the sun. A medium brown example with areas of gray granularity on the reverse. Crisply struck and mark-free. The obverse is misaligned toward 5 o'clock. Listed on page 72 of the 2013 *Guide Book*. (#545)

- 3342** 1786 Vermont Copper, Baby Head Genuine PCGS. RR-9, Bressett 7-F, W-2040, R.3. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that is scratched and has environmental damage. A full date ebony-brown example with granular fields and a few thin marks above the hair ribbon and across the waist of the seated Liberty. The dies are widely rotated. Listed on page 72 of the 2013 *Guide Book*. (#548)

- 3343** 1783 Nova Constellatio Copper, Pointed Rays, Small US AU55 PCGS. Crosby 2-B, W-1865, R.2. A richly detailed chestnut-brown example. A pair of short pin scratches are noted near US, with a third below the 3 in the date. The obverse has scattered tiny planchet flaws, as struck. The reverse has small rim breaks (as made) after the S in LIBERTAS and the latter half of JUSTITIA. Listed on page 54 of the 2013 *Guide Book*.
Ex: FUN Signature (Heritage, 1/2003), lot 5105; Long Beach Signature (Heritage, 2/2003), lot 5056.
From The Dr. Charles Nelson Collection. (#801)

- 3344** 1783 Nova Constellatio Copper, Blunt Rays XF45 PCGS. Crosby 3-C, W-1875, R.3. Medium brown and mahogany-brown compete for territory across evenly struck surfaces. Thin marks are at the obverse periphery and near the S in US. Listed on page 54 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#807)

- 3345** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Reverse Improperly Cleaned — NGC Details. XF. N. 11-X, W-6790, R.4. Well defined with moderate wear and no visible marks. Brick-red and steel-blue shades suggest the piece is recolored and retoned. Struck from a clashed obverse die. Listed on page 87 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection.

- 3346** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 PCGS. N. 13-X, R.2. A late die state with heavy clash marks on obverse, horizontal lines through MIND YOUR BUSINESS, and the B in the last word practically gone. Luminous with blue overtones to chocolate-brown surfaces and numerous peripheral planchet voids, as made. Listed on page 87 of the 2013 *Guide Book*. (#883)

MS61 Brown 1787 Fugio Cent, N. 13-X STATES UNITED, Four Cinquefoils

- 3347** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS61 Brown NGC. N. 13-X, W-6855, R.2. A lovely chocolate-brown Fugio cent that likely was once part of the Bank of New York holdings. Luster glimmers with powder-blue undertones. Unimportant flan granularity on the left half of the sun's rays. Well struck except for the borders near 9 o'clock. Listed on page 87 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#883)

**Near-Mint N. 8-B 1787 Fugio Cent
Pointed Rays, UNITED STATES**

- 3348** 1787 Fugio Cent, UNITED STATES, Cinquefoils AU58 NGC. N. 8-B, W-6740, R.3. Deep medium brown toning is consistent across essentially mark-free surfaces. The strike is a few degrees off-center toward 8:30, but the designs are intact. Minor flan imperfections are as made and usual for the type. The customary die state with bold clash marks. Listed on page 87 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#889)

- 3349** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars VF20 NGC. N. 15-Y, W-6915, R.2. The sole die marriage with two anomalous eight-pointed stars on the reverse. Toned in mahogany and gunmetal hues. A couple of minor flan defects are noted along with a light pinscratch at 3:30 on the reverse. Listed on page 88 of the 2013 *Guide Book*. (#898)

- 3350** 1787 Fugio Cent, New Haven Restrike, Copper MS64 Brown NGC. N. 104-FF, W-17560. The "New Haven Restrike" was struck from copy dies circa 1859, and has for generations been collected by Fugio specialists as if part of the series. **The present example has medal turn**, unusual for the issue. Well struck and unabraded with a chocolate-brown obverse and a mostly medium brown reverse. Listed on page 88 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#916)

**Brass 1778-1779 Rhode Island Ship Token
No Wreath, W-1730, Choice AU**

- 3351** 1778-1779 Rhode Island Ship Token, No Wreath, Brass AU55 NGC. Breen-1139, W-1730, R.3. A majority of Rhode Island ship tokens have a copper appearance, but the present piece is rich green-gold from a brassy alloy. This British propaganda piece is well-defined and minimally abraded but has a few minor gray spots, usual for the issue. VLUGTENDE is removed from the obverse exergue, as issued. Listed on page 50 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#588)

- 3352** (1792-94) Kentucky Token, Plain Edge MS63 Brown NGC. Breen-1155, W-8800, R.1. Rich forest-green and rose-red undertones emerge when this deeply toned token is rotated beneath a light. Sharply struck and mildly prooflike with a smooth reverse and scattered minor obverse contact. Listed on page 75 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#614)

- 3353** 1794 Franklin Press Token MS62 Brown NGC. Breen-1165, W-8850, R.1. Plain Edge. Both sides display a pleasing medium brown, semiglossy appearance with occasional light blue accents on the devices. Generally well struck and lightly abraded for the grade. Listed on page 76 of the 2013 *Guide Book*.
Ex: Dallas Signature (Heritage, 7/2006), lot 63.
From The Dr. Charles Nelson Collection. (#630)

**Smooth MS62 Brown Baker-15
Large Eagle 1791 Washington Cent**

- 3354** 1791 Washington Large Eagle Cent MS62 Brown PCGS. Baker-15, W-10610, R.2. Dusky golden-brown dominates the obverse, though the margin displays aquamarine. The reverse is principally medium brown with a glimpse of gunmetal-blue on the denomination. The surfaces are exemplary for the MS62 level though we note minor flaking at the left (facing) wingtip. Struck in England in hopes of securing a Federal coinage contract. Listed on page 81 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#702)

- 3355** 1791 Washington Small Eagle Cent AU58 PCGS. Baker-16, W-10630, R.3. A lightly handled example of this well made Washington variety. The high points exhibit deep lavender-blue patina while the open fields are lilac-red and the margins are olive-green. Listed on page 81 of the 2013 *Guide Book*.
From The William R. Green Collection. (#705)

- 3356** 1793 Washington Ship Halfpenny, Copper, Lettered Edge AU55 PCGS. Baker-18, W-10855, R.4. Medium brown overall with faded mahogany-red in the legends. Impressively unabraded and problem-free. The reverse die has buckled, as typically seen on this variety. Listed on page 83 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#734)

- 3357** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS63 Brown PCGS. Baker-29B, W-10955, R.1. The holder permits viewing of the edge, which has reeding sloping down to the right. This Baker variant is described as 29B by Rulau but referenced as 29A in Whitman. The obverse is deep mahogany-brown and the reverse is dark brown with lilac, cobalt-blue, and olive undertones. The dies are moderately rotated. Listed on page 83 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#746)

- 3358** Undated Washington Liberty & Security Penny AU55 PCGS. Baker-30, W-11050, R.2. The usual Plain Rims variety. Toned deep golden-brown and lavender-blue with minor marks on Washington's face and a more noticeable diagonal line on the lower left obverse field. Listed on page 84 of the 2013 *Guide Book*. (#767)

- 3359** Undated Washington Liberty & Security Penny AU55 PCGS. Baker-30, W-11050, R.2. Toned deep golden-brown throughout aside from gunmetal-gray at the peripheries. Nicely struck and nearly void of contact with a hint of rub on the high points. Listed on page 84 of the 2013 *Guide Book*.
From The Dr. Charles Nelson Collection. (#767)

- 3360** Undated Washington Liberty & Security Penny MS61 Brown PCGS. Baker-30, W-11050, R.2. ASYLUM edge as customarily seen. A boldly struck Washington piece with satin luster and attractive jade-green and golden-brown toning. Light marks on the forehead and nearby field determine the grade. Listed on page 84 of the 2013 *Guide Book*. (#767)

HALF CENTS

1793 C-3 Half Cent, AU58
Struck in July 1793

3361 1793 AU58 PCGS. CAC. C-3, B-3, R.3. The entire 35,334-coin mintage of 1793 half cents was accomplished through the use of two obverse dies and three reverse dies, with four known combinations. The obverse dies are easily recognized by the bottom bust line, which is smoothly curved on the first die and sharply angled on the second die, as offered here. The second die was combined with two reverse dies, having the stems and ribbons crowding the fraction as on this example, or spread widely apart on the other die. Careful study of the various die states will show that the Cohen and Breen variety classifications reflect the actual order in which the coins were struck. The C-3, B-3 die marriage was the third of the four varieties minted.

It is impossible to know exactly when each of the four varieties was struck, but their similar rarities today suggest they were struck in similar quantities back in 1793, or about 9,000 examples of each. Mint records tell us that 7,000 coins were delivered on July 20; 24,934 on July 26; and 3,400 on September 18, 1793. The 7,000 coins of July 20 were probably struck during the previous couple of days, the second delivery was clearly struck from July 21 through July 26, and the final group of 3,400 was likely struck a day or two before the September 18 delivery.

Among the exceptional examples of Cohen-3 that exist today is this piece, which PCGS has graded AU58. Much of the reverse is covered in tiny rust pits, interpreted as a late die state by most students of the early coppers. The strike is bold and nicely centered with full beaded borders on each side. A trace of wear appears on the high points, and minuscule rim nicks and other marks are evident on the light olive surfaces. Faint splashes of steel-blue and pale blue-green are evident. Our EAC grade AU55.

From The Fred Yee Collection. (#1000)

Cohen-9 1794 Half Cent, VF30

- 3362** 1794 VF30 PCGS. CAC. C-9, B-9, R.2. Manley Die State 1.0, "rare," without a die crack through the cap. The golden-brown fields contrast with steel-gray legends and devices. The obverse is the sharper of the two sides though only the E in CENT is faint. No marks are noticeable. Minor build-up is present on upper design recesses. Our EAC grade Fine 15. (#1003)

**Bold 1794 Half Cent, VF35
C-4a, Terminal Die State**

- 3363** 1794 VF35 PCGS. C-4a, B-6b, R.3. Manley Die State 4.0, "very scarce." A richly detailed chocolate-brown Choice VF example. Clash marks are prominent, as is a bulge beneath the cap, but these mint-made features only further increase the charm. Thin marks and minor granularity near the date are all that limit the grade. Our EAC grade VF20. (#1003)

**AU Sharpness 1794 Half Cent
C-2a, Small Edge Letters**

- 3364** 1794 — Cleaning — PCGS Genuine. AU Details. C-2a, B-2b, High R.2. The current generation holder allows edge viewing to confirm the PCGS attribution. This sharply detailed Liberty Cap half cent lacks consequential marks and has consistent blended walnut-brown and olive-green toning. Although possibly recolored, the surfaces are appealing to the early copper specialist. Our EAC grade VF30.
From The Fred Yee Collection.

-
- 3365** 1795 Lettered Edge — Corroded — NCS. VF Details. C-1, B-1, R.2. Cream-gray motifs and legends contrast with deep brown fields. The obverse is moderately granular and the reverse is only lightly granular. Small reverse rim dings are noted at 4 and 10 o'clock, and the obverse has a couple of faint pinscratches. Our EAC grade VG8.
From The Dr. Charles Nelson Collection. (#1009)

**MS63 Brown 1800 Half Cent, C-1
Pleasing Smooth Surfaces**

- 3366** 1800 MS63 Brown PCGS. C-1, B-1, R.1. Manley Die State 4.0. A satiny chocolate-brown representative with hints of deeper gunmetal toning on the high points. Marks are refreshingly absent, and we mention a small spot above the earlobe solely as an identifier. Very scarce in the present quality, though readily available in well circulated condition. Our EAC grade AU55. (#1051)

-
- 3367** 1804 Plain 4, No Stems AU58+ PCGS. CAC. C-13, B-10, R.1. Manley Die State 2.0. A satiny and minimally abraded near-Mint half cent. Light golden-brown and lime-green toning visits nicely struck surfaces. A charming example of the Draped Bust type. Our EAC grade AU50.
From The Fred Yee Collection. (#1063)

- 3368** 1804 Plain 4, Stems VF35 PCGS. C-11, B-12, High R.3. The sole Plain 4, With Stems, Normal Chin die pair, scarce regardless of grade. This luminous example has cinnamon overtones on walnut-brown surfaces with a copper spot at the top of the L in HALF. Our EAC grade VF20. (#1066)

**Spiked Chin 1804 Half Cent
MS63 Brown, C-8**

-
- 3369** 1804 Spiked Chin MS63 Brown PCGS. CAC. C-8, B-7, R.1. Manley Die State 2.0. The borders display glimpses of light golden-brown while the centers are deeper medium brown. Nicely struck and minimally abraded with good luster and pleasing eye appeal. The final Cohen variety for the hardy Spiked Chin obverse die, which had earlier coined C-5, C-7, and C-6. Our EAC grade AU55. (#1075)

3370 1806 Small 6, No Stems — Smoothed — PCGS Genuine. Unc. Details. C-1, B-3, R.1. Faint pinscratches on the field beneath the chin and on Liberty's neck suggest light tooling. This sharply impressed example has aquamarine toning with glimpses of fire-red in obverse design recesses. Our EAC grade AU50.
From The Fred Yee Collection.

3371 1806 Small 6, No Stems MS62 Brown PCGS. C-1, B-3, R.1. For a "Brown" coin, this luminous piece shows considerable copper and even orange hues. Blues and violets are present elsewhere, a majority on the reverse, with a few small carbon spots on the margins. Our EAC grade AU55.
From The Fred Yee Collection. (#1093)

3372 1806 Large 6, Stems MS62 Red and Brown NGC. CAC. C-4, B-4, R.1. Manley Die State 1.0. Brick-red persists in design crevices though the open fields and devices are deep brown. Void of any consequential contact. The strike is good despite bluntness on the bust tip and opposite at the top of the wreath and on the second S in STATES. Our EAC grade MS60. (#1100)

3373 1809 MS63 Brown NGC. C-3, B-4, R.1. Manley Die State 1.0. Chocolate-brown and medium brown with the deeper shades principally on the reverse. Nicely struck and satiny with a smooth obverse and only unimportant contact on the reverse. Our EAC grade AU55.
From The Dr. Charles Nelson Collection. (#1123)

3374 1826 MS63 Brown PCGS. CAC. C-1, B-1, R.1. Manley Die State IV. The crossing die file marks to the right of the date immediately identify this variety. This well-detailed Select specimen displays smooth light brown surfaces with iridescent lilac toning that adds to its overall eye appeal. Our EAC grade AU55. (#1144)

3375 1833 MS63 Red and Brown PCGS. C-1, B-1, R.1. Manley Die State 2.0. This intricately struck Select Mint State half cent shows considerable fire-red mint color, though the high points and open fields are either apple-green or steel-gray. Unabraded with one small obverse spot at 6 o'clock. Our EAC grade MS62.
From The Fred Yee Collection. (#1163)

3376 1835 MS64 Red and Brown PCGS. CAC. C-2, B-2, R.1. Manley Die State 3.0, "scarce." An intricately struck Choice type coin whose lustrous surfaces are virtually unabraded. Deep cherry-red dominates the borders while the centers are mostly blended olive-green and steel-blue. Our EAC grade MS62. (#1169)

Lustrous Gem Red and Brown Cohen-1 1835 Half Cent

3377 1835 MS65 Red and Brown PCGS. CAC. C-1, B-1, R.1. Manley Die State 1.0. Dynamic cartwheel luster illuminates this well struck Gem. The cheek and open fields are mellowed to gunmetal-gray. No marks are of any consequence though tiny flecks are present. PCGS has yet to certify any examples with a higher numerical grade (8/12). Our EAC grade MS63.
From The Fred Yee Collection. (#1169)

3378 1835 MS64 Red PCGS. C-1, B-1, R.1. Manley Die State 1.0. The obverse is honey-gold but the reverse displays deep orange-red and forest-green colors. Well struck and mark-free with scattered minor obverse carbon. Encased in an old green label holder. Our EAC grade MS63. Population: 31 in 64 (1 in 64+) Red, 5 finer (7/12). (#1170)

3379 1855 MS64 Red PCGS. C-1, B-1, R.1. A lustrous peach-red near-Gem that has an arc of sea-green on the obverse border between 5 and 9 o'clock. Essentially void of marks, and carbon is nearly as negligible. Our EAC grade MS64.
From The Fred Yee Collection. (#1235)

LARGE CENTS

1793 S-2 Chain Cent, AU Details

3380 1793 Chain, AMERICA — Surfaces Tooled — PCGS Genuine. AU Details. S-2, B-2, High R.4. At first glance, this piece looks like an amazing Mint State Chain cent. It is only on close inspection that the burnishing and other tooling becomes apparent. It is especially obvious on the reverse, where all of the interior spaces in the chain have been tooled, for example. All of that work was done to simulate original mint color. After being tooled, the entire coin has been retoned to light brown, olive, and steel. While all of that work may seem unfortunate, we suspect that the coin was highly unattractive before any of that restoration work occurred. Despite all of its shortcomings, this is still a most attractive Chain cent. We have no EAC grade for this piece.
From The Fred Yee Collection.

Fine Details 1793 Chain Cent
S-4, Periods After Date and LIBERTY

- 3381** 1793 Chain Periods — Surface Damage — PCGS Genuine Secure. Fine Details. S-4, B-5, R.3. All legends are readable on this deep brown example. UNITED is faint but all letters are fully evident. The surfaces are evenly and moderately granular. The lower half of the obverse displays a few pinscratches. A coveted introductory type. S-4 is the sole Periods variety. Our EAC grade Good 5.

- 3382** 1793 Wreath Cent, Vine and Bars — Burnished — NGC Details. VG. S-9, B-12, R.2. This deep brown Wreath cent has sharp legends and well defined types. Moderately granular throughout, and burnished at one time to remove verdigris. There are no consequential marks. Our EAC grade Good 4.

VF Details 1793 Wreath Cent
S-9, Vine and Bars Edge

- 3383** 1793 Wreath Cent, Vine and Bars — Environmental Damage — Genuine PCGS. VF Details. S-9, B-12, R.2. This dark brown example is evenly granular throughout but is well defined and surprisingly unabraded. The fraction and LIBERTY are faint but all other legends are crisp. S-9 is the most available Wreath cent variety, yet pursued as a representative of the early single year type. Our EAC grade VG8.

XF Details 1793 Wreath Cent
S-9, Vine and Bars Edge

- 3384** 1793 Wreath Cent, Vine and Bars — Environmental Damage — PCGS Genuine. XF Details. S-9, B-12, R.2. Much sharper than the typical Wreath cent, with only light wear on the curls and leaves. Abrasions are absent, though the fields are evenly and moderately granular. The arm's length eye appeal is formidable, and those who examine it beneath a loupe will find the surfaces more than acceptable. Our EAC grade VF20.
From The Fred Yee Collection.

1793 S-8 Wreath Cent, MS63 Brown
Reverse on Crosby-Levick Plate
Tied for Third Finest Known

3385 1793 Wreath Cent, Vine and Bars MS63 Brown NGC. S-8, B-13, R.3. The famous Crosby-Levick plate, published in the *American Journal of Numismatics* in April 1869, was the earliest photographic reproduction of large cents. That plate illustrated 12 obverse dies and 10 reverse dies. Since that publication only three more dies have been discovered, two obverse and one reverse. The Crosby-Levick plate was a remarkable achievement for the time. Equally remarkable is that the photography in 1869 was so good that coins can still be matched to that plate.

The S-8 or B-13 die marriage features the Horizontal Stem obverse die with a reverse showing a Triangular Bow, and a diagonal die bulge or (later) crack inside the wreath. The Del Bland Census published in Walter Breen's *Large Cent Encyclopedia* records two Mint State coins graded MS63 and MS60, followed by seven coins that he grades AU55, including the present specimen. Bill Noyes grades this specimen just AU50, and tied for eighth finest behind one MS63 and six AU55 coins. In our opinion, Bland and Noyes are both conservative with their grades for this specimen.

Both sides show lightly mirrored fields with sharp details and nice centering. The obverse is mahogany with wisps of pale blue and olive toning. The reverse has deeper reddish-brown and olive toning. A splendid specimen with no evidence of wear and exceptional eye appeal. Our EAC grade MS60.

Ex: Sylvester S. Crosby; Dr. Augustine Shurtleff (2/27/1901); Museum of Fine Arts, Boston; 1976 ANA (Stack's, 8/1976), lot 223; later, Stack's, privately; Eric Streiner; Superior (5/1992); John MacDonald; Robert Clark; ANA (Bowers and Merena, 8/2000), lot 209; Superior (9/2002), lot 33.

From The Fred Yee Collection. (#1347)

**1793 S-11c, B-16c Wreath Cent
Lettered Edge, One Leaf**

- 3386 1793 Wreath Cent, Lettered Edge PCGS Genuine. S-11c, B-16c, R.3.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been corroded.

A single leaf follows DOLLAR on the edge of the S-11c cent. Both sides have splashes of light brown on the deep steel-brown surfaces of this moderately corroded cent. Our EAC grade Fine 12.

- 3387 1793 Wreath Cent, Lettered Edge — Surface Damage — PCGS Genuine. S-11c, B-16c, Low R.3.** In our opinion, the piece has the details of a VF specimen that has been damaged and burnished. This example shows a single leaf after the word DOLLAR on the edge. Blue-brown surfaces are inordinately glossy and show several broad defects and rim bumps, yet this coin remains desirable as a confluence of the Lettered Edge and Wreath cent designs. Our EAC grade Good 5.

**Rarely Seen S-53 1794 Cent
Fine Details, Head of 1794**

- 3388 1794 Head of 1794 — Environmental Damage — PCGS Genuine. Fine Details. S-53, B-45, R.6.** A rare variety, S-53 shares its reverse die with several other Sheldon marriages but the obverse die is unique to S-53. The 4 in the date lightly touches the bust and the 794 are widely spaced relative to the 17. The present example is well defined except for OF AMERICA, which is faint but readable. The dark brown surfaces are granular, and we note thin scratches on the cap and through the eye. Our EAC grade Good 4.

- 3389 1794 Head of 1794 VF20 PCGS. S-54, B-46, R.3.** The types are clear on this mildly glossy tan-brown and steel-gray example. STATES OF is faint but all other legends are crisp. The obverse displays light planchet striations. Our EAC grade VG10.(#901374)

- 3390 1794 Head of 1794 — Environmental Damage — NGC Details. VF. S-60, B-52, R.3.** The gunmetal-gray fields are mildly granular and contrast with cream and mahogany high points. We note a moderate mark on the chin and a hair-thin line near the left ribbon end. All legends are readable with occasional fading near the borders. Our EAC grade VG10.

- 3391 1794 Head of 1794 — Environmental Damage — PCGS Genuine. XF Details. S-44, B-33, R.1.** This deep brown representative is evenly granular but well detailed. Marks are inconsequential except for one tick on the forehead and a few faint thin lines on the cheek. Our EAC grade Fine 15.

- 3392 1794 Head of 1794 — Corroded — NCS. XF Details. S-55, B-47, R.2.** The radial die crack at 8 o'clock on the obverse aids attribution. A sharply detailed representative of this coveted Liberty Cap date. The dark brown surfaces are granular but there are no visible abrasions.

From The Dr. Charles Nelson Collection. (#901374)

**Smooth Near-Mint 1795 Cent
Plain Edge, S-76b**

- 3393 1795 Plain Edge AU58 PCGS. CAC. S-76b, B-4b, R.1.** A satiny chocolate-brown near-Mint Liberty Cap cent with a hint of olive-green patina on the high points. Essentially void of marks, and carbon is equally trivial aside from a few gray flecks near the A in STATES. S-76b is regularly encountered in well circulated grades but is rare in the present exceptional quality. Our EAC grade AU50. *From The Fred Yee Collection. (#1380)*

- 3394 1796 Liberty Cap VG8 PCGS. S-81, B-2, R.3.** All peripheral legends are bold, and the portrait is well outlined. ONE CENT is faint and the surfaces are mildly granular. Toned medium brown with a darker obverse area between 7 and 9 o'clock. Our EAC grade Good 4.(#1392)

- 3395 1796 Draped Bust, Reverse of 1795 — Filed Rims — PCGS Genuine. S-97, B-20, R.3.** The PCGS number ending in .82 suggests Filed Rims as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has filed rims and environmental damage. The rims display file marks throughout, and the medium brown surfaces are moderately granular aside from pitting near Liberty's profile and drapery. Our EAC grade Fine 12.

- 3396 1798 First Hair Style — Surface Tooled — PCGS Genuine. AG. S-144, B-1, High R.5.** This extensively worn, oddly colored orange-and-blue piece has tooling in the fields. Nonetheless, as a representative of a rare die pair, this coin commands considerable attention. Our EAC grade AG3.

**Very Rare NC-2 1798 Cent
New Specimen, VG Details
Unrecorded Die State**

- 3397 1798 First Hair Style — Environmental Damage — PCGS Genuine. VG Details. NC-2, B-16, High R.7.** The broad yet incomplete die break above the RTY in LIBERTY attributes this very rare 1798 marriage. The break presumably accounts for the extreme rarity of NC-2, now known by seven examples, including two in the present sale. This specimen has the rim break over the R, with a crack extending to the right, but lacks the second rim break over the Y that is seen on every other known example except the perfect dies Dan Holmes coin. The present dark brown cent is evenly porous. Most of STATES OF is illegible but the other legends are readable. Our EAC grade AG3.

- 3398** 1798 First Hair Style VF35 NGC. S-153, B-12, R.3. Swelling on the left obverse field is characteristic of this early cent marriage. A medium brown representative with minutely granular surfaces. The obverse displays scattered small marks while the reverse is smooth aside from lines near the F in OF. Our EAC grade VF20. (#1431)

Rare 1799 Cent, S-189, Fair 2

- 3399** 1799 Fair 2 PCGS. S-189, B-3, R.2. Many legends emerge when this key date cent is examined beneath a light. Most of LIBERTY is clear, as is ONE CENT, OF AMERICA, and the denominator. The loops of the 9s in the date are evident. The deep brown and gray surfaces are moderately granular and we note a small obverse rim ding at 5:30. Our EAC grade Fair 2. (#1443)

- 3400** 1801 3 Errors — Improperly Cleaned — NGC Details. XF. S-219, B-11, R.2. Breen Die State VIII. A lavender and sea-green example of this popular *Guide Book* variety. The three errors are an inverted U in UNITED, a missing left stem, and a 1 over 000 fraction. Hairlined and a bit bright but much sharper than the typical survivor. Our EAC grade Fine 12.

- 3401** 1802 XF45 NGC. S-225, B-1, R.3. Luster fills the hair and other protected regions of this Draped Bust cent. The deeply blended walnut-brown and gunmetal-blue surfaces are lightly abraded save for a tick on the jaw and a slender mark on the forehead. Our EAC grade VF30. (#1470)

- 3402** 1803 Small Date, Small Fraction XF45 NGC. S-244, B-3, R.4. Multiple clash marks (as made) near the throat help confirm the Sheldon variety. The medium brown surfaces are minimally abraded and glimpses of luster persist. Our EAC grade VF30. (#1482)

**AU Details S-262 1803 Cent
Small Date, Small Fraction**

- 3403** 1803 Small Date, Small Fraction — Obverse Scratched — NGC Details. AU. S-262, B-21, R.3. S-262 is a conditionally rare variety rarely seen with the sharpness of the present example. The M in AMERICA is strongly repunched, while the vertical die crack through the bust tip confirms the marriage. The medium brown surfaces glimmer with luster. The NGC designation refers to moderate obverse field marks at 3 and 9 o'clock, and we also note a mahogany spot that overlaps the hair ribbon. Our EAC grade VF35.

- 3404** 1803 Small Date, Small Fraction — Cleaning — PCGS Genuine. AU Details. S-250, B-10, R.3. The obverse is glossy from a past wipe but the coin shows scant wear from circulation. Toned deep brown though olive, rose, and gunmetal shades emerge when the coin is rotated beneath a light. Our EAC grade VF25. *From The Fred Yee Collection.*

**Uncirculated Details 1803 Cent
S-247, Small Date, Small Fraction**

- 3405** 1803 Small Date, Small Fraction — Cleaning — PCGS Genuine. Unc. Details. S-247, B-5, R.3. Rotation beneath a light reveals a sea-green obverse with orange-red legends. The reverse displays similar shades with pink-red predominant. Likely once recolored but minimally abraded and attractive. The strike is crisp aside from 9 to 11 o'clock on the reverse. A "mumps" variety with a die break beneath Liberty's jaw. A row of dentils is clashed through the denominator. Our EAC grade VF35. *From The Fred Yee Collection.*

- 3406** 1803 Small Date, Large Fraction — Altered Surfaces — PCGS Genuine. AU Details. S-260, B-19, R.1. Excellent detail for this more accessible Small Date, Large Fraction issue. Strongly detailed, though the carbon-flecked mushroom-brown surfaces have artificial texture and gloss. Our EAC grade VF30. *From The Fred Yee Collection.*

**Key Date 1804 Cent, VG10
S-266b, Middle Die State**

- 3407** 1804 VG10 PCGS. S-266b, R.2. The intermediate die state with a break over RTY but no break over MERIC. This key date cent is mildly granular and toned deep mahogany-brown overall with aqua tints at the borders. The obverse is moderately misaligned toward 3 o'clock, and the reverse has a small edge flaw at 12:30. Our EAC grade Good 5. (#1504)

- 3408** 1810/09 — Altered Surfaces — PCGS Genuine. AU Details. S-281, B-1, R.1. The dusky mahogany color is deemed suspicious by PCGS. The reverse displays a few areas of subtle gray granularity. Well struck and minimally abraded. A conditionally rare type. Our EAC grade VF20. *From The Fred Yee Collection.*

- 3409** 1812 Small Date — Questionable Color — PCGS Genuine. Unc Details. S-290, B-2, R.1. A glossy Classic Head cent with uncommonly crisp detail on Liberty's curls. PCGS has labeled the color, largely green-gold, pink, and violet, as suspect. Our EAC grade XF40. *From The Fred Yee Collection.*

- 3410 1814 Plain 4 VF35 PCGS. S-295, B-2, R.1.** A “Mumps” example with die lumps above the chin and beneath the jaw. The medium to deep brown surfaces display moderate wear on the motifs. Unabraded aside from a couple of hair-thin marks near the first two stars. Our EAC grade VF25.
From The Fred Yee Collection. (#1576)

**Matron Head Cent Perfect Brockage of
Reverse Design on Obverse, VF35**

- 3411 (1817) Matron Head Cent — Reverse Brockage — VF35 PCGS.** The reverse is normal, but the obverse displays a first strike brockage of the reverse design. Likely an 1817 Newcomb-4, since there is no sign of the die crack atop the TATE in STATES invariably seen on N-5 and N-14, which also share the same reverse die. Such errors happen when a coin sticks to the obverse die and then acts as a die for the next fed flan. Toned chocolate-brown with minor marks confined to the final A in AMERICA and the field between the CE in CENT. Our EAC grade VF20. (#1594)

- 3412 1817 13 Stars AU58 PCGS. CAC. N-14, R.1.** Ample golden-brown is seen on both sides though CENT and the lower half of the wreath are darkly toned. Circulation wear is slight but portions of the design are incompletely struck. Marks are absent aside from a tick above the mouth. Housed in a green label holder. Our EAC grade XF40. (#1594)

**25% Off Center Fine 12
15 Stars 1817 Cent, N-16**

- 3413 1817 15 Stars — Struck 25% Off Center — Fine 12 PCGS. N-16, High R.1.** Struck widely off center toward 1:30. The date and LIBERTY are intact but lower portions of UNITED and AMERICA are off the flan, as are stars 5 through 12. The medium brown surfaces are void of corrosion and show only minor marks. One wonders how various finders regarded this piece as it served duty in 19th century commerce. Our EAC grade VG7. (#1597)

- 3414 1818 MS63 Red and Brown PCGS. N-10, R.1.** The heavy die crack through the stars is usual for this Randall Hoard marriage. The initial orange-red color accompanies protected areas, though a majority of the coin is medium brown. Crisply struck and satiny with minimal contact and a few small gray spots. Our EAC grade AU55.
From The Fred Yee Collection. (#1601)

- 3415 1820 Large Date — Questionable Color — PCGS Genuine. Unc. Details. N-13, R.1.** Unabraded and lustrous with a good strike, but the radiant orange to lilac coloration is subsequent to its exit from the Randall Hoard. Our EAC grade XF45.
From The Fred Yee Collection.

- 3416 1820 Large Date MS64 Brown PCGS. N-13, R.1.** Die cracks encircle the stars, customary for this Randall Hoard variety. Deep olive-brown at the centers with hints of faded red at the margins. Well preserved and satiny. The portrait and wreath are well struck though a few stars are lightly impressed. Our EAC grade MS60.
From The Dr. Charles Nelson Collection. (#1615)

- 3417 1820 Large Date MS64 Red and Brown PCGS. N-13, R.1.** Lilac-red toning dominates most of this Randall Hoard near-Gem, although glimpses of olive-gold adorn the peripheries. We note a thin vertical mark through the O in OF. Our EAC grade AU50. (#1616)

- 3418 1821 XF45 PCGS. N-2, R.1.** Only two die pairs were used to strike this low mintage date. Toned chocolate-brown and steel-blue with pleasing surfaces save for a thin mark near the R in AMERICA. Our EAC grade VF30.
From The Norva Collection. (#1621)

- 3419 1827 MS62 Brown NGC. N-11, R.1.** Rich olive-brown dominates but glimpses of faded orange-red linger in design crevices. This unabraded large cent has good luster and a sharp strike on the stars. The portrait and wreath show minor blending of detail on the high points. Our EAC grade AU50. (#1651)

**Rare Newcomb-19 1835 Cent
Head of 1836, AU Details**

- 3420 1835 Head of 1836 — Improperly Cleaned — NGC Details. AU. N-19, R.5.** The first three stars are recut on the outer points and a hair-thin die crack extends over the AME in AMERICA. These characteristics identify one of the rarest Newcomb marriages for the date, the N-19. The variety was discovered by John Wright in 1982, and combines the obverse of N-7 with the reverse of N-17. The present briefly circulated chocolate-brown example is mildly glossy and has a pair of minor marks beneath Liberty's eye, though the remainder of the coin shows only trivial contact. Our EAC grade VF35.

- 3421 1843 Mature Head, Large Letters MS64 Brown NGC. N-6, R.1.** Grellman Die State b. A magnificent near-Gem. Sharply struck and satiny with rich sea-green and plum-mauve toning. A couple of mint-made strike-throughs are located inside the wreath, but marks are absent aside from inconsequential grazes beneath the E in CENT. Our EAC grade AU55. (#1850)

- 3422 1853 MS65 Brown NGC. CAC. N-10, R.1.** Grellman Die State b. The 8 is widely repunched. This golden-brown Gem appears pristine save for two tiny ticks on the lips and lower cheek. The strike is precise on the major motifs though the stars are incompletely defined. Certified in a prior generation holder. Our EAC grade MS60. (#1901)

3423 1853 MS64 Red and Brown PCGS. N-25, R.1. Considerable fire-red luster ensures the eye appeal of this lustrous Choice cent. Marks are absent and carbon is minor. Peripheral elements show selected softness of strike. Our EAC grade MS62.
From The Fred Yee Collection. (#1902)

3424 1855 Upright 5s MS64+ Red PCGS. CAC. N-4, R.1. Grellman Die State a. A beautiful peach-red near-Gem that boasts a mark-free appearance and vibrant cartwheel sheen. Faint fingerprint fragments on the neck and beneath CENT are all that deny an even finer grade. Our EAC grade MS64.
From The Fred Yee Collection. (#1909)

Red Gem 1855 Upright 5s Cent, N-4

3425 1855 Upright 5s MS65 Red NGC. N-4, R.1. Grellman Die State a. A beautiful orange-red Gem with vibrant luster and a virtual absence of contact. The strike is sharp except on the stars. A shallow but fairly large strike-through (as coined) is above the N in ONE, and the portrait has a pair of minute flecks. Encapsulated in a prior generation, pre-hologram holder. Our EAC grade MS64. Census: 35 in 65 Red, 6 finer (7/12). (#1909)

3426 1857 Large Date MS64 Red and Brown NGC. N-1, R.1. Only a single Large Date die pair is known. The obverse is principally fire-red with glimpses of steel-blue. The reverse displays the same colors but in approximately equal amount. A few minor field marks near the denomination. Our EAC grade MS60. (#1929)

PROOF LARGE CENTS

Red and Brown Select Proof 1841 Cent, N-1

3427 1841 PR63 Red and Brown PCGS Secure. N-1, R.5. Imposing from the technical perspective, this proof Braided Hair cent lacks any hairlines or contact marks. Rich jade-green, cherry-red, and orange-gold patina embraces the obverse. The reverse has a lilac center and a peach-gold border along with occasional shades of deep forest-green. The strike is a bit uneven with sharp centers and a soft delivery on the right-side stars. Our EAC grade PR60. (#1953)

Choice Proof 1855 Cent, N-10 Exceptional Eye Appeal

3428 1855 Slanted 55 PR64 Brown PCGS. N-10, R.5 as a proof. This undisturbed and pleasing golden-brown specimen has weak stars at the left obverse, but full details of all other design elements. The surfaces are reflective although not deeply mirrored. A few faint lint marks on the central reverse confirm its proof status. Our EAC grade PR60.

Ex: Worth Hill / Lanting (Heritage, 12/1984), lot 445; Long Beach Signature (Heritage, 5/2009), lot 93, which realized \$5,175. (#1994)

FLYING EAGLE CENTS

3429 1857 MS63 NGC. Snow-2, FS-401b. The Type of 1856 with a square center to the O in OF. Most 1857 small cents have a round center to the O and are the Type of 1857. The variety is undesignated on the insert. Satiny with a good strike and deep gray fields.
From The Dr. Charles Nelson Collection. (#2016)

3430 1857 MS63 PCGS. Snow-2, FS-401b. The interior of the O in OF has a nearly rectangular shape, characteristic of the Type of 1856. Well struck and noticeably prooflike with peach-red color save for the sun-gold obverse center. (#2016)

3431 1857 MS64 NGC. CAC. Peach and lavender overtones are prominent on this near-Gem with strong detail and generous luster. A few minor flyspecks are noted at the lower and right obverse rims. (#2016)

Gem 1857 Flying Eagle Cent Great Type Coin

3432 1857 MS65 NGC. A great Flying Eagle cent type coin from the first of only two years of regular strikings. Rich copper-orange color forms the base, while blue-to-violet overtones form a "sky" behind the eagle. A few small dark imperfections on the holder should not be interpreted as carbon on the coin.
From The Fred Yee Collection. (#2016)

3433 1858 Large Letters MS63 PCGS. High Leaves Reverse. Closed E in ONE. A sharply struck golden-tan example of this final Flying Eagle date. The lustrous surfaces are uncommonly smooth despite small ticks near the M in AMERICA.
From The Dr. Charles Nelson Collection. (#2019)

3434 1858 Large Letters MS63 PCGS. High Leaves Reverse. Closed E in ONE. The golden-brown and powder-blue surfaces appear free from marks. The strike is crisp at the centers and soft across the borders. The reverse border has faint spots.
From The Fred Yee Collection. (#2019)

3435 1858 Large Letters MS64 NGC. CAC. High Leaves, Closed E in ONE. This sharp near-Gem has light brown toning on frosty and lustrous golden-tan surfaces with excellent eye appeal. A few trivial carbon flecks prevent a higher grade. (#2019)

PROOF FLYING EAGLE CENTS

Famous 1856 Flying Eagle Cent
PR45, Snow-3 'Business Strike' Dies

3436 1856 PR45 PCGS Secure. Snow-3. From business strike dies, and likely made as a business strike, though the grading services have certified most 1856 Flying Eagle cents as proofs in recent years. Snow-3 was struck in 1856 for distribution to Federal officials to demonstrate the new small cent. A number of those pieces were spent, while the Snow-9 restrikes from a few years later were sold to collectors who carefully saved them. The present Snow-3 specimen is toned an attractive olive-brown. The eagle's head and tail are lightly impressed but the unmarked surfaces show only moderate circulation wear. (#2037)

Near-Gem Proof 1856 Flying Eagle Cent Popular Pattern-Turned-Key

3437 1856 PR64 NGC. Reverse D. Most likely Snow-9, the most common variety of 1856 Flying Eagle cent, though the search for the typical die lines is inconclusive. This near-Gem specimen has rose, lavender, and blue overtones on luminous surfaces; a strong band of the last color that seems to pass down and to the left through the eagle's wings adds visual interest to the obverse. While technically patterns, the 1856 Flying Eagle cents have been adopted by collectors as an honorary issue, adding a challenging key date to what otherwise would be a short and easily completed series.
From The Dr. Charles Nelson Collection. (#2037)

**Choice Proof 1858 Cent, Snow-PR2
Small Letters, Low Leaves**

- 3438 1858 Small Letters PR64 PCGS. CAC. Snow-PR2.** Low Leaves Reverse. A bold die line in the dentils beneath the right ribbon end identifies the Snow-PR2 variety, which Snow believes was included (as Snow-PT9) in the 12-piece pattern sets of 1858 cents. Small Letters 1858 proofs are much rarer than their more famous 1856 predecessors, though valued less due to an associated high commercial mintage. The present near-Gem proof is fully struck and moderately mirrored. Free from abrasions, the fields display a few brief curly lintmarks, as made. The reverse is sun-gold, as is the obverse margin, though the open obverse field offers pastel lilac toning. One tiny spot noted left of the right ribbon end. Population: 38 in 64, 8 finer (7/12). (#2043)

INDIAN CENTS

- 3439 1859 MS62 NGC.** A luminous example of the first and one-year-only Indian cent issue with Laurel Wreath reverse. Reddish-orange and gold surfaces lend this coin far better eye appeal than the MS62 designation might suggest.
From The Fred Yee Collection. (#2052)
- 3440 1859 MS64 PCGS.** The portrait is gunmetal-gray but the reverse and the obverse margin are principally light tan-gold. This satiny single year type coin is virtually unabraded and shows incompleteness of impression only on the RT in LIBERTY. (#2052)
- 3441 1859 MS64 PCGS.** From the only year of the laurel wreath reverse, this attractive Choice example is sharply detailed and lustrous, with bright red surfaces that show a hint of light brown toning.
From The Dr. Charles Nelson Collection. (#2052)

- 3442 1859 MS64 PCGS.** The attractive orange-red and lilac surfaces of this impressive Choice specimen display areas of prooflike reflectivity mixed with satiny mint luster. The design elements are well-detailed and eye appeal is quite strong.
From the Fred Yee Collection. (#2052)

**Gem 1859 Indian Cent
One-Year Laurel Wreath Design**

- 3443 1859 MS65 PCGS. CAC.** The 1859 Indian cent is a one-year type coin, as the laurel wreath on the reverse was replaced by the oak wreath and shield the following year. This delightful Gem displays sharply detailed design elements, with lustrous red surfaces that show just a few accents of light brown. PCGS has graded only 18 numerically finer examples (7/12). (#2052)
- 3444 1861 MS65 NGC. CAC.** Lilac-red, orange-gold, and stone-gray encompass this highly lustrous, intricately struck, and unabraded Gem. The obverse die is slightly misaligned toward 3 o'clock. Housed in a former generation holder.
From The Fred Yee Collection. (#2061)
- 3445 1863 MS65 PCGS. CAC.** An amazing Gem with lovely pale violet toning on golden-olive surfaces. Satin luster accompanies sharp details on both sides. PCGS has only certified 37 finer (8/12). (#2067)
- 3446 1863 MS65 NGC. CAC.** A sharp strike is evident on both sides of this highly lustrous Gem with delicate lime and orange toning. A lovely and highly appealing specimen. (#2067)

**1863 Copper-Nickel Cent, MS66
Remarkably Clean Surfaces**

- 3447 1863 MS66 PCGS.** Copper-nickel cents are a short-lived type, and the surfaces are often distinguishable by bright whitish-gray color from the higher content of nickel in the alloy. This piece retains much of that "whitish" color in the center of the obverse, but elsewhere the surfaces are reddish tinted. The surfaces are remarkably clean, as one would expect from a coin in such a high grade. Population: 37 in 66 (1 in 66+), 0 finer (7/12). (#2067)
- 3448 1864 Copper-Nickel MS65 PCGS. CAC.** A shimmering and unabraded tan-gold Gem that has a reasonable strike despite mint-made die wear on the headdress feathers. Scarce in finer grades, and certified in a prior generation holder.
Ex: Long Beach Signature (Heritage, 9/2004), lot 5170. (#2070)

3449 1864 Copper-Nickel MS65 PCGS. CAC. Snow-5, FS-401. Heavy vertical die lines near the ear provide interest for the specialist. The present caramel-gold Gem has cartwheel luster on the obverse while the reverse is prooflike. Precisely struck and unabraded with a carbon-free reverse and a few minute obverse flecks.(#2070)

3450 1864 Copper-Nickel MS65 PCGS. CAC. This final-year copper-nickel Indian cent has a pale golden obverse and deeper peach hues on the reverse. Minor carbon is noted on and near the portrait, but the surfaces are largely mark-free.
From The Fred Yee Collection. (#2070)

3451 1864 L On Ribbon MS64 Red and Brown PCGS. Snow-10, FS-2306. The 86 in the date are boldly repunched within the loops. The variety is undesignated on the PCGS insert. Sharply struck and lustrous with unabraded fields. Orange-gold and sea-green with hints of lilac toning.
From The Dr. Charles Nelson Collection. (#2080)

**1865 Indian Cent, MS65+ Red
Popular Fancy 5 Variety**

3452 1865 Fancy 5 MS65+ Red PCGS. CAC. The 1865 Indian cent with a Fancy 5 in the date is a one-year subtype that is quite popular with collectors, despite being seen with more frequency than its Plain 5 counterpart. This high-end Gem is brightly lustrous and sharply detailed, with pleasing red surfaces. Population: 48 in 65 (1 in 65+) Red, 9 finer (7/12). (#2084)

3453 1866 MS64 Red and Brown PCGS. The orange-gold surfaces have moderately mellowed in rose and olive shades. The present crisply struck near-Gem is unabraded and displays occasional pinpoint carbon.(#2086)

3454 1867 MS65 Red and Brown PCGS. CAC. The 1867 Indian cent is a scarce issue in Gem condition, with Red and Brown surfaces. This attractive Gem is sharply detailed and lustrous, with a few microscopic specks of carbon. Population: 50 in 65 Red and Brown, 1 finer (7/12).(#2089)

3455 1869/9 MS64 Red and Brown NGC. Snow-3f, FS-301. The 9 is clearly repunched. One of the best known RPD varieties within the series, since it was once regarded as an 1869/8. Crisply struck and satiny with a mark-free appearance and a number of pinpoint flecks. (#37475)

3456 1870 MS65 Red and Brown PCGS. CAC. Shallow N in ONE. Very close to full Red, perhaps kept from that assessment by a wisp of lilac color on the cheek. Lustrous and well preserved with an exemplary strike and pleasing eye appeal.(#2098)

3457 1870 Doubled Die Obverse MS64 Red and Brown PCGS. CAC. Snow-1, FS-101. Bold N in ONE. The obverse exhibits a widely die-doubled TY in LIBERTY and the date is minutely repunched. The reverse shows minor die doubling on the upright of the E in CENT. Golden-brown overall with glimpses of sea-green on the portrait high points. Well struck and unabraded.
Ex: Long Beach Signature (Heritage, 2/2010), lot 119, which realized \$1,380.

3458 1871 MS64 Red and Brown NGC. Bold N in ONE. This semikey near-Gem is principally golden-brown though the Indian's cheek is powder-blue. The satiny surfaces are devoid of marks, and only a couple of flecks are present.(#2101)

3459 1872 MS63 Red and Brown PCGS. CAC. Bold N in ONE. Reddish-orange, mahogany, and violet-brown aspects compete for space on this luminous Select example. Lightly abraded devices show striking softness, most visibly at the upper reverse.(#2104)

3460 1873 Closed 3 MS64 Red and Brown PCGS. Perhaps the peripheral weakness is the reason that this piece received less than a Gem grade from PCGS. Both sides have nearly full red color with faint lilac and blue toning at the centers. Trivial carbon flecks are also noted on each side.(#2110)

3461 1873 Doubled LIBERTY, Closed 3 — Corroded, Cleaned — ANACS. VF30 Details. Snow-1, FS-101. A small planchet defect appears at the upper obverse, and both sides show ebony and green corrosion that is especially visible on the reverse. The obverse is reddish-brown and the reverse is tan.(#2115)

**1873 Doubled LIBERTY Cent, XF40
Much Scarcer of the Two Doubled Varieties**

3462 1873 Doubled LIBERTY, Closed 3 XF40 PCGS. CAC. Snow-1, FS-101. There are actually two doubled dies from 1873, but the Snow-1 variant far overshadows the other, less-obvious variety. Profound doubling is most easily seen on the letters of LIBERTY across the headband, thus the Doubled LIBERTY designation. The surfaces are deep brown and there are numerous handling marks, as one would expect, but none are worthy of individual mention. (#2115)

3463 1877 VF30 NGC. CAC. A medium brown midgrade example of the most coveted date of the series. Well defined with a smooth reverse and a couple of moderate obverse marks at the nose and the E in UNITED. Housed in a prior generation holder.(#2127)

Uncirculated Sharpness 1877 Cent

3464 1877 — Questionable Color — PCGS Genuine. Unc Details. Shallow N. A satiny example of the series key. Only a single reverse die is known for business strikes, which suggests the reported mintage of 852,500 pieces may include deliveries coined from 1876 dies. The present cent is well struck except for the shoulder curl and a few upper feather tips. Free from visible marks, though the peach-red and olive-green color is unconvincing.

MS62 Red and Brown 1877 Cent

- 3465** 1877 MS62 Red and Brown NGC. Shallow N in ONE. It is curious that the 1877 uses an obsolete design subtype otherwise unused since 1872, but it does provide an easy method of distinguishing business strikes from proofs for this key date, since the proofs have a bold N in ONE. Lustrous and nicely struck with minimal marks. Orange-gold and lime-green with obverse steel-gray freckles. (#2128)

**Red and Brown Near-Gem 1877 Cent
Close to Full Red**

- 3466** 1877 MS64 Red and Brown NGC. Shallow N. This lustrous peach-gold example comes fairly close to full Red but the central reverse has mellowed in lilac shades. Well struck at the centers though peripheral elements are softly impressed. Void of marks, and carbon is minor and scattered. The scarcest date of the half-century series. (#2128)

**1877 Cent, MS65 Red and Brown
Far Fewer Survive Than Generally Thought**

- 3467** 1877 MS65 Red and Brown PCGS Secure. The key to the Indian cent series, the 1877 issue, at 852,500 pieces struck, was the lowest-mintage cent coinage that the Mint had produced since the 1823 large cent. Even then, Bowers writes in his *Indian cent Guide Book* that, because only two obverse dies and a single reverse are known, the number struck (and not melted) was likely only 200,000 pieces or so. A Gem Red and Brown 1877 Indian cent such as this piece makes an especially nice compromise between price and quality when as much original red remains as here; Gem Red coins are far more expensive. The only mark of note is along the Indian's jawline. The usual minor strike weakness appears on the tips of the upper feathers in the headdress. Population: 58 in 65 (1 in 65+) Red and Brown, 3 finer (7/12). (#2128)
-
- 3468** 1886 Type One MS65 Red and Brown PCGS. CAC. Bright orange peripheral luster frames the lilac centers of this lovely Gem, showing wispy blue accents. Although technically Red and Brown, this piece is closer to Red than to Brown. Population: 38 in 65 Red and Brown, 2 finer (7/12). (#2155)
- 3469** 1888 MS65 Red and Brown PCGS. CAC. Splashes of sky-blue toning appear on each side of this frosty Gem, with about 80% brilliant orange color and only a few small marks in the left obverse field. The feather tips and shield are a trifle weak. Population: 22 in 65 (1 in 65+) Red and Brown, 0 finer (7/12). (#2167)
- 3470** 1903 MS66 Red PCGS. The base of the 1 is repunched. Not an exact match to any listing in Snow (2000). Orange-red and apple-green compete for territory across this lustrous and precisely struck Premium Gem. Pristine save for trivial grazes on the cheek. (#2216)

- 3471 1909-S MS64 Red PCGS.** A low-mintage key from the last year of the Indian design, this impressive Choice example displays original red surfaces with a few hints of light brown color. The sharply detailed devices and vibrant mint luster add to the strong visual appeal. (#2240)

PROOF INDIAN CENTS

Gem Proof 1859 Indian Cent Only 800 Pieces Struck

- 3472 1859 PR65 PCGS. CAC.** The 1859 proof Indian cent claims a mintage of 800 pieces and examples in Gem condition are very scarce. This impressive Gem exhibits well-preserved reflective surfaces and razor-sharp definition on all design elements, with original red fields and hints of lilac on the devices. Population: 55 in 65 (1 in 65+), 20 finer (7/12).
From The Fred Yee Collection. (#2247)

Cameo Proof Near-Gem 1859 Cent Single Year Laurel Wreath Reverse

- 3473 1859 PR64 Cameo NGC.** The 1859 is an important one-year type and the scarce proofs are rarely encountered with any degree of contrast. This is a remarkable apricot-gold example that has strong contrast between the flashy fields and the crisply defined devices. Census: 6 in 64 Cameo, 11 finer (7/12).
Ex: Long Beach Signature (Heritage, 6/2006), lot 275. (#82247)

- 3474 1861 PR64 PCGS Secure. CAC.** Trivial carbon flecks and minuscule marks are evident on fully mirrored tan fields with lustrous devices that create light contrast. Both sides exhibit lovely iridescent toning. Population: 59 in 64, 21 finer (7/12). (#2256)

- 3475 1862 PR64+ PCGS. CAC.** From a limited Civil War proof mintage of 550 pieces, this high-end Choice specimen displays sharply detailed design elements and deeply mirrored fields, with orange-red and lemon-yellow surfaces.
From The Fred Yee Collection. (#2259)

- 3476 1862 PR64 Cameo PCGS. CAC.** Eagle Eye Photo Seal, card not included. A satiny and needle-sharp Cameo near-Gem whose butter-gold surfaces display a few faint gray obverse flecks. A scant proof mintage of 550 pieces. (#82259)

Gem Proof 1863 Indian Cent Low-Mintage Civil War Issue

- 3477 1863 PR65 PCGS Secure. CAC.** Struck during the height of the Civil War era, the 1863 proof Indian cent claims a small mintage of 460 pieces. This impressive Gem displays sharply detailed design elements and moderately reflective surfaces under attractive copper-red and lilac patina. Population: 23 in 65 (1 in 65+), 7 finer (7/12). (#2262)

1864 Indian Cent, PR64 Cameo Bronze No L

- 3478 1864 Bronze No L PR64 Cameo PCGS.** The 1864 proof No L Indian cent claims a reported mintage of just 150 pieces, but most numismatists believe that figure is too low, based on number of survivors. The actual production total might reasonably be twice that number. The present coin is a magnificent Cameo example, with original red surfaces, brightly reflective mirrors, and sharply detailed frosty devices. Population: 8 in 64 Cameo, 5 finer (7/12). (#82278)

- 3479 1865 PR64 Red Cameo PCGS. Plain 5.** The brick-red centers are framed by orange-gold. A prominently mirrored Choice cent with exactly struck devices and attractively preserved fields. A scarce proof date, with a *Guide Book* mintage of 500+ pieces. Population: 6 in 64 Cameo, 2 finer (7/12). (#82284)

Cameo Choice Proof Red 1867 Cent

- 3480 1867 PR64 Red Cameo PCGS Secure.** This Reconstruction-era cent features radiant orange-red color and a precise strike. The cheek and neck show steel-gray and the obverse has minuscule flecks. The reverse is exceptionally preserved and requires a strong loupe to view imperfections. Population: 7 in 64 Red Cameo, 7 finer (7/12). (#82290)

3481 1868 PR64 Cameo PCGS. Well struck with lovely straw-gold color. The reflective fields contrast with luminous motifs. A few small spots are relegated to the obverse periphery. The coin is rotated almost 180 degrees from usual coin turn. Population: 3 in 64 Cameo, 5 finer (7/12).

Ex: New York Signature (Heritage, 6/2005), lot 5085, which realized \$2,242.50. (#82293)

3482 1869 PR64 Cameo PCGS. The strike is strong, and there are no distracting blemishes on this sun-gold near-Gem. A hint of rose-red is noted on the cheek and the reverse near 9 o'clock. A rare date with consequential cameo contrast.

Ex: St. Louis Central States (Heritage, 5/2003), lot 5375; Long Beach Signature (Heritage, 9/2007), lot 230, which realized \$1,840. (#82296)

1879 Indian Cent, PR67 Red Amazingly Well-Preserved

3483 1879 PR67 Red NGC. This spectacular Superb Gem Indian cent displays sharp definition on all design elements and copper-gold reflective fields that show a few hints of pale green at the peripheries. No mentionable signs of contact are evident on either side. From a proof mintage of 3,200 pieces. Census: 6 in 67 Red, 2 finer (7/12). (#2326)

3484 1880 PR65 Cameo PCGS. CAC. The frosty devices of this spectacular Gem contrast boldly with the deeply mirrored fields to produce a dramatic cameo effect. The design elements are sharply detailed and the surfaces are well-preserved. Population: 5 in 65 Cameo, 7 finer (7/12). (#82329)

3485 1885 PR66+ Brown Cameo NGC. Snow-PR3. The first 8 is lightly repunched. Though the Cameo attribute is seldom paired with the Brown designation, both are accurate. The aquamarine and plum-mauve surfaces consist of mirrored fields and luminous needle-sharp devices. (#2342)

Cameo Gem Proof 1892 Cent

3486 1892 PR65 Cameo PCGS. While a relatively common date as a proof, few Cameo pieces have been certified. In fact, only four such coins have been graded by PCGS as Gem with just five finer (7/12). None have been certified as Deep Cameo. The present crisply struck honey-gold specimen shows deeply mirrored fields with clearly contrasted devices. Seamless save for one slender contact mark on the cheekbone and minor peripheral obverse carbon. *Ex: West Palm Beach FUN (Heritage, 7/2007), lot 134. (#82365)*

3487 1893 PR65 Red and Brown PCGS. Unusually intense rose-red and cherry color endows this well struck Gem. The cheek is cobalt-blue and the wreath displays olive-green. A treat for the toning enthusiast. (#2367)

3488 1894 PR65 Red PCGS. Eagle Eye Photo Seal, card not included. This boldly struck Gem is principally orange-red although infrequent hints of olive-green are also present. Exceptional for the grade despite a minute fleck or two on the obverse field. Certified in a green label holder. (#2371)

3489 1898 PR64 Red Cameo PCGS. Golds, oranges, and reds prevail on this well-contrasted late 19th century proof. Strong all-around eye appeal, though a few flyspecks, the largest at the bottom of the reverse, contribute to the grade. Population: 3 in 64 Red Cameo, 7 finer (7/12). (#82383)

3490 1904 PR65 Red PCGS. This flashy and pinpoint-sharp Gem displays peach and cherry-red with a blush of olive-green near the profile. No marks are present and there is only a trace of pinpoint carbon. (#2401)

3491 1909 PR66 Red and Brown PCGS. The orange-red color is nearly comprehensive but a blush of lilac patina on the ribbon and the lower left reverse denies classification as full Red. The strike is razor-sharp.

Ex: Long Beach Signature (Heritage, 5/2007), lot 214, which realized \$862.50. (#2415)

LINCOLN CENTS

3492 1909-S VDB — Cleaning — PCGS Genuine. AU Details. This satiny example has a light walnut-brown obverse and a sea-green reverse with gray toning right of the T in CENT. Mildly glossy but minimally abraded. Sharply struck except on the V.D.B. initials, which have low relief due to a concave reverse die. *From The Fred Yee Collection.*

3493 1909-S VDB AU55 NGC. A Choice AU specimen of this popular key date, with sharply detailed design elements and traces of original red color mixed with the mostly brown patina. Only minor contact marks are evident. *From The Dr. Charles Nelson Collection. (#2426)*

3494 1909-S VDB — Improperly Cleaned — NGC Details. Unc. Sharply struck and satiny, but the iridescent cherry-red, lime-green, and orange-gold toning is too good to be true. Nearly void of contact, and a low mintage key to the series. (#2426)

3495 1909-S VDB MS64 Brown NGC. Precisely struck and lustrous with rich chocolate-brown toning. Glimpses of faded red are confined to the margins. A well preserved representative of this low mintage and always desirable issue. (#2426)

3496 1909-S VDB MS64 Red and Brown ANACS. The mostly red surfaces of this important key date show just a trace of light brown toning. The design elements are sharply defined throughout, with bold initials. Strong mint luster adds to the considerable eye appeal. *From The Dr. Charles Nelson Collection. (#2427)*

3497 1909-S VDB MS64 Red and Brown NGC. This sun-gold series key cent approaches full Red and would have been accepted as such without question in the era prior to third party certification. Traces of cherry toning are confined to the peripheries. Lustrous and crisply struck with a clean reverse and only marginal carbon on the obverse field. (#2427)

3498 1909-S VDB MS64 Red and Brown PCGS. CAC. The broad appearance of this near-Gem is copper-orange, though mahogany and violet tints also are plain on each side, especially the obverse. An attractive example of the popular Lincoln cent key. (#2427)

3499 1909-S VDB MS64 Red and Brown PCGS. CAC. Splashes of orange-gold alternate with deep olive-green and ruby-red, with the latter color most prominent on the reverse. Needle-sharp aside from the V in the initials. Thoroughly lustrous and void of contact. (#2427)

**Gem 1909-S VDB Lincoln Cent
Well-Preserved Red and Brown Surfaces**

3500 1909-S VDB MS65 Red and Brown PCGS. CAC. The 1909-S VDB Lincoln cent is a numismatic icon, with a series-low mintage of 484,000 pieces. The well-preserved surfaces of this impressive Gem are mostly original red, with some traces of light brown patina. The design elements are well-detailed, with boldly delineated initials. From *The Fred Yee Collection*. (#2427)

**Choice Red 1909-S VDB Cent
Famous Low Mintage Issue**

3501 1909-S VDB MS64 Red PCGS. Booming luster and a precise strike combine with consistent pumpkin-gold color to ensure the vibrant eye appeal. No marks are visible, and carbon is only moderate. Chief Engraver Charles Barber is traditionally assigned the role as villain in the saga of the removal of Brenner's initials, which returned to the cent only after Barber's demise. Ex: *Ft. Lauderdale Signature (Heritage, 1/2005)*, lot 5294. (#2428)

**MS64 Red 1909-S VDB Lincoln Cent
First-Year Key**

3502 1909-S VDB MS64 Red NGC. CAC. Few issues are as avidly sought after as the 1909-S VDB Lincoln cent, due to its series-low mintage of 484,000 pieces. This attractive Choice example features original red surfaces that show only a few specks of carbon on the reverse. The design elements are sharply rendered and vibrant luster adds to the considerable eye appeal. (#2428)

**1909-S VDB Cent, MS65 Red
Capstone to the Series**

3503 1909-S VDB MS65 Red PCGS. The 1909-S VDB is the low-mintage key to the Lincoln cent series. Aside from a short diagonal mark above N in UNITED, this spectacular Gem shows no mentionable flaws and no sign of carbon. The design elements are well-detailed and the original red surfaces radiate vibrant mint luster. Eye appeal is terrific. (#2428)

**Bright Yellow-Red 1909-S VDB Cent, MS65+
Exceptional Quality and Color**

3504 1909-S VDB MS65+ Red PCGS Secure. The 1909-S VDB cents, like their non-VDB and S-mint Indian cent counterparts, show tremendous variability in color. A significant number of Uncirculated survivors of each issue show "woodgrain" streakiness — that is, deeper reddish-brown interspersed with yellowish color. Seldom, however, is a coin located with the bright, sparkling yellow-red color seen on this coin. The devices offer full strike details on all the design elements. The quality of this coin is clearly suggestive of an even higher grade. (#2428)

**Gem 1909-S VDB Lincoln Cent
Attractive Red Surfaces**

3505 1909-S VDB MS65 Red PCGS. CAC. An impressive Gem example of this famous key, with original red surfaces that show only a few microscopic flecks of carbon on the reverse. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. The all-important VDB initials are boldly delineated. (#2428)

**1909-S VDB Lincoln Cent, MS65 Red
Sharply Detailed Key Date**

3506 1909-S VDB MS65 Red PCGS. CAC. An attractive Gem specimen of this famous first-year key, with the all-important VDB initials boldly impressed, and the other design elements sharply detailed. The brightly lustrous Red surfaces show some streaks of violet and amber toning. Housed in an old green label holder. (#2428)

3507 1909-S MS65 Red PCGS. Razor-sharp definition is evident on all design elements and the original red surfaces of the delightful Gem radiate vibrant mint luster. Eye appeal is exceptional. *From The Fred Yee Collection.* (#2434)

3508 1909-S MS66 Red NGC. CAC. Excellent detail with faintly pebbled texture to fresh copper-orange fields. Amazing preservation for more than a century, a feature the winning bidder is sure to appreciate. Census: 59 in 66 Red, 3 finer (7/12). (#2434)

**Red MS66 1911 Lincoln Cent
Distinctive Color**

3509 1911 MS66 Red PCGS. CAC. A dappled, almost "crackled" appearance dominates this Red Premium Gem, an intensely lustrous piece with dramatic patterns of lighter and deeper orange shadings. On the reverse, a die crack from the rim overlaps the right wheat ear. PCGS has graded just eight Red representatives as MS67 Red or finer (8/12). (#2443)

3510 1911-D MS65 Red PCGS. Orange-gold overall with a hint of rose-red on Lincoln's face. This lustrous better date Gem is free from any sign of abrasion though the upper obverse displays a few flecks. (#2446)

3511 1912 MS66 Red PCGS. A lovely 1912 Lincoln showing fiery golden-orange luster. Both the strike and overall eye appeal are everything one expects for the grade. Population: 82 in 66 (2 in 66+) Red, 7 finer (7/12). (#2452)

3512 1912-S MS65 Red and Brown NGC. This satin Gem is sharply defined with lovely iridescent toning, retaining considerable reddish-gold mint color on both sides. Census: 66 in 65 Red and Brown, 6 finer (7/12). (#2457)

3513 1912-S MS64 Red PCGS. CAC. Light copper color overall with pink touches and minor carbon. Pleasingly detailed for an early S-mint Lincoln cent and challenging any better. PCGS has graded just 47 examples as MS65 Red or better (7/12). (#2458)

3514 1913-S MS64 Red PCGS. A few carbon flecks on each side prevent a higher grade to this attractive near-Gem. Pinkish-orange mint luster is present, along with sharp design motifs. (#2467)

3515 1913-S MS64 Red PCGS. A delightful Choice specimen of this early series issue, with well-detailed design elements and original orange-red surfaces that show few signs of contact and just a few microscopic specks of carbon. *From The Fred Yee Collection.* (#2467)

3516 1913-S MS64 Red PCGS. CAC. Copper-pink overall with lavender touches at parts of the margins. Quicksilver luster shows few immediately apparent abrasions. High eye appeal. (#2467)

Scarce Red Gem 1913-S Cent

3517 1913-S MS65 Red PCGS. Bright gold color dominates the centers, which are outlined by olive and rose hues. An unmarked and lustrous Gem. Although the strike is slightly soft on the shoulder or the O in ONE, the impression is certainly above average for this scarce early branch mint issue. In a green label holder. Population: 45 in 65 Red, 2 finer (7/12).

Ex: Orlando FUN (Heritage, 1/2004), lot 4603, which realized \$6,325. (#2467)

3518 1914-D AU55 NGC. From a low mintage of 1.2 million pieces, the elusive nature of the 1914-D Lincoln cent was not recognized until the 1930s, by which time high-grade specimens were quite elusive. This attractive Choice AU example is sharply detailed, with traces of mint luster and hints of original red color mixed with the predominant brown.

From The Dr. Charles Nelson Collection. (#2471)

3519 1914-D — Altered Surfaces — PCGS Genuine. Unc. Details. The dusky apple-green fields appear unabraded, satiny, and mildly glossy. Golden-brown resides near the rims. A boldly struck example of this popular key date.

From The Fred Yee Collection.

**1914-D Cent, MS64 Red and Brown
Rare and Seldom Seen With Any Red Color**

3520 1914-D MS64 Red and Brown PCGS. This low-mintage (1.1 million pieces) D-mint issue was not saved in significant numbers at the time of delivery. As a result, the 1914-D ranks as one of the key dates in the Lincoln cent series. This is a pinkish-red representative with slight mellowing of color from the passage of time. The surfaces are remarkably clean, even for the MS64 grade level, and the devices are well-impressed. A find for the Lincoln cent specialist.

Ex: Long Beach Signature (Heritage, 2/2002), lot 5194.

From The Fred Yee Collection. (#2472)

**1914-D Lincoln Cent, MS64
Pleasing Red and Brown Key**

- 3521 1914-D MS64 Red and Brown PCGS. CAC.** The 1914-D Lincoln cent is a low-mintage issue and few examples were saved for numismatic purposes, making high-grade specimens quite elusive today. This well-detailed Choice example displays vibrant mint luster on both sides, with mostly red surfaces and a few traces of light brown patina.
From The Fred Yee Collection. (#2472)

- 3522 1914-S MS64+ Red and Brown PCGS.** The well-preserved surfaces of this high-end Choice example show an even mixture of original red and light brown patina with strong mint luster underneath. Sharply detailed devices add to the strong visual appeal.
From The Fred Yee Collection. (#2475)

- 3523 1914-S MS65 Red and Brown NGC. CAC.** Delightful blue-green toning appears on both sides of this fully lustrous Gem, retaining considerable orange mint luster. A few trivial marks are evident. Census: 50 in 65 Red and Brown, 6 finer (7/12). (#2475)

- 3524 1914-S MS64 Red PCGS.** Pale copper-gold overall with significant lavender overtones to the fields. Quicksilver luster is subtle but pleasing. PCGS has graded just 35 pieces as MS65 Red or better (8/12).
*Ex: Long Beach (Heritage, 2/2003), lot 5387.
From The Fred Yee Collection. (#2476)*

**MS66 Red 1915-D Cent
Ideal for Advanced Registry Set**

- 3525 1915-D MS66 Red PCGS.** A delightful coin for the specialist who demands the finest available. Full Red appears on both sides with no noticeable fading, and only a few carbon flecks are noted near the O in ONE. The fields and surfaces are excellent, with a few tiny ticks found under scrutiny. Marks are absent save for a tick near Lincoln's forehead. Housed in an older green label PCGS holder. A prize for the Registry Set collector and a coin that is currently tied for the finest graded by either PCGS or NGC. Population: 20 in 66 Red, 0 finer (7/12).
Ex: San Francisco ANA (Heritage, 7/2005), lot 10108, which realized \$7,475. (#2482)

- 3526 1915-S MS65 Brown NGC.** Generally light ocean-blue save for peach-gold at the margins and the reverse center. Boldly struck and lustrous with a mark-free and carbonless appearance. A scarce San Francisco issue. (#2483)

- 3527 1915-S MS64 Red and Brown PCGS.** Designated Red and Brown, most observers would call this piece Red. Sharply struck with frosty luster and only slight mellowing of the brilliant mint color. (#2484)

- 3528 1915-S MS64 Red and Brown PCGS.** A sharply detailed Choice specimen, with well-preserved lustrous surfaces that show an even mixture of light brown and original red. PCGS has graded only 18 numerically finer examples (7/12).
From The Fred Yee Collection. (#2484)

- 3529 1915-S MS65 Red and Brown PCGS.** The design elements are sharply detailed throughout on this rare Gem specimen and the well-preserved surfaces are mostly original red, with just a hint of light brown toning. Population: 18 in 65 Red and Brown, 0 finer (7/12).
From The Fred Yee Collection. (#2484)

- 3530 1916-D MS65 Red and Brown PCGS.** The mostly red surfaces of this attractive Gem show a few highlights of brown, with vibrant mint luster on both sides. The design elements show sharp definition throughout and visual appeal is quite strong.
From The Fred Yee Collection. (#2490)

- 3531 1917 MS66 Red PCGS.** A spectacular Premium Gem Lincoln cent, with vibrant mint luster and slightly granular original red surfaces. PCGS has graded only 17 numerically finer examples (7/12). (#2497)

- 3532 1917 MS66 Red PCGS Secure. CAC.** The peach-red and sun-gold surfaces teem with cartwheel luster. Intricately struck and mark-free. A loupe fails to locate any noticeable carbon. An extraordinary example of this high mintage World War date. (#2497)

**Choice AU 1917 Doubled Die Cent
Popular Guide Book Variety**

- 3533 1917 Doubled Die Obverse AU55 PCGS. CAC. FS-101.** This *Guide Book* variety's doubling is most obvious at the date and the word TRUST. The doubled die was not noticed immediately on release, unlike the famous 1955 doubled die, and so a Choice AU example such as the present coin is a condition rarity. Largely medium-brown surfaces show significant olive-gold elements dappled on the upper reverse. (#92495)

Full Red 1917-D Lincoln Cent, MS65

- 3534 1917-D MS65 Red PCGS Secure.** This is just a really pretty coin, despite the rather advanced state of the dies at the time the piece was struck, as seen by considerable die flow lines on both sides. The obverse is orange-red with some light (and minor) purple hues on the high points of Lincoln. The reverse is lighter orange, with a couple of tiny blue dots, all well within the Red appellation. A couple of tiny flecks could pass almost unnoticed. (#2500)

- 3535 1918 MS66 Red PCGS.** Most of the early P-Mint Lincolns have high mintages with low survival rates in Gem or finer grades. The 1918 is no exception. This piece is fully brilliant with bright orange luster and excellent design features. (#2506)
- 3536 1918 MS66 Red PCGS. CAC.** Sharply struck and fully brilliant, this Premium Gem has frosty orange luster with few carbon flecks only visible under a glass. An outstanding representative, and rarely found finer. (#2506)
- 3537 1918-D MS65 Red and Brown PCGS.** Apple-green dominates the obverse while the reverse is primarily ruby-red. Intricately struck and essentially mark-free. A conditionally scarce early Denver issue. Encased in an old green label holder. (#2508)
- 3538 1918-S MS65 Red and Brown NGC.** The obverse ranges from light copper-orange to rich mahogany, while the reverse shows the latter hue as well as deep peach and umber. This smooth and attractive Gem has a single carbon spot of note over the R in LIBERTY.
Ex: FUN (Heritage, 1/2006), lot 186.
From The Fred Yee Collection. (#2511)

**1919-D Lincoln Cent, MS65
Rare Example With Red Surfaces**

- 3539 1919-D MS65 Red NGC.** The 1919-D Lincoln cent is much more difficult to locate with original color and a decent strike than its large mintage of 57 million pieces would suggest. This well-detailed Gem displays vibrant mint luster and pleasing original red surfaces, with a few hints of light brown patina. Census: 42 in 65 Red, 0 finer (7/12).
From The Fred Yee Collection. (#2518)
- 3540 1919-S MS64 Red PCGS.** As an issue, the 1919-S is better produced than the 1918-S. Finding a sharply defined example that also possesses clean, lustrous surfaces is not, however, an easy task. Undeniably original, this coin is colored in golden-orange hues that are free of even the most trivial distraction. The surfaces are nicely frosted with impressive eye appeal. PCGS has graded only 21 finer coins (7/12).
Ex: Long Beach Signature (Heritage, 6/2001), lot 7706.
From The Fred Yee Collection. (#2521)

**Gem Red 1920-S Lincoln Cent
None Finer at NGC**

- 3541 1920-S MS65 Red NGC.** The 1920-S Lincoln cent is rarely encountered with the original orange-red surfaces displayed by the present coin. The design elements are well-detailed and the surfaces radiate vibrant mint luster. Eye appeal is outstanding. Census: 10 in 65 Red, 0 finer (7/12).
From The Fred Yee Collection. (#2530)

- 3542 1922 No D Strong Reverse VF30 NGC. FS-401.** Die Pair 2. The mintmark was probably effaced by excessive die polishing on this important issue. The light brown surfaces of this coin are lightly abraded, but there is a long depression on the reverse, near T in CENT. (#3285)
- 3543 1922 No D Strong Reverse VF30 PCGS. FS-401.** Die Pair 2. A middle-grade medium brown example of this desirable variety. Free from detractors aside from a minor ding on the reverse rim at 9 o'clock. 1922 is the only year of the Lincoln cent without any Philadelphia Mint production, due to large-scale Peace dollar coinage.
From The Dr. Charles Nelson Collection. (#3285)
- 3544 1922 No D Strong Reverse VF30 PCGS. CAC. FS-401.** Die Pair 2. This chocolate-brown representative lacks distracting marks and displays clear separation on the lines of the wheat ears. TRUST and the second 2 in the date are sharper than the remainder of the obverse legends, diagnostic for this key variety.
From The Norva Collection. (#3285)
- 3545 1922 No D Strong Reverse — Improperly Cleaned — NGC Details. AU. FS-401.** Die Pair 2. A briefly circulated example of this key variety. The light chocolate-brown color is agreeable though judged as retuned by NGC. The borders have a few small gray spots, the most apparent on the BU in PLURIBUS. (#3285)
- 3546 1922 No D Strong Reverse — Improperly Cleaned — NGC Details. AU. FS-401.** Die Pair 2. All diagnostics are present for the key Strong Reverse variety. The wheat ears display minimal wear, but the brown wood-grain surfaces are moderately bright. Unabraded though a couple of minor obverse spots are noted. (#3285)
- 3547 1922 No D Strong Reverse — Cleaning — PCGS Genuine. AU Details. FS-401.** Die Pair 2. Diagnostics on the date and TRUST lock in attribution of the desirable No D variety. The apple-green and olive-gold color is deemed suspect by PCGS but there are no other detractors.
From The Fred Yee Collection.
- 3548 1923-S MS63 Red and Brown PCGS.** A well-preserved Select specimen, with pleasing light brown surfaces that retain much of their original red color. The 1923-S Lincoln cent is a scarce issue in higher grades.
From The Fred Yee Collection. (#2547)
- 3549 1923-S MS64 Red PCGS.** For the issue, this near-Gem has a decent strike and is well preserved. The red-brown color is quite rich, with some dappled patina in the obverse fields, and bright iridescence near the borders. Population: 62 in 64 Red, 16 finer (7/12). (#2548)
- 3550 1923-S MS64 Red PCGS.** A satiny fire-red Choice cent that lacks any indication of contact. A good strike except on TRUST. A challenging branch mint issue in full Red. Housed in a green label holder. Population: 62 in 64 Red, 16 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2002), lot 5574.
From The Fred Yee Collection. (#2548)
- 3551 1924 MS66 Red PCGS. CAC.** A spectacular Premium Gem Lincoln cent, with well-preserved original red surfaces and intense satiny mint luster. The well-detailed design elements add to the considerable eye appeal. Population: 70 in 66 (2 in 66+) Red, 5 finer (7/12). (#2551)

- 3552 1924-S MS64 Red and Brown PCGS. CAC.** This satiny, unabraded, and well struck near-Gem is generally apricot-gold although the right obverse field displays a swirl of light gray toning. Minute obverse carbon fails to deny the eye appeal. (#2556)
- 3553 1924-S MS65 Red and Brown NGC. CAC.** Delicate blue toning enhances the brilliant orange luster of this Gem Mint State 1924-S cent. The strike is unusually sharp for this issue. Census: 26 in 65 Red and Brown, 0 finer (7/12). (#2556)

- 3554 1925 MS67 Red NGC.** Booming luster illuminates this decisively struck and essentially immaculate Superb Gem. Peach-red throughout save for a blush or two of iridescent lime-green on the reverse. Census: 26 in 67 Red, 0 finer (7/12). (#2560)

**1925-S Cent, Bright MS64 Red
Scarce With Original Red Color**

- 3555 1925-S MS64 Red PCGS.** This shimmering near-Gem displays intermingled pink and gold colors. The strike is reasonable, but the late stage obverse die does not provide sharp details on the portrait. A couple of "as struck" grease stains are seen around the date and a large one curves across the reverse.
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 1106. (#2566)

- 3556 1926 MS67 Red PCGS. CAC.** Ex: Joshua and Ally Walsh. Rich orange, olive, and ruby tints adorn the margins, while the remainder of this lustrous and unabraded Superb Gem offers consistent light gold color. As the devices are well struck, only the infrequent tiny carbon fleck denies perfection.
Ex: *Joshua and Ally Walsh Collection of United States Cents* (Heritage, 1/2006), lot 233, which realized \$1,667.50. (#2569)

- 3557 1926-S MS64 Red and Brown PCGS.** Glimmers of copper-orange grace the rims, while the interiors show a mix of blue and brown. A largely smooth near-Gem representative of its long-underrated but increasingly popular S-mint issue. (#2574)

- 3558 1927-S MS65 Red and Brown NGC.** A spectacular Gem that is virtually full Red, showing only wispy toning that fails to diminish the mint brilliance. A typical strike is evident and trivial carbon flecks are noted. Census: 22 in 65 Red and Brown, 2 finer (7/12). (#2583)

- 3559 1928 MS67 Red PCGS.** Exceptional color is seen on each side of this Superb Gem P-mint cent. The obverse has pumpkin-gold shadings overall aside from slightly lighter gold accents over Lincoln. The reverse has an olive center bounded by apricot hues. Sharply struck and desirable. Neither NGC nor PCGS has graded a finer Red example (7/12).
Ex: *Dallas Signature* (Heritage, 12/2004), lot 5311; *Jack Lee Estate* (Heritage, 2/2009), lot 495, which realized \$2,300. (#2587)

- 3560 1928-D MS65 Red PCGS.** A copper-red Gem with booming luster and mark-free surfaces. The reverse exergue has a hint of olive and rose. Sharply impressed except for the O in ONE. Housed in an old green label holder. Population: 76 in 65 Red, 11 finer (7/12).
Ex: *Houston Signature* (Heritage, 12/2009), lot 149, which realized \$2,530. (#2590)

- 3561 1929 MS67 Red PCGS. CAC.** Superb Gem examples such as the present lot are anything but common, especially given the popularity of the Lincoln cent series. Only 46 other pieces have been so graded by PCGS, and none have been certified finer by either of the major services (7/12). Beautiful pumpkin-gold surfaces are lustrous and carbon-free with only trivial contact near the ME in AMERICA. (#2596)

**Premium Gem Red 1929-D Cent
None Finer at PCGS**

- 3562 1929-D MS66 Red PCGS.** The 1929-D Lincoln cent is plentiful in lower Mint State grades, but Premium Gem examples, with original red surfaces, are quite rare. This attractive MS66 example displays well-detailed design elements, with just a touch of the typical softness on the central obverse. The unmarked surfaces radiate satiny mint luster. Population: 23 in 66 Red, 0 finer (7/12). (#2599)

- 3563 1931-S MS66 Red PCGS.** Rose-peach in the fields with subtle green-orange tints over the centers. Well-defined with striking eye appeal, and tied for the finest Red example known to PCGS (7/12). (#2620)

- 3564 1933 MS66+ Red PCGS. CAC.** 1933 was near the bottom of the Great Depression, as indicated by the low Philadelphia mintage of 14,360,000 pieces. This high grade and lustrous orange-red example has a sharp strike and radiant eye appeal. (#2629)

- 3565 1936 MS67 Red NGC.** This pumpkin-gold Premium Gem has a precise strike and is virtually void of contact or carbon. Lustrous and beautiful. A common issue except in the present magnificent quality. (#2650)

**Choice Red Doubled Die Obverse
1936 Cent, FS-101**

- 3566 1936 Doubled Die Obverse Type One MS64 Red PCGS. FS-101.** The strongest of the three major 1936 doubled die obverse varieties. All obverse legends are clearly doubled. A fire-red and olive-gold near-Gem with potent luster and a full strike. A few pinpoint flecks near LIBERTY and faint marks near the profile limit the grade. Population: 5 in 64 Red, 12 finer (7/12). (#82650)

- 3567 1945 MS67 Red PCGS. CAC.** This magnificent Superb Gem displays original red surfaces with vibrant mint luster and no mentionable distractions. The design elements are sharply rendered and eye appeal is terrific. (#2734)

- 3568 1950-D MS67 Red PCGS.** The 1950-D Lincoln cent issue is surprisingly elusive in MS67 Red, as the high-speed production of 335 million pieces placed the emphasis on quantity rather than quality. This Superb Gem displays none of the problems of strike or carbon that plague most examples, offering brilliant luster over problem-free, deep orange-red surfaces. Population: 32 in 67 Red, 0 finer (7/12). (#2782)

- 3569 1955 Doubled Die Obverse AU55 PCGS. CAC. FS-101.** This chocolate-brown Choice AU key date cent is mark-free except for a single tiny tick on the right obverse field. Luster glimmers from the portrait and legends. Free from spots and with only a trace of wear on the cheekbone. (#2825)

3570 1955 Doubled Die Obverse AU58 PCGS. FS-101. This chocolate-brown key date cent is kept from Mint State by a trace of wear on the cheekbone and jaw. The satiny surfaces are smooth aside from a single hair-thin line on the exergue.
From The Dr. Charles Nelson Collection. (#2825)

3571 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. Unc. FS-101. Well struck, satiny, and virtually void of contact. Hairline-free but recolored at one time and now displaying dusky blended olive-green and stone-gray toning. The most famous of all Lincoln doubled die varieties. (#2825)

Doubled Die Obverse 1955 Cent MS63 Brown

3572 1955 Doubled Die Obverse MS63 Brown PCGS. FS-101. A lovely golden-brown representative whose lustrous, well struck, and undisturbed surfaces exude eye appeal. The obverse mottos display traces of mint red. Dramatic die doubling throughout the obverse of this variety caused a stir in the hobby in 1955 that still reverberates today. (#2825)

Doubled Die Obverse 1955 Cent MS63 Brown

3573 1955 Doubled Die Obverse MS63 Brown NGC. FS-101. A coruscating deep golden-brown representative of this famous and dramatic doubled die variety. Rotation beneath a light reveals rose-red and aquamarine tints. Essentially void of marks, though minuscule carbon is scattered and a pair of tiny spots are near the stem of the right wheat ear. (#2825)

Choice Red and Brown FS-101 Doubled Die Obverse 1955 Cent

3574 1955 Doubled Die Obverse MS64 Red and Brown PCGS. CAC. FS-101. Dynamic luster sweeps this unabraded and boldly struck Choice key date cent. Orange-gold overall with lilac-red and sea-green high points. There are no obtrusive spots. The most famous of all doubled dies, and a desirable acquisition with significant remaining mint red.
From The Fred Yee Collection. (#2826)

Superb Gem Red 1956-D Lincoln Cent Among the Finest Certified

3575 1956-D MS67 Red PCGS. The flawless original red surfaces of this magnificent Superb Gem display blazing mint luster, with outstanding eye appeal. Only a few microscopic specks of carbon are present on both sides. The design elements are well-detailed and no mentionable contact marks are noted. Population: 25 in 67 Red, 0 finer (7/12). (#2839)

3576 1960-D Small Date MS67 Red PCGS. This well struck Superb Gem features dazzling luster and seamless pumpkin-gold color. Inspection beneath a lens reveals only the most inconsequential imperfections. Population: 12 in 67 Red, 0 finer (7/12). (#2869)

Red Superb Gem 1966 Cent Conditionally Rare

3577 1966 MS67 Red PCGS. Registry Set collectors will perk up when the present offering has its moment at the auction podium. This lustrous peach-red Superb Gem has an intricate strike and is virtually unabraded but its best feature is the absence of carbon or toning. The fields display prominent die lines (as made) from a Mint attempt at removing clash marks, though traces remain within the Memorial. Population: 6 in 67 Red, none finer (7/12). (#2900)

3578 1972 Doubled Die Obverse MS66 Red PCGS. FS-101. This is the *Guide Book* variety, by far the most prominent of the various doubled dies known for this date. A magnificent peach-red Premium Gem with potent luster and only minor imperfections. Certified in an old green label holder. (#2950)

3579 1972 Doubled Die Obverse MS66 Red PCGS. CAC. FS-101. The exceptionally strong obverse die doubling is exceeded only by the famous 1955 variety. This orange-gold Premium Gem has exemplary luster and is pristine aside from the infrequent small fleck. (#2950)

PROOF LINCOLN CENTS

- 3580 1909 PR65 Red PCGS.** An impressive and fully brilliant Gem, this matte proof has slight mellowing of the mint color near the borders, but justifiably received the Red designation. A few tiny carbon flecks and a small dark toning spot are evident. (#3305)
- 3581 1910 PR65 Brown PCGS.** Freckles of chocolate-brown overlie the powder-blue surfaces. This fully struck Gem matte proof is carbon-free and provides excellent eye appeal. Much scarcer than implied by the mintage of 4,118 pieces. (#3306)
- 3582 1911 PR65 Brown PCGS.** A fully struck Gem of this scarce matte proof date. The undisturbed surfaces display fire-red and navy-blue with the latter color more prevalent on the reverse. No carbon or contact is discernible. (#3309)
- 3583 1912 PR65 Red and Brown PCGS.** Rich lavender, orange-red, and cobalt-blue invigorate this needle-sharp and undisturbed Gem. A remarkable display for the toning connoisseur to relish.
Ex: Long Beach Signature (Heritage, 2/2007), lot 2382, which realized \$1,265. (#3313)
- 3584 1913 PR64 Red PCGS.** A lovely peach-red Choice cent with occasional rose shadings and a splash of silver-blue on the face of Lincoln. Devoid of contact though minute carbon is distributed. Matte proofs are very scarce in full Red. (#3317)

PR65 Brown 1916 Cent Rare Matte Proof Issue

- 3585 1916 PR65 Brown PCGS.** Other than the 1909 VDB, the 1916 is the rarest matte proof issue and more challenging than implied by its mintage of 1,050 pieces. The present needle-sharp Gem is void of contact and displays only microscopic carbon. Although designated as Brown, the surfaces retain substantial mahogany-red color. (#3324)
- 3586 1938 PR65 Red Cameo PCGS. CAC.** Rich orange color throughout save for an infrequent whisper of lilac on the fields. Fully struck and exceptionally mirrored. No 1938 cents have been designated as Deep or Ultra Cameo. Population: 10 in 65 Cameo, 6 finer (7/12). (#83341)
- 3587 1938 PR66 Cameo NGC. CAC.** Although the 1936 to 1942 proof issues of all denominations are frequently seen in a wide range of grades, examples with any degree of contrast are rare. This Premium Gem Cameo proof has brilliant orange luster with exceptional cameo contrast, featuring satin devices over fully and deeply mirrored fields. Census: 15 in 66 Cameo, 2 finer (7/12). (#83341)

TWO CENT PIECES

- 3588 1864 Small Motto MS63 Brown NGC. FS-401.** Primarily chocolate-brown although glimpses of the initial orange-gold linger in design recesses. Crisply struck and spot-free. A couple of minor marks near the 2 in the denomination are of little import. (#3579)
- 3589 1864 Small Motto MS64 Brown PCGS. CAC. FS-401.** An impressively undisturbed medium brown representative of this briefly issued subtype. No marks or carbon is remotely of interest. Well struck at the centers with slight inexactness at the margins. (#3579)
- 3590 1865 MS65 Red PCGS. CAC.** This well-detailed Gem exhibits vibrant mint luster and original red surfaces, with a few microscopic specks of carbon. PCGS has graded 44 numerically finer specimens (7/12). (#3584)

PROOF TWO CENT PIECES

- 3591 1869 PR65 Red and Brown PCGS.** Deep blue-brown patina covers most of each side with occasional streaks of red seen on each side, more so on the reverse. The fields are deeply reflective, surprisingly so considering the depth of toning present. Only 600 proofs minted. (#3640)
- 3592 1869 PR65 Red and Brown PCGS.** Only 600 proof two cent pieces were struck in 1869, and Gem examples are very scarce in today's market. This sharply detailed specimen displays mirrored fields with mostly original red surfaces and a few accents of light brown. Population: 59 in 65 (2 in 65+) Red and Brown, 13 finer (7/12).
From The Fred Yee Collection. (#3640)
- 3593 1869 PR65 Red and Brown PCGS. CAC.** An intricately struck and satiny Gem without evidence of contact or carbon. Variegated rose-red and apple-green toning adorns the centers while orange-gold persists near the rims. Encapsulated in a green label holder. (#3640)
- 3594 1870 PR65 Red and Brown PCGS.** Close to full Red with the peach-gold shadings only marginally mellowed. Fully struck and flashy. Void of contact though a loupe reveals infrequent pinpoint flecks. Scarcer than suggested by its mintage, since unsold pieces were melted. (#3643)

Red Gem Proof 1871 Two Cent

- 3595 1871 PR65 Red NGC.** The obverse is principally sun-gold, while the reverse is orange-gold and cherry-red with a glimpse of forest-green at the left margin. TRUST is die doubled, as always seen on proofs of this later date. Fully struck and void of contact with a glimpse of carbon near the reverse center. Census: 31 in 65 Red, 7 finer (7/12). (#3647)

**Proof-Only 1873 Two Cent
Closed 3, PR66 Red and Brown**

- 3596 1873 Closed 3 PR66 Red and Brown PCGS. CAC.** The 1873 is a proof-only date but two logotype varieties are known. The Closed 3 is regarded as an original striking, while its Open 3 successor is called a restrike though it may also have been struck in 1873. The present high grade specimen is housed in a first generation holder. It is fully struck and satiny with moderately mellowed pumpkin-gold color. (#3652)

THREE CENT SILVER

- 3597 1854 MS64 NGC.** This medium almond-gold near-Gem displays pleasing luster and an absence of contact. One tiny spot is centered above the shield. The strike is intricate save for a couple of peripheral stars. (#3670)
- 3598 1854 MS64 PCGS. CAC.** Uncommonly well struck for a commercial issue, this lustrous and essentially brilliant near-Gem is unabraded although mint-made clash marks are prominent. An outstanding example of the Type Two design. (#3670)
- 3599 1858 MS64 PCGS.** Apricot-gold and powder-blue embrace this lustrous and crisply struck near-Gem. The fields are clashed (as coined) though completely free from abrasion. Bulging on the field northwest of the date suggests an improperly tempered obverse die. (#3674)
- 3600 1862/1 MS65 PCGS. CAC. FS-301.** The obverse displays only a trace of tan toning though the reverse has medium chestnut-gold patina. A crisply struck Gem whose lustrous surfaces appear void of detractors. (#3681)
- 3601 1865 — Improperly Cleaned — NGC Details. Unc.** Though cleaned, this three cent silver from the last year of the Civil War is desirable as a survivor of a heavily melted business strike issue that amounted to just 8,000 pieces. Partial blue retoning is seen at the margins.
From The Norva Collection. (#3685)

PROOF THREE CENT SILVER

**First-Year Type Two Three Cent Silver
1854, Toned, Distraction-Free PR63**

- 3602 1854 PR63 PCGS.** The 1854 three cent silver is actually a first-year subtype, the first of the Type Two design, with two extra outlines around the obverse star and bonus olive sprig and bundled arrows on the reverse. It is also the first to be struck in 90% or coin silver as opposed to the earlier subsidiary 75% silver content, which Breen calls "billon." As with virtually all pre-1858 proof coinage the number struck is guesswork, but PCGS estimates that 25 to 30 are known. This conservatively graded piece displays variegated original patina on each side, blue, gold, pink, and gray intermingled. A stray contact mark appears in the field on the upper-left side of the star, and a curving lintmark beneath TE provides a pedigree identifier, but this sharply struck, distraction-free coin boasts more eye appeal than the technical grade suggests. Population: 5 in 63, 9 finer (7/12). (#3701)
- 3603 1858 PR63 NGC.** Proof Type Two three cent silver pieces are seldom encountered and can be very pricey. The 1858 is the most frequently encountered date in the series, but its availability seems much less than the 300 pieces allegedly struck. This is an almost completely brilliant example that has just a hint of golden at the margins. Fully struck in all areas and deeply mirrored.
From The Fred Yee Collection. (#3705)

- 3604 1861 PR64 Cameo NGC.** The gleaming mirrored fields of this attractive Choice specimen contrast boldly with the sharply detailed frosty devices and close inspection reveals only a few minor signs of contact. Census: 2 in 64 Cameo, 3 finer (7/12).
From The Fred Yee Collection. (#83710)

THREE CENT NICKELS

- 3605 1873 Closed 3 MS65 PCGS. CAC.** Caramel-gold and stone-gray intermingle across this lustrous and crisply struck Gem. Void of detractions save for occasional minute flecks. Business strikes of the present quality are scarcer than their proof counterparts. Population: 32 in 65, 10 finer (7/12). (#3739)

Gem 1873 Three Cent Nickel
Open 3, Rich Golden Toning

- 3606 1873 Open 3 MS65 NGC. CAC.** Variegated apricot-gold and stone-gray toning endows this satiny and unabraded Gem. Well struck aside from the lower obverse and upper reverse dentils. The Open 3 is the sole issue of the series unknown in proof format, although incongruously priced as such in the 2013 *Guide Book*. Certified in a prior generation holder. Census: 9 in 65, 3 finer (7/12). (#3740)

1873 Open 3 Three Cent Nickel, MS66
Only Two Other Pieces So Graded

- 3607 1873 Open 3 MS66 NGC.** The 1873 three cent nickel is a surprising condition rarity. The mintage was a hefty 783,000 pieces, but in MS66 only two other pieces have been certified by NGC and none by PCGS (7/12). This is an all-brilliant example that is well struck with complete detailing on the ribbing on the Roman numeral. The only flaw is a small grease stain that was struck into the cheek of Liberty. (#3740)

PROOF THREE CENT NICKELS

1865 Three Cent Nickel
Top-Flight PR67 Cameo
None Graded Finer

- 3608 1865 PR67 Cameo NGC. Breen 2-B.** The first year of the three cent nickel series and the last of the Civil War saw the issuance of these proof 1865s, struck to the extent of somewhere between 400 and 500 pieces according to Breen and the *Guide Book*, respectively. Three obverse die varieties appear in Breen's *Proof Encyclopedia*; this is the most common Breen-2B, showing obvious repunching on the 6 — but high-grade proofs are rare regardless. This well-contrasted Superb Gem Cameo proof is one of four in this grade at NGC, one of which also boasts the Star designation (8/12). There are none numerically finer at NGC in any contrast level. The greenish-silver surfaces show a bold strike and no mentionable signs of contact. (#83761)
- 3609 1868 PR65 PCGS. CAC.** Honey-gold and powder-blue illuminate the reflective surfaces of this sharply struck Gem. The lower reverse displays minor retained laminations, as coined. A meager 600 proofs were produced. The flag of the 1 is lightly repunched. (#3764)
- 3610 1868 PR65 Cameo NGC.** This coin displays dramatic cameo contrast between the frosty design elements and the mirrored fields, with attractive hints of champagne-gold and lavender patina. Census: 30 in 65 Cameo, 29 finer (7/12).
From The Fred Yee Collection. (#83764)
- 3611 1870 PR66 NGC.** Green-gold and lavender tints grace gleaming fields and mildly frosted devices. This attractive Premium Gem specimen is housed in a prior-generation holder. Census: 20 in 66, 0 finer (7/12). (#3766)

3612 1875 PR65 NGC. CAC. This satiny Gem appears brilliant upon first glance but displays a hint of apricot toning. Intricately struck and devoid of contact with a few flecks on the reverse. Certified in a prior generation holder. (#3771)

3613 1878 PR66 PCGS. A collector-favorite because of the low mintage of only 2,350 pieces, all of which were proofs. This is a nicely mirrored example with attractive, light pastel iridescence over each side. (#3774)

1880 Three Cent Nickel, PR67 Cameo Significant Field-Device Contrast

3614 1880 PR67 Cameo NGC. When it comes to a type coin for this unusual denomination, this proof would be hard to beat. Each side is completely brilliant. The fields are deeply reflective and fully mirror-like, and the devices are significantly frosted. The result is strong cameo contrast on each side. Census: 5 in 67 Cameo, 0 finer (7/12). (#83776)

3615 1883 PR67 NGC. CAC. Light rose-gold, lime-green, and steel-blue shades adorn this fully struck and lustrous Superb Gem. A few nearly microscopic flecks near the date and wreath are of little consequence. (#3779)

3616 1887/6 PR66 Cameo NGC. The undertype 6 is plainly visible to the left of the 7 in the date. This delightful Premium Gem is sharply detailed, with brightly reflective surfaces and strong cameo contrast. Interesting clash marks on the reverse and a few die lumps in the field near OF. Census: 23 in 66 Cameo, 12 finer (7/12). (#83784)

SHIELD NICKELS

Premium Gem Rays 1866 Nickel

3617 1866 Rays MS66 NGC. Straw-gold and cream-gray toning adorn this lustrous high grade two-year type coin. The unabraded surfaces show occasional softness of impression but carbon is negligible. Interesting reverse rim die breaks are noted at 1 and 7 o'clock. Census: 25 in 66, 0 finer (7/12).
From The Fred Yee Collection. (#3790)

3618 1869 MS66 PCGS. CAC. Broadly swirling luster enhances the eye appeal of well-preserved surfaces. Nickel-white is the main color, though green-gold accents are present at the margins. The two olive branches have die cracks descending from them, while on the reverse, the strike on the stars is uneven. Population: 11 in 66, 0 finer (7/12). (#3796)

3619 1883/2 MS63 PCGS. CAC. FS-303. One of the more subtle overdates, visible at the lower loop of the 3 only. Green-gold and peach overtones grace broadly luminous, modestly abraded surfaces. (#3814)

PROOF SHIELD NICKELS

3620 1866 Rays PR64 PCGS Secure. CAC. Exquisite peach-gold, rose-red, and lime-green patina illuminates this satiny and fully struck near-Gem. A scarce proof subtype since the rays were removed during the second year of the series. (#3817)

3621 1866 Rays PR64+ NGC. CAC. This Rays nickel is going to please some lucky collector. Essentially a one-year type, the 1866 shows highly variable striking quality among business strikes. Proofs are more consistent. This is a nicely reflective example that only shows slight striking softness on the rays. Light, pastel toning is seen over each side, and there are a few small specks of carbon present.
From The Fred Yee Collection. (#3817)

1867 No Rays Shield Nickel, PR66 Wonderfully Toned, Deeply Reflective

3622 1867 No Rays PR66 NGC. The 1867 No Rays proof has an estimated mintage of 750 to 1100 pieces, according to Q. David Bowers (2006). The fields on this piece show nice depth of mirrored reflectivity. Multicolored orange-gold and powder-blue iridescence is easily seen on each side, along with a few tiny, light flyspecks. Boldly struck and seemingly pristine, this example is solidly graded as a Premium Gem proof. Census: 9 in 66, 0 finer (7/12). (#3821)

3623 1868 PR66 Cameo NGC. Boldly reflective with a light golden overtone that settles over the gleaming fields and partly on the well-frosted devices. Eye-catching contrast is core to this well-preserved specimen's visual appeal. Census: 16 in 66 Cameo, 3 finer (7/12).
From The Fred Yee Collection. (#3822)

3624 1869 PR65 PCGS. CAC. A reflective Gem proof specimen with green-gold and blue overtones enriching each side. Partly contrasted, though the green label holder would not allow a Cameo designation even if the coin qualified. Only 600 proofs were struck. Population: 71 in 65, 22 finer (7/12). (#3823)

3625 1879/8 PR65 Cameo PCGS. CAC. Intricately struck and well preserved. The obverse is satiny, the reverse is flashy, and both sides display light butter-gold patina. A low business strike mintage increases demand for high quality proofs. (#83834)

3626 1882 PR67 PCGS. Ex: Law Collection. An intricately struck, immaculate, and satiny proof type coin. Almond-gold toning is seen on both sides though the lower obverse displays powder-blue. Population: 37 in 67, 0 finer (7/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5863, which realized \$1,610. (#3837)

LIBERTY NICKELS

- 3627 1885 XF40 NGC.** Peach overtones settle across medium-gray surfaces on this key-date Liberty nickel. Some of the obverse stars retain bold inner detail, though others show evidence of striking softness. (#3846)

1885 Liberty Nickel, MS62 Key Business-Strike Issue

- 3628 1885 MS62 NGC.** The 1885 Liberty nickel is the low-mintage business-strike key to the series and collectors prize examples of this date in all grades. This attractive MS62 specimen exhibits well-detailed design elements, with some softness on the lower left stars. The lightly marked surfaces display frosty mint luster, under pleasing nickel-gray patina. (#3846)
- 3629 1886 MS61 NGC.** Light nickel-gray surfaces have considerable but by no means universal gold-orange overtones. Appreciably abraded but still a desirable example of this famous Liberty nickel issue. (#3847)
- 3630 1887 MS65 PCGS.** Powder-blue, rose-red, and green-gold toning illuminates this lustrous and unmarked Gem. The upper stars and left ear of the corn exhibit a typical impression. The 1 in the date is repunched north. (#3848)
- 3631 1894 MS65+ PCGS. CAC.** Apricot-gold, olive-green, and lilac-red shades embrace this pristine and lustrous Gem. The stars and the left ear of corn show typical definition. A lower mintage date. Rare any finer. (#3855)

Patinated MS66 1895 Nickel

- 3632 1895 MS66 PCGS.** Green-gold and gunmetal-gray toning adorns this lustrous and boldly struck Premium Gem. No marks are visible and any carbon is inconsequential. A mintage of less than 10 million pieces contributes to the conditional rarity. Population: 12 in 66, 0 finer (7/12). (#3856)

Top-Shelf Superb Gem 1900 Nickel Green Label Holder

- 3633 1900 MS67 PCGS.** Fully struck with extraordinary luster that is mostly brilliant, though there is just a hint of light golden patina on the reverse. The strike is uneven on the stars and lower wreath, but these minor faults are entirely forgivable. Population: 5 in 67, 0 finer (7/12).
Ex: *World's Fair of Money (Heritage, 8/2001)*, lot 5562. (#3861)

- 3634 1912-S — Obverse Planchet Flaw — NGC Details. Unc.** This low-mintage key features well-detailed design elements with attractive shades of champagne-gold and lavender patina. A few irregular planchet defects are evident, the most noticeable near Liberty's nose.
From *The Fred Yee Collection*.

1912-S Liberty Nickel, MS64 In-Demand, Key Issue

- 3635 1912-S MS64 NGC.** A key final-year issue in the 1883-1912 Liberty series, the 1912-S is also the premier nickel from the San Francisco Mint with a mintage of only 238,000 pieces. The devices are typically struck on Liberty's hair and at the base of the wreath, each side exhibiting a light coating of steel-gray and blue patina. This near-Gem key is worthy of a close look and a strong bid.
Ex: *Central States Signature (Heritage, 5/2004)*, lot 6221.
From *The Dr. Charles Nelson Collection*. (#3875)

Near-Gem 1912-S Nickel Scarce Low Mintage Issue

- 3636 1912-S MS64 PCGS.** This nicely struck, smooth, and lustrous near-Gem is mostly caramel-gold but has a splash of ruby-red patina on the lower reverse. The 1912-S has the lowest business strike mintage of the Liberty nickel series, and has historical significance as the first San Francisco issue of the type. (#3875)

PROOF LIBERTY NICKELS

1883 No Cents Liberty Nickel, PR67 Deeply Mirrored, Lightly Toned

- 3637 1883 No Cents PR67 PCGS.** Ex: Compradore Collection. A Superb Gem proof representative of this single-year type issue. Light gray surfaces provide a backdrop for hints of pale gold toning. The famous No CENTS Liberty nickel was issued for a brief period in 1883 before problems developed with the design. The story of Racketeer nickels is a famous one that has been repeated many times in auction catalogs and other numismatic promotional material. Population: 4 in 67, 0 finer (7/12).

Ex: *Central States Signature* (Heritage, 5/2007), lot 1550; *West Palm Beach Signature* (Heritage, 6/2008), lot 380. (#3878)

- 3638 1883 No Cents PR66 Cameo NGC.** Sharply detailed throughout, this spectacular Premium Gem displays mirrored fields that contrast boldly with the frosty design elements. The well-preserved surfaces show a few hints of champagne-gold and lavender toning. Census: 62 in 66 (1 in 66+) Cameo, 18 finer (7/12). (#83878)

- 3639 1883 No Cents PR66 Cameo NGC.** From the first year of the Liberty design, the famous No Cents reverse is a favorite issue with type collectors. This sharply detailed Premium Gem exhibits reflective fields and frosty devices with intense cameo contrast. Census: 62 in 66 (1 in 66+) Cameo, 18 finer (7/12).
From *The Fred Yee Collection*. (#83878)

- 3640 1883 No Cents PR66 Cameo PCGS. CAC.** From a generous mintage of 5,219 pieces, the 1883 proof No Cents Liberty nickel is still a scarce issue in Premium Gem condition. This impressive coin offers deeply mirrored fields that contrast boldly with the sharply detailed frosty design elements. A few hints of light gold and lavender toning add to the outstanding visual appeal. Population: 64 in 66 (4 in 66+) Cameo, 11 finer (7/12). (#83878)

- 3641 1884 PR66 NGC. FS-301.** The 1 in the date is prominently repunched southeast. The obverse die later coined business strikes. A crisply struck and satiny high grade proof with exceptional preservation and attractive light cherry-red and lime-green toning.
From *The Fred Yee Collection*. (#3882)

- 3642 1884 PR67 Cameo NGC.** Writing in 1995, Gloria Peters and Cynthia Mohon stated of this second-year proof Liberty nickel: "Date seems to be available in all certified grades except ... PR67 and 68." An important condition rarity, the present Superb Gem is silky-smooth from rim to rim. Razor sharp striking definition characterizes all features, and the warmly frosted devices contrast nicely with the deeply mirrored, glassy fields. Nearly untuned with just the slightest suggestion of peripheral color. Census: 14 in 67 Cameo, 3 finer (7/12).

Ex: *Santa Clara Signature* (Heritage, 11/2002), lot 5850. (#83882)

- 3643 1885 PR65 PCGS.** Rich apricot-gold toning encompasses this satiny and fully struck Gem. Void of detractions and housed in a green label holder. Although proofs are relatively available they are nonetheless in demand due to the rarity of Mint State examples. (#3883)

- 3644 1885 PR66 NGC.** Attractive shades of champagne-gold and lilac toning blanket the well-preserved surfaces of this delightful Premium Gem. The design elements are sharply defined and the reflective fields show some hints of mint frost.
From *The Dr. Charles Nelson Collection*. (#3883)

- 3645 1885 PR66 PCGS. CAC.** Pastel lilac, rose, and olive shades endow this coruscating high grade and key date specimen. The strike is unassailable and the mark-free surfaces exhibit only the most inconsequential carbon. (#3883)

1885 Liberty Nickel, PR67 Only Three Finer Specimens at NGC

- 3646 1885 PR67 NGC.** A substantial mintage of 3,790 proof Liberty nickels was achieved in 1885, but few survivors can match the quality or eye appeal of this magnificent Superb Gem. This coin is sharply detailed throughout, except for some incomplete radials on stars 1 and 2, and the brilliant reflective surfaces show no mentionable distractions. Census: 16 in 67, 3 finer (7/12). (#3883)

- 3647 1891 PR66 Cameo NGC.** Reddish-gold and powder-blue colors bathe this penetratingly struck Premium Gem. Undisturbed surfaces and delightful field-motif contrast confirm the wonderful eye appeal. Census: 27 in 66 Cameo, 3 finer (7/12). (#83889)

- 3648 1894 PR67 NGC.** Exquisite peach-gold and ice-blue toning endows this lustrous and immaculate Superb Gem. Fully struck and desirable. The date is lightly repunched, visible above the flag of the 1 and beneath the corner of the 4.
Ex: *Santa Clara Signature* (Heritage, 11/2002), lot 5860. (#3892)

1895 Ultra Cameo Nickel, PR66 The Only Ultra/Deep Cameo Certified

- 3649 1895 PR66 Ultra Cameo NGC.** It appears this is a newly certified coin, and as such it is the only Ultra or Deep Cameo 1895 nickel that has been graded. And the mirrors are incredibly deep on each side of this well-produced proof striking. Likewise, the devices are heavily frosted and offer strong contrast on each side. The only flaws we see are a couple of tiny contact marks near the center of the reverse and a planchet flake close to the lower portion of the wreath. Unimprovable quality. (#93893)

- 3650 1898 PR66 Cameo PCGS. CAC.** Dramatic cameo contrast is apparent between the deeply mirrored fields and the razor-sharp frosty design elements of this spectacular Premium Gem. Population: 15 in 66 Cameo, 4 finer (7/12). (#83896)

3651 1902 PR66 Cameo NGC. Struck in the first year of the no-contrast period of proofing in the Mint, this piece does show cameo contrast but it is not as pronounced as, say, on a 1901. Each side is mostly brilliant with just a hint of yellowish patina present. Census: 3 in 66 Cameo, 1 finer (7/12). (#83900)

3652 1903 PR67+ ★ NGC. This high-end Superb Gem displays sharply detailed design elements and deeply mirrored fields with attractive champagne-gold toning. Census: 27 in 67, 3 in 67 ★, 1 in 67+ ★, 6 finer (7/12). (#3901)

3653 1904 PR64 NGC. Dusky rose-red and sun-gold toning consume this intricately struck and nicely mirrored Choice proof type coin. (#3902)

1905 Nickel, PR66 Cameo Only One Finer at PCGS

3654 1905 PR66 Cameo PCGS. CAC. Delicate lavender and gold overtones appear on the ice-blue surfaces of this lovely Premium Gem Cameo proof. Remarkable mirrored fields surround the satin devices of this example. Cameo proofs of all denominations from the early 20th century are rarities. Population: 4 in 66 Cameo, 1 finer (8/12). (#83903)

Superb Gem Cameo Proof 1905 Nickel

3655 1905 PR67 Cameo NGC. Immensely reflective fields carry the contrast with the little-frosted devices on this blue-accented Superb Gem Cameo proof. The fields have a hint of delicate texture, an aesthetically pleasing aspect of an incredibly well-preserved coin. Census: 3 in 67 Cameo, 0 finer (7/12). (#83903)

1907 Liberty Nickel, PR66 Cameo Only Two Finer PCGS Coins

3656 1907 PR66 Cameo PCGS. CAC. Discounting the clandestine 1913 issue, the 1907 Liberty Head nickel boasts the lowest proof mintage of the series, at 1,475 pieces. This sharply detailed Premium Gem exhibits distinct cameo contrast between the frosty devices and the deeply mirrored fields. Population: 11 in 66 Cameo, 2 finer (7/12). (#83905)

3657 1908 PR67 ★ NGC. A spectacular Superb Gem with razor-sharp definition on all design elements and brightly mirrored fields that show just a wisp of light gold toning. Census: 19 in 67 (1 in 67+), 3 in 67 ★, 2 finer (7/12). (#3906)

Premium Gem Proof 1908 Liberty Nickel Seldom Encountered Cameo Specimen

3658 1908 PR66 Cameo PCGS. CAC. Gleaming gold-accented surfaces offer immense reflectivity on this delightful Premium Gem specimen. Decisively struck and appealing, an unusual Cameo representative of this later Liberty issue. From a mintage of just 1,620 pieces. Population: 13 in 66 Cameo, 4 finer (7/12). (#83906)

3659 1910 PR66 Cameo NGC. CAC. A razor-sharp and virtually untuned Premium Gem that remains as immaculate today as it was one century ago. A trio of faint retained obverse laminations are seen near stars 1, 4, and 7. Census: 15 in 66 Cameo, 15 finer (7/12). (#83908)

3660 1910 PR66 Cameo PCGS. CAC. The fields are nicely mirrored and also display vibrant cartwheel sheen. The present fully struck specimen offers delicate honey toning and a few peripheral gray flecks on the reverse. Population: 20 in 66 Cameo, 13 finer (7/12). (#83908)

1910 Liberty Nickel, PR67 Rare Cameo Example

3661 1910 PR67 Cameo PCGS. A nominal mintage of 2,405 proof Liberty nickels was accomplished in 1910, and few examples can match the quality of this extraordinary Superb Gem. This coin displays razor-sharp definition on all design elements, which contrast boldly with the pristine fields. Like many proofs of this date, the fields show a combination of frosty luster and reflective mirrors. Population: 11 in 67 Cameo, 2 finer (7/12). (#83908)

3662 1911 PR66 Cameo PCGS. CAC. Darkly reflective fields provide noticeable contrast with the luminous and well struck motifs. A thin layer of apricot-gold patina blankets the flawless surfaces. Ex: Milwaukee Central States (Heritage, 5/2004), lot 6298. (#83909)

**1912 Liberty Nickel, PR67 Cameo
Glittering Fields, Sharply Contrasted**

- 3663 1912 PR67 Cameo NGC. CAC.** One of the more visually impressive proofs from the final year of Liberty nickel production that we have ever seen. The glittering, untoned surfaces offer dramatic contrast and are essentially as struck. Census: 5 in 67 Cameo, 0 finer (7/12).
Ex: New York Signature (Heritage, 7/2004), lot 5494; Long Beach Signature (Heritage, 5/2003), lot 5590. (#83910)

BUFFALO NICKELS

- 3664 1913 Type One MS67 PCGS.** Aquamarine, lilac, and golden-tan enrich this lustrous, crisply impressed, and unabraded Superb Gem. A magnificent representative of the ephemeral design subtype. Struck from moderately rotated dies.
Ex: Marvin Elkin Collection (Heritage, 6/2002), lot 5459, which realized \$1,092.50. (#3915)
- 3665 1913-S Type One MS66 PCGS. CAC.** The rough-hewn fields and raised mount identify the ephemeral Type One subtype, promptly modified by Charles Barber to protect the denomination from wear. Golden-brown and mark-free with minute carbon. Well struck except on the tail. Certified in a green label holder.
From The Fred Yee Collection. (#3917)
- 3666 1913 Type Two MS66 PCGS. CAC.** Sharply struck with gleaming luster, attractive rose-gray and gold coloration, and no more than two to three minor contact marks, all on the bison. Strong clash marks (as struck) show just beneath the Indian's chin.
Ex: Long Beach Signature (Heritage, 9/2004), lot 5905. (#3921)
- 3667 1913-D Type Two MS65 PCGS.** A better date Gem that boasts a sharp strike and a smooth appearance. The caramel-gold surfaces show only inconsequential carbon. Encapsulated in a green label holder.
From The Fred Yee Collection. (#3922)
- 3668 1913-S Type Two MS62 NGC.** This low mintage golden-gray representative has pleasing luster and an impressively unabraded appearance. The mintmark is sharp, and the date is plain though slightly blurry due to the strike. A heavy, interesting die crack ventures along the Indian's shoulder. (#3923)
- 3669 1913-S Type Two MS63 PCGS.** Gold-orange overtones across each side are most visible in the fields. Though striking softness affects the high points, the underlying quicksilver luster is pleasing. Housed in a green label holder. (#3923)

**MS65 1913-S Type Two Nickel
Frosty Obverse, Gold-Toned Reverse**

- 3670 1913-S Type Two MS65 PCGS.** The obverse die used to strike this Type Two 1913-S nickel was pushed well past what should have been the point of retirement; the surfaces are startlingly frosty and die erosion is visible all around the margins. The golden touches on the obverse contrast with the fuller antique-gold appearance of the reverse. Housed in a green label holder.
From The Fred Yee Collection. (#3923)

**Luminous Gem 1913-S Type Two Nickel
Important First-Year Key**

- 3671 1913-S Type Two MS65 NGC.** Broadly lustrous with the surface texture ranging from frostiness to small pools of watery reflectivity. The strike is typically soft, but there are few marks and minimal carbon. Blue-gray and green-gold overtones visit both sides. The 1913-S Type Two nickel largely missed out on the first-year savings effect, and just 1,209,000 of the coins were struck. Census: 68 in 65, 19 finer (7/12).
From The Fred Yee Collection. (#3923)
- 3672 1914-D MS65 PCGS.** This well struck early branch mint Gem has lilac-gray and chestnut-tan toning. Essentially devoid of contact, though minor carbon is noted. Certified in a green label holder.
From The Fred Yee Collection. (#3925)
- 3673 1914-D MS65 PCGS.** Autumn-gold and dove-gray toning compete for territory across this coruscating and splendidly preserved Gem. The borders are nicely struck, although the centers show softness. In a green label holder. (#3925)
- 3674 1914-S MS65 PCGS.** The slightly granular surfaces of this impressive Gem radiate vibrant mint luster and the design elements are sharply rendered throughout. PCGS has graded only 29 finer examples (7/12). (#3926)
- 3675 1914-S MS65 PCGS.** A beautifully toned Gem with golden-brown margins and powder-blue centers. The low mintage branch mint nickel is satiny and unabraded with a matte obverse and a glossy reverse. Certified in a green label holder.
From The Fred Yee Collection. (#3926)

3676 1914-S MS65 PCGS. A fully struck Gem whose coruscating and mark-free surfaces possess uncommon eye appeal. The obverse is sea-green and lilac, while the reverse displays caramel-gold and lavender patina. Certified in a green label holder. (#3926)

3677 1915-S MS64 NGC. Light honey-gold and pearl-gray surfaces shimmer with luster and exhibit a pleasing strike. No marks are detected and the eye appeal is excellent for this early low mintage issue. Encased in a prior generation holder.
From The Fred Yee Collection. (#3929)

3678 1915-S MS64 NGC. Ocean-blue and green-gold embrace this shimmering and mark-free Choice nickel. The date and mintmark are intricate though the tail and centers show softness. A low mintage collector favorite. Housed in a prior generation holder. (#3929)

Colorful MS65 1915-S Nickel

3679 1915-S MS65 PCGS. Boldly toned with blues and violets through the outer zones and off-center “cores” of gold and apricot pushed toward the top on the obverse and the right on the reverse. Under the toning is a pleasingly lustrous Gem with few marks.
Ex: Superior (5-6/1999), lot 1924.
From The Fred Yee Collection. (#3929)

Doubled Date 1916 Nickel, VG10 Rarest Guide Book Variety of Series

3680 1916 Doubled Die Obverse VG10 PCGS. FS-101. The 1916 Doubled Die Obverse Buffalo nickel is a rare and significant variety. Collectors avidly pursue examples in all grades. The obverse die is doubled to the southeast, with the widest spread on the date. The present gunmetal-gray example has a fully readable date and all other legends are sharp. One spot is noted beneath OF and a faint curved hair-thin mark crosses the forehead. (#3931)

3681 1916-D MS65 PCGS. CAC. This coruscating and mark-free Gem has lime-green and gunmetal-gray toning. Infrequent pinpoint carbon is all that limits the grade. Crisply struck for a Denver Mint issue from the era. Encased in a green label holder.
From The Fred Yee Collection. (#3932)

3682 1916-S MS65 PCGS. Light blues and green-gold are the major elements in the modest wash of patina enriching each side. Understated luster is up to the task on this attractive Gem. Housed in a green label holder.
From The Fred Yee Collection. (#3933)

Sharply Struck Gem 1917-S Nickel

3683 1917-S MS65 PCGS. CAC. Medium sea-green, peach-gold, and steel-gray toning adorns this lustrous and impressively unabraded Gem. The strike is uncommonly sharp, particularly on the hair above the braid. Certified in a green label holder. Population: 79 in 65 (1 in 65+), 22 finer (7/12).
From The Fred Yee Collection. (#3936)

3684 1918 MS65 NGC. Bright, satiny mint luster and subtle pastel coloration characterize this Gem coin. The strike is just a bit short of complete on the reverse. (#3937)

3685 1918-D MS64 NGC. Steel-gray and apricot tints adorn this satiny and unblemished Choice nickel. The tail and centers show bluntness usual for this better branch mint issue. In a former generation holder.
From The Fred Yee Collection. (#3938)

1918-D Nickel, Satiny MS65

3686 1918-D MS65 PCGS. Its association with the famous overdate is one reason that the 1918-D is popular with collectors. Another reason is its condition rarity. PCGS has certified just one Gem or finer specimen for every 100,000 coins that were minted. This impressive piece has brilliant nickel-gray luster with no evidence of toning on either side. The strike is bold and the eye appeal is excellent. Population: 67 in 65 (1 in 65+), 23 finer (7/12). (#3938)

AU Details 1918/7-D Nickel Popular Guide Book Variety

3687 1918/7-D — Improperly Cleaned — NGC Details. AU. FS-101. This example of the bold and popular Guide Book overdate retains almost all of its original detail. The surfaces were less fortunate, though subsequent golden retoning softened the harsh edges of the coin's uniform cleaned luster. Many collectors will appreciate the opportunity this coin offers.
From The Fred Yee Collection.

Near-Gem 1918-S Nickel

- 3688 1918-S MS64 NGC.** Like many early San Francisco issues, the 1918-S is challenging to secure in better Mint State grades. The present lustrous near-Gem lacks visible marks and displays medium aquamarine and mauve toning. A good strike with a crisp mintmark and tail. Encased in a former generation holder.
From The Fred Yee Collection. (#3940)

Pleasingly Toned MS64 1919-D Nickel

- 3689 1919-D MS64 PCGS. CAC.** A broad luminous swirl dominates the eye appeal of this near-Gem, lighting up patina that ranges from green-gold to rose and violet. Detail is decidedly above-average for this branch mint issue, if a trifle soft on the highest design elements. Housed in a green label holder.
From The Fred Yee Collection. (#3942)

1919-S Nickel, MS64 Quality for the Grade

- 3690 1919-S MS64 PCGS.** Gold-tinged at the margins with lighter nickel-gray interiors, this near-Gem has minor carbon but major visual appeal. The strike is above-average for the issue, though still soft on central features such as the portrait's braid and the bison's shoulder. Housed in a green label holder.
From The Fred Yee Collection. (#3943)
- 3691 1920-D MS64 PCGS.** Lovely peach-gold, lilac-red, and stone-gray toning embraces this coruscating and unabraded Choice semi-key nickel. The dies are moderately rotated and clashed beneath the chin. Encased in a green label holder.
From The Fred Yee Collection. (#3945)

1920-S Nickel, MS64 Green Label Holder

- 3692 1920-S MS64 PCGS.** Decently struck for the issue with a quicksilver gloss, this near-Gem has a carbon spot between the bison's head and shoulder but few readily visible marks. Die erosion is noted along the margins where olive and orange-gold tints collect, a sign of the frequent overuse to which U.S. coinage dies were subjected in the 1920s.
From The Fred Yee Collection. (#3946)

MS65 1920-S Buffalo Nickel Toned Condition Rarity

- 3693 1920-S MS65 NGC.** Despite a mintage of nearly 9.7 million pieces, the 1920-S nickel is a great condition rarity at the Gem level and virtually unavailable any finer. The issue by-and-large was poorly produced and little-saved, making attractive examples a tiny minority. This luminous example has rich green-gold, tan, and magenta hues draping smooth fields and devices that are soft on the high points but far better-defined than the norm. The holder permits examination of the edge, which shows beveling in places, particularly at the upper obverse. Census: 14 in 65, 1 finer (7/12).
(#3946)

- 3694 1921-S AU53 NGC.** Medium forest-green, stone-gray, and chestnut-gold toning encompasses this well struck and briefly circulated low mintage nickel. Marks are trivial overall despite a hair-thin line beneath the bison's flank. (#3948)

**1921-S Buffalo Nickel, MS65
Only Three Finer Examples at NGC**

- 3695 1921-S MS65 NGC.** The 1921-S Buffalo nickel boasts a low mintage of 1.5 million pieces and Gem examples are very scarce today. This sharply detailed Gem displays satiny mint luster and hints of champagne-gold and ice-blue toning. Census: 34 in 65, 3 finer (7/12).
From The Fred Yee Collection. (#3948)

- 3696 1923 MS66+ PCGS. CAC.** Appealing powder-blue, rose-red, and lemon-blue toning illuminates this unabraded and lustrous Buffalo nickel. Well struck save for the curve of the tail. A few tiny gray flecks near the profile. (#3949)

- 3697 1923-S MS64 NGC.** Frosty luster swirls on an attractive near-Gem with gold and orange toning most prominent at the rims. Minor flyspecks and a wispy abrasion just below the bison's shoulder contribute to the grade.
From The Fred Yee Collection. (#3950)

- 3698 1924-D MS64 PCGS.** Rich powder-blue and apricot patina invigorates this lustrous and mark-free near-Gem. The mintmark and date are clear though some design elements are lightly impressed. Encased in a green label holder.
From The Fred Yee Collection. (#3952)

**1924-D Nickel, Upper-End Gem Example
Sparkling Mint Luster**

- 3699 1924-D MS65 NGC.** This upper-end Gem has bright mint luster and each side displays even, light toning. The 1924-D is one of the best-known strike rarities from the 1920s. A few fully struck examples may be known, but with most high-grade pieces the question is the degree of completeness. On this coin the matting on the bison's head is soft, and there is just a bit of weakness noted above the Indian's braid (the usual case with most Buffalo nickels). Census: 18 in 65, 1 finer (7/12). (#3952)

Smooth Select 1924-S Nickel

- 3700 1924-S MS63 NGC.** Rich rose-red and olive-green toning embraces satiny and mark-free surfaces. Moderate carbon corresponds to the grade. The date and mintmark are sharp though the hair above the ear is incomplete. The low mintage 1924-S has long been regarded as among the scarcest issues of the all-American series.
From The Fred Yee Collection. (#3953)

- 3701 1925-D MS64 NGC. CAC.** Delicate mauve and gold shades enrich this lustrous and smooth Choice nickel. Evenly struck and attractive. A conditionally elusive branch mint issue. Certified in a prior generation holder.
From The Fred Yee Collection. (#3955)

- 3702 1925-S MS63 PCGS.** The centers are lilac and are bounded by caramel-gold patina. Well preserved and coruscating with an above average strike for this scarce branch mint issue. Certified in a green label holder.
From The Fred Yee Collection. (#3956)

**Gem 1926-D Buffalo Nickel
Rare Issue in Higher Grades**

- 3703 1926-D MS65 PCGS.** The 1926-D Buffalo nickel is a scarce issue in high grade. This delightful Gem displays vibrant satiny mint luster, sharply detailed design elements and attractive highlights of champagne-gold and ice-blue toning. Housed in a green label holder. Population: 91 in 65 (1 in 65+), 24 finer (7/12).
From The Fred Yee Collection. (#3958)

- 3704 1926-S — Improperly Cleaned — NGC Details. AU.** A lightly circulated stone-gray representative that has an even strike and no noticeable marks. The bison's hipbone shows minor wear. The lowest mintage issue of the series. (#3959)

Select 1926-S Buffalo Nickel
Attractively Toned Key Issue

- 3705 1926-S MS63 PCGS.** From a low mintage of 970,000 pieces, the 1926-S is a key date in the Buffalo nickel series. This charming Select specimen features well-detailed design elements and lustrous surfaces, with attractive shades of champagne-gold and ice-blue toning. Eye appeal is quite strong for the grade.
From The Fred Yee Collection. (#3959)

- 3706 1927-S MS62 NGC.** Luminous gray surfaces show blue or peach aspects depending on the angle to the light. Softly struck on the high points with a few hidden abrasions but solid all-around eye appeal.
From The Fred Yee Collection. (#3962)

1927-S Nickel, MS64
Nicely Toned and Well Struck

- 3707 1927-S MS64 NGC.** Considerably easier to locate in high grades and with better striking details than previous S-mints, this piece is well (but not fully) struck. The surfaces show bright mint luster with rose and lilac overtones. A very attractive example with most of the eye appeal of a full Gem.
Ex: Long Beach Signature (Heritage, 9/2002), lot 6026.
From The Fred Yee Collection. (#3962)

MS64+ 1927-S Nickel, Iridescent Toning

- 3708 1927-S MS64+ NGC. CAC.** Attractive iridescent toning in shades of saffron, jade, and fire-red graces each side of this near-Gem Buffalo nickel. This piece shows a decent strike, and only a sprinkling of light marks precludes an even finer grade. NGC has graded 17 examples as MS65 or better (7/12). (#3962)

Luminous Gem 1928-S Nickel
Green Label Holder

- 3709 1928-S MS65 PCGS.** This Gem example of the popular mintmarked 1920s issue has quicksilver luster that is largely nickel-gray but also has olive and green-gold attributes. The strike is slightly above-average, and a few "smudges" of opaque patina are noted along the margins. Housed in a green label holder. Population: 65 in 65, 6 finer (7/12).
From The Fred Yee Collection. (#3965)

- 3710 1929-DMS65 PCGS.** This better date Gem exhibits lavender motifs and straw-gold fields. The tail is well struck though selected areas are incompletely brought up. Encapsulated in a green label holder.
From The Fred Yee Collection. (#3967)

- 3711 1930-S MS66 NGC.** Well struck for a branch mint issue, though the hair above the braid is incomplete. The date, mintmark, and bison's hair are all sharp. Light tan and aqua toning further aids the eye appeal. Certified in a former generation holder.
From The Fred Yee Collection. (#3970)

- 3712 1934 MS66 PCGS. CAC.** Gorgeous peripheral toning consists of slender bands of cherry-red, forest-green, and lemon-gold. The obverse center displays powder-blue while the bison has lilac tints. A few tiny flecks near the Indian's chin and a small spot at the base of the A in STATES. (#3972)

Superb Gem 1935-S Buffalo Nickel
Among the Finest Certified

- 3713 1935-S MS67 PCGS.** The 1935-S Buffalo nickel is an underrated date in high grade. This majestic Superb Gem is among the finest-known specimens, with sharply detailed design elements and virtually pristine fields. Vibrant mint luster is apparent on both sides and the surfaces display a few accents of light gold and ice-blue patina. Population: 28 in 67, 0 finer (7/12). (#3976)

- 3714 1936 MS67 PCGS.** A magnificent Superb Gem with razor-sharp definition on all design elements and vibrant mint luster on both sides. A few wisps of light gold and ice-blue toning enhance the pleasing surfaces. PCGS has grade no numerically finer specimens (7/12).(#3977)
- 3715 1936 MS67 PCGS.** A bright and frosty Superb Gem with little color on either side aside from hints of peripheral green-gold. Well-defined on the obverse, though the reverse has minor weakness. PCGS has graded no examples as MS68 or better (8/12).(#3977)
- 3716 1936 MS67 PCGS. CAC.** A colorful example with violet-blue and gold-orange overtones enriching each side. The obverse has a curve of the latter color against a backdrop of the former, while the reverse has violet-blue largely on the bison with gold-orange for a "sky."(#3977)
- 3717 1936-S MS67 PCGS.** This spectacular Superb Gem displays vibrant satiny mint luster and fully struck design elements on both sides, with just a wisp of light gold and ice-blue toning. Population: 63 in 67, 0 finer (7/12).(#3979)
- 3718 1937-D Three-Legged AU53 NGC. FS-901.** Dove-gray and tan-brown toning encompass the unperturbed surfaces of this key date nickel. All diagnostics of the variety are evident. The bison's hip and hair display moderate wear.(#3982)
- 3719 1937-D Three-Legged AU55 NGC. FS-901.** Lilac-red and orange-gold embrace this coruscating but lightly worn key date example. No marks are remotely consequential, and variety characteristics (such as the granular hind leg) are plainly evident.(#3982)
- 3720 1937-D Three-Legged AU55 PCGS. CAC. FS-901.** A dusky cream-gray Choice AU example that boasts bold detail and only a single remotely mentionable mark, a thin line at 4 o'clock on the obverse. Among the most famous die varieties of the series, along with the 1918/7-D and the 1916 doubled date.(#3982)
- 3721 1937-D Three-Legged AU58 NGC. FS-901.** Blended gunmetal-gray and walnut-brown toning enriches the nearly mark-free surfaces of this key date nickel. The horn tip is sharp and all diagnostics are evident, such as the trail of minute die flaws beneath the bison's flank.(#3982)
- 3722 1937-D Three-Legged AU58 NGC. FS-901.** A caramel-gold near-Mint representative of this famous and perennially popular mint error. Sharply struck and nearly unabraded with light wear on the high points of the bison.
From The Dr. Charles Nelson Collection.(#3982)
- 3723 1937-D Three-Legged AU58 NGC. FS-901.** Lightly toned and lustrous. The diagnostic trail of die dots beneath the flank are clear. An attractive example of this traditionally pursued variety. Smooth aside from a pair of minute rim nicks on the reverse at 4:30.(#3982)

**1937-D Three-Legged Buffalo, MS62
High Demand Enjoyed**

- 3724 1937-D Three-Legged MS62 NGC. FS-901.** A popular *Guide Book* variety, the 1937-D Three-Legged Buffalo nickel is in strong demand across a wide range of grades from well-circulated to Gem Mint State. Mellow gold toning appears over lustrous gray surfaces on this lovely example. The strike is especially bold with a noticeably split tail. (#3982)

**Select 1937-D Three-Legged Nickel
Frosty With Pleasing Overtones**

- 3725 1937-D Three-Legged MS63 PCGS. FS-901.** This Select example of the popular die-state variety is notable for its frosty appearance and pillowy reverse luster. Green-gold and blue-violet overtones drape broadly luminous surfaces that seem far smoother than the MS63 designation might suggest. Housed in a green label holder.
From The Fred Yee Collection. (#3982)
-

**1938-D/S Buffalo Nickel, MS68
Spectacular Multicolor Toning**

- 3726 1938-D/S MS68 NGC. FS-511.** There are several overmintmarked dies, but this is the most significant among them, since the S mintmark can be seen both above and within the D mintmark, which is repunched at the base. This is the variety photographed on page 134 of the 2013 *Guide Book*. The present coin, however, is even more noteworthy for its remarkable toning. Both sides are bathed in vivid lemon-gold, fire-red, lilac, and gunmetal shades. The lustrous surfaces are virtually immaculate, and the strike is good with only slight blending on selected peripheral elements such as the curve of the tail. The present coin was the first 1938-D/S to be graded MS68 by NGC, although over the past ten years it has been joined by five others, with 1 graded MS68 ★ (7/12). *Ex: Robert Moreno Collection (Bowers and Merena, 4/2005), lot 376, which realized \$11,213. (#3985)*

PROOF BUFFALO NICKELS

**Premium Gem Proof 1913 Type One Nickel
Glorious Example of One-Year Type**

- 3727 1913 Type One PR66 NGC.** Gold-gray overtones on this Premium Gem matte proof turn orange when tilted fully into the light. A magnificently preserved example of this one-year-only proof type that showcases all of the rugged detail of the Type One Buffalo nickel in exacting proof glory. *From The Fred Yee Collection. (#3988)*

**1915 PR67 Buffalo Nickel
Carbon-Free and Lovely Toning**

- 3728 1915 PR67 PCGS Secure.** Now, this is a nice coin. The surfaces appear to be completely free from carbon spotting, at least we do not see any with a strong loupe. Additionally each side is beautifully toned in shades of rose and lilac. The mintage was a low 1,050 proofs, and this is certainly one of the finest known. Population: 51 in 67 (2 in 67+), 2 finer (7/12). (#3992)

**1916 Nickel, Golden-Toned PR67
Scarcest of the Matte Proofs**

- 3729 1916 PR67 NGC.** A mintage of 600 proofs ensures the scarcity of this matte striking. Rich golden-brown toning predominates, although hints of lilac are evident on the reverse, especially near UNITED. Fully struck and pristine. Void of either carbon or contact. Census: 18 in 67, 1 finer (7/12). (#3993)

- 3730 1936 Type One—Satin Finish PR65 NGC.** This sharply detailed Gem displays the Satin Finish used on the first proofs of the year, with well-preserved surfaces and exceptional eye appeal. From *The Fred Yee Collection*. (#3994)

**1936 Satin Finish PR67
Exceptional Quality**

- 3731 1936 Type One — Satin Finish PR67 PCGS Secure. CAC.** The Satin Finish proofs of 1936 are a one-year type in the Buffalo nickel series. They are not particularly rare, the mintage estimated at approximately half the total between Satin and Brilliant Finish proofs. The surfaces on this splendid proof are bright and expectantly satiny, with profound striking definition that can only be found on proofs. Much brilliance shows with just a hint of pale yellowish-golden. (#3994)

- 3732 1937 PR65 PCGS.** A glassy and lightly toned Gem with a carbon-free and pristine appearance. The strike is sharp despite minor inexactness of impression on the hair above the braid. A scarce proof type. (#3996)

- 3733 1937 PR66 PCGS.** Well preserved, bright proof surfaces reveal just the barest hint of ice-blue, lilac, and beige color under magnification. The design elements are exquisitely brought up. Ex: *FUN Signature* (*Heritage*, 1/2007), lot 2409. (#3996)

**1937 Buffalo Nickel, PR67+
Fully Struck and Deeply Reflective**

- 3734 1937 PR67+ PCGS. CAC.** Shades of champagne-gold and ice-blue toning enliven the pristine surfaces of this high-end Superb Gem. The design elements are fully struck and the fields are deeply mirrored throughout. From a mintage of 5,769 pieces, PCGS has graded only 12 numerically finer specimens (7/12). (#3996)

JEFFERSON NICKELS

- 3735 1938 MS67 Full Steps NGC.** A magnificent Superb Gem from the first year of the series, this coin features sharply detailed design elements, with 5 Full Steps on Monticello. Census: 3 in 67 Full Steps, 0 finer (7/12). (#84000)

- 3736 1939-D Reverse of 1938 MS66 Full Steps PCGS.** A razor-sharp stone-gray and caramel-gold example of the Wavy Steps subtype. The '38-D was saved in great number as a souvenir of the novel Jefferson type, but the '39-D was allowed to circulate and is counted among the scarcest issues. (#84005)

- 3737 1939-S Reverse of 1938 MS66 Full Steps PCGS.** A lemon-gold Premium Gem with coruscating luster and a full strike. The '39-S ranks among the scarcest issues of the long-lived series. Population: 17 in 66 (1 in 66+) Full Steps, 0 finer (7/12). (#84006)

- 3738 1940-S MS67 Five Full Steps NGC.** A splendidly toned Superb Gem with apricot-gold centers framed by bands of powder-blue and sea-green. Lustrous and virtually pristine. Census: 3 in 67 Five Full Steps, 5 in 67 Six Full Steps, none finer (7/12). (#84009)

- 3739 1943-P Doubled Die Obverse MS66 PCGS. FS-106.** Jefferson's eye is doubled, the most visible aspect of the Doubled Die Obverse nickel. Both sides are brilliant and frosty with splashes of gunmetal-blue and deep gold toning. Population: 52 in 66, 0 finer (7/12). (#4174)

- 3740 1943-P Doubled Die Obverse MS66 PCGS. FS-106.** LIBERTY and the date are clearly die doubled, but the traditional pick-up point for the variety is the wide doubling on Jefferson's eye, as seen on the *Guide Book* photograph for the listing. Lustrous and smooth with a good strike and medium caramel-gold toning. Population: 52 in 66, none finer (7/12). (#4174)

- 3741 1962-D MS65 Five Full Steps NGC.** A satiny Gem with faint olive-gold toning. The 1962-D is a formidable strike rarity within the series, seldom encountered with five unbroken steps on Monticello. As of (7/12), NGC has graded just four examples with Five Full Steps, and none with Six Full Steps. Ex: *Summer FUN* (*Heritage*, 7/2007), lot 451. (#84072)

EARLY HALF DIMES

- 3742 1794 — Damaged — NGC Details. Fine. V-4, LM-4, R.4.** A small circular dig near the bust tip may be from an attempted puncture. The reverse displays many parallel thin marks that appear to be post-strike. Both sides are minutely granular. The obverse displays minor mint-made adjustment marks at the border and has sharper detail than the reverse. (#4250)

**Very Fine 1795 Half Dime
Rare V-7, LM-6 Variety**

- 3743 1795 VF20 NGC. V-7, LM-6, R.6.** Valentine-7 is a variety whose rarity is likely due to the peripheral die crack on the lower right obverse. Though relatively light on the current lot, on later die state examples the crack is heavy and threatens to form a large retained break between 3 and 6 o'clock. The present two-year type coin has deep gray fields with lighter pearl-white motifs. Refreshingly unabraded and problem-free. (#4251)

**Patinated AU 1795 Half Dime
V-4, LM-10**

- 3744 1795 AU50 PCGS. CAC. V-4, LM-10, R.3.** This beautiful final-year Flowing Hair half dime exhibits blended lavender and chestnut-brown toning. Glimmers of luster accompany design elements. Evaluation under a loupe locates only a couple of thin lines on the right obverse field and beneath the eagle's wings. (#4251)

- 3745** 1795 — Improperly Cleaned — NGC Details. Unc. V-4, LM-10, R.3. A sharply detailed early half dime, with pleasing surfaces that show few signs of contact, but display an unnaturally bright sheen. The surfaces are retoning a light lavender-gray shade, with a ring of blue at the peripheries. A die cud has formed on the obverse at 2 o'clock.
From The Fred Yee Collection. (#4251)

1796 V-1, LM-1 Half Dime, MS60

- 3746** 1796 MS60 NGC. V-1, LM-1, R.3. The NGC label calls this the **LIKERTY** variety, but the top and bottom of the B are delicately closed. This is an extremely important piece with exquisite design definition on both sides. A delicate crack from the rim joins the middle hair ribbon, and the obverse shows light clash marks. The reverse has a delicate crack through the first T in STATES to the wreath and eagle's neck. Brilliant silver surfaces host traces of delicate champagne toning with reflective fields. A thin scratch is visible in the right obverse field, along with a few other trivial marks. Census: 2 in 60, 17 finer (7/12).
From The Fred Yee Collection. (#4254)

- 3747** 1797 15 Stars — Obverse Graffiti — NGC Details. XF. V-2, LM-1, R.3. On close inspection some thin pin scratches are evident in the hair and the left obverse field. The design elements are moderately worn and traces of mint luster remain on both sides, under light gold and rose patina. The obverse shows dramatic bisecting die cracks.

**Mint State Details V-1, LM-1
1800 Half Dime**

- 3748** 1800 — Obverse Repaired — NGC Details. Unc. V-1, LM-1, R.3. Upon first glance, the present **Heraldic Eagle** half dime appears to be a magnificent example, since it has semi-prooflike fields, exquisite design detail, and lovely orange and rose-red toning. Close inspection reveals a smoothed and re-engraved area on the obverse that affects stars 9 through 12 and the nearby dentils. Struck from clashed dies.
From The Fred Yee Collection. (#4264)

**Famously Rare 1802 Half Dime
V-1, LM-1, AG Details**

3749 1802 — Bent — PCGS Genuine. AG Details. V-1, LM-1, R.5. A small roundish dig behind Liberty's neck causes a noticeable bend and uneven wear. Most of LIBERTY and the date is clear, as are the right-side stars. The left-side stars are nearly worn smooth. The reverse has a few readable letters and the eagle motif is perhaps two-thirds outlined. One thin horizontal mark is noted on the eagle's head and a minor pinscratch is on the upper left obverse field. All in all, these problems are acceptable for many collectors who dare to attempt ownership of this famous First Mint rarity. Among half dime issues, only the unique 1870-S is more difficult to acquire. The fame of the 1802 half dime is such that it receives its own chapter in the Logan-McCloskey standard reference to the series.

3750 1803 Large 8 — Cleaning — PCGS Genuine. VF Details. V-2, LM-3, R.3. Deep jade-green and plum-red toning conceals a moderate cleaning. No marks are of any interest, and the strike is consistent save for minor softness on the vertical shield lines.
From The Norva Collection.

BUST HALF DIMES

3751 1832 — Surface Damage — PCGS Genuine. Fine Details. V-14, LM-9.1, R.7. Collectors seeking an example of this rare die and state will overlook the borderline-bent character of the surfaces. Here is what is important: Obverse 2 and Reverse T, the latter with the upper loop of the second S in STATES clear. Blue and peach-gold overtones grace gray surfaces.

**Gem 1832 Half Dime, V-8, LM-5
Well Struck, Peripheral Patina**

3752 1832 MS65 NGC. V-8, LM-5, R.1. This dazzling Gem is well struck and lustrous with untuned centers and honey-gold peripheries. Virtually void of contact, though for pedigree purposes we note a slender mint-made lintmark through the eagle's neck. The U in UNITED is repunched, one diagnostic for this collectible die variety.
From The Fred Yee Collection. (#4279)

3753 1833 MS64 ★ NGC. V-3, LM-4, R.2. Beautiful golden-brown and sea-green peripheral toning explains the Star designation. As of (8/12), NGC has certified just six pieces with a Star designation, 3 in 64 ★ and 3 in 67 ★. Sharply struck, smooth, and satiny. (#4280)

SEATED HALF DIMES

3754 1837 No Stars, Large Date (Curl Top 1) MS64 NGC. An attractive Choice example of this extremely popular short-lived design, with sharply detailed design elements and lightly marked lustrous surfaces. A few hints of lavender and champagne-gold highlight the mostly brilliant surfaces.
From The Fred Yee Collection. (#4311)

3755 1841 MS66 NGC. A spectacular premium Gem, with razor-sharp definition on all design elements and vibrant satiny mint luster. Attractive shades of gold and rose toning add to the terrific eye appeal. Census: 9 in 66 (1 in 66+), 5 finer (7/12).
From The Fred Yee Collection. (#4328)

3756 1844 MS66 PCGS. Splashes of cherry-red, navy-blue, and golden-brown toning are deepest near the rims. Precisely struck and lustrous with a pristine reverse and minor marks on the right obverse field. Population: 21 in 66 (1 in 66+), 10 finer (7/12). (#4333)

3757 1854 Arrows MS65 NGC. A sharply detailed Gem, from the second year of the popular Arrows design. This coin possesses terrific eye appeal, with vibrant mint luster and highlights of champagne-gold and rose toning.
From The Fred Yee Collection. (#4358)

- 3758 1854 Arrows MS66 NGC.** From green-gold to blue and violet, this Premium Gem has great color and luster. An attractive example of the popular limited-run type. Census: 17 in 66 (1 in 66+), 3 finer (7/12). (#4358)

**1854 Arrows Half Dime, MS66+
Vivid Multicolor Toning**

- 3759 1854 Arrows MS66+ NGC. CAC.** A high-end Premium Gem specimen of the popular Arrows design, with sharply detailed design elements and vibrant mint luster, under vivid shades of burnt-orange and rose toning. The arrows at the date indicate a change in weight instituted in 1853. Census: 17 in 66 (1 in 66+), 3 finer (7/12). From *The Fred Yee Collection*. (#4358)
- 3760 1858 MS65+ NGC. CAC.** This high-end Gem exhibits well-detailed design elements and especially vibrant mint luster, under vivid shades of gold, rose, and gray toning. Exceptional eye appeal, as well. From *The Fred Yee Collection*. (#4367)
- 3761 1871 MS66 PCGS. CAC.** A well-detailed Premium Gem, with satiny mint luster under shades of lavender and gold toning. Housed in a green label holder. Population: 22 in 66 (1 in 66+), 1 finer (7/12). (#4398)

*Mint Director Henry Linderman,
1867-1869, 1873-1878.*

PROOF SEATED HALF DIMES

**Very Rare PR62 1844 Half Dime
Valentine-1 Die Pair**

- 3762 1844 PR62 PCGS. Valentine-1.** Normal date high, slanting down to the right. This example does not correspond to any of the five Valentine-1 specimens listed in our most recent roster of proof 1844 half dimes (Phil Kaufman, *FUN*, 1/2008), but may be the same coin as either Stack's, 4/1978, or the F.C.C. Boyd/World's Greatest Collection example. In any event, this is an attractively toned specimen of a very rare issue. Gold-to-peach and blue-to-violet patina embraces each side, the former hue range prevailing on the obverse and the latter on the reverse. Several light to moderate hairlines in the fields contribute to the grade. Population: 2 in 62, 3 finer (7/12). (#4420)

1861 Half Dime, Richly Toned PR66

- 3763 1861 PR66 NGC. CAC.** This lovely Premium Gem proof has light field-to-device contrast with multi-hued toning. The obverse combines light gold at the borders, with violet and pale blue. The reverse has delicate gold and violet at the centers, with deep blue peripheries. Census: 11 in 66, 3 finer (7/12). (#4444)

EARLY DIMES

AU Sharpness 1796 Dime, JR-1

- 3764** 1796 — Repaired — NGC Details. AU. JR-1, R.3. The usual die state with a break or “cud” near star 1, large but less advanced than sometimes seen. This introductory year dime displays ample luster, especially on the hair, wings, and wreath. Pastel toned in light lilac and gold tints. Minor adjustment marks near UNITED are mint-made. Inspection beneath a lens reveals smoothing on Liberty’s neck and the right obverse field. The cud is scratched from an attempt at removal.
From The Fred Yee Collection. (#4461)

- 3765** 1798/97 16 Stars on Reverse AG3 PCGS. CAC. JR-1, R.3. Largely gold-gray on the devices with blues in the fields, the rule held more strictly on the obverse. A few old pinscratches affect the lower and left parts of the bust. (#4468)

1798/97 JR-1 Dime, AU53 16 Reverse Stars

- 3766** 1798/97 16 Stars on Reverse AU53 NGC. JR-1, R.3. All four die varieties of 1798-dated dimes receive separate *Guide Book* listings due to distinctive differences in the date logotype or a different star count on the reverse. JR-1 is curious in that it has 13 obverse and 16 reverse stars. The reverse die was presumably made prior to the obverse die, despite the fact that no 1797 varieties have a Heraldic Eagle reverse. This is a lavender-gray and almond-gold example with minor inexactness of strike at the centers and one faded slender mark on the right obverse field. (#4468)

- 3767** 1805 4 Berries Fine 15 PCGS. JR-2, R.2. Caramel-gold and lavender-gray toning embraces this scarce early silver type coin. All legends are clear and there are no consequential marks, though the obverse displays faint hairlines.
From The Dr. Charles Nelson Collection. (#4477)

1805 JR-2 Dime, MS64 Four Berries Reverse

- 3768** 1805 4 Berries MS64 NGC. JR-2, R.2. The obverse is cracked through ERTY and through the base of the date, with light clash marks through the top of the date and elsewhere. The reverse has light clash marks among the stars and above the clouds. This is the second use of the obverse die that was also used for the 1805 JR-1 5 Berries dimes, and the only use of the reverse die. The reverse is rotated 30 degrees clockwise, as often seen on this die marriage.

An impressive Choice Mint State early dime, this piece is boldly defined, save for the usual weakness at the borders. Both sides have brilliant centers with delicate iridescent peripheries. Census: 28 in 64, 27 finer (7/12).

From The Fred Yee Collection. (#4477)

Choice AU 1807 Dime, JR-1 Excellent Design Definition

- 3769** 1807 AU55 NGC. JR-1, R.2. The sole known dies. Dusky gunmetal-gray toning predominates though the borders exhibit darker green and charcoal shades. An unmarked and exceptionally sharp example of this final Draped Bust date. The right obverse field displays clash marks, usual for JR-1. Moderately granular on the left reverse periphery. (#4480)

Gem 1807 JR-1 Dime
Ideal Type Coin

3770 1807 MS65 PCGS. JR-1, R.2. Among Draped Bust dimes, the year 1807 has the highest mintage by far, at 165,000 pieces. Whether all of those coins actually were dated 1807 is doubtful, seeing as all known dimes *dated* 1807 come from a single pair of dies, yet the numerous die states known for the 1807 JR-1 dime suggest that the pair did in fact see heavy use consistent with the striking of tens of thousands of examples; further, the R.2 rarity of the die pair indicates survival in the hundreds.

Of course, few dimes have made it through two centuries and more in such excellent shape as this Gem. Due to the elite preservation, this coin shows its die states more plainly than the vast majority of survivors. The margins are weakly struck, especially at the left obverse where several stars are all but wiped out and the corresponding soft lettering at the left reverse, yet the broad swirl of luster leaves no doubt as to this coin's Mint State status. On the obverse, the date exergue and right field show prominent clash marks from the eagle motif on the reverse die.

In contrast to the peripheral softness, the interiors have relatively good definition, particularly on Liberty's curls and the eagle's feathers. With a hint of greenish-gold color accenting the frosty silver surfaces, this coin has amazing all-around eye appeal. It could find a home in either an elite type set or as a finisher to a great series collection of Draped Bust dimes. Population: 5 in 65, 2 finer (7/12). (#4480)

BUST DIMES

Rare Fine 1822 Dime, JR-1

- 3771 1822 Fine 12 PCGS. JR-1, R.4.** The sole dies for this rare Capped Bust date. Richly patinated in cobalt-blue, olive-green, plum-mauve, and golden-brown. All legends are bold and ample plumage detail remains. Void of mentionable contact aside from a single thin vertical line through the bust tip. (#4497)

Multicolor 1827 Dime, JR-12, MS63

- 3772 1827 MS63 NGC. JR-12, R.1.** Vibrant ocean-blue borders cede to orange and ruby shades closer to the lightly toned center. This satiny Capped Bust dime appears unabraded though faint obverse hairlines decide the grade. The strike is precise except on the uppermost stars. An example with exceptional eye appeal. *From The Fred Yee Collection.* (#4504)

Near-Gem 1827 Dime, JR-8 Pastel Toned and Satiny

- 3773 1827 MS64 PCGS. JR-8, R.4.** Rim die breaks on the upper right obverse and a spike from a leaf tip confirm the attribution. A satiny Choice Bust type coin with well preserved fields and devices. Lightly toned in pastel lilac, aqua, and gold hues. A good strike with minor blending noted on the shield and neck curls. The reverse is strike doubled, most apparent on RICA and 10C. (#4504)

JR-3 1827 Dime, MS65 Excellent Type Coin

- 3774 1827 MS65 NGC. JR-3, R.1.** This Gem hails from the Dentilated Border era of Capped Bust dime design. Both sides display watery reflectivity through layers of patina, blue, green, sage, and gray. Great detail and all-around eye appeal make this coin a type collector's delight. For all varieties, Census: 22 in 65, 7 finer (7/12). (#4504)

- 3775 1831 MS63 PCGS. JR-3, R.1.** Rose-red borders frame the lightly toned centers of this nicely struck and coruscating Capped Bust dime. Unabraded aside from a single diagonal hairline on the cheek. (#4520)

JR-1 1831 Dime, MS64 Magnificent Eye Appeal

- 3776 1831 MS64 NGC. CAC. JR-1, R.1.** A boldly struck and coruscating Choice dime that boasts clean surfaces and attractive medium almond-gold toning. Thorough examination locates only unimportant marks near the left scroll end. The dies are moderately rotated. Census: 48 in 64, 2 in 64 Prooflike, 38 finer (7/12). *From The Fred Yee Collection.* (#4520)

- 3777 1832 MS64 PCGS. CAC. JR-1, R.2.** Cream-gray and olive-green toning encompasses this crisply struck and satiny Choice Capped Bust type coin. Study beneath a lens reveals a few faint marks on each side. Population: 30 in 64, 22 finer (7/12). (#4521)

1835 JR-1 Dime, MS64 Well-Toned Type Coin

- 3778 1835 MS64 NGC. JR-1, R.1.** One of the two most accessible 1835 dime die pairs along with the JR-5, but this hardly is a knock on such a beautiful coin as this near-Gem. Rich peach and rose toning graces broad centers, while the margins show dappled blue and violet patina, more notably on the obverse. A well-defined and readily collectible coin for either type or series enthusiasts. (#4527)

SEATED DIMES

1837 Seated Dime, MS64 No Stars, Small Date

- 3779 1837 No Stars, Small Date MS64 PCGS. CAC.** An attractive Choice example of this first-year type coin, with the short-lived No Stars design. The design elements are well-detailed and the surfaces display satiny mint luster, with a light gold patina. Housed in a green label holder. Population: 48 in 64, 31 finer (7/12).
From The Fred Yee Collection. (#4562)

- 3780 1838 Large Stars MS64 ★ NGC. CAC.** Vivid shades of burnt-orange, rose, and lilac patina enhance the surfaces of this delightful Seated Liberty dime, with bright luster underneath. Razor-sharp definition is evident on all design elements, adding to the stunning visual appeal.
From The Fred Yee Collection. (#4568)

- 3781 1839-O No Drapery AU58 PCGS. CAC.** This lightly circulated Seated Liberty dime displays attractive shades of lavender, gray, and golden-brown toning, with satiny mint luster and sharply detailed design elements. Population: 11 in 58, 21 finer (7/12). (#4572)

- 3782 1843-O — Cleaned — ANACS. XF45 Details.** The fields and devices are slate-white while the margins display deeper tan-gray toning. Mildly glossy from cleaning. A scant 150,000 pieces were struck, a great reduction from the production of the '41-O and '42-O, which each exceeded 2 million pieces. (#4584)

- 3783 1845 MS65 NGC.** Silvery surfaces with a touch of burgundy at the lower obverse rim. The strike is unusually crisp, especially on the obverse stars. One of the underrated Gems of the auction. Census: 9 in 65, 7 finer (7/12). (#4586)

MS62 Large O 1849-O Dime Minimally Abraded

- 3784 1849-O MS62 NGC.** Large O. Fortin estimates the Large O variety is R.7 in Mint State. This is a satiny example draped in rich olive-green, lavender, and cobalt-blue shades. Free from consequential contact. The strike is uneven, with intricate detail along the left borders and moderate incompleteness on the right peripheries. (#4592)

Gem 1857-O Seated Dime Attractive Multicolor Toning

- 3785 1857-O MS65 PCGS.** The 1857-O Seated Liberty dime claims a substantial mintage of 1.5 million pieces, but few examples were saved by collectors and specimens in Gem condition are rare. This sharply detailed Gem displays lustrous surfaces that are blanketed in shades of violet, rose, and golden-brown toning. Population: 13 in 65, 10 finer (7/12). (#4615)

1859 Seated Liberty Dime, MS67+ No Finer Coins at NGC

- 3786 1859 MS67+ NGC.** A magnificent high-end Superb Gem survivor, from a mintage of 430,000 pieces. This coin exhibits sharp definition on all design elements, with vibrant satiny mint luster and low-intensity gold and lavender toning. Visual appeal is outstanding. Census: 17 in 67 (2 in 67+), 0 finer (7/12).
From The Fred Yee Collection. (#4619)

- 3787 1859-O MS65 NGC.** Medium O. Well struck except for a few of the obverse peripheral stars, with rather deep golden-gray patina, especially so on the obverse, vibrant underlying luster, and the near-absence of surface marks on either side. Census: 19 in 65, 17 finer (7/12).
From The Fred Yee Collection. (#4620)

- 3788 1865 MS62 NGC.** Well-defined with a touch of flash, though the mirrors are not nearly so reflective as on a proof. One of just 10,000 business strikes for the year and an attractive one at that, faintly tinged gold and blue. Census: 4 in 62, 31 finer (7/12). (#4641)

- 3789 1867 — Improperly Cleaned — NGC Details. AU. Fortin-103.** The date is repunched, most clearly above the base of the 1. Gerry Fortin (and earlier, Kam Ahwash) state that all proofs were struck from this obverse die. The present piece is lightly hairlined and mildly granular but the obverse border has attractively toned in orange-gold shades. (#4645)

**Premium Gem 1874 Seated Dime
Distinctive Arrows Design**

3790 1874 Arrows MS66 PCGS. A spectacular Premium Gem example of this popular Arrows issue, eminently suitable as an upper-end type coin. Liberty's head is softly struck, but the devices are pleasingly detailed elsewhere. Delicate blue and gold toning graces half-frosted, half-watery luster. Population: 19 in 66, 8 finer (7/12). (#4668)

3791 1879 MS66 NGC. Pronounced reflectivity with partial rim toning in gold and orange shades. A narrow line of deep color crosses the wrist supporting the cap-and-pole and flows out into the right-side field. Census: 40 in 66 (2 in 66+), 28 finer (7/12). (#4687)

3792 1884 MS66 NGC. Medium golden-brown toning is predominant though the borders also exhibit splashes of forest-green. Lustrous and pristine with incompleteness of strike confined to the upper left portion of the wreath. Census: 39 in 66 (1 in 66+), 26 finer (7/12). (#4692)

3793 1886 MS66 PCGS. Jade-green, lilac-rose, sun-gold, and stone-gray dominate this lustrous, pristine, and boldly struck Premium Gem. During the 1880s, the dime and silver dollar were the only silver denominations struck in large quantities at Philadelphia. Population: 28 in 66, 7 finer (7/12). (#4696)

3794 1888 MS66 NGC. Despite a large mintage of nearly 5.5 million pieces, the 1888 Seated Liberty dime is rarely seen in MS66 condition. This well-detailed Premium Gem displays vibrant mint luster and light gold toning, with outstanding eye appeal. Census: 28 in 66, 1 finer (7/12).
From The Fred Yee Collection. (#4700)

PROOF SEATED DIMES

3795 1859 PR62 NGC. The obverse margin is golden-brown and the reverse border is jade-green. Well struck save for the upper obverse and lower reverse dentils. Only 800 proofs were issued.
From The Fred Yee Collection. (#4748)

3796 1874 Arrows PR64+ ★ NGC. The Star designation indicates exceptional eye appeal. This prooflike Mint State piece has a rainbow crescent at the upper obverse and a splash of delicate gold on the reverse. Otherwise, both sides are brilliant. Significant depth of mirroring in the fields sets up a significant contrast against the frosted devices, but no Cameo designation has been given. Census: this is the only 64+ ★, 27 finer (7/12). (#4770)

**1874 Arrows Dime, PR65+ Cameo
Highly Sought-After Type Coin**

3797 1874 Arrows PR65+ Cameo NGC. CAC. Second year of this two-year type and a tremendously popular type coin. The fields are deeply reflective on each side and a significant amount of mint frost is seen over the devices, giving the coin its contrast. Pale golden color in the centers gradually deepens toward the margins. Census: 4 in 65 (1 in 65+) Cameo, 4 finer (7/12).
From The Fred Yee Collection. (#84770)

3798 1882 PR65 Cameo PCGS. CAC. Deep blue patina at the margins yields to lighter centers, gold on the obverse and silver on the reverse. Well-contrasted and pleasingly preserved, an all-around delight. Population: 15 in 65 Cameo, 14 finer (7/12). (#84779)

3799 1884 PR66 PCGS. Reflectivity appears in the obverse fields and reverse margins on this well-toned Premium Gem. Gold, green, and blue tints appear on each side, while the space within the wreath adds dusty-rose. Population: 33 in 66, 14 finer (7/12). (#4781)

3800 1884 PR66 NGC. CAC. This date is relatively available as a proof and makes a nice type coin. This particular coin shows good reflectivity through the rich red and blue toning that covers each side. The only mark of any note is a tiny planchet flaw in the left obverse field. Census: 41 in 66, 21 finer (7/12). (#4781)

BARBER DIMES

3801 1895-O — Questionable Color — PCGS Genuine. VF Details. This low mintage and key date New Orleans dime has a clear LIBERTY and gunmetal-gray toning. A hair-thin mark beneath the chin, but otherwise void of abrasions.
From The Norva Collection.

**1897-S Dime, Gem Uncirculated
Speckled Toning, Bright Mint Luster**

3802 1897-S MS65 PCGS. The 1897-S is much scarcer than its mintage of 1.3 million pieces might indicate, and it is especially challenging in Gem. This is a speckled golden-brown and blue-toned example that exhibits strong underlying mint luster. The reverse fields are semireflective, the result of die polishing seen across the center of that side. Sharply defined throughout. Population: 10 in 65, 6 finer (7/12). (#4814)

**1907-D Dime, High-End MS66
Brightly Lustrous, Attractively Toned**

- 3803 1907-D MS66 PCGS. CAC.** Golden-russet and sea-green shadings form arcs around the nearly brilliant centers. Thick mint frost swirls beneath this toning scheme and accents the mark-free faces. Crisp definition rounds out the impressive eye appeal of this early D-mint Barber dime. Population: 6 in 66, 2 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2003), lot 6456; Central States Signature (Heritage, 3/2005), lot 6660; Long Beach Signature (Heritage, 5/2009), lot 507. (#4843)

- 3804 1910-S MS65 PCGS. CAC.** Even though 1.2 million pieces were struck of the 1910-S, only 80-110 coins are estimated to exist today in Uncirculated. This is a nice, frosted example that displays gray-lilac centers with rose-gold peripheral color. Sharply struck throughout. Population: 16 in 65, 10 finer (7/12). (#4856)

PROOF BARBER DIMES

- 3805 1893 PR64 Cameo PCGS. CAC.** The nearly brilliant surfaces allow even more of the cameo contrast to be evident between the fields and devices on each side. Just the slightest bit of golden peripheral color is present. A shallow scrape on the neck of Liberty is the only grade-limiting mark. Population: 14 in 64 (1 in 64+) Cameo, 44 finer (7/12). (#84877)

**1894 Barber Dime, Richly Toned PR67
Popular Early Date for Type Purposes**

- 3806 1894 PR67 PCGS. CAC.** The 1894 is a frequently encountered date as a proof, but because of the earliness of the date in the series it makes an impressive coin for type purposes. The mirrored fields flash brightly through the gray and turquoise toning seen on each side. Population: 22 in 67, 0 finer (7/12). (#4878)

1895 Barber Dime, Toned PR67

- 3807 1895 PR67 NGC.** Like the more famous silver dollars of this date, only 880 proof Barber dimes were struck in 1895. This sharply detailed Superb Gem offers reflective fields, under vivid shades of champagne-gold and electric-blue toning. Eye appeal is outstanding. Census: 27 in 67, 8 finer (7/12). (#4879)

- 3808 1899 PR66 Cameo NGC. CAC.** The sharply detailed frosty devices of this spectacular Premium Gem contrast boldly with the deeply mirrored fields. No mentionable distractions are evident. Census: 14 in 66 Cameo, 7 finer (7/12).
From The Fred Yee Collection. (#84883)

**1911 Superb Gem Proof Dime
Brightly Reflective, Nicely Toned**

- 3809 1911 PR67 PCGS. CAC.** This is an impressive, deeply reflective proof example of this popular, low-mintage date. Only 543 proofs were struck in 1911. Rich turquoise toning is accented by just a bit of occasional golden color. The surfaces are essentially flawless, and when closely examined field-device contrast is evident but subdued by the depth of color present. Population: 11 in 67 (1 in 67+), 4 finer (7/12). (#4895)

- 3810 1911 PR65 Cameo PCGS. CAC.** This is an exceptionally well-produced example of this scarce, low-mintage date. The devices are heavily frosted and set against unfathomably deep mirrors in the fields. Each side is mostly brilliant with just a hint of peripheral color, thus making the contrast even more evident. Population: 14 in 65 Cameo, 13 finer (7/12). (#84895)

**Single Finest Certified
PR68 ★ 1912 Dime**

- 3811 1912 PR68 ★ Cameo NGC.** The sole PR68 Cameo at NGC, with or without the desirable Star designation, which in the present case was awarded for the exquisite cherry-red, cobalt-blue, and golden-brown peripheral patina. The devices are fully struck and the fields are flawless. PCGS has yet to certify any Cameos above the PR67 level, and neither service has certified any as Deep or Ultra Cameo (8/12). (#84896)

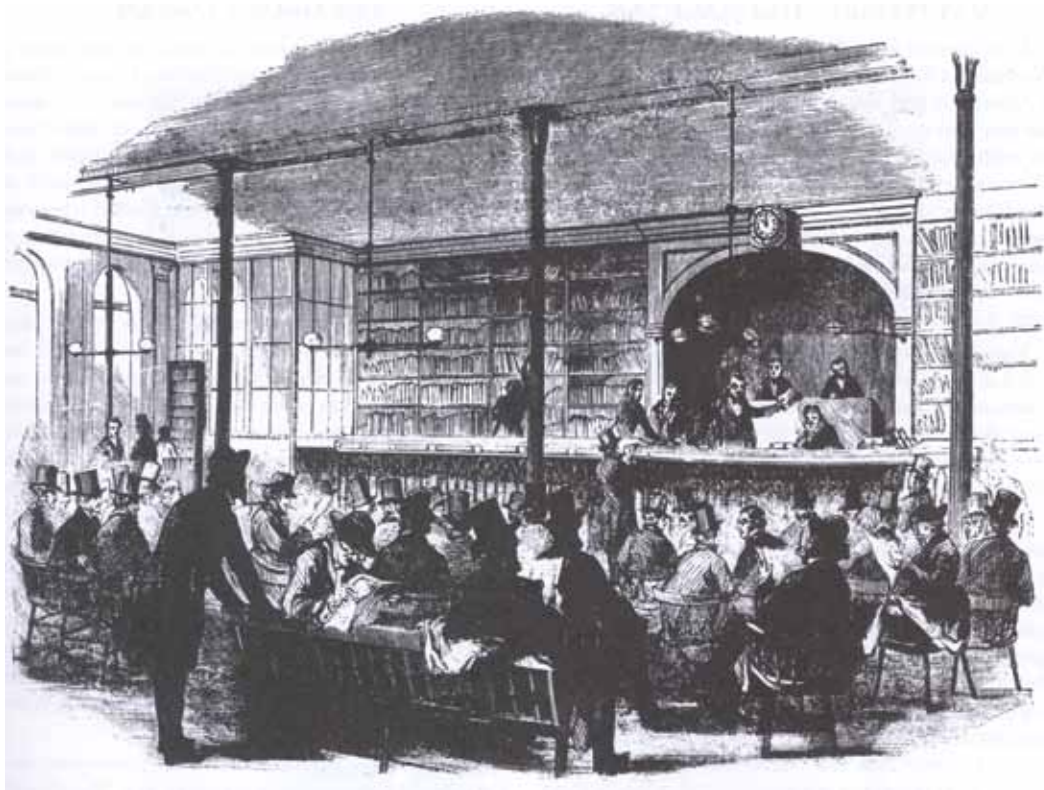

TWENTY CENT PIECES

- 3812 1875 MS64 NGC.** This first-year twenty cent piece was struck in Philadelphia, far from the Southern and Western states the denomination ostensibly was made to help. Patches of gold, peach, rose, and blue patina cover otherwise silver surfaces that shimmer and swirl with luster. Census: 43 in 64, 31 finer (7/12).(#5296)
- 3813 1875 MS64 NGC. CAC.** This low-mintage first-year twenty cent piece displays sharply detailed design elements and especially vibrant mint luster. The mostly brilliant surfaces show a few hints of light gold toning. Census: 43 in 64, 31 finer (7/12).
From The Fred Yee Collection. (#5296)
- 3814 1875-CC XF45 PCGS.** This lightly worn Choice XF specimen displays pleasing shades of dove-gray and blue-steel toning, with remarkably clean fields. The 1875-CC is the only readily collectible twenty cent piece from the Carson City Mint.(#5297)
- 3815 1875-CC — Improperly Cleaned — NGC Details. AU.** Moderate friction can be seen over the high points on each side from a short stay in circulation, then the coin was cleaned. The result is a dulling of the surfaces, and now each side has taken on gray patina with deeper iridescence at the margins.(#5297)
- 3816 1875-S MS63 PCGS. FS-301.** The top of a digit is in the dentils beneath the 8 in the date. The variety is undesignated on the PCGS insert. Lustrous with smooth surfaces and light pearl-gray toning. A good strike except on the claws and uppermost stars.
From The Dr. Charles Nelson Collection. (#5298)

- 3817 1875-S MS64 NGC.** The mint luster is pronounced, as often found on this issue, and there is just a hint of pale golden toning over each side. The head of Liberty is better struck than usually found, but softness is seen on the tops of the eagle's wings, as often seen. A pleasing near-Gem type coin.
From The Dr. Charles Nelson Collection. (#5298)
- 3818 1875-S MS64 NGC.** A delightful Choice example of this popular type issue, with well-detailed design elements that show just a touch of softness on the upper stars and the eagle's claws. The lustrous surfaces are toned in vivid shades of burnt-orange, amber, and rose.
From The Fred Yee Collection. (#5298)
- 3819 1876 MS64 PCGS.** The sole readily collectible second-year twenty cent business strike issue, as the 1876-CC is a great rarity. This silvery example with green-gold toning at the margins is housed in a green label holder.
Ex: Central States (Heritage, 5/2003), lot 6100. (#5299)

EARLY QUARTERS

- 3820 1796 — Damaged — NGC Details. Fair. B-2, R.3.** Two small but deep digs near Liberty's ear cause a noticeable bend and uneven wear. This pearl-gray representative is hairlined and has pinscratches through the eagle's neck and Liberty's forehead. Among the rarest silver types.(#5310)

1796 Quarter, Richly Toned AU53
B-1, Low 6 Variety

3821 1796 AU53 NGC. CAC. B-1, R.4. Some collectors choose to focus their collecting pursuits around solely the coins produced in a given year. This is certainly not a new phenomenon, although with the advent of Registry Sets of every conceivable stripe, it has intensified. Famed collector Harry X Boesel concentrated only on the large number of coins produced in 1873.

Another famous collector, John Whitney Walter (sometimes called John Whitney for short), was popularly known simply as “Mr. 1796.” As advanced numismatists know, the year 1796 was a special one in U.S. coinage history. It was the first time that every authorized denomination was struck, from copper half cent to gold eagle—an event that would not recur for more than a half-century, until 1849. But all of the coins of 1796 are rare — most of them famously so. The fabulous collection of Mr. 1796 was auctioned off by Stack’s in May 1999. The 1796 No Pole half cent in the collection was graded “MS-64” and brought \$275,000. Walter/Whitney’s fabulous collection of 1796-dated coins included four 1796 quarters ranging from AU to BU (lots 1772-1775), which brought from \$14,950 to \$41,400.

This is a lovely example of the “Low 6” variety. Significant traces of mint luster remain around the devices. The obverse is moderately toned in shades of gray-rose in the center with deep green around the margin. The reverse, on the other hand, is much deeper in hue with the same basic colors present, just much more pronounced. The strike is sharp throughout, and only minor abrasions are noted.

From The Fred Yee Collection. (#5310)

3822 1805 Fine 12 PCGS. CAC. B-2, R.2. A powder-blue and stone-gray representative of the scarce Draped Bust type. One small roundish mark on the shield but otherwise free from consequential contact. Moderate die rotation caused softness of strike on the leg of the R in LIBERTY. (#5313)

3823 1805 VF30 PCGS. B-2, R.2. Tompkins Die State 4/2. The fields are toned deep powder-blue but the high points are stone-gray. The stars above the eagle are softly impressed but the strike is otherwise consistent.
From *The Dr. Charles Nelson Collection*. (#5313)

**Near-Mint 1806/5 Quarter, B-1 Die Pair
Great Example of Guide Book Variety**

3824 1806/5 AU58 NGC. B-1, R.2. This overdate has its own *Guide Book* variety, setting it apart from the rest of the die pairs for the year. The underlying 5 is obvious on this example, which shows only a trace of friction on softly frosted silver surfaces with pale apricot and blue accents. The left-side obverse stars are bluntly struck, but this is a minor concern. For the variety, Census: 5 in 58, 10 finer (7/12).
From *The Fred Yee Collection*. (#5315)

3825 1806 VF30 NGC. B-3, R.1. Tompkins Die State 2/4. The reverse border is forest-green but the remainder of this Draped Bust type coin is slate-gray. Lightly impressed at the centers and mildly bright but void of remotely relevant abrasions.
From *The Dr. Charles Nelson Collection*. (#5314)

**Peripherally Toned 1806 Quarter
XF40, B-3**

3826 1806 XF40 ANACS. B-3, R.1. Tompkins Die State 1/1. A lengthy die scratch from a leaf tip aids the attribution of this moderately circulated Draped Bust type coin. Mostly russet-brown and slate-gray with arcs of navy-blue across portions of the obverse margin. The central reverse shows softness usual for the variety, and thorough evaluation reveals occasional minor marks.
From *The Dr. Charles Nelson Collection*. (#5314)

BUST QUARTERS

**1818/5 B-3 Quarter, MS66
Minor Curved Clip**

3827 1818/5 — Curved Clip at 6 o'clock — MS66 NGC. B-3, R.3. Two 1818 quarter varieties are recognized as 1818/5 overdates, from a single obverse die that was reworked between striking. Consequently, 1818/5 B-1 quarters have the 5 visible beneath the 8, especially in the upper loop. Alternatively, the B-3 variety has remnants of the 5 visible on the flat, top surface of the 8, with no trace inside the loops. The B-1 has the more visible overdate, but the B-3 has a lower condition census. A minor curved clip at 6 o'clock, relative to the obverse, is confined to the dentils below the date. Both sides of this Premium Gem have amazing silver luster with frosty surfaces and delicate peripheral gold toning. The strike is bold with heavy reverse clash marks.
From *The Fred Yee Collection*. (#5323)

Richly Toned MS61 1818 Quarter, B-4

3828 1818 MS61 NGC. B-4, R.2. On the obverse, glimmering luster breaks through muted blue hues edged in green-gold. The latter color takes center stage on the brighter reverse, appearing with variations into emerald and amber. While the highest points of the design lack perfect definition, most of the obverse stars show their centrils. (#5322)

3829 1825/4/3 XF45 NGC. B-2, R.2. Specialists disagree on the underdigits for the 1825-dated quarters, but B-1 is the very scarce 1825/2 *Guide Book* listing while B-2 and B-3 share the more available 1825/4 entry. Toned deep gray overall with lighter cream-white on the high points. Marks noted beneath the chin and left wingtip and near the T in UNITED. From The Dr. Charles Nelson Collection. (#5336)

Choice XF 1825/2 Quarter Rare B-1 Variety

3830 1825/2 XF45 PCGS. B-1, R.5. Much scarcer than either B-2 or B-3, the "1825/4" varieties for the year. For all three marriages it is difficult to confirm the specific underdigits, though B-1 definitely has an underdigit 2. The PCGS insert lists the overdate as 1825/4/2. The present example has an almond-gold center bounded by a broad band of sea-green. A few faint thin obverse marks are visible beneath a loupe. (#5337)

3831 1831 Large Letters MS62 NGC. B-5, FS-301, R.3. Large 1s are entered over the Small 1s in the date. A sharply detailed MS62 specimen, with full star radials and fine definition on Liberty's curls and the eagle's feathers. The surfaces are brightly lustrous, with attractive shades of champagne-gold and violet patina. From The Fred Yee Collection. (#5349)

3832 1835 XF40 PCGS. B-5, R.2. A late die state with several lengthy obverse die cracks that converge beneath the B in LIBERTY. Rich lavender-gray toning blankets well defined and moderately marked surfaces. (#5354)

3833 1837 — Polished — ANACS. AU50 Details. B-5, R.5. A sharp example of this very scarce Browning variety. The navy-blue and mauve-gray surfaces display myriad criss-cross hairlines when studied beneath a loupe. (#5356)

Final Year 1838 Capped Bust Quarter Select Mint State, B-1

3834 1838 MS63 NGC. CAC. B-1, R.1. The only dies, since the transition to the Seated design was pending. This is a lustrous and lovely Select example. The obverse displays powder-blue and chestnut-gold while the reverse is brilliant except for a hint of peripheral tan patina. The strike is crisp aside from a couple of star centers. Census: 26 in 63, 23 finer (7/12). From The Fred Yee Collection. (#5357)

SEATED QUARTERS

1839 No Drapery Quarter, MS63 Only Nine Finer Coins at NGC

3835 1839 No Drapery MS63 NGC. Closed Claws Reverse. This early series Seated Liberty quarter features the short-lived No Drapery design, making it an important issue for type purposes. This well-detailed Select example exhibits a few minor contact marks in the fields, but none worthy of individual mention. The lustrous surfaces show a few highlights of blue and gold toning. Census: 10 in 63, 9 finer (7/12). From The Fred Yee Collection. (#5392)

3836 1843-O MS61 NGC. Small O. The 1843-O is available in Fine and lower grades but is very rare in Mint State. This well defined and minutely granular stone-gray example is devoid of any mentionable abrasions. Census: 1 in 61, 8 finer (7/12). (#5405)

1851-O Quarter, XF40 Only 88,000 Pieces Struck

3837 1851-O XF40 PCGS. Scarce in all grades, the 1851-O is rarely located finer than XF. This piece displays even wear over the high points of the design, and numerous small handling marks are distributed over both sides. Typically struck with soft head detailing and weak stars. Light reddish patina on the obverse, gray-toned reverse. Population: 6 in 40, 14 finer (7/12). (#5418)

1852 Seated Liberty Quarter, MS64
Only Six Finer Coins at PCGS

3838 1852 MS64 PCGS. CAC. The 1852 Seated Liberty quarter boasts a low mintage of 177,060 pieces and examples in Choice condition are rare in today's market. This impressive MS64 specimen displays well-detailed design elements, with vibrant mint luster, under shades of rose, gold, and gray patina. Population: 13 in 64, 6 finer (7/12). (#5419)

3839 1853 No Arrows VF30 NGC. FS-301. A midrange example of one of the most prominent die blunders in the old-tenor Seated quarter era. Blue-green and sage central overtones yield to near-violet at the rims.
From The Norva Collection. (#5421)

1853 Seated Quarter, MS64
Only Issue With Arrows and Rays

3840 1853 Arrows and Rays MS64 NGC. An attractive Choice specimen from the first year of the popular Arrows and Rays design, this coin displays sharply detailed design elements and satiny surfaces, with only minor signs of contact. The Arrows and Rays indicate a weight change in the silver coinage instituted in 1853.
From The Fred Yee Collection. (#5426)

3841 1854 Arrows MS63 PCGS. CAC. Short-lived as a type coin, there are surprisingly few high-grade examples available compared to the mintage, a staggering 12.3 million quarters. The lustrous surfaces seen here have a layer of pearl-gray that deepens to russet at the margins. Well, but not quite fully struck. (#5432)

Gem 1854 Arrows Quarter
Only Six Finer Coins at NGC

3842 1854 Arrows MS65 NGC. This impressive Gem is sharply detailed in most areas, but shows just a touch of softness on the stars on the right. The surfaces are free of mentionable distractions and satiny mint luster is apparent on both sides. A few highlights of gold and lavender toning enhance the pleasing surfaces. Census: 18 in 65, 6 finer (7/12).
From The Fred Yee Collection. (#5432)

3843 1855 Arrows MS63 NGC. The central design elements of this impressive Select specimen are sharply detailed, but the lower stars are flat. Satiny mint luster and attractive accents of gold and rose toning add to the considerable eye appeal. Census: 10 in 63, 26 finer (7/12).
From The Fred Yee Collection. (#5435)

1856 Quarter, Nearly Brilliant MS66
A High-Grade No Motto Type Coin

3844 1856 MS66 NGC. The mintage of the 1856 quarter of more than 7.2 million pieces explains the relatively large number of survivors today. However, even the 1856 is a condition rarity in MS66. None are finer at either service, and this is one of only six pieces so graded at NGC (7/12). The softly frosted surfaces are almost brilliant, there just being a smidgen of peripheral golden color present on each side. Sharply struck on the obverse, less so on the reverse with roller marks present on the left (facing) leg of the eagle.
From The Fred Yee Collection. (#5438)

**1856-S Quarter, Frosted MS63
Seldom Seen in Mint State**

- 3845 1856-S MS63 PCGS. CAC.** The 1856-S quarter is the second San Francisco issue in the series, as that mint skipped the opening-year 1854-S Seated quarter. The 1855-S is thus the first S-mint Arrows issue, the 1856-S the first of the No Arrows type. Few examples were saved in Mint State in an era where circulating gold and silver coinage was crucial and collecting by mintmarks was far in the future. This Select PCGS example is surpassed by only two submissions there, one each in MS64 and MS65 (8/12). Frosty silver-gray surfaces show a few random contact marks and a couple of small carbon spots near the rims. The large S mintmark is blatant but typical of the era on silver and gold coins. (#5440)

- 3846 1858-S VF25 NGC.** The mintage of the 1858-S would suggest a much greater availability than it has. In VF it is scarce and it becomes increasingly scarcer/rarer in XF and AU. This is an evenly worn example with bright reddish-gray centers and deep charcoal-colored margins. A couple of larger field marks on the reverse are all that are worthy of mention. (#5447)

**1861 Seated Liberty Quarter, MS65
Challenging Civil War Era Issue**

- 3847 1861 MS65 PCGS. CAC.** Brilliant, gleaming mint luster combines with a razor-sharp strike and a few barely discernable marks. Much more difficult to locate in Gem and finer conditions than one might expect from the substantial mintage of 4.8 million pieces. Population: 34 in 65, 14 finer (7/12). (#5454)
- 3848 1862 MS64 PCGS.** Sharply struck with shimmering semifrosted luster. Silver interiors yield to bands of gold-orange and blue at the margins. An attractive near-Gem. Population: 46 in 64 (1 in 64+), 23 finer (7/12). (#5456)
- 3849 1866-S VF25 PCGS.** The first year Motto San Francisco quarter has a tiny mintage of 28,000 pieces and is rare in all grades. This lightly abraded example has a bold LIBERTY and rich sea-green and powder-blue toning. (#5469)
- 3850 1870 MS62 PCGS.** From a mintage of 86,400 pieces, the 1870 Seated Liberty dime is very rare in MS62 condition. This attractive specimen is sharply detailed and lustrous, with a few minor contact marks in the field that explain the grade. Population: 6 in 62, 10 finer (7/12). (#5476)

**Luminous VF25 1870-CC Quarter
Conditionally Rare This Fine**

- 3851 1870-CC VF25 PCGS.** Though the Carson City Mint opened in 1870, the first year's output was wholly inadequate for the local economy's needs. Just 8,340 1870-CC quarters were struck, for example, and the attrition of heavy commercial demand wore the vast majority of them to oblivion. As a VF25 example, this survivor is a condition rarity, which speaks to how challenging the issue is overall. Each letter of LIBERTY is clear, and the surfaces are luminous under layers of gold-orange and violet patina. Scattered small marks and a couple of rim nicks are as expected of the grade. Population: 4 in 25, 15 finer (7/12). (#5477)

**Second-Year 1871-CC Quarter, Fine 15
Condition Rarity at This Level**

- 3852 1871-CC Fine 15 PCGS.** The mintage of 10,980 pieces does not begin to tell the true rarity of the 1871-CC quarter, which was released into a "Silver State" economy desperate for government-sanctioned small change; even a Fine coin is a condition rarity. This Fine 15 representative, though significantly worn, has all letters of LIBERTY legible and faint luminosity on gray surfaces with sage, green, and blue overtones. A small silvery streak is noted at the upper left (facing) corner of the eagle's shield. The few light abrasions on each side are not nearly as numerous as one might expect on a coin of its grade. Population: 3 in 15, 11 finer (7/12). *From The Norva Collection.* (#5479)

- 3853 1873 Arrows MS64 NGC.** This well-detailed Choice example shows just a touch of softness on the obverse stars, with vibrant mint luster and mostly brilliant surfaces that display a few hints of gold. Census: 38 in 64, 11 finer (7/12). *From The Fred Yee Collection.* (#5491)

- 3854 1874-S Arrows MS64 PCGS.** The 1874-S is the most frequently encountered Arrows quarter. This is a highly lustrous example that has light, speckled gray-rose toning over each side that deepens only slightly around the margins. Well struck, with no obvious abrasions. (#5495)

- 3855 1876 MS64 PCGS. CAC.** Type Two Reverse. Brilliant, boldly struck, and lustrous with exceptional preservation save for a few ticks on the right obverse field. A lovely near-Gem Seated type coin. (#5501)

**1876-S Seated Liberty Quarter, MS66
None Certified Finer**

- 3856 1876-S MS66 NGC.** Type Two Reverse. Although the 1876-S Seated Liberty quarter claims a mintage of nearly 8.6 million pieces the issue is seldom encountered in high grade. This impressive Premium Gem is among the finest survivors, with sharply detailed design elements, vibrant mint luster, and virtually pristine surfaces that show a few hints of light gold toning. Census: 10 in 66, 0 finer (7/12).
From The Fred Yee Collection. (#5503)

- 3857 1877-S MS65+ NGC.** Lovely peach-gold and emerald-green toning adorns this lustrous and well struck Seated type coin. No marks are remotely consequential. Census: 34 in 65 (1 in 65+), 12 finer (7/12). (#5506)

- 3858 1877-S Over Horizontal S MS64 NGC. Briggs 4-D, FS-501.** This curious overmintmark is seldom duplicated in U.S. numismatics. Off hand, the only other similar issue we can think of is the 1909-S Lincoln cent. This is a mostly brilliant example that is well struck throughout and shows no obvious or detracting abrasions. (#5507)

**1883 Seated Liberty Quarter, MS66+
Prooflike Fields, Spectacular Toning**

- 3859 1883 MS66+ NGC. CAC.** A high-end Premium Gem with spectacular rings of golden-brown and cobalt-blue toning surrounding mostly brilliant centers. The design elements are sharply detailed and the fields show prooflike reflectivity. Eye appeal is outstanding. From a mintage of just 14,400 pieces. Census: 16 in 66 (1 in 66+), 4 finer (7/12). (#5515)

Open-Wing Eagle, sketched on mica.

PROOF SEATED QUARTERS

Arrows and Rays 1853 Quarter Very Rare PR65 Cameo One-Year Proof Type

3860 1853 Arrows and Rays PR65 Cameo NGC. Walter Breen's *Proof Encyclopedia* records a total of five proofs and Larry Briggs' Liberty Seated quarter reference does likewise, probably following Breen's lead. Breen identifies (while citing no reference) the occasion for the pieces' striking on March 3 as the introduction of the new Arrows and Rays subtype, whose business-strike coinage began on April 26. (This remark apparently dates to Harold Newlin in the 1880s, who pegged the striking of proof half dimes to that date. Breen leapt, rightly or wrongly, to the conclusion that all Arrows and Rays proofs were struck on that date.)

As any serious collector of 19th century proof coinage knows, proof coins of any denomination and year before 1858 or so are quite rare. This piece should be doubly popular, as it is not only incredibly rare in its own right, but it is also a one-year proof representative of the important Arrows and Rays subtype. (While the 1853 and 1854 are often collected and considered as a single type, the 1854 Seated quarters lack the Rays reverse, technically making the two issues distinct subtypes.) The proof 1853 Arrows and Rays quarter is considered the most important proof issue in the Seated Liberty quarter collection.

Although this coin is not attributed as such by NGC, it is clearly the specimen from the Louis E. Eliasberg, Sr. Collection, where Q. David Bowers cataloged it as "MS-64, prooflike," going into extensive detail on why the piece might be a true proof — at least, as that term might apply to coins dated 1853. Among the similarities he cites that are visible on this piece are "delicate champagne toning over mirror surfaces" and the die finishing lines just inside the denticles over stars 11 and 12. A small patch of darker toning midway down Liberty's right (facing) calf is a match, as is the tiny rim crease just above the Liberty cap, between stars 8 and 9 (this is, however, apparently in the die, as some other specimens in the roster below show the same feature). The color plate in the Eliasberg catalog is also a full match.

Ex: J.M. Clapp (acquired as "Uncirculated") at an early date, probably before 1894; John H. Clapp; Clapp estate, 1942, to Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1454; Heritage (1/1998), lot 6782; David Lawrence (3/2005), lot 1522; unknown intermediaries; Central States (Heritage, 4/2009), lot 2353; FUN (Heritage, 1/2010), lot 2518. (#85548)

**1862 Seated Liberty Quarter, PR65
Elusive Civil War Issue**

3861 1862 PR65 NGC. Proof mintages dropped drastically in 1862 because of the financial stresses of the Civil War. Only 550 proof Seated Liberty quarters were struck. This sharply detailed Gem exhibits attractive shades of bluish-gray and champagne-gold toning over reflective fields that show few signs of contact. Census: 12 in 65, 14 finer (7/12). (#5558)

3862 1873 No Arrows PR63 NGC. CAC. Often overlooked because of its With Arrows counterpart, the No Arrows is a significant coin as a proof but it lacks the cachet of a two-year type. This is a deeply mirrored example that has oil-slick iridescence on each side. (#5572)

**Gem Proof 1880 Seated Liberty Quarter
Rare Deep Cameo Specimen**

3863 1880 PR65 Deep Cameo PCGS. The 1880 Seated Liberty quarter boasts the highest proof mintage of the series, at 1,355 pieces, but few survivors display the intense Deep Cameo contrast of this spectacular Gem. The surfaces are deeply mirrored and the design elements are frosty and sharply detailed. Population: 1 in 65 Deep Cameo, 4 finer (7/12). (#95581)

3864 1882 PR66 NGC. Always popular whether a proof or business strike, only 16,300 pieces combined were struck of this date. The fields are deeply reflective and there is a significant amount of mint frost over the devices, especially the reverse. The brilliant centers are surrounded by rings of deep color at the margins. (#5583)

3865 1884 PR64 ANACS. Vivid shades of orange-gold and lilac toning blanket the deeply mirrored surfaces of this sharply detailed Choice proof. From a proof mintage of just 875 pieces. *From The Dr. Charles Nelson Collection.* (#5585)

**Premium Gem Proof 1891 Quarter
Impressive Cameo Example**

3866 1891 PR66 Cameo NGC. The Seated Liberty design was retired after 1891, making the date an important one for type collectors. Only 600 proof quarters were struck in 1891, and high-grade Cameo examples are rare. This sharply detailed Premium Gem displays deeply reflective fields that contrast boldly with the frosty devices. A few hints of champagne-gold toning add to the considerable eye appeal. Census: 24 in 66 Cameo, 11 finer (7/12). (#85592)

BARBER QUARTERS

**1893-S Quarter, MS65
Few Available in High Grades**

3867 1893-S MS65 PCGS. CAC. The 1893-S is curiously unavailable in the better grades of Uncirculated in spite of a mintage in excess of 1.4 million pieces. This is a highly lustrous Gem that is evenly covered with gray-rose toning on each side. The strike is especially notable with full talon detail on the eagle. Clean and problem-free overall. Population: 8 in 65, 4 finer (7/12). (#5606)

**1897-O Barber Quarter, MS66
None Finer at PCGS**

3868 1897-O MS66 PCGS. CAC. The 1897-O Barber quarter is an elusive issue in high grade, from a mintage of 1.4 million pieces. This impressive Premium Gem is sharply detailed in most areas, with a touch of softness on the stars and arrow fletchings. The brilliant surfaces radiate satiny mint luster, with ample eye appeal. Population: 17 in 66, 0 finer (7/12). (#5617)

3869 1898 MS65 PCGS. Produced in large numbers, the 1898 Barber quarter is easily located in circulated grades, but examples in Gem condition are rare. This sharply detailed lustrous specimen shows a few hints of gold toning. Population: 28 in 65, 30 finer (7/12). (#5619)

3870 1898-S MS61 NGC. This better date branch mint quarter has satin luster and a sharp strike. The steel-gray and caramel-gold surfaces are mark-free except for faint contact on the cheek. (#5621)

- 3871 1900 MS65 PCGS.** This delightful Gem exhibits well-detailed design elements and lustrous surfaces, with accents of gold and lavender patina. Eye appeal is outstanding. Population: 35 in 65, 17 finer (7/12). (#5625)
- 3872 1902 MS66 PCGS. CAC.** Attractive golden-brown toning dominates the obverse and visits the reverse margin. The portrait displays stone-gray and a glimpse of sea-green is at the upper obverse. The fletchings and shield corners are well defined though lower obverse stars are incomplete. Population: 25 in 66, 3 finer (7/12). (#5631)
- 3873 1911-S MS66 PCGS. CAC.** Sharply struck and pleasingly preserved with speckles of blue and violet patina over a faintly gold-gray base. The mintmark appears to be lightly repunched. Population: 39 in 66 (3 in 66+), 5 finer (7/12).
Ex: FUN (Heritage, 1/2008), lot 1189. (#5661)
- 3874 1913-D MS66 PCGS.** Silver-white overall with frostiness revealed by a few strips of brilliance from local burnishing on the dies. Speckles of amber toning enhance the eye appeal. Softly struck on star 11 and the eagle's right (facing) talons but well-defined elsewhere. Housed in a green label holder. Population: 11 in 66, 0 finer (7/12).
Ex: Heritage (11/2007), lot 60544. (#5665)

**1913-S Barber Quarter, VF35
Deeply Toned**

- 3875 1913-S VF35 PCGS.** Only 40,000 pieces were struck of this scarce, semikey issue. This is a moderately circulated example that displays deep charcoal patina over each side and lightly contrasting high points over the devices. A couple of tiny planchet flakes are located on the point of the chin and the back of Liberty's neck. (#5666)
- 3876 1914-S AU55 PCGS.** Medium wheat-gold toning visits this partially lustrous example. Smooth aside from a hair-thin vertical mark on the portrait. A much better date, though less well known than its 1913-S predecessor.
From The Norva Collection. (#5669)

PROOF BARBER QUARTERS

**1908 Barber Quarter, PR66
Only 545 Pieces Struck**

- 3877 1908 PR66 PCGS. CAC.** Only 545 proof Barber quarters were struck in 1908, making the issue scarce-to-rare in all grades. This delightful Premium Gem exhibits sharply detailed design elements and deeply reflective fields, with accents of champagne-gold and lavender toning. Population: 15 in 66, 18 finer (7/12). (#5694)

- 3878 1909 PR65 NGC.** Richly toned electric-blue over much of each side with lighter, more reflective green-to-gold patina elsewhere. This Gem proof has appreciable contrast despite its toning. (#5695)
- 3879 1910 PR66 NGC.** A magnificent Premium Gem from a tiny proof mintage of 551 pieces, this coin features deeply mirrored fields and sharply detailed design elements. Although not designated as a cameo, the devices exhibit enough frost to provide a definite element of contrast. Census: 28 in 66, 32 finer (7/12).
From The Fred Yee Collection. (#5696)

**PR68 ★ Cameo 1910 Quarter
Among Finest Certified**

- 3880 1910 PR68 ★ Cameo NGC.** A stunning early 20th century Barber quarter proof, one of only 551 produced in 1910. The number of Barber quarter proofs steadily declined from a high of 1,245 coins in 1892, falling below 600 pieces per year in six years of the early 20th century. This example is fully struck with deep mirror surfaces and sharply contrasting frosty devices. This stone-white specimen is pristine and has a few pinpoint mint-made flan flakes on the field near the forehead. Census: 2 in 68 Cameo, 5 in 68 ★ Cameo, 1 in 68 Ultra Cameo, 2 in 68 ★ Ultra Cameo, 3 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1116, which realized \$9,775. (#85696)

**Superb Gem Proof Barber Quarter
Only Three Numerically Finer Coins at NGC**

- 3881 1915 PR67 NGC.** Ex: Pittman. Blushes of apricot-gold, forest-green, and plum-mauve adorn this fully struck Superb Gem. For the series, the second lowest proof mintage with only 450 pieces coined. Census: 13 in 67, 3 finer (7/12).
Ex: John Jay Pittman Collection, Part Two (David Akers, 5/1998), lot 1402. Earlier purchased by Pittman from George Bauer in 9/1945 for \$3.50. (#5701)

MERCURY DIMES

3882 1916-D VG8 NGC. Well worn but attractive with natural silver-gray surfaces. Handling marks are limited to those that are expected for the grade. Full rims and a bold mintmark are key features of this example.

From The Dr. Charles Nelson Collection. (#4906)

3883 1916-D VG10 PCGS. The surfaces show extensive signs of circulation, but are definitely original and uncleaned. Light gray patina covers each side, and the only mark of note is located between the IB of LIBERTY. (#4906)

1916-D Dime, VF20

Smooth, Distraction-Free Surfaces

3884 1916-D VF20 PCGS. A well-circulated example of this important key date coin, this example is toned medium gray, and the wear is even. The coin is clear of contact marks and other detractors, making it a good example for the budget-minded collector.

Ex: Atlanta Signature (Heritage, 8/2001), lot 5757.

From The Fred Yee Collection. (#4906)

Very Fine 1916-D Dime

Original Surfaces

3885 1916-D VF20 PCGS. CAC. This is a well-worn example of this popular key date dime. It has the appearance of a coin that has spent years in circulation, but when it was pulled, no one cleaned it. Each side has light gray patina with sharply contrasting charcoal around the devices. A couple of minor scratches are seen by Weinman's initial. (#4906)

Midgrade 1916-D Dime, VF30

Rarest Regular Issue of Type

3886 1916-D VF30 NGC. Generally stone-white though protected areas display russet-gray. Most of the fasces lines are clear. Today, all collectors know the rarity of the 1916-D dime, but the issue was seldom set aside until long after its release, given that most survivors are in Fair to VG grades.

From The Fred Yee Collection. (#4906)

1916-D Mercury Dime, MS63
Pleasing, Lustrous Surfaces

3887 1916-D MS63 PCGS. CAC. The 1916-D Mercury dime is the undisputed key to the series with its remarkably low production of 264,000 coins. The 1921-P and 1921-D issues rank “distant second” with mintages of slightly more than 1 million pieces each. The 1916-D was generally a well-struck issue, but it has an unusual grade distribution. Many examples are found in the range from Fair or Almost Good to Very Good (Poor examples generally show insufficient mintmark to distinguish from a 1916-P), with an occasional Fine coin found. Specimens in the range of Very Fine to AU (and more specifically, XF40 to AU53) are seldom seen, and nice examples with good eye appeal in that grade range are highly prized. In Uncirculated grades the 1916-D is especially sought after. This Select example has light golden-reddish patina with strong underlying mint luster. There are few marks on either side, none obvious, and the center band details are almost completely defined.
From The Fred Yee Collection. (#4906)

1916-D Mercury Dime, MS65 Full Bands Popular Key and First Year of Issue

3888 1916-D MS65 Full Bands NGC. The 1916-D Mercury dime is a popular key coin, and it is one that requires third-party authentication, as many bogus coins have been made over the years, either through alteration and addition of mintmarks or outright fabrication. Lange's series reference notes that, "Such is the prevalence of altered and counterfeit examples that even those which meet the established criteria for genuineness should be authenticated by a reputable certification service."

The authentication is difficult for most numismatists, however, as there are four known mintmark positions (pictured in Lange, second edition, page 78) on the various reverse dies used, with subtle differences:

—Reverse Die 1 has the mintmark quite high (away from the rim), single-punched, and tilting right relative to the rim, and it is closer to the leaf than the stem.

—Die 2 has the mintmark high, level, and double-punched, a trait that shows clearly at the top, left, and bottom of the D on high-grade specimens. This mintmark is also closer to the leaf than the stem, and the top of the D is in line with the bottom of the top bar of the E in DIME. (A die crack often appears on this die near the stem bottom, pointing straight down to the rim.)

—Die 3 has the mintmark not quite so high, a bit further away from the leaf, and also double-punched.

—Die 4 has the lowest mintmark, about equally spaced between the leaf and stem (just a trifle closer to the leaf), and the top of the D is in line with the middle of the space between the top and middle bars of the E in DIME.

This is a Die 1 coin, positioned high and showing no die doubling. The surfaces are remarkably clean and highly lustrous. Each side is covered with a mixture of rose and sea-green toning. There are no marks of any consequence on either side, but a triangular planchet flaw is noted in the middle of the left obverse field. Census: 24 in 65 (1 in 65+) Full Bands, 7 finer (7/12). (#4907)

3889 1918-D MS63 Full Bands PCGS. Gold, rose, and blue overtones enrich each side of this satiny Full Bands Select piece, the colors richer on the reverse. The Full Bands arguably are the place of *weakest* detail on this coin, a testament to its overall strength.
From The Fred Yee Collection. (#4919)

3890 1918-S MS66 PCGS. CAC. Cherry-red and honey-gold augment the margins of this thoroughly lustrous early branch mint Premium Gem. The reverse is essentially pristine, and the strike is sharp save for the central bands.
Ex: Larry Shapiro #1 All-Time Finest Mercury Dimes Basic PCGS Registry Set (Heritage, 1/2006), lot 1953, which realized \$1,610. (#4920)

Choice Full Bands 1918-S Dime

3891 1918-S MS64 Full Bands PCGS. Deep russet-brown freckles are confined to the reverse margin of this generally cream-gray better date dime. Boldly struck aside from the tops of LIBERTY. Marks are minimal for the MS64 level. Full Bands examples constitute a decided minority of Uncirculated survivors. Population: 60 in 64 (1 in 64+) Full Bands, 42 finer (8/12).
From The Fred Yee Collection. (#4921)

3892 1919-D MS63 Full Bands PCGS. Crisp all-around detail with hues that flow into each other, including peach, rose, violet, and blue. Broadly swirling luster through the patina enhances the eye appeal.
From The Fred Yee Collection. (#4925)

Choice 1919-D Mercury Dime Full Bands Definition

3893 1919-D MS64 Full Bands PCGS. Delicate shades of ice-blue and champagne-gold toning accent both sides of this attractive Choice example. The design elements are sharply detailed and Full Bands definition is evident on the fascies. Vibrant mint luster adds to the considerable visual appeal. Population: 76 in 64 (2 in 64+) Full Bands, 18 finer (7/12). (#4925)

3894 1919-S MS65 NGC. Excellent obverse detail, though the reverse bands are incomplete. Subtly satiny surfaces blossom with silver luster and show just a touch of green-gold near the rims. Census: 25 in 65, 14 finer (7/12).
From The Fred Yee Collection. (#4926)

3895 1919-S MS63 Full Bands PCGS. Silver at the central obverse with antique-gold and violet around. The reverse is even more richly toned on this Select Full Bands example. Population: 13 in 63 Full Bands, 58 finer (7/12).
From The Fred Yee Collection. (#4927)

3896 1920-D MS64 Full Bands PCGS. Violet and gold overtones are at their deepest at the right reverse. Strongly lustrous through the patina with bold detail and great all-around eye appeal.
From The Fred Yee Collection. (#4931)

3897 1920-S MS64 Full Bands PCGS. Blues and golds through the centers with reddish aspects at the margins. All trends deepen and extend on the reverse. PCGS has graded 35 pieces as MS65 Full Bands or better (8/12).
From The Fred Yee Collection. (#4933)

1921 Dime, MS63 Full Bands A Clean, Problem-Free Example

3898 1921 MS63 Full Bands NGC. This low-mintage key is needed in all grade ranges, and the present MS63 represents especially good value for the collector. The lustrous surfaces are covered with glowing russet-golden toning, and there are no large or distracting abrasions apparent on either side. (#4935)

MS64+ Full Bands 1921 Dime Low-Mintage Semikey

3899 1921 MS64+ Full Bands PCGS. CAC. Light cream-gray centers gradually cede to autumn-gold margins. The devices are fully struck though portions of the letters near the rims show incompleteness. Lustrous and unabraded with superior eye appeal for the designated grade. A traditional semikey with a scant mintage due to resumed silver dollar production.
From The Fred Yee Collection. (#4935)

1921-D Mercury Dime, MS64 Full Bands Low-Mintage D-Mint Issue

3900 1921-D MS64 Full Bands PCGS. CAC. The 1921-D Mercury dime claims the second-lowest mintage of the series at just over 1 million pieces. This well-detailed Choice example displays Full Bands definition on the fascies, with satiny mint luster and spots of gold and amber toning.
From The Fred Yee Collection. (#4937)

3901 1923-S MS64 Full Bands PCGS. Pleasingly detailed with silver interiors and blue-violet and gold-orange margins that show greater coverage on the reverse. Lightly marked but with great all-around eye appeal. Population: 62 in 64 (1 in 64+) Full Bands, 39 finer (7/12).
From The Fred Yee Collection. (#4941)

3902 1924-S MS63 Full Bands PCGS. The obverse is lustrous and largely silver with touches of gold, blue, and violet. The reverse has broad patches of those colors blended in the center and right.
From The Fred Yee Collection. (#4947)

3903 1925 MS66 Full Bands PCGS. CAC. A splendid Premium Gem, this Full Bands specimen has a bold strike throughout, with satiny mint brilliance and delicate iridescent toning. Population: 50 in 66 Full Bands, 26 finer (8/12). (#4949)

3904 1926-S MS63 PCGS. The frostiness of the luster is most apparent in contrast with the small areas of brilliance surrounding the portrait. The light golden overtones of the obverse deepen and add violet aspects on the reverse. Population: 20 in 63, 77 finer (7/12).
From The Fred Yee Collection. (#4958)

1926-S Mercury Dime, MS64 Full Bands Low-Mintage S-Mint Issue

3905 1926-S MS64 Full Bands PCGS. A well-struck example of this challenging low-mintage branch mint issue. The obverse on its own appears to merit a finer grade, and the reverse is also well-preserved. Lustrous and lightly toned in olive and straw-gold shades. Population: 40 in 64 Full Bands, 36 finer (8/12). (#4959)

3906 1928-D MS64 Full Bands PCGS. Delicate golden-gray toning adorns this lustrous, intricately struck, and unabraded near-Gem. The date is minutely die doubled, most apparent on the base of the 2. Encapsulated in a green label holder.
Ex: Long Beach Bullet (Heritage, 6/1994), lot 350.
From The Fred Yee Collection. (#4969)

3907 1929-S MS66+ Full Bands PCGS. CAC. Light blue inner and gold-orange outer toning graces the obverse, with both hues deepening on a reverse that is just as sharply struck and no less lustrous for the patina. Great all-around appeal. PCGS has graded just 27 pieces as MS67 Full Bands or better (8/12). (#4977)

3908 1939 MS67+ Full Bands PCGS. CAC. Pale silver overall with slightly pebbled texture and suggestions of ice-blue and antique-gold in the fields. Exquisitely preserved and eye-catching. PCGS has graded only six coins as MS68 Full Bands or finer (7/12). (#5017)

3909 1942/1 AU50 PCGS. FS-101. A briefly circulated and satiny stone-gray example of the prominent hubbed overdate. Presumably, experienced Mint workers were off fighting World War II, a contributing factor to the hubbing error. Certified in a green label holder.
From The Dr. Charles Nelson Collection. (#5036)

3910 1942/1 AU58 NGC. FS-101. The overdate is blatant on this desirable Guide Book variety. Light tan-gold toning is mostly confined to the left reverse border. No marks are evident and wear is difficult to detect.
From The Fred Yee Collection. (#5036)

Mint State 1942/1 Dime, FS-101 Prominent Hubbed Overdate

3911 1942/1 MS61 NGC. FS-101. This coruscating key date dime displays rich multicolor toning. The centers are lavender and the fields exhibit ice-blue, sea-green, and caramel-gold. Despite the MS61 grade the surfaces are nearly unabraded save for a hairline at the base of the nose and a few faint marks beneath UNUM. (#5036)

Select Mint State 1942/1 Dime Surprisingly Unabraded

3912 1942/1 MS63 PCGS. FS-101. A beautiful example of this incontestable overdate. The obverse is brilliant and a whisper of caramel-gold adorns the reverse. Lustrous and essentially unabraded with selected softness of strike on some of the peripheral letters as they approach the rim.
From The Fred Yee Collection. (#5036)

1942/1-D Dime, MS62 Full Bands Scarce in Uncirculated Grades

3913 1942/1-D MS62 Full Bands NGC. By far the scarcer of the two overdates from 1942, the Denver-mint dime was also discovered years after its P-mint counterpart; thus, the number of high-grade survivors is much smaller of the D-mint. This satiny example is covered with a light layer of golden toning on each side. Numerous small abrasions appear under a loupe, the only one of significance along the jawline of Liberty. Census: 19 in 62 Full Bands, 50 finer (7/12).
From The Fred Yee Collection. (#5041)

PROOF MERCURY DIME

1942 Dime, PR68 Essentially Perfect Surfaces

- 3914 1942 PR68 PCGS.** Proof coins of 1942 are known for their high quality and exceptional eye appeal, but this magnificent PR68 Mercury dime stands out, even in such distinguished company. The design elements are fully struck, and the all-brilliant finish provides remarkable depth of reflectivity. A few wisps of champagne-gold toning enhance the surfaces. Population: 39 in 68 (1 in 68+), 0 finer (7/12). (#5077)

ROOSEVELT DIMES

- 3915 1946-1964-D Roosevelt Dime Set MS67 NGC.** This is a uniform, high-grade set from 1946 through 1964-D. Of the 48 coins contained in this set, all are brilliant except for two (1954 and 1955-S). Each coin is certified MS67 by NGC (no FT coins). An outstanding, uniform set of this popular modern series. (Total: 48 coins)

PROOF ROOSEVELT DIME

- 3916 1951 PR68 Cameo PCGS.** Wisps of pastel toning appear on the obverse of this otherwise brilliant Superb Gem, with full cameo contrast from deeply mirrored fields and frosty devices. Population: 7 in 68 Cameo, 0 finer (8/12). (#85226)

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter AU Sharpness

- 3917 1916 — Harshly Cleaned — NGC Details. AU.** A polished pearl-white example of the low-mintage series key. The high points and open fields are glossy and the shield rivets are quite faint, though the eagle's wings retain considerable design definition. Struck late in 1916, the issue was soon overwhelmed in commerce by the high mintage 1917. As a result, comparatively few pieces were set aside.

Famed 1916 Standing Liberty Quarter Still-Lustrous AU50

- 3918 1916 AU50 PCGS.** A lightly worn example of the classic first-year Standing Liberty quarter key, gold-orange at the edges with light grays through the interiors and touches of canary-yellow and blue. The fields remain faintly luminous, though whatever detail might have been present on Liberty's head largely is worn away. From The Dr. Charles Nelson Collection. (#5704)

- 3919 1917 Type One MS65 Full Head NGC.** Well-defined overall, not only on Liberty's head. Light gold and peach overtones grace subtly mellowed silver surfaces. A small tick affects Liberty's lower-left drapery and another her right (facing) foot. From The Fred Yee Collection. (#5707)

- 3920 1917 Type One MS65 Full Head PCGS. CAC.** The Type One quarters of 1917 are typically found with a bold strike like this Gem, with a sharp head, shield, and eagle. This frosty and fully lustrous beauty has wisps of toning over mostly untuned silver surfaces. (#5707)

- 3921 1917-S Type One MS64 Full Head NGC.** Gold-orange and blue-gray tinges visit the margins on this Full Head Type One quarter from the sole such issue struck at San Francisco. The luster is warm and smooth. (#5711)

Gem Full Head Type One 1917-S Quarter, Excellent Type Coin

- 3922 1917-S Type One MS65 Full Head NGC.** An essentially brilliant Gem whose intricately struck features and vibrant cartwheel luster provide exquisite eye appeal. Since marks are absent, the sole identifier is an ebony fleck at 2 o'clock on the reverse. Due to the incredible strike qualities of the Type One quarters overall, they make excellent type coins when found in high Mint State grades. (#5711)

**Gem Full Head 1917-S Quarter
Razor-Sharp Type One Example**

- 3923 1917-S Type One MS65 Full Head NGC. CAC.** A razor-sharp Gem that boasts vibrant luster and nearly pristine surfaces. Close to brilliant though glimpses of light ocean-blue and autumn-gold toning visit the obverse margin. An exceptionally attractive example of this single-year San Francisco type. Housed in a former generation holder.
From The Fred Yee Collection. (#5711)

- 3924 1917-D Type Two MS64 Full Head PCGS.** Golden overtones grace luminous surfaces. This near-Gem is softly struck on Liberty's shield but meets the Full Head criterion. Housed in a green label holder. (#5717)

- 3925 1917-D Type Two MS64 Full Head PCGS. CAC.** Light golden touches are more prominent on the reverse. Blossoming silver luster dominates the eye appeal, and Liberty's head has the tiny ear-hole that so many otherwise Full Head examples of this issue lack. (#5717)

- 3926 1918-D MS64 Full Head PCGS Secure.** Steel-blue and almond-gold toning alternates across this lustrous and well preserved near-Gem. The head and date are well struck although shield rivets near the waist are incomplete. (#5723)

**1918/7-S Quarter, AU Details
Excellent Definition for This Key Issue**

- 3927 1918/7-S — Obverse Scratched — NGC Details. AU. FS-101.** The underdigit is plainly visible on this piece, and there is good design detail present on each side with only minimal high-point friction. Both sides retain much central brightness with deeper russet toning at the margins. The obverse is scratched below WE TRUST and again across the shield.

**Choice 1918/7-S Standing Liberty Quarter
Sought-After Wartime Overdate**

- 3928 1918/7-S MS64 PCGS. CAC. FS-101.** This is one of the most famous and popular of all 20th century overdates due to its listing in the *Guide Book* for many years. The earliest listing of this overdate variety actually predates the famous "Redbook." The 1942 edition of Wayne Raymond's *Standard Catalog* included the first record of this variety that had been discovered a few years earlier. Barney Bluestone first offered an example of this overdate variety in his December 1937 coin auction. The Mint State example was described at that time as unique.

By way of explanation, in his *Complete Encyclopedia* Walter Breen states:

"During autumn 1917, immense wartime coinage quotas had to be filled in haste. The Engraving Department was simultaneously making dies for 1917 'Type II' and 1918; in particular, 1918-dated dies for the branch mints had to be ready well before the year's end, so that the Denver and San Francisco facilities could proceed at once with coinage of this denomination. One working die received a blow from a 1917 hub, routinely went to the annealing furnaces to be prepared for subsequent blows, but through error returned to the wrong press and received its other blow from a 1918 hub."

A Choice Mint State example, this highly lustrous piece has exceptional mint frost beneath deep lilac and rose toning. Although not a full strike, all of the design details on each side are boldly defined, with considerable (about 60%) head details on the obverse. Population: 20 in 64, 5 finer (7/12).

Ex: Central States Signature (Heritage, 5/2007), lot 2107. (#5726)

- 3929 1919-S MS63 NGC.** Decently struck overall, even on Liberty's shield, though her head is soft. Wispy abrasions visit amply lustrous surfaces that appear far better at arm's-length than "merely" Select. (#5732)

**Choice 1921 Quarter
Lustrous and Attractively Toned**

- 3930 1921 MS64 PCGS.** The 1921 Standing Liberty quarter is a scarce issue in high grade, from a relatively low mintage of 1.9 million pieces. This attractive Choice example is sharply detailed in most areas, but falls just short of Full Head definition. Shades of pale gold and lavender toning enhance the lustrous surfaces and eye appeal is outstanding. (#5740)
- 3931 1923-S XF45 PCGS.** Still-luminous surfaces are largely light gray with a few touches of gold. Minor but clear wear is noted at the high points of the design, though there are few distracting marks. An important semikey coin. (#5744)
- 3932 1923-S — Improperly Cleaned — NGC Details. AU.** This low-mintage Standing Liberty quarter has only a hint of wear and much luster is present. Only trivial marks but the stone-white surfaces are moderately bright.

**1923-S Quarter, MS67 Full Head
Great Rarity, Tied for Finest Known**

- 3933 1923-S MS67 Full Head PCGS Secure.** Ex: North Shore. The 1923-S is the most challenging nonvariety Type Two Standing Liberty quarter in lesser grades, and it is a great rarity at the highest Mint State tiers as well, if not so famous as dates such as the 1927-S. This Secure-graded example with North Shore pedigree is one of six MS67 Full Head examples certified by PCGS with no Full Head coins numerically finer (7/12). Not only does it rate highly on technical merits, but the "artistic presentation" is amazing as well. The strike is strong on the shield as well as the head, and dappled peach, rose, and violet patina drapes strongly lustrous devices with a hint of frost at the silvery center of the obverse. Magnificent. (#5745)
- 3934 1924-D MS64 Full Head PCGS.** Splashes of tan-brown toning enrich the peripheries of this otherwise cream-gray near-Gem. Coruscating and refreshingly unabraded with an unusually sharp strike on Liberty's head, shield, and waist. One slender retained lamination at the date. (#5749)

Full Head Near-Gem 1924-S Quarter

3935 1924-S MS64 Full Head PCGS. CAC. Light straw-gold toning adorns coruscating and nearly mark-free fields and devices. A trio of shield rivets are indistinct but the rest of the design is intricately impressed. Very scarce in the present quality despite a reasonable mintage of 2,860,000 pieces. Population: 72 in 64 (1 in 64+) Full Head, 38 finer (8/12). (#5751)

3936 1925 MS66 PCGS. A lovely Premium Gem with frosty luster and hints of iridescent toning. This sharp specimen has nearly full head details with only slight weakness on the shield. Population: 24 in 66 (1 in 66+), 1 finer (8/12). (#5752)

**Choice 1926-D Standing Liberty Quarter
Full Head With Vibrant Luster**

3937 1926-D MS64 Full Head PCGS. CAC. Only 1.7 million quarters were struck at the Denver Mint in 1926, and examples with Full Head definition are quite elusive. This coin is a high-end specimen close to full Gem status. No obvious abrasions appear on either side, and both obverse and reverse are covered with light, even golden-brown toning. Vibrant mint luster adds to the terrific eye appeal. Housed in a green label holder. Population: 27 in 64 Full Head, 29 finer (7/12). (#5757)

3938 1927-S — Improperly Cleaned — NGC Details. AU. This brilliant key date quarter has considerable luster and only minor wear. A bit bright for the AU grade. The reverse die extensively clashed (as made) and displays prominent vertical die lines that should not be confused with hairlines. (#5764)

**1927-S Quarter, MS66
Low-Mintage Key With Dazzling Luster**

3939 1927-S MS66 PCGS. The 1927-S Standing Liberty quarter wins the low-mintage sweepstakes among Type Two issues, at 396,000 coins struck. Among nonvariety coins (excluding the 1918/7-S), only the 1916 has a lower production total within the series. A few years back Jay Cline wrote in the *Coin Dealer Newsletter Monthly Summary* that the non-Full Head 1927-S was “undervalued and very elusive in MS64, MS65, MS66, and MS67.” Even today, a Full Head example of this date would bring well into the six-figure range. This Premium Gem boasts dazzling mint luster over surfaces that are brilliant save for a barely discernible hint of golden color at the margins. As usual for this softly struck issue, the head detail is nearly flat, and many of eagle’s breast feathers lack full definition. Each side is remarkably clean overall. Population: 31 in 66, 4 finer (7/12). (#5764)

3940 1928-D MS66+ PCGS. CAC. A lower-mintage Denver quarter whose virtually pristine fields and devices teem with luster and display rich golden-brown and lime-green toning. A good strike save for blending on a couple of shield rivets and the center of Liberty’s head. (#5768)

3941 1929-S MS66 Full Head PCGS. This high-grade Standing Liberty type coin has only an occasional blush of tan-gold toning. Lustrous and carefully preserved with a sharp impression on the date and Liberty’s head. A pair of shield rivets near the waist lack absolute detail. (#5777)

3942 1930 MS66 Full Head PCGS. CAC. Both sides show gold-orange and sky-blue overtones, with the obverse favoring the former and the reverse the latter. Great luster and excellent detail not only on Liberty’s head but her shield. (#5779)

WASHINGTON QUARTERS

- 3943 1932-D MS61 NGC.** Peach and blue overtones are dappled across the obverse, while the reverse has fainter echoes across a more obviously gray surface. A pinscratch near 3 o'clock on the obverse rim is well-hidden by the toning. (#5791)
- 3944 1932-D MS61 NGC. CAC.** Brightly lustrous with touches of gold at the reverse margins. The obverse is clean for the grade, though a long, thin abrasion affects the eagle's right (facing) wing. (#5791)
- 3945 1932-D MS63 PCGS.** The mint luster is nicely frosted and each side has just the slightest hint of toning. The only mark that bears mention is a scuff on the high point of Washington's cheekbone, and that is a minor flaw. Looks finer than the stated grade. (#5791)
- 3946 1932-D MS64 PCGS.** A few scattered marks on each side are expected for the grade. This Choice Mint State Washington key has ivory luster with satin surfaces and sharp details. Seldom are finer examples encountered.
From The Dr. Charles Nelson Collection. (#5791)
- 3947 1936-D MS65 PCGS. CAC.** A minimally toned and coruscating Gem. The strike is sharp save for the left-side margins. Infrequent slight contact prevents a finer grade. The '36-D is famously scarce in Mint State. (#5801)
- 3948 1937-S MS66 PCGS. CAC.** A stunning Premium Gem with frosty silver luster that shines through beautiful orange, green, violet, and gold toning that is intermingled over most of the obverse and reverse surfaces. Only 21 finer PCGS examples are certified (7/12). (#5805)
- 3949 1940-S MS67 PCGS.** Frosty luster is pale silver-blue with aspects of gold-orange and amber at the margins. A smooth Superb Gem with great all-around eye appeal. Population: 44 in 67 (1 in 67+), 1 finer (7/12). (#5813)
- 3950 1942 MS67 NGC.** A gorgeous light green-gold Superb Gem that boasts a pristine appearance and blazing cartwheel sheen. A high mintage issue, but desirable this close to perfection. Census: 87 in 67 (1 in 67+), 0 finer (7/12). (#5817)
- 3951 1942 MS67 PCGS. CAC.** Delicate peripheral iridescence appears on both sides of this frosty and highly lustrous Superb Gem. Pristine surfaces are devoid of mentionable marks. Population: 26 in 67 (3 in 67+), 0 finer (8/12). (#5817)
- 3952 1945-S MS67 PCGS.** Ex: Omaha Bank Hoard. Knob S. Light straw-gold and ice-blue patina visits this lustrous and pristine Superb Gem. Evenly struck and essentially unimprovable. Population: 36 in 67 (1 in 67+), 0 finer (7/12).
Ex: *Long Beach Signature* (Heritage, 5/2007), lot 1045, which realized \$977.50. (#5829)
- 3953 1946-D MS67 NGC.** This gunmetal-gray and caramel-gold Superb Gem appears perfect aside from slight inexactness of strike on peripheral elements. Luster dominates pristine surfaces. A lower mintage issue. (#5831)
- 3954 1948-D MS67 PCGS.** Thick mint frost is the primary draw to this Superb Gem. Additionally, the surfaces are lightly toned around the margins with nearly brilliant centers. Surprisingly scarce for a coin with more than 16 million pieces struck. Population: 30 in 67 (2 in 67+), 0 finer (7/12). (#5837)
- 3955 1962-D MS67 NGC.** A nearly pristine Superb Gem whose lustrous fields and devices display lightly freckled jade-green and russet patina. Certified in a former generation holder. Census: 19 in 67, 2 as 67 ★, none finer (7/12). (#5873)
- 3956 1964 MS67 NGC.** Type A Reverse. Apple-green, golden-brown, ocean-blue, and plum-mauve toning encompass this lustrous and fully struck Superb Gem. An immaculate representative of this plentiful final year silver circulation issue. Census: 41 in 67, 3 in 67 ★, none finer (7/12). (#5876)

PROOF WASHINGTON QUARTERS

Deep Cameo PR66 1952 Quarter Rare With White-on-Black Contrast

- 3957 1952 PR66 Deep Cameo PCGS.** Blatant cameo contrast is rarely seen on proof quarters from the early 1950s. PCGS has certified just 12 1952 proof quarters as Deep Cameo. Well-struck and virtually immaculate with darkly reflective fields and luminous motifs. The margins display light mauve toning. Population: 9 in 66 Deep Cameo, 2 finer (8/12). (#95984)

- 3958 1976-S Silver PR70 Deep Cameo PCGS.** Gorgeous white-on-black contrast jumps out at the viewer of this flawless Superb Gem. The frosted devices are intricately impressed. Population: 49 in 70 Deep Cameo (7/12).
Ex: *Cincinnati Central States* (Heritage, 4/2009), lot 619, which realized \$1,495. (#96008)

- 3959 1981-S Type Two PR70 Deep Cameo PCGS.** Radiant motifs rise in full detail above flawless glassy fields. Ideal for the advanced Registry holding. The second and scarcer Clear S mintmark variety. Population: 41 in 70 Deep Cameo (7/12). (#96017)

WALKING LIBERTY HALF DOLLARS

- 3960 1916 MS64 PCGS.** Golden overtones through the margins with aspects of deeper patina at the upper obverse and lower reverse as well as small streaks elsewhere. A softly struck but lustrous first-year example. (#6566)
- 3961 1916 MS64 PCGS.** A popular first-year type coin, this attractive Choice example displays well-detailed design elements and satiny mint luster under delicate champagne-gold toning.
From The Fred Yee Collection. (#6566)
- 3962 1916 MS65 PCGS. CAC.** Light caramel-gold patina visits this highly lustrous and sharply struck half dollar. Carefully preserved and attractive. Among the lowest-mintage issues of the popular silver type. (#6566)
- 3963 1916 MS65 PCGS. CAC.** A highly lustrous Gem first-year Walker, this example has brilliant centers within a frame of gold, blue, and lavender toning on each side. The strike is bold with trivial marks of no consequence. (#6566)
- 3964 1916-D MS64 PCGS. FS-501.** The mintmark is nicely repunched southwest. The variety is undesignated on the PCGS insert. Precisely struck, lustrous, and brilliant aside from a few navy-blue freckles along the lower right reverse margin. Unabraded but a mint-made strike-through is concealed within the skirt. (#6567)

**Gem 1916-D Half Dollar
First-Year Mintmark Type Coin**

- 3965 1916-D MS65 PCGS.** From the first year of the Walking Liberty design, the 1916-D is always in demand from mintmark type collectors. This well-struck Gem displays the usual softness on the centers, but peripheral detail is stronger. A few hints of golden-tan toning are evident, with vibrant satiny mint luster. (#6567)

**1916-D Half Dollar, MS65
Dappled Green and Gold Toning**

- 3966 1916-D MS65 NGC. CAC.** A beautifully preserved Gem with potent luster and a good strike. Dappled forest-green and tan-gold toning dominates the margins and visits the centers. All first-year issues of the Walking Liberty type are low-mintage, due to technical delays in introducing the design. (#6567)

- 3967 1916-S AU58 NGC.** This low-mintage first-year half dollar is still lustrous despite faint wear on the central skirt lines and the eagle's breast. Dappled moderate tan-gold and lilac toning drapes surprisingly mark-free surfaces. One small spot appears at the base of the sun. (#6568)

**1916-S Walking Liberty Half, MS64+
Low-Mintage First-Year Issue**

- 3968 1916-S MS64+ PCGS. CAC.** The Walking Liberty half dollar made its debut in 1916, and the San Francisco Mint produced only 508,000 pieces. This high-end Choice example is well-struck for the issue, with some emerging detail apparent on Liberty's hand and head. The lustrous surfaces display attractive hints of champagne-gold and ice-blue toning. *From The Fred Yee Collection.* (#6568)

- 3969 1917 MS65 PCGS.** Silver-frost interiors yield to dappled green-gold and crimson along the margins, where the devices show partial outlining. A tiny nick is noted on the eagle's fore leg. (#6569)

- 3970 1917 MS65 PCGS.** This well-detailed Gem shows more definition on Liberty's hand and head than usually seen, but some of the lines in her gown are soft. The lustrous surfaces are well-preserved, with no mentionable flaws. (#6569)

- 3971 1917 MS66 NGC.** This well-detailed Premium Gem, from the second year of the series, exhibits satiny mint luster and shades of green, gray, and amber toning. Census: 38 in 66, 5 finer (8/12). (#6569)

- 3972 1917-D Obverse MS62 NGC.** This minimally abraded better-date half dollar has vibrant cartwheel sheen and original cream-gray toning. The strike is sharp. Detractions are confined to subtle carbon on the upper portions of the wings. (#6570)

- 3973 1917-D Obverse MS64 PCGS.** Light apricot-gold patina graces each side of this otherwise brilliant and lustrous coin, an example of the last year of the Obverse Mintmark subtype. The strike through the centers is typical for the issue, with a bit of softness that leaves a partial thumb showing and less than full detail on Liberty's head. Nonetheless a pleasing, accurately graded near-Gem example of this low-mintage issue. (#6570)

- 3974 1917-D Reverse AU58 PCGS.** The 1917-D Walking Liberty half dollar with the Reverse mintmark is actually more difficult to locate than its Obverse counterpart. This near-Mint example is well-detailed and lustrous, with a thin light gold patina. *From The Fred Yee Collection.* (#6571)

- 3975 1917-D Reverse AU58 NGC. CAC.** Silver and gold overall with deeper green-gray influences scattered along the obverse margins. The high points are softly struck but show only minor rub. (#6571)

- 3976 1917-D Reverse — Cleaning — PCGS Genuine. Unc Details.** The surfaces are mildly bright but this lustrous and lightly toned better date half dollar will please the astute specialist. Marks are absent aside from a few hair-thin lines on the sun. *From The Fred Yee Collection.*

**Choice 1917-D Walking Liberty Half
Popular Reverse Mintmark Subtype**

- 3977 1917-D Reverse MS64 NGC.** The mintmark moved to the reverse on the Walking Liberty half dollar partway through the year in 1917, creating an important new subtype for collectors. This well-detailed Choice example displays vibrant mint luster, under pleasing shades of violet, gold, and amber toning. Census: 98 in 64, 26 finer (8/12). (#6571)

**Choice 1917-D Walker
Well-Struck Reverse Mintmark Example**

3978 1917-D Reverse MS64 NGC. A remarkably well-struck example of this first year of the reverse mintmark subtype, with much emerging detail on Liberty's hand and head. The lustrous surfaces are well-preserved, as well, with only a few minor contact marks in evidence. Accents of golden-tan toning visit both sides. Census: 98 in 64, 26 finer (8/12). (#6571)

3979 1917-S Obverse AU55 PCGS. A well-detailed Choice AU specimen of this low-mintage early series date, with the distinctive obverse mintmark. The lustrous surfaces show few signs of contact. (#6572)

**1917-S Walking Liberty Half, MS62
Last Obverse Mintmark Issue**

3980 1917-S Obverse MS62 PCGS. This 1917-S Walking Liberty half dollar represents the last year of the obverse mintmark subtype, from a low mintage of 952,000 pieces. This attractive MS62 example shows some definition on Liberty's hand and head, the usual trouble spots for this issue, which is known for its soft strike. The lustrous surfaces exhibit only minor contact marks under a light gold patina. (#6572)

**1917-S Walking Liberty Half, MS63
Low-Mintage Obverse Mintmark**

3981 1917-S Obverse MS63 PCGS. The 1917-S Walking Liberty half dollar with the prominent obverse mintmark is an elusive issue, from a low-mintage of 952,000 pieces. The 1917-S is known as a strike rarity, and this attractive Select specimen shows a touch of softness on the central obverse and the eagle's leg, but the strike is better-than-average in other areas. The lustrous brilliant surfaces exhibit only minor signs of contact. *From The Fred Yee Collection.* (#6572)

3982 1917-S Reverse MS63 PCGS. Well-struck with moderately toned, mattelike surfaces that show mostly wispy marks. Gold-orange and lavender-gray are the most noteworthy hues on this Select piece. (#6573)

**White Near-Gem 1917-S Half Dollar
Reverse Mintmark**

3983 1917-S Reverse MS64 PCGS. CAC. An unabraded and lustrous stone-gray Choice half dollar with a mint-made mattelike appearance. Nicely struck and impressive. Despite a reported production of more than 5.5 million pieces, this early branch mint issue is scarce in Uncirculated grades. *From The Fred Yee Collection.* (#6573)

3984 1918 MS64 PCGS. A well-detailed Choice Walking Liberty half dollar, with the usual touch of softness on Liberty's gown, but surprising detail on the head and hand. Satiny mint luster shines through delicate light gold toning. *From The Fred Yee Collection.* (#6574)

3985 1918-D MS61 NGC. CAC. Light peach and blue overtones dust the medium-gray surfaces of this luminous D-mint Walker. The strike is fair for its day with separation on the branch hand, though Liberty's head and the eagle's front leg characteristically lack detail. (#6575)

Unmarked MS63 1918-D Half Dollar

3986 1918-D MS63 ANACS. The caramel-gold and apple-green obverse toning is lighter than the dusky steel-blue, lilac-red, and olive-green reverse. This lustrous wartime Walker has vibrant luster and refreshingly few marks. The branch hand is typically brought up, but most design elements are crisply impressed. (#6575)

**Select 1918-D Walker
Rare in High Grade**

- 3987 1918-D MS63 PCGS.** The 1918-D Walking Liberty half dollar is rarely seen in higher grades because of a typically weak strike and a tendency to acquire excessive bagmarks. This pleasing Select specimen displays some separation on Liberty's thumb and hand and much emerging detail on the head. Satiny mint luster shines through a delicate layer of light gold toning, and only minor contact marks are noted.
From The Fred Yee Collection. (#6575)

- 3988 1918-S MS62 NGC.** Despite an uncharacteristically high mintage of over ten million pieces, the survival rate of the '18-S half dollar in Mint State is quite low. This example displays very good striking details on Liberty's hand and head, somewhat subdued luster, and creamy gray-gold patina that yields to attractive, multicolored, speckled patina near the borders, on obverse and reverse. A handful of contact marks are noticeable on the lower obverse, and two or three more are seen on the upper left reverse field. (#6576)

Border-Toned Near-Gem 1918-S Half

- 3989 1918-S MS64 PCGS.** Gold and peach patina, never deeper than a medium thickness, graces the margins of this S-mint near-Gem. Silvery centers have uncommonly bold detail on the obverse, particularly on Liberty's branch hand, though the eagle's front leg has more typical softness. Strong all-around luster includes a few areas of die-polish brilliance along the upper reverse. PCGS has graded 31 examples as MS65 or finer (7/12). (#6576)

Smooth Choice 1918-S Half Dollar

- 3990 1918-S MS64 PCGS. CAC.** Virtually untoned, though the reverse center has a dab of golden patina and a small spot is between the ES in STATES. Sharply struck and thoroughly lustrous with immaculate fields and only unimportant contact on the motifs. A good value relative to the few graded finer.
From The Fred Yee Collection. (#6576)

**Select 1919 Half Dollar
Better P-Mint Date**

- 3991 1919 MS63 PCGS.** Among Philadelphia Mint issues, the 1919 is the second-rarest Walking Liberty half dollar, from a low mintage of 962,000 pieces. This pleasing MS63 specimen exhibits the typical softness on the central obverse and the eagle's leg, but the peripheries are sharp. The lustrous surfaces show areas of dark amber toning at the rims.
From The Fred Yee Collection. (#6577)

**Choice 1919 Walking Liberty Half
Low-Mintage Early Series Date**

- 3992 1919 MS64 PCGS. CAC.** The 1919 Walking Liberty half dollar is a better date in the early series, from a low mintage of 962,000 pieces. This pleasing Choice example exhibits the soft definition usually seen on early series Walkers, but the satiny surfaces display an attractive mix of gray, gold, and violet patina. (#6577)

- 3993 1919-D — Improperly Cleaned — NGC Details. AU.** This key-date half dollar has been dipped white, but the motifs nonetheless glimmer with luster. Moderate wear on the eagle's breast and Liberty's waist indicates brief postwar circulation. A few small marks appear on the right obverse field.

**1919-D Half Dollar, Elusive MS63
Seldom Seen in Mint State**

3994 1919-D MS63 PCGS. CAC. In Mint State the 1919-D Walking Liberty half dollar is likely the third-rarest issue of the series, behind the important keys 1919-S and 1921-S. The 1919-D is seldom seen even in the higher circulated grades, making the present Select Mint State example an important conditional rarity. The surfaces are frosty throughout with little trace of color. The strike through the centers is typical, with little detail showing on the branch hand, upper thigh of Liberty, or the lower right (facing) leg feathers on the eagle. Generous luster and relatively few marks for the grade more than compensate, however. The CAC endorsement will further the appeal to many collectors. Population: 56 in 63 (1 in 63+), 78 finer (7/12).
From The Fred Yee Collection. (#6578)

3995 1919-S AU55 PCGS. Traces of wear appear on the high points of this Choice AU example. Nearly full luster remains with faint champagne toning over silver-gray surfaces. (#6579)

**MS64 1919-S Half Dollar
Second-Rarest Series Issue**

3996 1919-S MS64 PCGS. Among Walking Liberty half dollars, only the famous 1921-S is rarer than the 1919-S in terms of total number of coins known. This attractive Choice example is well-detailed at the peripheries, but the central obverse shows the softness always seen on this issue. The lustrous surfaces are enhanced by shades of pale gold and ice-blue toning. Population: 88 in 64 (8 in 64+), 50 finer (7/12). (#6579)

**Choice 1919-S Half Dollar
Peripheral Golden Patina**

3997 1919-S MS64 PCGS. CAC. Lemon-gold shadings enrich the margins of this highly lustrous and nicely struck near-Gem. Only trivial contact can be found beneath a loupe. Exceptional quality for this lower mintage and conditionally rare early branch issue. Population: 88 in 64 (8 in 64+), 50 finer (8/12).
From The Fred Yee Collection. (#6579)

**MS65 1920 Walking Liberty Half
Well-Defined Branch Hand**

3998 1920 MS65 PCGS. Broadly lustrous with a hint of peach-gold "halo" in the silvery fields. Though Liberty's head has a typically soft strike, her hands are better-defined than usual. If not for a small nick in the right obverse field, this coin would be a candidate for an even finer grade; even as a Gem, the piece is conditionally scarce. Population: 81 in 65 (2 in 65+), 13 finer (7/12). (#6580)

3999 1920-D AU53 PCGS. A soft strike leaves this coin looking more worn than it is, though the ample luster remaining in the fields points to the coin's true grade. Silver-blue and canary-yellow overtones enhance the eye appeal. (#6581)

4000 1920-S MS62 NGC. CAC. Splashes of gold and pale brown toning reside on the lustrous surfaces of this otherwise brilliant piece. Both sides are satiny and attractive. (#6582)

MS64+ 1920-S Half Dollar

4001 1920-S MS64+ PCGS. CAC. Light almond-gold toning visits lustrous and splendidly smooth surfaces. The strike is crisp given the facility of origin, with Liberty's head especially sharp. A much better date that is more elusive in Mint State than implied by its mintage.
From The Fred Yee Collection. (#6582)

4002 1921 — Harshly Cleaned — NGC Details. AU. The 1921 has the second-lowest mintage of the series. Production ended early in order for the facility to coin tens of millions of silver dollars to fulfill the Pittman Act. This is a glossy stone-gray and almond-gold example with moderate high-point wear and subdued luster.

4003 1921 — Improperly Cleaned — NGC Details. AU. This low-mintage Walking half dollar is nearly mark-free and has only a trace of high-point wear, but the surfaces are subdued, perhaps from excessive dipping. Luster nonetheless glimmers on the motifs.

Low-Mintage 1921 Half Dollar Borderline Uncirculated

4004 1921 AU58 PCGS. CAC. A lustrous stone-gray example of the scarcest Philadelphia issue. A trace of friction on the breast feathers and cheek indicates momentary Harding-era circulation. The reverse is unabraded, and the obverse displays only delicate grazes. The eye appeal exceeds many certified pieces with higher numerical grades.
From The Fred Yee Collection. (#6583)

1921-D Walking Liberty Half Popular Low-Mintage Issue

4005 1921-D PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Unc specimen that shows a reverse wheel mark. Just the lightest hairlines can be seen, and each side displays muted blue-golden toning. Always popular in all grades because of the low mintage of only 208,000 pieces.

4006 1921-D VF35 NGC. Light pearl-gray surfaces overall with deeper charcoal outlining the devices and a surprising level of gloss for the wear seen. Highly appealing for a midrange example of this key date. (#6584)

**1921-D Walking Liberty Half, MS63
Low-Mintage Mint State Rarity**

- 4007 1921-D MS63 PCGS. CAC.** The 1921-D half dollar is the lowest-mintage series issue at 208,000 pieces, and conditionally among the most rare in Mint State, save for the 1921-S, 1919-D, and 1919-S. But even a Select Mint State 1921-D is the subject of hot pursuit among series specialists. Frosty luster covers silver-white surfaces with gold accents on this attractive example, which shows some detail on the branch hand and more on Liberty's head, with weakness confined chiefly to the lower leg feathers on the eagle. A couple of small dark flecks are not overt.
From The Fred Yee Collection. (#6584)

1921-S Walker, Problem-Free VF35

- 4008 1921-S VF35 PCGS.** The natural light-gray surfaces show slight russet-gold and olive patina near the obverse peripheries. Evenly worn with plenty of design detail remaining, for the grade. A nice, problem-free, Choice VF of this key date Walker. Just 548,000 pieces were originally produced, a lower mintage with a smaller-than-expected number of survivors. (#6585)
- 4009 1921-S — Improperly Cleaned — NGC Details. XF.** This rare date Walker is hairlined and glossy from cleaning and has been dipped. The designs show substantial wear though the wings retain much plumage detail. (#6585)
- 4010 1921-S — Improperly Cleaned — NGC Details. XF.** This key date half dollar is dipped white but retains glimpses of luster on the motifs and legends. The reverse rim is filed at 6:30 where it also has a small cut. Narrow scrapes are present at the left (facing) wingtip and the base of the branch. (#6585)

**1921-S Half Dollar, AU Details
Rarest Walker in High Grade**

- 4011 1921-S — Cleaning — PCGS Genuine. AU Details.** The 1921-S is the most difficult issue in the Walking Liberty series to locate in high grade. This still-attractive specimen shows signs of a light cleaning, but the pleasing surfaces are retoning in delicate shades of pink and champagne-gold. The strike shows the usual softness on the central obverse, but only the slightest trace of actual wear is evident.
From The Fred Yee Collection.

**1921-S Half Dollar, Satiny MS64
Important, Well-Struck Key Issue**

4012 1921-S MS64 PCGS. CAC. The 1921-S Walking Liberty half, at 548,000 pieces struck, is not the lowest-mintage issue in the series. That accolade goes to the 1921-D, of which only 208,000 were made. The 1921-S is, nonetheless, the rarest Walking Liberty half in Mint State; perhaps it was its higher mintage that prevented the few serious numismatists/dealers who paid attention to such things back in 1921 from setting aside more Mint State pieces.

The rarity of Gem 1921-S half dollars will make the present near-Gem the object of serious consideration (and, likely, feverish bidding) at its auction appearance. PCGS has seen only 16 submissions of the 1921-S at the Gem level, with a single MS66 finer, and it is probable that most of those Gems are in strong hands and top-flight collections.

We note that the sole MS66 PCGS example of the 1921-S is published in the Gerald Forsythe Collection, the number 2 finest set of all time and current finest of the PCGS Circulation Strikes set; but even among the top few sets, this near-Gem would provide an important upgrade to several of them.

Generous frosted mint luster covers both sides of this piece, with notes of golden-brown that congregate more prominently around the rims on each side. A small area of deep russet patina appears on the lower reverse. The surfaces show few marks in the exposed open fields. There is considerable separation of the thumb on the branch hand, and the strike elsewhere is better-executed than on most survivors of the issue in this grade. Population: 47 in 64 (1 in 64+), 17 finer (7/12). (#6585)

Bold MS63 1923-S Half Dollar

- 4013 1923-S MS63 PCGS. CAC.** Potent cartwheel luster illuminates the pearl-white surfaces of this unmarked better date half dollar. No marks are remotely of notice, and the strike is good, particularly on the central skirt lines. As of (8/12), the only MS63 example with a CAC bean.

From The Fred Yee Collection. (#6586)

1923-S Half Dollar, MS64 Sharply Struck, High-End Example

- 4014 1923-S MS64 NGC. CAC.** For the issue, this piece shows remarkably strong definition on the central design elements. The mint luster is softly frosted and each side shows just a bit of golden toning, gaining color around the margins. Remarkably free from abrasions for the grade as well. All of which helps explain the CAC designation. (#6586)

- 4015 1927-S MS62 PCGS.** Central weakness is typical for this issue and most others in the 1920s. This brilliant specimen has satin luster and untuned silver surfaces. A few faint hairlines and trivial marks explain the grade. (#6587)

- 4016 1927-S MS63 PCGS.** Frosty luster is largely silver with a few small areas of gold and peach. Softly struck overall, though modest definition is noted on Liberty's head and branch hand. *From The Fred Yee Collection. (#6587)*
-

1927-S Half Dollar, MS64 Lustrous and Attractively Toned

- 4017 1927-S MS64 PCGS.** Satiny luster throughout with a blush of light gold over much of the surfaces. The strike is average for the date with characteristic weakness on Liberty's hand and thumb, as well as the skirt lines. On the reverse we note a number of thin die cracks which can be seen with a glass. About as nice as this date is found; locating a Gem is not only a challenge, but costs significantly more than the present Choice specimen. *Ex: FUN Signature (Heritage, 1/2005), lot 7673. (#6587)*
-

1927-S Walker, Better-Struck MS64

- 4018 1927-S MS64 NGC. CAC.** The strike is just a bit above average with a slight split in the hand area and better definition on the skirt lines than usually seen on 1927-S halves. The surfaces are brightly lustrous and there are numerous die polishing marks in the obverse fields that help impart much of the brightness. Light golden peripheral toning is present on each side. (#6587)
-

1927-S Half Dollar, Lustrous MS64

- 4019 1927-S MS64 PCGS. CAC.** The 1927-S Walker seldom rises above average striking definition. This piece shows the usual softness in the centers, but that is more than made up for by bright mint luster that swirls around each side. The centers are brilliant with occasional dabs of golden present at the margins. (#6587)

- 4020 1928-S MS63 PCGS.** Decently struck on Liberty's head, if not her branch hand. This coin swirls with luster on the obverse, where the pale blue and gold patina has a partial cloth pattern, but the reverse positively blazes.

From The Fred Yee Collection. (#6588)

Golden-Toned Gem 1929-D Half

- 4021 1929-D MS65 PCGS.** The walnut-brown toning is moderate on the obverse and comprehensive on the reverse. Lustrous and minimally abraded. The strike is good despite blending on the branch hand. An original Gem of this better Denver issue. *Ex: Ft. Lauderdale FUN (Heritage, 1/2005), lot 7687. (#6589)*
-

**1929-D Walking Liberty Half, MS65
Well-Preserved Depression-Era Survivor**

- 4022 1929-D MS65 PCGS. CAC.** Fortunately for present day collectors, many examples of the 1929-D Walking Liberty half dollar were not released into circulation because there was no need for the denomination during the troubled years of the Great Depression. This well-detailed Gem exhibits dusky gray patina over lustrous well-preserved surfaces. (#6589)

**Gem 1929-D Half Dollar
Exceptional Mint Frost**

- 4023 1929-D MS65 PCGS. CAC.** The 1929-D Walking Liberty half dollar is reasonably available in high grade and enjoys great popularity with type collectors. This impressive Gem displays well-detailed design elements, with brilliant unmarked surfaces and especially vibrant mint luster. Visual appeal is outstanding. *From The Fred Yee Collection.* (#6589)
- 4024 1929-S MS65 NGC.** Especially vibrant mint luster complements the well-preserved surfaces to create outstanding eye appeal for this attractive Gem. The design elements are well-detailed, with a touch of softness on Liberty's hand and the eagle's leg. (#6590)
- 4025 1933-S MS62 PCGS.** Sharply struck with natural ivory surfaces, this lustrous specimen has frosty mint brilliance, showing only minimal marks on each side. (#6591)
- 4026 1933-S MS64 PCGS.** Steel-gray and caramel-gold patina endows this lustrous and boldly struck near-Gem. A well preserved and attractive Choice example of this better Great Depression issue. (#6591)

Frosty Gem 1933-S Half Dollar

- 4027 1933-S MS65 PCGS.** A glimpse of tan toning at 9 o'clock on the reverse prevents full brilliance on this lustrous and boldly struck Gem. Nearly void of contact save for minute ticks on the right obverse field. The 1933-S traditionally marks the end of the early date portion of the Walking Liberty half series. Issues from 1934 and on are plentiful in nice Mint State relative to their predecessors, likely due to the growing number of West Coast and Midwestern collectors. (#6591)

**1933-S Walking Liberty Half, MS65
Fully Struck, Original Surfaces**

- 4028 1933-S MS65 PCGS. CAC.** The "last of the first," the 1933-S forms the final low-mintage issue from the early years of the Walking Liberty half dollar series. This a lovely grayish-gold Gem with cinnamon and charcoal accents at the peripheries and a bold strike, as usual for this well-produced issue. Note the split on the hand between thumb and forefinger, and the *actual presence of visible feathers* on the eagle's lower legs. PCGS has certified only 93 pieces finer, less duplicates as always (7/12). *Ex: Long Beach Signature (Heritage, 6/2010), lot 1012.* (#6591)

**1933-S Half Dollar, Fully Struck MS66
Scarce Middle-Date Issue**

- 4029 1933-S MS66 PCGS. CAC.** The 1933-S half is a remarkably well-produced issue that almost always shows a full strike or one that is very nearly full, which is what is seen on this piece. The surfaces on most 1933-S halves are also usually brightly frosted, as seen here also. Each side has speckled golden-rose toning and there are no noticeable abrasions present. Population: 86 in 66 (2 in 66+), 7 finer (7/12). (#6591)

Nearly Pristine 1933-S Half, MS66

4030 1933-S MS66 PCGS. CAC. Dazzling cartwheel luster and pristine fields demonstrate the quality of this sharply struck and desirable half dollar. Brilliant except for a wisp of tan toning at the reverse periphery. The 1933-S half dollar was the sole San Francisco issue of any denomination dated from that Great Depression year. *From The Fred Yee Collection.* (#6591)

4031 1934-D MS65 NGC. Small D. Attractively toned with butter-gold centers and iridescent olive-green and powder-blue borders. Sweeping luster illuminates well preserved and nicely struck surfaces. (#6593)

4032 1934-D MS65 PCGS. Small D. This better date Great Depression Gem is sharply struck and lustrous with only a hint of gold and lime toning. Minor obverse marks fail to challenge the grade. *From The Fred Yee Collection.* (#6593)

4033 1934-D MS65 PCGS. Large D mintmark, far scarcer in high grade than its Small D counterpart. Lustrous with delicate chestnut toning and delicate obverse grazes. The skirt lines are close to full though the head is softly defined. *Ex: Long Beach Signature (Heritage, 6/2005), lot 6457.* (#6593)

4034 1934-S MS64 PCGS. Solidly lustrous with a touch of flash, largely silver at left with gold, tan, and blue elements to the right. The obverse has a soft strike, but the reverse offers better definition. Housed in a green label holder. (#6594)

4035 1934-S MS64 PCGS. This attractive Choice specimen offers a better-than-average strike, with some emerging detail on Liberty's hand and head. The well-preserved lustrous surfaces are accented by wisps of light gold toning. *From The Fred Yee Collection.* (#6594)

1934-S Half Dollar, MS65 Sharply Detailed, Lightly Toned

4036 1934-S MS65 PCGS. The 1934-S can be found in Gem condition with a bit of searching, but the strike details are generally not as strong in the centers as seen on this piece. The mint luster is pronounced, as one would expect from an S-mint, and there is just the slightest hint of pale golden color over each side. (#6594)

Scarce Gem 1934-S Half Dollar

4037 1934-S MS65 PCGS. Light straw-gold toning adorns this lustrous and attractively preserved Gem. Sharply struck given its San Francisco origin. All three mints produced Walking Liberty halves in 1934, the first such occurrence since 1921 and an indication that the worst of the Great Depression was over. (#6594)

4038 1935-D MS65 PCGS. Brilliant surfaces with exceptionally vibrant mint luster are the hallmarks of this delightful Gem. The design elements are well-detailed and only a few minor contact marks are evident. (#6596)

4039 1935-S MS65 NGC. This lustrous and attractive Gem offers light powder-blue and caramel-gold toning. The cheek and branch hand show the customary incompleteness but the skirt lines are close to full. (#6597)

4040 1935-S MS65 PCGS. Sharply detailed in most areas, Liberty's hand and the eagle's leg show the incomplete detail almost always seen on the 1935-S. The lustrous well-preserved surfaces display attractive light gold patina. (#6597)

4041 1936 MS67+ PCGS. CAC. Bold yellow centers with more muted greens and blues gracing the interiors. This solidly struck and smooth beauty goes half a step beyond the "ordinary" Superb Gem. PCGS has graded just two pieces as MS68 or better (8/12). (#6598)

4042 1937-D MS66 PCGS. The 1937-D Walking Liberty half dollar is conditionally scarce as a Premium Gem, and finer coins are rare. This well-detailed specimen exhibits vibrant satiny mint luster under delicate light gold toning. *From The Fred Yee Collection.* (#6602)

4043 1937-S MS66 PCGS. The 1937-S Walking Liberty half dollar is slightly scarce in MS66 condition, and finer coins are rare. This impressive premium Gem displays well-detailed design elements with vibrant mint luster and traces of golden-tan toning. *From The Fred Yee Collection.* (#6603)

4044 1938-D MS65 PCGS. The 1938-D has the lowest mintage among late-date Walkers and is avidly sought-after by collectors. This is a bright Gem with swirling mint frost. Very little color is evident, even with magnification. (#6605)

4045 1938-D MS65 PCGS. This spectacular Gem is sharply detailed in most areas, with just a touch of softness on the eagle's leg. The smooth brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. *From The Fred Yee Collection.* (#6605)

4046 1938-D MS66 PCGS. The 1938-D Walking Liberty half dollar is prized for its low mintage of 491,600 pieces. This delightful Premium Gem exhibits vibrant mint luster, well-detailed devices, and attractive accents of light gold toning. (#6605)

4047 1938-D MS66 PCGS. CAC. Light golden tints settle largely at the margins of this Premium Gem from a mintage of fewer than half a million pieces. Liberty's head is well-defined, though her branch hand is soft. PCGS has graded just 28 pieces as MS67 or better (7/12). (#6605)

4048 1939 MS67 PCGS. CAC. A beautiful butter-gold and powder-blue Superb Gem. The strike is intricate and the smooth surfaces display sweeping luster. The 1939 is available in most Uncirculated grades but is very scarce in the present quality. (#6606)

**1939 Walking Liberty Half, MS68
Among the Finest Certified**

- 4049 1939 MS68 NGC.** The 1939 Walking Liberty half dollar claims a substantial mintage of 6.8 million pieces and high-grade specimens are readily available in today's market. However, few coins can match the quality and eye appeal of this magnificent MS68 example. The design elements are sharply detailed throughout and the pristine surfaces radiate vibrant mint luster. A few highlights of light gold toning add to the visual appeal. Census: 19 in 68, 0 finer (7/12). (#6606)
- 4050 1939-S MS67 NGC. CAC.** An essentially brilliant Superb Gem whose potent luster and virtually pristine surfaces combine with an above average strike and outstanding eye appeal. Only a single example (as MS67 ★) is certified finer at NGC (7/12). (#6608)
- 4051 1940 MS67 PCGS. CAC.** Rich, opaque antique-gold and rose peripheral shadings break to shimmering silver at the sharply struck centers. A great Superb Gem to start a short set. PCGS has graded just 24 examples as MS68 or better (7/12). (#6609)
- 4052 1940-S MS66+ PCGS. CAC.** The hallmark of the 1940-S is consistently bright, swirling mint frost, as seen on this piece. The strike, which is usually a problem, is surprisingly strong and perhaps two-thirds complete on this coin. Pale reddish-lilac toning is seen over each side. (#6610)
- 4053 1941-D MS67 PCGS.** Light straw-gold toning adorns lustrous and smooth surfaces. Liberty's head is well struck and the skirt lines are close to full though the branch hand shows softness. (#6612)

**1941-S Walking Liberty Half Dollar, MS67
Late-Date Key in High Grade**

- 4054 1941-S MS67 NGC.** The 1941-S Walking Liberty half dollar is the most difficult coin of the late-date series to locate in high grade. This spectacular Superb Gem is well-detailed, with just a touch of the always seen softness on Liberty's branch hand. The completely brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. Census: 18 in 67, 0 finer (7/12). (#6613)
- 4055 1942-D MS67 PCGS.** This short-set Superb Gem has bright and bold luster with a hint of a wire rim at the upper obverse. Largely silver luster shades toward gold at the reverse margins and in a spot just off the eagle's beak. (#6615)
- 4056 1942-S MS66 PCGS.** Small S, much scarcer than the usual Trumpet Tail S. A pristine and lustrous Premium Gem with apricot patina and the usual San Francisco strike on the branch hand. Minor die doubling is present on the sun's rays. (#6617)

- 4057 1943 MS67+ PCGS. CAC.** Impressively preserved with modest wisps of blue and gold patina in the silvery fields and a single dot of deep color at Liberty's upper gown. PCGS has graded only five examples of this issue as MS68 or better (7/12). (#6618)
- 4058 1944-S MS66+ PCGS. CAC.** Large S. An essentially brilliant high grade wartime Walker that boasts vibrant luster and a pristine appearance. The skirt lines are well defined though the branch hand is softly brought up. (#6623)
- 4059 1945 MS67 PCGS.** An immaculate Superb Gem that has only a hint of olive-gold and ice-blue toning. Mint luster is effusive, and the strike is crisp with just slight softness on Liberty's cheek. Population: 83 in 67 (2 in 67+), 0 finer (7/12). Ex: FUN (Heritage, 1/2010), lot 2733. (#6624)
- 4060 1945 MS67 NGC. CAC.** Sharply defined with full luster, this untuned Superb Gem is tied for the finest that NGC or PCGS have certified. Pristine surfaces host only minuscule marks. (#6624)
- 4061 1945-S MS66+ PCGS. CAC.** Knob S. Only a wisp of olive toning denies full brilliance. Potent luster and exemplary preservation ensure the eye appeal. An above average strike with nearly full definition on the skirt lines. (#6626)
- 4062 1946-S MS67 NGC.** Trumpet Tail S. Golden-brown and ruby-red patina invigorate the peripheries of this coruscating high grade half dollar. The skirt lines are full though the cheek and branch hand are incomplete. Census: 59 in 67, 0 finer (7/12). (#6629)

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Walking Liberty Half, PR66
Only 3,901 Examples Struck**

- 4063 1936 PR66 PCGS. CAC.** From a tiny mintage of just 3,901 pieces, the 1936 proof Walking Liberty half dollar is a scarce issue in Premium Gem condition, and PCGS has graded only 22 numerically finer coins (8/12). This impressive Premium Gem displays pinpoint definition on all design elements and deeply mirrored surfaces with no mentionable distractions. (#6636)

**1936 Walking Liberty Half Dollar, PR66
All-Brilliant First-Year Proof**

- 4064 1936 PR66 PCGS. CAC.** The deeply reflective surfaces of this spectacular Premium Gem are typical of the all-brilliant finish used by the Mint in this first proof Walking Liberty half dollar issue. The design elements show razor-sharp definition throughout and the brilliant surfaces are free of mentionable distractions. (#6636)

**1936 Walking Liberty Half, PR67
Only One Finer Coin at PCGS**

4065 1936 PR67 PCGS. A magnificent Superb Gem example of the first proof issue in the Walking Liberty series. This delightful coin displays razor-sharp definition on all design elements and pristine reflective fields with attractive accents of pale gold patina. Population: 21 in 67, 1 finer (7/12). (#6636)

4066 1937 PR67 NGC. Stunningly reflective where opaque green-gold and blue-violet patina does not appear. The strike is razor-sharp on this Superb Gem specimen from an issue of only 5,728 pieces. (#6637)

4067 1938 PR67 PCGS. CAC. An amazing Superb Gem proof, this 1938 Walker has fully mirrored fields and satin devices beneath light gold toning, creating excellent eye appeal. PCGS has only certified 11 finer (8/12). (#6638)

4068 1939 PR67+ NGC. CAC. A high-end Superb Gem from a mintage of 8,808 pieces, with well-detailed design elements, reflective fields, and spectacular accents of lime-green toning at the peripheries. (#6639)

4069 1940 PR67 NGC. CAC. The surfaces show obvious originality on each side, composed of multicolored yet subtle iridescence. The fields are deeply reflective and greatly enhance the visual appeal of not only the mirroring for its own sake but the covering of pale patina. (#6640)

**1942 Half Dollar, PR68
Last Walking Liberty Proof**

4070 1942 PR68 NGC. The Mint cancelled commercial proof set offerings after 1942, due to the financial stresses of World War II. Few survivors of the final mintage of 21,120 pieces can match the quality of the present coin. The design elements show razor-sharp definition throughout and the flawless brilliant fields are deeply mirrored. NGC has graded only three numerically finer coins (7/12). (#6642)

FRANKLIN HALF DOLLARS

4071 1948-D MS66 Full Bell Lines PCGS. CAC. Both sides of this sharply defined Premium Gem exhibit frosty silver luster beneath delicate obverse toning and deep golden iridescent reverse toning. No finer examples are certified at PCGS or NGC. (#86652)

**1949-D Franklin Half, MS66
Rare Full Bell Lines Example**

4072 1949-D MS66 Full Bell Lines PCGS. CAC. The 1949-D Franklin half dollar is a rare issue in Premium Gem condition, with Full Bell Lines. The present coin is sharply detailed and lustrous, with none of the mottled Mint set toning that often appears on high-grade examples, although an attractive light gold patina is apparent on both sides. Population: 25 in 66 Full Bell Lines, 0 finer (7/12). (#86654)

4073 1952 MS66+ Full Bell Lines PCGS. CAC. Lovely stone-gray, jade-green, and caramel-gold blend throughout this lustrous and flawless high grade half dollar. Elusive yet affordable in the present quality. A scant seven pieces have been certified finer by PCGS (7/12). (#86661)

4074 1952-D MS66 Full Bell Lines PCGS. Iridescent rose-red and lime-green shades compete for territory throughout this lustrous and beautifully preserved high grade half dollar. Marks are limited to a grazes on reverse motifs. Population: 59 in 66 Full Bell Lines, 1 finer (7/12). (#86662)

4075 1958-D MS67 Full Bell Lines NGC. CAC. An amazing, deeply toned Superb Gem with nearly full iridescence on both sides accompanying a sharp strike. Census: 13 in 67 Full Bell Lines, 0 finer (8/12). (#86675)

PROOF FRANKLIN HALF DOLLARS

4076 1950 PR67 NGC. Though the reflectivity on this first-year proof Franklin half dollar is watery at best, the sharply struck bell lines leave little doubts as to this coin's proof status. A carefully preserved Superb Gem. (#6691)

**1961 PR69 Ultra Cameo Half Dollar
The Only Such NGC-Certified Coin**

4077 1961 PR69 Ultra Cameo NGC. The 1961 is scarcer than the 1960 and certainly more so than the 1962 and 1963 proofs. This is the only Ultra Cameo certified by NGC in PR69, and it is only rivaled by a single PCGS coin. This is an all-brilliant coin with unusually sharp contrast between the frosted devices and deeply reflective fields. (#96702)

MORGAN DOLLARS

- 4078 1878 8TF MS65 NGC. CAC. VAM-4.** Both sides are die doubled, as often seen on the various 8TF varieties. Lustrous and virtually brilliant with a well preserved reverse and a few unimportant grazes on the left obverse. (#7072)
- 4079 1878 7/8TF Strong MS65 NGC. VAM-37.** An essentially brilliant Gem, though a wisp of tan visits the lustrous and minimally abraded surfaces. A nicely struck and better grade example of this popular Morgan specialty. (#7078)

Prooflike Gem 1878 Morgan Dollar Strong 7 Over 8 Tailfeathers, VAM-40

- 4080 1878 7/8TF Strong MS65 Prooflike NGC. VAM-40.** A 7 over 5 tailfeathers variety. The various doubled tailfeather 1878 VAMs were caused by overhubbing slightly different reverse design subtypes. The obverse is also die doubled, though the spread is relatively minor. This is a stone-white Gem that boasts an intricate strike and clean surfaces. (#7079)

MS64 Deep Mirror Prooflike VAM-41A 1878 7/8TF Silver Dollar

- 4081 1878 7/8TF Strong MS64 Deep Mirror Prooflike NGC. CAC. VAM-41A.** Although NGC and VAMworld.com call this a 7 over 4 tailfeathers variety, they overlook the tail feather fragment beneath the middle feather. The present well struck near-Gem displays blatant field reflectivity and substantial cameo contrast. Small marks on the left obverse correspond to the grade. (#97079)
- 4082 1878 7/8TF Weak MS63 Prooflike NGC. CAC. VAM-43.** A Hot 50 Variety. A "doubled legs" VAM. The obverse is also die doubled, though less prominently, as seen on PLURIBUS. Flashy and bold with peripheral peach patina.
Ex: Dallas Signature (Heritage, 10/2009), lot 7987, which realized \$718.75. (#7071)
- 4083 1878 7/8TF Weak MS63 Deep Mirror Prooflike NGC. VAM-32.** A Top 100 Variety. A rare 7/8TF variety notable for its heavily lapped tailfeathers, as made. Crisply struck, stone-white, and impressively mirrored. The cheek and fields show abrasions. (#97071)
- 4084 1878 7TF Reverse of 1878 MS65 PCGS. CAC. VAM-79.** A Hot 50 Variety. The tops of the cotton leaves are die doubled, as are several of the left-side stars. Brilliant and highly lustrous with a bold strike and exemplary preservation. (#7074)

- 4085 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** Well-defined and boldly toned with violet elements mostly at the margins and a mix of peach and gray through the interiors. Great swirling luster is especially bright on the obverse. A rewarding example from the second of three reverse designs used in the first year of Morgan dollar production. (#7074)
- 4086 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** Green-gold patina appears at the margins of silvery surfaces, far more so on the obverse. A well-defined Gem example of the second of three reverses employed at the Philadelphia Mint for the first year of Morgan dollar production. (#7074)

1878 Reverse of 1879 Dollar, MS66 Among the Finest

- 4087 1878 7TF Reverse of 1879 MS66 NGC.** The slanting top arrow feather and rounded eagle's breast identify the Reverse of 1879. This is the scarcer of the two 7 Tail Feathers varieties. A well-executed strike leaves sharper definition than ordinarily seen on the issue, including the hair over Liberty's ear and the eagle's breast feathers. The lustrous surfaces are untuned and nicely preserved. Census: 13 in 66, 0 finer (7/12). (#7076)
- 4088 1878-CC MS65 NGC.** This first-year Carson City Morgan dollar is frosty on the devices and flashy in the fields. Gold-orange bands wrap around the margins of an otherwise untuned Gem. (#7080)
- 4089 1878-CC MS65 PCGS. CAC.** A strongly struck Gem with partial peach-rose and medium-gray toning over the obverse that has an echo on the reverse. Great all-around luster. (#7080)
- 4090 1878-CC MS65 PCGS. CAC.** The sea-green and orange-red obverse displays a central toning pattern consistent with long-term storage against a canvas bag. The reverse is close to brilliant aside from glimpses of peach near the lower rim. (#7080)
- 4091 1879-CC XF45 NGC.** Where gray, this luminous piece has a bluish cast, though yellow-green overtones are prominent. Rub is noted largely on the high points of this second-year Carson City Morgan dollar. (#7086)
- 4092 1879-CC AU53 NGC.** Moderate cream-gray and olive-gold toning drapes this partly satiny key date Carson City silver dollar. Marks on the left obverse and beneath the left (facing) wing merit passing mention. (#7086)

1879-CC Dollar, MS62 Second-Rarest Carson City Morgan

- 4093 1879-CC MS62 ANACS.** Traces of light gold toning enhance the surfaces of this attractive MS62 Morgan dollar, and only minor contact marks are evident on both sides. The reverse is especially smooth and nearly mark-free. Sharply detailed design elements and satiny mint luster add to the solid visual appeal. (#7086)

Lustrous Select 1879-CC Dollar

- 4094 1879-CC MS63 PCGS.** Rich peach-gold patina endows the obverse margin, though the remainder of this lustrous and better date Carson City dollar is only lightly toned. The reverse is surprisingly well-preserved, as is the obverse field. Scattered facial grazes determine the grade. Encapsulated in a green label holder. *From The William R. Green Collection. (#7086)*

VAM-3A Capped Die Top 100 1879-CC Dollar, MS62

- 4095 1879-CC Capped Die MS62 NGC. VAM-3A, R.6.** A Top 100 Variety. Designated as VAM-3 on the NGC insert, but this is the recently discovered late die state with a "die gouge at base of A over to left side of M in AMERICA plus horizontal die gouge at wing edge below A," per its VAMworld.com entry. This lustrous key date Carson City dollar has a golden-brown obverse margin but is otherwise untuned. We note a thin mark through LIBERTY and a short broad abrasion above Liberty's eye. (#7088)

1879-S Morgan Dollar, MS68 An Immaculate Type Coin

- 4096 1879-S MS68 NGC.** It would be a difficult choice for "best for type" if one had to choose between the four S-mints from 1879 through 1882. This nearly perfect example is brilliant throughout. The mint luster is exceptional, as expected, with semireflective fields. The strike details show pinpoint precision on each side. (#7092)

- 4097 1879-S MS66 Deep Mirror Prooflike NGC.** A dazzling silver type coin. Well struck and flashy with brilliant centers and light rose-red peripheral patina. Housed in a former generation holder. Census: 30 in 66 Deep Prooflike, 2 finer (7/12). (#97093)

- 4098 1880 MS65 Prooflike PCGS.** This minimally toned Gem is nicely struck and has pleasing surfaces. Both sides are flashy although the reverse shows the greater level of reflectivity. Prooflike 1880 dollars are surprisingly elusive. (#7097)

- 4099 1880-CC MS65 PCGS.** A stone-white Carson City Gem whose booming luster, clean fields, and nice strike ensure the eye appeal. Minor grazes on the portrait are all that limit the grade. Scarcer than its '82-CC through '84-CC successors. (#7100)

- 4100 1880-CC MS65 PCGS.** A trace of champagne toning appears on each side of this delightful Gem Morgan dollar. A small bar under the second 8 is a familiar sight among 1880-CC Morgan dollars. (#7100)

- 4101 1880-CC MS65 PCGS.** The surfaces are brilliant and the coin reflects vigilance on the part of Quality Control in the Carson City Mint. The fields are nearly Prooflike and the devices are nicely frosted. The fields around the devices show the often-seen "halo effect" on early prooflike CC dollars. (#7100)

- 4102 1880-CC MS65 PCGS.** Thick mint frost characterizes this attractive Gem Carson City dollar. Each side is untuned and there is just the slightest bit of central striking softness, accompanied on the obverse by faint roller marks (loupe required). (#7100)

- 4103 1880-CC 8 Over High 7 MS66 PCGS. CAC. VAM-5.** A Top 100 Variety. The three most prominent overdates of the Morgan dollar series are all 1880-CC dollars: VAM-4, VAM-5, and VAM-6. The present lustrous and brilliant Premium Gem has splendidly smooth fields and only minor contact on the portrait. (#7102)

- 4104 1880-CC 8 Over Low 7 MS65 PCGS. VAM-6.** A Top 100 Variety. Faint almond-gold patina visits this lustrous overdated Carson City Morgan. The fields are well preserved and the portrait has only delicate grazes. The centers show minor incompleteness. (#7104)

- 4105 1880/79-CC Reverse of 1878 MS64 PCGS. CAC. VAM-4.** A Top 100 Variety. Faintly toned and thoroughly lustrous with a precise strike and an exceptionally clean reverse. The 1880-CC has several interesting VAMs yet in aggregate is scarcer than the 1882-CC through 1884-CC issues. (#7108)

- 4106 1880/79-CC Reverse of 1878 MS64+ PCGS. CAC. VAM-4.** A Top 100 Variety. The strongest overdate of the series is paired with the obsolete Second Reverse. This Carson City silver dollar has a flashy and minimally toned appearance. The fields are well preserved and the cheek exhibits delicate marks. (#7108)

**Gem VAM-4 1880/79-CC Silver Dollar
Dramatic Toning, Reverse of 1878**

- 4107 1880/79-CC Reverse of 1878 MS65 PCGS. CAC. VAM-4.** A Top 100 Variety. Dramatic fire-red, orange-gold, and olive-green toning consumes the obverse. The reverse is close to brilliant. Sharply struck and lustrous with smooth surfaces save for minor facial contact. The 79 digits are obvious within the 80 in the date. (#7108)
- 4108 1880-O MS64 PCGS.** Medium O. Boldly struck and thoroughly lustrous with a dusting of light golden-brown toning. The reverse is beautifully unabraded, and the obverse has fewer than the expected number of faint grazes. PCGS has graded just 31 coins finer (7/12). (#7114)
- 4109 1880-O 80/79 MS64 PCGS. CAC. VAM-4.** A Top 100 Variety. Traces of the crossbar from a 7 are visible inside the upper loop of the second 8 on this important variety. Hints of champagne toning appear on brilliant and fully lustrous silver surfaces. (#7114)
- 4110 1880-S MS67+ PCGS. CAC.** Large S. Brilliant with booming luster and a good strike. The fields are exceptionally clean and the cheek has only trivial grazes. An outstanding representative of the perennially popular Morgan design. (#7118)
- 4111 1880-S MS67 Prooflike NGC.** Large S. Both fields are reflective, and the strike is razor-sharp. A pristine cheek and smooth fields confirm the high grade. Most would regard this Superb Gem as brilliant, but a whisper of tan visits both sides.
Long Beach Signature (Heritage, 6/2007), lot 1436. (#7119)
- 4112 1880-S 8 Over 7 MS66 Deep Mirror Prooflike NGC. VAM-8.** A Top 100 Variety. Medium S. The variety is undesignated on the NGC insert. Cameo contrast is evident between the luminous motifs and the mirrored fields. A precisely struck and splendidly smooth Premium Gem.
From The Dr. Charles Nelson Collection. (#97121)
- 4113 1881-CC MS66+ NGC.** Bright cartwheel luster swirls around lightly frosted devices. The overall appearance of this Carson City dollar is creamy, and only a few small marks affect the surfaces. (#7126)
- 4114 1881-CC MS65 Prooflike PCGS. CAC.** This well struck and low mintage Carson City Gem has dazzling luster and smooth fields. Small marks on the face are consistent with the grade. Encapsulated in a green label holder. (#7127)

**1881-CC Dollar, MS66+ Prooflike
Dazzling and Brightly Mirrored**

- 4115 1881-CC MS66+ Prooflike PCGS. CAC.** This is an exceptional Carson City type coin. The fields are deeply reflective and the devices are just as thickly frosted, the combination yielding the desirable cameo effect. Each side is also exceptionally clean for a CC dollar. Most of each side is brilliant, the only exception is a dab of light golden on the left reverse margin. Population: 32 in 66 (1 in 66+) Prooflike, 0 finer (7/12). (#7127)
- 4116 1881-CC MS64 Deep Mirror Prooflike PCGS.** The fields are deeply reflective and the devices heavily frosted, creating the Deep Mirror Prooflike effect. A long but shallow mark on the cheek of Liberty accounts for the MS64 grade. A couple of rust-colored spots are noted on the reverse. (#7127)
- 4117 1881-O MS65+ PCGS. CAC.** This New Orleans Gem has an intricate strike and only a hint of wheat-gold patina. Vibrant luster sweeps minimally marked surfaces. The 1881-O is plentiful in typical Mint State but becomes a conditional rarity in the present quality. (#7128)

**Brilliant Gem 1881-O Dollar
Deep Mirror Prooflike
A Coin Impossible To Upgrade**

4118 1881-O MS65 Deep Mirror Prooflike PCGS. In the late 1870s-early 1880s America's mints were on full production schedules, churning out the "Bland" (later called Morgan) silver dollars by the wagonload at facilities in Carson City, San Francisco, New Orleans, and Philadelphia. New Orleans managed to pump out more than 5.7 million examples of the issue in 1881. Most of them are either lightly circulated or heavily bagmarked, and few show Deep Mirror brilliance on both sides, although one-sided Prooflike examples are found with some regularity. This Gem example is brilliant throughout, with strong contrast that far surpasses most examples, front and back. The full strike is a plus and also quite unusual. A coin for the series aficionado that will never require upgrading — even if one could be found. Population: 12 in 65 Deep Mirror Prooflike, 0 finer (7/12). (#97129)

4119 1881-S MS67 ★ NGC. Stunningly toned on the obverse with zones of gold-orange, magenta, violet, and blue. The reverse has dappled gold-orange and blue peripheral elements around a silver center that flashes with cartwheel luster. (#7130)

4120 1881-S MS67+ PCGS. CAC. A characteristically well-made 1881-S dollar that straddles the line between Superb Gem and a step beyond. Powerful cartwheel luster is minimally toned save for hints of gold at the rims. (#7130)

**High-Grade 1881-S Dollar, MS68 ★
Multicolor Obverse Toning**

4121 1881-S MS68 ★ NGC. Lemon-gold and cherry-red dominate the obverse, though the border displays lime-green. The reverse is brilliant save for a glimpse of honey patina at the margins. The strike is intricate, as usual for the well-made '81-S, and vigorous cartwheel luster illuminates the surfaces. Only minor contact on the portrait denies perfection.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2425. (#7130)

Colorful MS68 ★ 1881-S Dollar

4122 1881-S MS68 ★ NGC. CAC. Splashes of aquamarine, peach, gold, and rose-red adorn the obverse of this needle-sharp silver dollar. The reverse is only lightly toned, although the upper border has lemon and pink shades. Occasional minor contact cannot deny the eye appeal of this attractive silver type coin.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2424. (#7130)

4123 1882-O MS65 PCGS. This brilliant and highly lustrous Gem has impressive frosty surfaces with no evidence of toning on either side, and no marks worthy of mention. PCGS has only certified 26 finer (8/12). (#7136)

4124 1882-S MS67+ PCGS. CAC. Great blazing silver luster and strong all-around appeal. The hints of gold patina noted at the obverse rims are more overt on the reverse. (#7140)

4125 1882-S MS65 Deep Mirror Prooflike NGC. Stunningly mirrored with considerable field-to-device contrast. Several splashes of cloudy toning are present in the obverse fields, yet the essential reflectivity remains intact on this Gem. NGC has graded just nine numerically finer Deep Prooflike pieces (8/12). (#97141)

4126 1883-CC MS66+ PCGS. CAC. The obverse has wild crazy-quilt toning in green, gold, orange, magenta, violet, and blue. The luminous reverse is less dramatic, though this lets that side showcase the coin's solid strike and other attributes. (#7144)

4127 1883-CC MS65 Deep Mirror Prooflike PCGS. Appreciably frosted devices lend this moderately reflective Carson City coin an extra dimension of contrast and eye appeal. Green-gold tints appear at the obverse borders, and the area around the word OF on the reverse has a milky sage appearance. (#97145)

1883-O Dollar, Exceptional MS67 Coin

- 4128 1883-O MS67 NGC.** Untoned and intensely lustrous with marvelously clean surfaces, this is a conditionally rare Superb Gem example of this New Orleans Mint issue. Dave Bowers (1993) estimated that several million Mint State examples had been dispersed from long-term storage, many of those in the great releases of 1962-1964. Out of those millions, however, only a tiny fraction have achieved this lofty grade level. Census: 33 in 67, 0 finer (7/12).
Ex: Summer FUN Signature (Heritage, 7/2007), lot 1372. (#7146)

- 4129 1884-CC MS66 PCGS. CAC.** A lightly toned and boldly struck Carson City type coin with exemplary luster and a pristine reverse. The obverse displays only minor grazes. Certified in a green label holder. (#7152)

- 4130 1884-CC MS66+ PCGS. CAC.** Frosted on the devices with silver cartwheel luster in the surrounding fields. This impressively preserved Carson City dollar has great detail and only a few luster grazes. (#7152)

- 4131 1884-CC MS65 Deep Mirror Prooflike NGC. VAM-4A.** The "Spiked Date, Pinned Wing Gouge" VAM. Profoundly deep mirrored fields are close to pristine with a high degree of contrast against the frosty devices. A brilliant and beautiful Carson City Gem.
Ex: Long Beach Signature (Heritage, 2/2006), lot 1962. (#97153)

- 4132 1884-CC MS65 Deep Mirror Prooflike PCGS.** This prominently reflective Gem is well struck and impressively devoid of abrasions. Light straw-gold toning is principally confined to the margins. Excellent eye appeal for the popular Carson City type. (#97153)

- 4133 1884-CC MS65 Deep Mirror Prooflike PCGS.** A stunning Gem Deep Mirror Prooflike example, this fully brilliant Carson City dollar has brilliant and untuned silver surfaces with exceptional contrast. A single dark spot joins the wing tip at 10 o'clock. (#97153)

1884-O Dollar, All-White Superb Gem

- 4134 1884-O MS67 PCGS.** This brilliant Superb Gem is essentially devoid of distractions. Each side displays incredible silver-white surfaces. Generally New Orleans dollars are not well struck, but the 1884-O, and in particular this coin, are the exception to the rule. Population: 57 in 67, 1 finer (7/12).
Ex: Dallas Signature (Heritage, 7/2006), lot 2806; Long Beach Signature (Heritage, 6/2010), lot 1104. (#7154)

- 4135 1884-S AU58 NGC.** Just a hint of friction keeps this high-end AU from a much costlier Mint State grade. The fields are semireflective and the central devices are fully struck. Brilliant except for a light accent of golden at the rims. (#7156)

- 4136 1884-S AU58 PCGS.** Dusky gray patina covers both sides of this still mostly lustrous dollar. Original with just a bit of striking softness in the centers and no obvious or detracting abrasions. (#7156)

- 4137 1884-S AU58+ PCGS. CAC.** Only a hint of rub affects the strongly lustrous surfaces of this S-mint dollar. Gray, peach, and rose tints are thicker on the reverse. (#7156)

Brilliant Uncirculated 1884-S Dollar Noted Conditional Rarity

- 4138 1884-S MS61 PCGS.** This brilliant silver dollar displays potent luster and a well preserved reverse. The left obverse exhibits marks that correspond to its grade. A good strike though the eagle's breast lacks full detail. The 1884-S is famous for its conditional rarity, common in XF but seldom seen in Mint State. (#7156)

1885 Dollar, MS67 ★ Rainbow-Toned Obverse

- 4139 1885 MS67 ★ NGC. CAC.** Much of the obverse is toned with bright yellow, crimson, and blue color, and a much smaller part is fully brilliant silver-white. The reverse is entirely brilliant and untuned, both sides exhibiting sharp design details including the hair over Liberty's ear and the eagle's breast. Census: 12 in 67 ★, 5 finer (7/12). (#7158)

- 4140 1885-CC MS65 PCGS.** Wisps of lemon-yellow toning appear at the upper left obverse, with the balance exhibiting full mint brilliance and frosty luster. Slight central weakness is typical for this issue. (#7160)

- 4141 1885-CC MS65 PCGS.** A nicely struck and lightly toned Gem that boasts coruscating luster and an absence of mentionable marks. This low mintage Carson City dollar has been a collector favorite since the GSA auctions of the 1970s. (#7160)

- 4142 1885-CC MS65 PCGS.** This well-detailed Gem exhibits just a touch of softness on the hair above Liberty's ear, with especially vibrant satiny mint luster and only minor signs of contact. This coin possesses exceptional eye appeal. (#7160)

- 4143 1885-CC MS65+ PCGS. CAC.** Flashy cartwheel luster is the greatest asset to this Carson City dollar's eye appeal. Minimally toned surfaces host devices that are softly struck on the highest elements. (#7160)

- 4144 1885-CC MS66+ PCGS. VAM-2A, R.6.** The N from IN is clashed in front of Liberty's neck, a popular VAM target within recent years. The present high grade Carson City dollar exhibits vibrant luster and extensive swaths of peach-gold patina. Glimpses of cherry-red and blue-green are also evident. Pristine fields contribute further to the exceptional eye appeal. (#7160)
- 4145 1885-CC MS66 PCGS. CAC.** A hint of almond-gold toning on the cheek precludes full brilliance. Lustrous and well struck with smooth fields and minor facial grazes. Certified in an old green label holder. (#7160)
- 4146 1885-CC MS66 PCGS. CAC.** This gorgeous Premium Gem is highly lustrous and almost entirely brilliant, with delicate peripheral gold and iridescent toning. Rarely encountered in finer grades. (#7160)

Lustrous MS66+ 1885-CC Dollar

- 4147 1885-CC MS66+ PCGS. CAC.** A crescent of navy-blue, golden-brown, and plum-red enriches the upper obverse border of this lustrous and sharply impressed high grade silver dollar. The fields and cheek display only trivial contact. A popular Carson City issue due to a low mintage and availability in quality Mint State. (#7160)

MS66+ ★ 1885-CC Dollar Iridescent Multicolor Toning

- 4148 1885-CC MS66+ ★ NGC. CAC.** Dramatic cherry-red, forest-green, orange-gold, and powder-blue toning makes it obvious why NGC awarded this low mintage Carson City dollar the coveted Star designation. The reverse displays only a hint of golden patina. Lustrous and boldly struck with smooth fields and unimportant facial grazes. (#7160)
- 4149 1885-CC MS65 Prooflike PCGS. CAC.** Faint golden-gray toning graces this moderately mirrored Carson City dollar. The strike is good despite some blending at the centers. The fields are smooth and the portrait displays minor grazes. Encapsulated in a green label holder. (#7161)
- 4150 1885-CC MS66 Prooflike NGC.** An amazing Premium Gem Prooflike Morgan dollar, this piece is brilliant and entirely untuned. The fields are fully mirrored and surround thickly lustrous devices. Census: 23 in 66 Prooflike, 3 finer (5/12). (#7161)

- 4151 1885-CC MS63 Deep Mirror Prooflike NGC.** This fully brilliant Carson City Morgan provides ice-white designs and prominently mirrored fields. Cameo contrast is considerable. The reverse is well preserved and the portrait displays wispy abrasions. (#97161)
- 4152 1885-CC MS63 Deep Mirror Prooflike PCGS.** Profoundly reflective fields surround thickly frosted devices. Though lightly abraded throughout, this is a highly pleasing Deep Mirror Prooflike example.
From The William R. Green Collection. (#97161)
- 4153 1885-CC MS64 Deep Mirror Prooflike PCGS.** Blatant field reflectivity and frosty motifs combine for noticeable cameo contrast. Sharply struck and untuned with a number of small grazes on the portrait. Housed in a green label holder.
Ex: Atlanta Signature (Heritage, 4/2006), lot 1024, which realized \$1,610. (#97161)
- 4154 1885-O MS67 NGC.** Traces of tan patina grace this sharply struck and highly lustrous Superb Gem. The reverse appears immaculate and the left obverse exhibits only delicate grazes.
Ex: Reuben Reinstein Collection (Heritage, 7/2007), lot 1426. (#7162)
- 4155 1885-O MS67 NGC.** A whisper of gold patina encompasses this lustrous and splendidly preserved Superb Gem New Orleans Morgan. The strike is exact save for minor softness at the centers.
Ex: West Palm Beach Signature (Heritage, 7/2007), lot 1428. (#7162)
- 4156 1885-O MS67 PCGS Secure.** A desirable Superb Gem with potent luster and delicate olive-green toning. This New Orleans piece has a virtually full strike, seldom seen from the Louisiana facility.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4533, which realized \$2,070. (#7162)
- 4157 1885-S MS65 PCGS. VAM-4.** The date is repunched, most clearly on the first 8. This thoroughly lustrous Gem displays faint golden patina and a good strike. The fields are close to pristine while the cheek exhibits only minor marks. (#7164)
- 4158 1886 MS66 Prooflike PCGS. CAC.** Light golden tints glitter at the margins of this moderately reflective P-mint Morgan dollar. Liberty's portrait is amply frosted and carefully preserved. Population: 21 in 66 Prooflike, 1 finer (7/12). (#7167)
- 4159 1886-O MS62 PCGS.** Luminous blue-gray through the centers with green-gold touches along the margins. The portrait has a few wispy marks, but the overall eye appeal is better than the MS62 designation would suggest. (#7168)

1886-O Morgan Dollar, MS64 Extremely Rare in Higher Grades

- 4160 1886-O MS64 NGC.** The 1886-O Morgan dollar is easily located in circulated grades, but examples in Choice condition are quite scarce, and finer coins are virtually unobtainable. This well-detailed Choice specimen exhibits vibrant cartwheel mint luster with accents of light gold patina. Census: 88 in 64, 0 finer (7/12). (#7168)

**Near-Gem 1886-O Morgan Dollar
Only Three Numerically Finer at PCGS**

- 4161 1886-O MS64 PCGS. CAC.** Despite the mintage of more than 10.7 million pieces, the 1886-O Morgan dollar is a scarce issue in MS64 condition, and PCGS has graded only three numerically finer specimens (7/12). This well-detailed Choice example displays creamy unmarked surfaces with hints of golden-tan toning and vibrant mint luster. (#7168)

**Gem 1886-S Morgan Dollar
Vivid Multicolor Toning**

- 4162 1886-S MS65 PCGS. CAC.** The 1886-S Morgan dollar claims a low mintage of 750,000 pieces, and the issue is scarce in Gem condition. This well-detailed Gem shows a touch of softness on the hair above Liberty's ear, with vibrant mint luster and intense shades of ice-blue, lavender-gray, and golden-brown toning. PCGS has graded 33 numerically finer examples (7/12). (#7170)
- 4163 1887/6 MS62 PCGS. VAM-2. A Top 100 Variety.** Lustrous and close to brilliant with an intricate strike, clean fields, and a couple of marks on the cheek. Housed in a Regency PCGS holder dating from the mid-1990s. (#7174)
- 4164 1887/6 MS65+ NGC. CAC. VAM-2. A Top 100 Variety.** Slender but beautiful powder-blue and golden-brown bands adorn the left reverse margin. The outline of the base of an underdigit 6 is apparent on both sides of the bottom of the 7. Exceptionally preserved and desirable. (#7174)
- 4165 1887/6 MS64 Prooflike PCGS. VAM-2. A Top 100 Variety.** A brilliant and flashy near-Gem of this *Guide Book* overdate. The curve of a base of a 6 bookends the bottom of the 7. Nicely struck with a smooth reverse and minor obverse abrasions. *From The William R. Green Collection.* (#7175)
- 4166 1887/6 MS64 Prooflike PCGS Secure. CAC. VAM-2. A Top 100 Variety.** This brilliant Choice overdated Morgan has flashy fields and only moderate inexactness of strike at the centers. The reverse is essentially pristine, and the left obverse exhibits only unimportant abrasions. (#7175)
- 4167 1887 MS67 NGC.** A magnificently unabraded silver type coin whose dynamic luster and good strike contribute further to the eye appeal. Minor strike-throughs on Liberty's neck are of mint origin. *Ex: Reuben Reinstein Collection (Heritage, 7/2007), lot 1449.* (#7172)
- 4168 1887-S MS65 PCGS. CAC.** The fields are distinctly reflective, though not to Prooflike levels. Silver cartwheel luster dominates the eye appeal, and only a thin mark on Liberty's jawline keeps this coin from an even finer grade. (#7180)

- 4169 1889 MS66 NGC.** Fully patinated in russet-brown, violet-red, and jade-green. Lustrous and refreshingly unabraded with a hint of incompleteness at the centers. A high mintage issue but seldom encountered with such vibrant multicolor toning. (#7188)
- 4170 1889-CC VF25 NGC.** Though moderately worn, this key-date Carson City dollar remains faintly luminous. Peach and blue overtones alternate depending on the angle to the light. Numerous small marks are as expected for the level of circulation seen. (#7190)
- 4171 1889-CC VF25 NGC.** A rare date Carson City Morgan whose slate-gray surfaces are only lightly abraded given its stint in Old West commerce. The wings and hair show noticeable remaining inner detail. (#7190)

**1889-CC Dollar, Choice XF
Scarce in All Grades**

- 4172 1889-CC XF45 NGC. CAC.** This Choice XF retains just a trace of mint luster around the devices on each side. The surfaces are light gray with a hint of golden. Numerous small handling marks are strewn across each side, but the only one worthy of individual mention is located on the reverse below TA in STATES. Scarce and popular in all grades. (#7190)
- 4173 1889-CC — Obverse Reengraved — NGC Details. AU.** A trio of thin horizontal marks on the hair above the ear are from an attempt to conceal wear. The surfaces are a bit bright but no other deficiencies are evident. Luster clings to the borders and devices. Well defined with a hint of golden patina at the margins.
- 4174 1889-S MS65 PCGS. VAM-7.** The mintmark is clearly repunched within the upper loop. A well struck and beautifully preserved Gem that shows only a hint of almond-gold toning. The 1889-S is scarce as a Gem and rare any finer. (#7194)
- 4175 1890 MS65 PCGS.** Broad cartwheel luster enhances the eye appeal on this faintly pearl-gray Gem. The strike is a trifle soft on the hair over Liberty's ear, typical for the issue. PCGS has graded only one example as MS66 or finer (7/12). (#7196)
- 4176 1890 MS65 PCGS.** The 1890 Morgan dollar is easy to locate in Mint State, but most examples are softly struck, with subdued luster. This delightful Gem is a welcome exception as it exhibits vibrant luster and well-detailed devices. Nearly uncollectible any finer. (#7196)
- 4177 1890 MS64 Deep Mirror Prooflike PCGS. CAC.** Deep/Ultra Mirror Prooflike examples are seldom seen of the 1890, even though more than 16 million pieces were struck. This all-brilliant example displays extraordinary contrast between the thickly frosted devices and deeply reflective fields. Population: 88 in 64 (2 in 64+) Deep Mirror Prooflike, 6 finer (7/12). (#97197)
- 4178 1890-O MS64 Deep Mirror Prooflike NGC. VAM-5.** The 9 in the date is repunched. Orange-gold, ruby-red, and navy-blue toning illuminates the borders. Exceptionally reflective fields contribute further to the eye appeal. Well preserved but selected portions are lightly impressed. Certified in a prior generation holder. (#97201)
- 4179 1890-S MS65 PCGS. CAC.** This thoroughly lustrous Gem has light golden toning and a precise strike. The fields are refreshingly close to pristine and only a few minor marks appear on Liberty's face. (#7202)

- 4180 1891 MS64 PCGS. CAC.** Faint blue overtones and scattered cloud-white elements are the few suggestions of patina on this gleaming near-Gem. Liberty's portrait offers considerable frost. (#7204)
- 4181 1891-CC MS64 NGC.** Ex: Fitzgerald Collection. A stone-white and lustrous Carson City dollar that has a well preserved reverse and some grazes on the left obverse. One small spot noted on the cotton leaves. (#7206)
- 4182 1891-CC MS64 NGC.** Frosty interiors are largely silver. Peripheral toning ranges from pale yellow to richer gold and orange, the latter colors mostly at the right.
From The William R. Green Collection. (#7206)
- 4183 1891-CC MS64 PCGS. CAC.** This frosty near-Gem has above average design definition with full luster beneath golden-brown and iridescent toning. (#7206)
- 4184 1891-CC MS64 Prooflike PCGS.** The well-detailed design elements are set against the brightly reflective fields, but only slight contrast is apparent. A few hints of gold toning can be observed on both sides. (#7207)
- 4185 1891-O MS64+ PCGS. CAC.** Golden patina is strongest at the margins, fading to gold-gray and finally muted silver on the interiors. Long roller marks cross the obverse but do not affect the technical grade. (#7208)
- 4186 1892 MS64 PCGS. CAC.** Light peach touches settle over the upper obverse of this near-Gem, while the rest of the coin is silver. Liberty's face shows light abrasions, though few have any depth. (#7212)

Gem 1892 Morgan Dollar Rare in Higher Grades

- 4187 1892 MS65 PCGS.** The 1892 Morgan dollar is a scarce issue at the Gem level, and finer grades are almost unobtainable. This well-detailed Gem exhibits just the slightest softness on the hair strands above Liberty's ear. The creamy surfaces show few signs of contact and display vibrant cartwheel mint luster. PCGS has graded only three numerically finer specimens (7/12). (#7212)

Smooth Gem 1892 Silver Dollar

- 4188 1892 MS65 PCGS. VAM-3.** The reverse is nicely die doubled, perhaps most prominently on UNITED and the nearby portion of the wreath. This is an essentially brilliant Gem of this relatively low mintage issue. Well preserved and highly lustrous with some incompleteness of strike at the centers. (#7212)

- 4189 1892-CC MS62 NGC.** An essentially brilliant example of this much better Carson City issue. Well struck with booming luster and good eye appeal. Only lightly abraded for the grade, especially on the reverse. (#7214)
- 4190 1892-CC MS62 NGC. VAM-8A.** A faintly clashed N from IN in front of the neck is the favored attribute of this Carson City VAM variety. A die break fills the base of the 2. Brilliant and lustrous with a good strike and a smooth reverse. (#7214)
- 4191 1892-CC MS63 PCGS.** Silver through all but the rims, where a few touches of color are noted. Wispy abrasions cross Liberty's cheek and the surrounding fields, though the reverse has a cleaner, semireflective appearance.
From The William R. Green Collection. (#7214)
- 4192 1892-O MS64 PCGS.** Pastel chestnut-gold and ice-blue toning endows this lustrous better date New Orleans dollar. The reverse is close to immaculate and the obverse shows only minor contact. (#7216)

1892-O Dollar, Lustrous MS65 Example

- 4193 1892-O MS65 PCGS.** Although somewhat weakly impressed in the centers, this 1892-O Morgan dollar is a lovely Gem with brilliant lustrous surfaces and wispy toning on both sides. This issue is a condition rarity with only a handful of finer examples, just five certified by PCGS (8/12). (#7216)
- 4194 1892-S AU50 NGC.** Modestly worn yet strongly lustrous still in the fields, which have pale canary-yellow and blue overtones. Numerous fine abrasions combine to account for the grade.
Ex: The Clay Grant Collection (Heritage, 8/2011), lot 4705. (#7218)
- 4195 1892-S AU53 NGC.** A delightful AU example with considerable luster, this light silver-gray dollar has hints of peripheral gold on the obverse, with additional blue toning on the reverse. An important condition rarity, living in the shadows of the more famous 1893-S dollar. (#7218)
- 4196 1892-S AU55 NGC.** Lightly rubbed on the high points, though the field luster is close to intact. Gold and peach patina covers much of each side, though numerous windows into silver-gray also are present. (#7218)
- 4197 1893 MS62 PCGS.** A low mintage Morgan dollar that boasts dynamic luster and a well preserved reverse. The obverse is light caramel-gold while the reverse is dusky rose-gold. Certified in an old green label holder.
From The William R. Green Collection. (#7220)
- 4198 1893 MS63 PCGS.** Rich orange-gold and lilac toning dominates the obverse. The reverse is brilliant save for peripheral peach and jade-green patina. Faint marks on the cheek and near 4 o'clock on the obverse preclude a finer grade. (#7220)
- 4199 1893 MS64 NGC.** Mostly brilliant, though the borders display traces of gold patina. Lustrous with well preserved fields and faint facial grazes. A retained lamination (as made) is near the O in ONE. Liberty's chin is lightly die doubled and the peak of the 3 is repunched. (#7220)
- 4200 1893-CC XF45 NGC.** Richly toned, faintly luminous surfaces switch between green-gold and blue-gray depending on the angle to the light. Light wear and abrasions affect the devices, but this coin has strong all-around eye appeal for the grade. (#7222)

**Near-Mint 1893-CC Dollar
Last Carson City Morgan**

- 4201 1893-CC AU58 NGC.** As the final Carson City Morgan dollar the 1893-CC is an important issue for both type and date collectors. The present coin shows just a touch of high-point rub on the sharply detailed design elements, and the fields display a mixture of satiny mint luster and prooflike reflectivity. The pleasing surfaces boast a few accents of gold and blue toning. (#7222)

**Prooflike Uncirculated 1893-CC Dollar
Brilliant and Flashy**

- 4202 1893-CC MS60 Prooflike PCGS.** A flashy and brilliant better date Carson City dollar. The reverse field is minimally abraded though the eagle's breast has a moderate mark. The left obverse displays expected grazes and the centers show a typical impression. Encapsulated in an old green label holder. (#7223)
- 4203 1893-O AU58 NGC.** A lustrous and lightly toned Borderline Uncirculated example of this low mintage New Orleans issue. Moderate abrasions are scattered but more evident on the reverse. The centers show only unimportant incompleteness. (#7224)
- 4204 1893-O — Obverse Improperly Cleaned — NGC Details. Unc.** Both sides are faintly hairlined, but this low mintage New Orleans Morgan dollar has no indication of wear and the motifs glimmer with luster. The untuned surfaces have only infrequent minor bagmarks. (#7224)

**1893-O Dollar, Semiprooflike MS61
Low-Mintage Issue**

- 4205 1893-O MS61 NGC.** With the lowest mintage of all O-mint dollars, the 1893-O is a popular coin with collectors, especially in Mint State. This bright, untuned example displays significant reflectivity in the fields, insufficient to qualify for Prooflike status but enough to grab the attention of the astute collector. (#7224)

- 4206 1893-S Good 4 NGC.** A pearl-gray example of the rarest commercial issue of the type. All legends are clear and some plumage detail is visible on the wings and tail. Minor rim dings are seen at 8 o'clock on the obverse and 7:30 and 11 o'clock on the reverse. (#7226)
- 4207 1893-S Good 6 PCGS. CAC.** Although well worn, this attractive key Morgan dollar has light silvery-gray devices and pewter-gray fields with a few splashes of deep blue on the reverse. (#7226)
- 4208 1893-S — Improperly Cleaned — NGC Details. VG.** A more extensively worn example of this popular key date than usually seen, cleaned in the past with a thin ring of tan retoning around an oddly glossy medium-gray central obverse. Despite its impairment, this is an important coin that may well cap a lifetime of collecting Morgan dollars for the winning bidder. (#7226)
- 4209 1893-S — Improperly Cleaned — NGC Details. VG.** Both sides display coarse hairlines but the date is bold and the mintmark is fully outlined. Toned stone-gray with glimpses of chestnut-brown at the margins. (#7226)

VF Sharpness Key 1893-S Dollar

- 4210 1893-S — Rim Damage — PCGS Genuine. VF Details.** An obverse rim ding at 12 o'clock is relatively minor for the VF level but strictly assessed by PCGS. This stone-gray example has bold legends and ample remaining hair and plumage detail. Moderate marks are confined to the field near the shoulder curl.

1893-S Dollar, Problem-Free VF35

- 4211 1893-S VF35 PCGS.** The 1893-S is available in all grade ranges, but is primarily seen in lower grades. It is also often found cleaned or with some other sort of impairment(s). This solidly graded coin displays even wear over each side, and light gray patina with charcoal accents around the devices and within the recesses of the design elements. Problem-free for the grade. (#7226)

XF Sharpness 1893-S Dollar

4212 1893-S — Improperly Cleaned — NGC Details. XF. This mostly white key date dollar is a bit dull from dipping but the borders have regained traces of golden-brown toning. Luster brightens the wings and legends. The obverse has minor to moderate marks while the reverse is minimally abraded. An obtainable yet sharp example of a coveted issue. (#7226)

4213 1894 VG10 NGC. CAC. Despite extensive wear, this is an attractive two-tone example of the Philadelphia key to business strike Morgan dollars. This dollar has light gray devices with medium gray fields showing only minor grade-consistent marks. (#7228)

4214 1894 — Scratch — PCGS Genuine. XF Details. A long thin scratch crosses the reverse. This piece has traces of luster on both sides, with no toning evident on its light silver surfaces.

4215 1894 XF40 ANACS. Peach-gold and navy-blue visit the margin of the otherwise cream-gray obverse. Rich navy-blue, jade-green, and stone-gray encompass the more richly patinated reverse. One thin diagonal mark noted on the cheek of this rare date dollar. (#7228)

4216 1894 AU55 NGC. The centers are pearl-gray, while the borders are light tan except for a slender area of granular charcoal toning on the reverse rim between 8 and 9 o'clock. A briefly circulated key date silver dollar with marks noted on the G in GOD and on the field near the arrowheads. (#7228)

4217 1894 — Improperly Cleaned — NGC Details. Unc. Rose-red and orange-gold hues grace the borders of this lustrous key date Philadelphia Morgan dollar. Lightly hairlined but nonetheless attractive despite slight incompleteness of detail at the centers. (#7228)

Uncirculated Low-Mintage 1894 Dollar

4218 1894 MS61 NGC. This Philadelphia Mint key date silver dollar has the overall look of an even higher grade, but we note a rim irregularity at 4 o'clock on the reverse. Faint chestnut toning graces lustrous and smooth surfaces. Other than the '93-S, the lowest mintage regular issue of the type. (#7228)

Mint State 1894 Dollar Delicate Almond-Gold Toning

4219 1894 MS61 NGC. Delicate almond-gold toning encompasses this lustrous key date Philly dollar. The reverse is minimally abraded and on its own would grade higher, but slender marks on the left obverse correspond to the MS61 level. The hair above the ear displays softness, but the overall strike is good. (#7228)

4220 1894-S MS62 NGC. Silver through the vast majority of each side but with blushes of peach and blue at the upper obverse rim. Lightly abraded overall with just a few scrapes of significance, most visibly on Liberty's cheekbone. (#7232)

4221 1895-O AU53 NGC. Most untuned, though the upper obverse margin displays a glimpse of golden-brown. Luster brightens the borders and motifs despite noticeable wear on the eagle's breast. One thin mark noted on Liberty's neck. A key New Orleans issue. (#7236)

4222 1895-O AU53 PCGS. This lightly toned example has abundant luster at the borders and on the devices. A couple of slender facial marks do not contest the grade. The key New Orleans Morgan issue in AU grades. (#7236)

4223 1895-O AU53 PCGS. Delicate peripheral gold toning is evident on each side of this lustrous Morgan dollar. Light wear is evident on the high points of the design, and the surfaces have moderate grade-consistent marks. (#7236)

4224 1895-O AU53 PCGS. Luminous light gray overall with hints of golden patina and a few splashes of charcoal. A modestly worn but pleasing example of this popular semikey issue. (#7236)

4225 1895-O AU55 NGC. Both sides of this light gray and gold specimen have considerable luster with reflective fields that remain from prooflike surfaces. A few trivial marks are noted on each side, with light wear on the high points. (#7236)

4226 1895-O AU55 NGC. Splashes of peach-red adorn the peripheries of this key date New Orleans dollar. The centers show slight wear, but much luster remains. The eagle displays a few concealed abrasions. Encased in a former generation holder. From The William R. Green Collection. (#7236)

Key 1895-O Dollar, AU58 Still Lustrous and Mostly Brilliant

4227 1895-O AU58 NGC. Glowing luster is extensive, but slightly diminished on Liberty's cheek. High-point friction is extremely faint. There are a few moderate marks near the profile, but the appearance overall is clean and not far from brilliant. The 1895-O is the key New Orleans issue, and more challenging in all grades than the lower-mintage 1893-O.

Ex: Dallas Signature (Heritage, 11/2005), lot 3559. (#7236)

- 4228 1895-S XF40 PCGS.** Scarce in all grades, this XF example has original gray-toned surfaces. There are no obvious or detracting marks on either side. (#7238)
- 4229 1895-S — Improperly Cleaned — NGC Details. Unc.** A low mintage silver dollar that exhibits a sharp strike and satin luster. Apricot-gold fills the margins while the interiors are cream-gray. A few faint hairlines are relegated to the left obverse. The eagle's breast displays mint-made roller marks.
- 4230 1896 MS66+ PCGS. CAC.** Broad silver luster is faintly patinated but has little color aside from faint suggestions of blue or pink at certain angles to the light. Great all-around detail with a small scrape at the hair over Liberty's ear. PCGS has graded just 30 examples as MS66+ or better (8/12). (#7240)

**1896 Dollar, Superb Gem
Brilliant, Remarkably Clean Surfaces**

- 4231 1896 MS67 NGC.** The 1896-P may be a common date, but there is nothing "common" about this example. Basically untoned, except for faint golden peripheral color, with thick, satiny luster and a creamy-smooth portrait of Liberty that boasts a pristine cheek. Trivial field marks are noted on the obverse, but the overall eye appeal of this Superb Gem dollar is simply outstanding. Census: 54 in 67 (1 in 67+), 0 finer (7/12).
Ex: *Summer FUN (Heritage, 7/2007)*, lot 1656. (#7240)

**Premium Gem 1896 Morgan Dollar
Rare Deep Mirror Prooflike Example**

- 4232 1896 MS66 Deep Mirror Prooflike PCGS.** This delightful Premium Gem displays noticeable contrast between the sharply detailed design elements and the deeply reflective fields, an effect not usually seen on the 1896 Morgan dollar. The mostly brilliant surfaces show a few hints of gold and lavender toning, with terrific eye appeal. Population: 13 in 66 Deep Mirror Prooflike, 1 finer (7/12). (#97241)
- 4233 1896-O MS62 PCGS.** Softly struck on the obverse but with broad cartwheel luster. Silver interiors yield to peach-gold at the margins, and a few small dots of charcoal patina also are present. (#7242)
- 4234 1896-O MS62 PCGS.** Gold and gray are the main overtones, though a few splashes of charcoal also are present. Broadly lustrous surfaces have few overt abrasions for the grade. (#7242)

**Choice 1896-O Morgan Dollar
Condition Rarity In High Grade**

- 4235 1896-O MS64 PCGS.** One of several condition rarities in the Morgan dollar series, this particular 1896-O will suit the collector who appreciates light golden toning over lustrous surfaces and a rather sharp strike for this notoriously poorly struck issue. The curls over Liberty's ear show minimal weakness and the eagle's breast shows some definition on the feathers, although the central area is a bit shadowy. The surfaces are quite attractive, with no deep or distracting nicks or scuffs on Liberty's cheek or neck, and the surrounding fields are quite pleasing for the grade. Close examination reveals a vertical nick close to Liberty's ear on her cheek, and another tiny tick on her nostril which may be useful for future identification. Population: 26 in 64, 3 finer (7/12).
Ex: *Ft. Lauderdale FUN (Heritage, 1/2005)*, lot 30339, which realized \$32,200. (#7242)

- 4236 1896-S — Improperly Cleaned — NGC Details. Unc. VAM-2.** Faint hairlines are present but the lustrous surfaces nonetheless possess eye appeal. Golden-brown and jade-green toning enriches the margins. The centers are incompletely brought up and one moderate mark is behind the mouth. (#7244)

**1897 Morgan Dollar, MS67
Brilliant and Semiprooflike**

4237 1897 MS67 NGC. Well struck with a light coating of silver-white patina over both sides and impeccably preserved surfaces. Two or three tiny contact marks are noted on the lower parts of the eagle. Both Wayne Miller and Dave Bowers have called the 1897 Morgan dollar a common date, but they were obviously not referring to MS67 coins. A mere 27 pieces have been certified at this grade level by NGC and PCGS combined, with none finer (7/12).
Ex: Summer FUN Signature (Heritage, 7/2007), lot 1669. (#7246)

4238 1897-O MS62 NGC. The 1897-O is an important condition rarity in the Morgan series, from a mintage of just over 4 million coins. This satin example is fully brilliant with hints of peripheral blue and gold on the obverse.
From The William R. Green Collection. (#7248)

4239 1897-O MS62 NGC. Gold-orange and violet patina appears at the margins, while the lustrous interiors are silver tending toward blue. A number of wispy abrasions have collected on Liberty's cheek, though they largely are hidden by patina.
From The William R. Green Collection. (#7248)

4240 1897-S MS66+ PCGS. CAC. Gold-orange and blue-violet elements are dappled near the rims, while the interiors are largely silver. Subtly frosted touches appear on the high points. PCGS has graded just 22 non-Prooflike examples as MS67 or finer (7/12). (#7250)

4241 1898 MS66+ PCGS. CAC. Faintly toned-over silver-gray covers the interiors, while the margins have a few narrow strips of golden color, most visibly at the lower obverse and upper reverse. (#7252)

4242 1898-O MS65 Deep Mirror Prooflike PCGS. Strongly mirrored under scattered toning, largely cloud-gray and sage with the greatest thickness at the margins, right obverse, and upper and right reverse. Two near-vertical abrasions close to the eagle's head contribute to the grade. (#97255)

4243 1899-S MS63 Deep Mirror Prooflike NGC. A trace of gold toning visits the obverse border of this otherwise brilliant better date example. The fields are reflective and the strike is precise. Small marks on the left obverse correspond to the grade.
From The William R. Green Collection. (#97263)

4244 1900 MS66+ PCGS. CAC. Pristine surfaces and frosty luster appear on both sides of this lovely Premium Gem. The strike is sharp, the eye appeal excellent. PCGS has only certified 21 numerically finer (8/12). (#7264)

4245 1900-O MS66+ PCGS. CAC. Silver luster is slightly quicksilver but has a strong cartwheel aspect. The obverse appears to be of Superb Gem quality, though the reverse has a line of stuttering marks to the right of the eagle. (#7266)

4246 1900-O MS67 NGC. A gorgeous Superb Gem that appears fully brilliant upon first glance but possesses a whisper of olive-green toning. Lustrous and nicely struck with exceptionally clean surfaces. Census: 71 in 67, 0 finer (7/12).
Ex: Reuben Reinstein Collection (Heritage, 7/2007), lot 1695. (#7266)

4247 1901 AU58 NGC. CAC. Both sides of this conditionally scarce dollar have full luster with only a trace of wear. The obverse has gold, violet, and blue, and the reverse has peripheral gold toning around ivory brilliance. (#7272)

**Mint State 1901 Morgan Dollar
Doubled Die Reverse, VAM-3**

4248 1901 Doubled Die Reverse MS61 NGC. VAM-3. A Top 100 Variety. Also known as the "Shifted Eagle" variety. The 1901 Morgan dollar is among the rarest issues of the series in higher Mint State grades. In addition to its status as a condition rarity, the present coin is a representative of one of the most important doubled die varieties. The die doubling is prominent on the reverse, especially at the tail feathers, arrows and branch, and IN GOD WE TRUST. The eagle's lower wing feathers and beak are also clearly doubled. This example is an attractive piece with good luster and a hint of peripheral golden toning. Infrequent moderate abrasions limit the grade. Census: 1 in 61, 1 finer (2/12).
Ex: Houston Signature (Heritage, 12/2009), lot 1129, which realized \$9,200. (#7302)

4249 1902-O MS66+ PCGS. CAC. Broadly swirling luster with light patina that shows little color aside from a few tiny dark dots. A touch of striking softness at the high points is as expected for this later O-mint issue. PCGS has graded only seven pieces as MS67 or better (8/12). (#7280)

4250 1902-O MS66+ PCGS. CAC. Strong silver luster for the issue with hints of steel and rose. The strike on the hair over Liberty's ear is just a trifle soft. PCGS has graded seven pieces as MS67 or better (8/12). (#7280)

4251 1903 MS64 Deep Mirror Prooflike ANACS. Boldly reflective with gold and blue-violet touches noted at the margins. Stuttering marks arc around the hair at Liberty's forehead and a few other abrasions are noted, but the overall eye appeal is solid. Housed in a small-format holder.
From The William R. Green Collection. (#97285)

4252 1903-S AU55 PCGS. Lightly rubbed on the high points but with ample remaining luster. Small dashes of charcoal patina appear at the margins along with a broader aura of pale gold, while the interiors remain lustrous silver. (#7288)

4253 1904-O MS66+ PCGS. CAC. Pale silver with a few small areas of whitish cloudiness. Flashy cartwheel luster with an above-average strike for this final New Orleans issue, though the high points of the obverse remain a trifle undefined. PCGS has graded only 29 pieces as MS67 or finer (7/12). (#7292)

4254 1921-S MS65 PCGS. Fully brilliant and highly lustrous, this frosty Gem is untuned, save for a touch of gold on the reverse, and extremely attractive. PCGS has only certified 27 finer examples (8/12). (#7300)

PROOF MORGAN DOLLARS

1885 Brilliant Cameo PR63 Morgan Dollar

- 4255 1885 PR63 Cameo PCGS.** The 1885 dollar had 930 pieces struck from two die pairs. This particular coin is from the die pairing that shows doubling at the base of the 85 in the date. The fields are unfathomably deep on each side and thick mint frost sets up cameo contrast. Brilliant throughout, undoubtedly the coin would be graded much higher were it not for several pinscratches in the left obverse field. (#87320)

Stone-White Select Proof 1886 Morgan VAM-15, Repunched Date

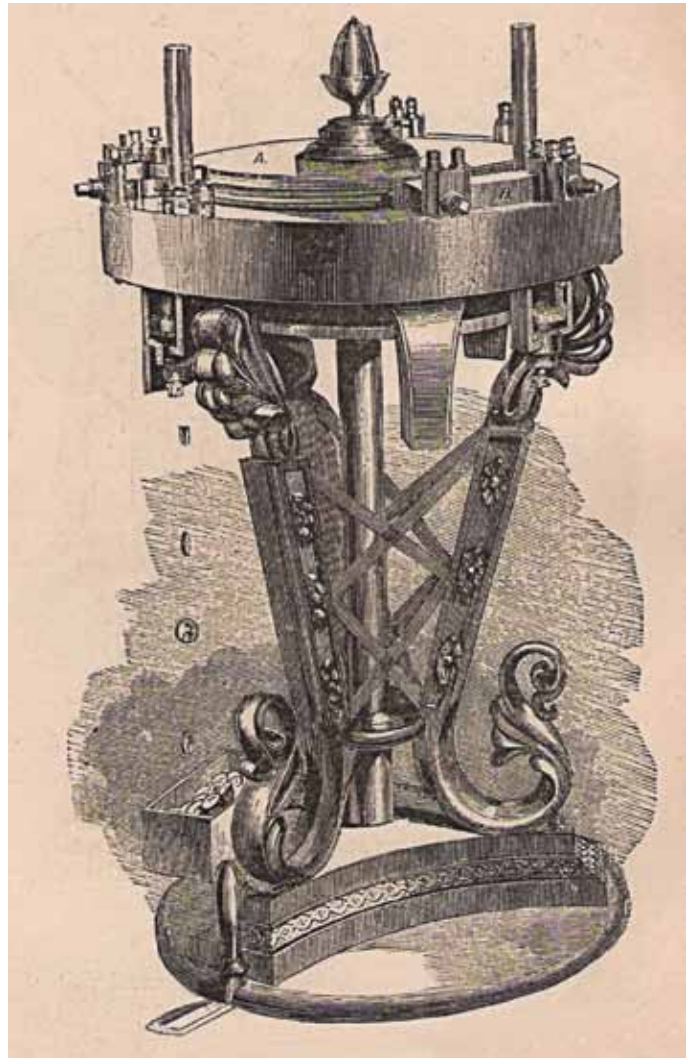

- 4256 1886 PR63 NGC. VAM-15.** The sole proof VAM for the issue. The 1 is lightly repunched south and a dash extends beneath the second 8. A fully struck pearl-white specimen with nicely reflective fields and a couple of minor hair-thin marks near 1 o'clock on the obverse. A scant 886 proofs were issued. (#7321)

1893 PR64 Cameo Morgan Dollar Fully Struck, Deeply Reflective

- 4257 1893 PR64 Cameo PCGS.** Many 1893 proof dollars are softly defined in the centers, apparently from improper spacing of the dies. That is not the case with this coin, though. Full hair detail is seen over the ear of Liberty and all the eagle's plumage is complete. The devices are noticeably frosted and present good contrast against the deeply mirrored fields. Each side is mostly brilliant except for a light accent of golden-brown toning around the peripheries. No obvious contact marks can be seen to the casual observer. Population: 15 in 64 Cameo, 15 finer (7/12). (#87328)

**Proof-Only 1895 Silver Dollar
Just 880 Pieces Issued**

4258 1895 — Surfaces Tooled — PCGS Genuine. Proof. In our opinion, this coin has the details of a proof specimen with AU details that has been tooled and cleaned. The slate-gray fields have been carefully smoothed and are moderately granular and hairlined. One reed impression noted behind Liberty's eye. Faint wear is evident on the eagle's breast and the hair above the ear. Die 4 per VAMworld.com with a Far Date. The 1895 is the key date of the Morgan dollar series, since it is a proof-only emission limited to 880 pieces. About one-quarter of PCGS-certified examples are in grades of less than 60, which suggests many were spent by owners or eventual heirs, enticed by the purchasing power of a silver dollar prior to World War II.

**1895 Dollar, Lightly Circulated and
Attractive PR55 Example**

4259 1895 PR55 NGC. Collectors understandably like to purchase the nicest specimens of their targeted coin that they can afford, but the 1895 proof Morgan dollar poses a special challenge, since there are no business strike examples to be had at a lesser price. Only 880 proof 1895 Morgans were struck, although it is likely that most survive today — at least, it is likely that they survive in about the same proportion as any other Morgan dollar proof issue. The existence of a few circulated 1895 proofs has clouded the issue, but it remains true today that no verifiable business strike has ever been found, despite the reported mintage of 12,000 pieces. While this piece is clearly not a business strike, it would fit nicely in an AU set. It was either circulated briefly or carried as a pocket piece. We tend to think it was the former as there are several larger diagonal marks on the cheek of Liberty. An irregularly shaped planchet flaw is also noted in the left obverse field. Light rose-colored surfaces show significant deep gray patina surrounding the devices on each side. (#7330)

1895 Morgan Dollar, PR61
Key Proof-Only Issue

4260 1895 PR61 NGC. "Buy the nicest piece you can afford" has generally been excellent advice for collectors in most U.S. series, if they purchase wisely and hold their coins for a sufficient amount of time. The 1895 Morgan dollar is available in an especially wide grade range, since the issue's very popularity makes it more profitable to send in even the humblest circulated pieces for grading — far more so than for other proofs in the series. Between NGC and PCGS combined (7/12), there are currently 137 submissions of circulated proof 1895 Morgans, those grading less than PR60 (and of course, not all different coins). While NGC shows a single example grading PR4, most of the circulated coins at the two services are in the range of PR40 to PR58, although there is a small pack at the PR20 level. These circulated examples have the effect of pulling the average grade of certified proof 1895s down to "PR60.3." If one excludes the impaired or circulated proofs, the average certified grade increases to "PR63.6." The finest examples are in the PR67-PR68 range.

This example is between those grading extremes, and it gives the collector an opportunity to acquire this key in a more-affordable grade, while still fully detailed and showing fully evident proof surfaces. Hairlining on each side has dulled the coin's original sparkle. But the fields were obviously so heavily polished in the Mint that much of the mirroring remains. Pale gray patina covers each side with a trace of golden at the margins, and there are no obvious or detracting contact marks present. (#7330)

1895 Dollar, PR63
Proof-Only Date, Only 880 Pieces Struck

4261 1895 PR63 PCGS. The saying goes in numismatics to “buy the keys first,” and collectors of circulation-strike Morgan dollars eagerly pursue the 1889-CC, the 1893-S, and other issues that are conditionally rare, such as the 1886-O, 1896-O, 1884-S, and 1901 Philadelphia. But for the 1895 Morgan dollar, the choice is rather more stark: either leave a gaping hole in the collection for the nonexistent business strikes, or purchase one of the few proofs made, most of which likely survive to this day. The 1895 Morgan dollar proof, in and of itself, is neither more rare nor less rare than any other proof in the series — although any Gem proof or finer, regardless of date, is a condition rarity. Rather, it is the absence of business strikes, combined with legions of collectors of this series, that makes the demand for the proof 1895 dollar so extraordinary.

While we have no hard data to back this up, it would be surprising to us if the Morgan dollar were *not* America’s most popular coin to collectors. It is certainly avidly pursued in all grades. This piece strikes a nice balance for the collector of this popular series. A few light hairlines account for the PR63 grade, but there are none of the contact marks usually seen on proofs in this grade. The surfaces cannot be termed brilliant, but they are not far from it. Just the lightest hint of speckled brown patina is seen over each side and is just marginally deeper around the margins. The fields are deeply reflective and, with a little imagination, modest contrast can be seen between the fields and devices. (#7330)

**Choice Proof 1898 Morgan Dollar
Only 735 Examples Minted**

- 4262 1898 PR64 NGC.** The 1898 proof Morgan dollar is known as a high-quality issue from a mintage of just 735 pieces. This impressive Choice example exhibits vivid shades of violet and champagne-gold toning over sharply detailed design elements and deeply reflective fields. Census: 46 in 64, 68 finer (7/12). (#7333)

**1898 Morgan Dollar
Untoned PR67+ Ultra Cameo**

- 4263 1898 PR67+ Ultra Cameo NGC.** The 1898 Morgan dollar, along with its 1896 counterpart, has a well-deserved reputation as among the finest-made proof dates in the entire series. This splendid PR67+ with the Ultra Cameo contrast designation from NGC provides ample demonstration, as few Morgan dollars a collector sees in his/her career will exceed this piece in either contrast or technical grade. The surfaces are untoned throughout and seemingly unmarked, with the profound contrast expected and a strike that is virtually flawless, save for minor roller marks that appear only under a loupe over the ear. This coin would make a perfect acquisition for type collectors, as one of the best-quality issues in the series in top-notch condition. This piece is the finest Ultra Cameo of the issue at NGC. Census: 18 in 67 (1 in 67+) Ultra Cameo, 0 finer (7/12). *From The Fred Yee Collection.* (#97333)

Gem Proof 1903 Dollar

- 4264 1903 PR65 PCGS. CAC.** Light honey-gold toning graces this prominently mirrored and boldly struck Gem. Cameo frost is evident except on Liberty's cheek and neck. Void of perceptible hairlines. A meager 755 proofs were coined, and perhaps half that number have survived unimpaired. Population: 28 in 65 (1 in 65+), 1 in 65 Cameo, 33 finer (8/12). (#7338)

PEACE DOLLARS

- 4265 1921 MS65 PCGS.** Delicate peach and golden-brown tints brush the margins of this first-year Peace dollar Gem. Smooth and well-preserved, though typically soft in the centers. (#7356)
- 4266 1921 MS65 PCGS.** The strike is unexpectedly crisp on this lustrous and delicately toned Gem. Wisps of honey toning deny full brilliance. Carefully preserved, and a worthwhile representative of this introductory issue. (#7356)
- 4267 1921 MS65 NGC.** Lustrous surfaces display a veneer of light champagne color on the obverse and medium-gray patina on the reverse. Typical design softness shows in the obverse center, but neither it nor a few grade-consistent marks detract. *Ex: Long Beach (Heritage, 9/2008), lot 3014.* (#7356)
- 4268 1921 MS65 PCGS.** Medium honey-gold and cream-gray toning enriches lustrous and pleasing surfaces. The centers are above average in sharpness given the high relief of the introductory subtype. One spot above the E in ONE. Housed in an old green label holder. *From The Fred Yee Collection.* (#7356)
- 4269 1922-S MS65 NGC. CAC.** Vibrant mint luster and well-detailed design elements are the hallmarks of this attractive Gem, with wispy light gold and violet toning. Encapsulated in a prior generation holder. NGC has graded only 13 numerically finer specimens (7/12). *From The Fred Yee Collection.* (#7359)
- 4270 1923 MS66+ PCGS. CAC.** Gorgeous silver-frost luster carries the eye appeal on this well-struck Peace dollar. A rim irregularity is noted near the eagle's tailfeathers on the reverse. (#7360)
- 4271 1923 MS66+ PCGS. CAC.** Boldly frosty with a few dabs of milky patina on silver surfaces. All-around preservation is excellent with only a shallow scrape on Liberty's chin precluding full Superb Gem status. (#7360)

**1923-S Peace Dollar, MS65
One Single Finer Coin at NGC**

- 4272 1923-S MS65 NGC.** The 1923-S Peace dollar is very scarce in Gem condition, and finer examples are virtually unobtainable. This remarkable Gem displays well-preserved lustrous surfaces and well-detailed design elements with attractive light gold patina. Certified in a former generation holder. Census: 76 in 65, 1 finer (7/12). *From The Fred Yee Collection.* (#7362)

4273 1924 MS66+ PCGS. CAC. Frosty on the high points with great shining silver luster, this coin seems a Superb Gem at first glance. Only a few shallow grazes on the cheek and out in the fields preclude such a status. PCGS has graded just 22 pieces as MS67 or better (7/12). (#7363)

4274 1924-S MS64 NGC. CAC. VAM-3. A Top 50 Variety. The reverse leg feathers are lightly die doubled. The VAM is undesignated on the insert. This well preserved and lower mintage silver dollar has medium autumn-gold obverse toning along with hints of steel-gray and lilac. The reverse is close to brilliant but displays faint almond patina. (#7364)

4275 1924-S MS64 PCGS. CAC. An uncommonly bold strike and a wealth of silver-white mint frost distinguishes this example of a date often described as difficult to find with such qualities. Great eye appeal, especially for a near-Gem. (#7364)

Gem 1924-S Peace Dollar Only One Finer Coin at NGC

4276 1924-S MS65 NGC. Quality control was lax at the San Francisco Mint in 1924 and Peace dollars of that date are seldom encountered in Gem condition, with a decent strike. This well-detailed Gem displays vibrant mint luster under light gold toning, with mottled specks of gray. Housed in a prior generation holder. Census: 68 in 65, 1 finer (7/12).

Ex: Harold Rothenberger Collection (Superior, 2/1994), lot 2159. From The Fred Yee Collection. (#7364)

4277 1925 MS66+ PCGS. CAC. This frosty beauty offers a few spots of brilliance on largely untoned surfaces. The obverse has few flaws, though several short nicks appear on the eagle's body. (#7365)

1925 Peace Dollar, Brilliant MS67

4278 1925 MS67 NGC. This is a marvelous Peace dollar type coin. It is unusual in that it lacks the reddish-golden toning often seen. Instead, the surfaces are brilliant and exhibit remarkably bright, vibrant mint luster. The strike details are complete and there are no mentionable abrasions. (#7365)

Superb Gem 1925 Peace Dollar Outstanding Type Coin

4279 1925 MS67 PCGS. The 1925 is well-known as one of the most available and attractive type coins in the Peace dollar series. It is surprising for a coin with more than 10 million pieces minted, that after 26 of certifying coins PCGS has only graded 74 1925 dollars in MS67 (7/12). The surfaces are remarkably smooth and problem-free, and each side has varying degrees of golden-brown toning intermixed with lilac. The central strike details are strong, as one would expect. (#7365)

4280 1925-S MS64 NGC. CAC. This faintly toned Choice Peace dollar has booming luster and only moderate incompleteness of strike at the centers. The obverse is well-preserved, though the reverse displays wispy marks. The 1925-S is a better date seldom offered in finer grades. NGC has graded just 63 examples as MS65 or better (7/12). (#7366)

4281 1925-S MS64+ PCGS. CAC. Though softly struck, this piece has all the luster a collector could want. Deep, dappled blue-gray and green hues enrich each side, though a few small marks and scrapes preclude Gem status. (#7366)

1925-S Peace Dollar, MS65 Important Conditional Rarity

4282 1925-S MS65 NGC. One of the rarest issues in the series at the MS65 level, much more so than the traditional 1928 and 1934-S keys. This is a remarkably unabraded Gem whose lustrous surfaces display delicate almond-gold and slate toning. The centers show minor incompleteness. Certified in a former generation holder. Census: 63 in 65, 0 finer (7/12).
From The Fred Yee Collection. (#7366)

4283 1926 MS66 NGC. Orange-gold and violet dapples grace the broadly lustrous surfaces of this Premium Gem. The obverse is close to mark-free, though a line of reed-marks is noted just above the eagle's tailfeathers. Census: 47 in 66, 1 finer (8/12). (#7367)

1926-D Dollar, Satiny MS66

4284 1926-D MS66 PCGS Secure. The 1926-D is an often-overlooked issue in the Peace dollar series. The mintage was a generous 2.3 million pieces, but high-grade coins remain elusive. This example certainly deserves the high grade it has been accorded. The silky surfaces are free from any noticeable abrasions, and the strike is well-defined throughout. The light yellow-golden patina shows a slight accent of lilac over the eagle on the reverse. PCGS has seen only eight finer (8/12). (#7368)

4285 1927 MS65 PCGS. After bountiful mintages at Philadelphia between 1922 and 1925, production dwindled by 1927 to less than 850,000 pieces, since silver dollars melted by the Pittman Act had largely been replaced. Well preserved and lustrous with light pearl-gray toning. Housed in a green label holder. From The Fred Yee Collection. (#7370)

Gem 1927-D Peace Dollar Just Three Finer Coins at NGC

4286 1927-D MS65 NGC. Among Denver Mint Peace dollars, the 1927-D is the second-rarest issue in high grade, as most Mint State examples were roughly handled in storage and show excessive bagmarks. This impressive Gem is well-detailed and lustrous, with pleasing shades of golden-brown toning. Housed in a prior generation holder. Census: 74 in 65, 3 finer (7/12). From The Fred Yee Collection. (#7371)

4287 1927-S MS64 NGC. VAM-3. A Top 50 Variety. The variety is undesignated on the NGC insert. Die doubling on the leaves and stems of the olive branch identifies VAM-3. However, any Choice 1927-S is desirable due to a low mintage and conditional scarcity. Lustrous and close to Gem with pastel honey-gold and powder-blue toning. (#7372)

4288 1927-S MS64 NGC. VAM-1D. Close to brilliant and highly lustrous with smooth surfaces save for moderate marks at the top of the tail. The fields display heavy die polish lines in various places, and rays beneath DOLLAR are lightly reengraved (as made), particularly the ray at the rightmost leaf tip. (#7372)

4289 1927-S MS64+ PCGS. Semifrosted, bright luster is largely silver with aspects of green-gold near the rims. A nick at the right truncation of the bust leaves an otherwise Gem coin just shy of the mark. (#7372)

1927-S Peace Dollar, MS65 Just One Numerically Finer at NGC

4290 1927-S MS65 NGC. The 1927-S Peace dollar boasts a low mintage of 866,000 pieces and high-quality examples are even more elusive than this small figure would suggest. This well-detailed Gem displays vibrant mint luster under light gold toning. Encased in a former generation holder. Census: 75 in 65, 1 finer (7/12). Ex: Harold Rothenberger Collection (Superior, 2/1994), lot 2177. From The Fred Yee Collection. (#7372)

4291 1928 MS64 PCGS Secure. One of the traditional keys to the set, desired in any grade. This near-Gem 1928 Peace dollar shows satin frost on both sides with silver-gray patina and a sharp strike on the central high points. A few scattered, minor marks preclude Gem status. (#7373)

Gem 1928 Silver Dollar Low-Mintage Collector Favorite

4292 1928 MS65 PCGS. Delicate golden-gray toning graces this coruscating and crisply struck Gem. Uncommonly smooth for the grade aside from one slender bagmark on the eagle. The 1928 has less than half the mintage of any other Peace dollar issue, and becomes a formidable rarity above the MS65 level. Encapsulated in a green label holder. From The Fred Yee Collection. (#7373)

1928 Peace Dollar, MS65 Small-Production Key to the Series

4293 1928 MS65 PCGS. CAC. The 1928 has an enduring popularity with collectors of this short series. Only 340,649 pieces were struck, the lowest mintage in the series. This is a lovely, original coin whose frosty-textured features are sharply detailed in all areas. Warm, billowy, silver-gray patina envelops both sides and deepens to tan-copper hues at the upper and left obverse rims. There is not a single outwardly distracting bagmark. Ex: Santa Clara Signature (Heritage, 11/2002), lot 6846. (#7373)

4294 1928-S MS64 NGC. CAC. Attractive golden-brown toning visits the margins of this lustrous and well preserved near-Gem. Ice-blue and wheat-gold blend across the fields and motifs. Well preserved though incompletely struck at the centers. Housed in a prior generation holder.
From The Fred Yee Collection. (#7374)

4295 1928-S MS64+ PCGS. CAC. Delicate caramel-gold toning denies full brilliance on this lustrous better date silver dollar. Minor contact on the base of Liberty's neck determines the grade. IN GOD WE TRUST shows significant die doubling on the letters near Liberty's neck. (#7374)

Well-Struck Gem 1928-S Peace Dollar Foremost Series Rarity in This Grade

4296 1928-S MS65 NGC. The 1928-S Peace dollar is now generally acknowledged by specialists to be the conditionally rarest issue of the series in Gem condition. Circulated examples are as common as can be, but few Mint State examples survive. This Gem makes the grade due to the softly glowing frosted luster that prevails on each side, with a better-than-average strike producing detail in the central hair on the obverse and even the highest eagle feathers on the reverse. The obverse is mostly untoned silver-gray, while the reverse shows flecks of russet and aqua. Census: 38 in 65, 1 finer (7/12).
From The Fred Yee Collection. (#7374)

4297 1934-D MS65 NGC. Medium D. This magnificent Gem displays razor-sharp definition on all design elements, and the vibrant mint luster adds to the extraordinary visual appeal. The 1934-D was a well-produced issue, and this coin is an outstanding example of that high-quality mintage. (#7376)

4298 1934-D MS65 PCGS. VAM-3. A Top 50 Variety. Medium D. The obverse is nicely die doubled, prominent on the profile and GOD WE. Undesignated by VAM since it is certified in an old green label holder. Lustrous and lightly abraded with a russet-brown obverse and an almond-gold reverse.
From The Fred Yee Collection. (#7376)

Scarce MS63 1934-S Dollar

4299 1934-S MS63 PCGS. Close to brilliant, though a few pale gray freckles are on the cheek and the field before the profile. A well struck and lustrous example of this key Peace dollar issue. Marks are surprisingly minimal for the Select level. Minute die doubling is present on the monogram and the tips of the rays near ONE. (#7377)

1934-S Dollar, Richly Toned MS64

4300 1934-S MS64 NGC. The mintage of just over a million coins was the first tip-off for collectors from previous decades that the 1934-S was a coin worth pursuing. It was also an issue that was genuinely difficult to locate, especially in high grades. Unlike most 1934-S dollars, this piece has significant toning, in this case reddish-russet on each side but notably deeper in hue on the reverse. Attractive and minimally abraded. (#7377)

Gem 1934-S Peace Dollar Key Date in High Grade

4301 1934-S MS65 PCGS. The 1934-S Peace dollar is an important low-mintage key, not usually seen with attractive light gold toning. This delightful Gem offers well-detailed design elements and vibrant mint luster. Housed in a green label holder. PCGS has graded only 24 finer coins (7/12).
From The Fred Yee Collection. (#7377)

4302 1935 MS66 NGC. A smooth and satiny Premium Gem example of the last circulating silver dollar issue struck at Philadelphia. Occasional suggestions of golden color appear when the obverse is tilted at certain angles to the light. Census: 73 in 66, 4 finer (8/12). (#7378)

4303 1935-S MS65 PCGS. The satiny surfaces of this Gem Peace dollar are pristine and lustrous with faint champagne toning on both sides. Delicate splashes of peripheral gold toning enhance the eye appeal. (#7379)

- 4304 1935-S MS65 PCGS. CAC.** Three rays beneath ONE. This silver-gray Gem displays potent luster and only a few minor obverse grazes. The cheek and reverse are well preserved. Encapsulated in a green label holder.
From The Fred Yee Collection. (#7379)

PROOF SUSAN B. ANTHONY DOLLARS

- 4305 1981-S Type Two PR70 Deep Cameo PCGS.** The ever-popular Type Two 1981-S proof Susan B. Anthony dollar also counts as the series key. This is a technically flawless specimen with absolute contrast. Population: 99 in 70 Deep Cameo (7/12). (#99595)
- 4306 1981-S Type Two PR70 Deep Cameo PCGS.** Great quality and contrast on this Type Two Susan B. Anthony dollar, the rarer variety for the last San Francisco proof issue of the series. Neither side shows any post-striking faults. PCGS has assigned just 99 pieces this ultimate grade (7/12). (#99595)
- 4307 1981-S Type Two PR70 Deep Cameo PCGS.** By far the scarcer of the two mintmark styles for the issue. Ice-white motifs display unimprovable contrast with darkly reflective fields. A pristine example of a modern scarcity. (#99595)

SACAGAWEA DOLLARS

- 4308 2000-P Goodacre MS68 PCGS.** Sculptor Glenna Goodacre received 5,000 examples of the 2000-P Sacagawea dollars as her payment for her idealized obverse design. Unlike business strike examples or the deep mirror proofs, the Goodacre dollars have a special finish, imparted by the Mint prior to release. The present lot resides in a PCGS holder with an insert signed by Philip N. Diehl, who was Mint director at the advent of the series. (#99584)
- 4309 2000-P Goodacre MS68 PCGS.** One of the 5,000 2000-P Sacagawea dollars that were bestowed to sculptor Glenna Goodacre as payment for her contribution to the series. Each of those 5,000 pieces has a special glossy to prooflike finish, as issued by the Mint. The present example is in a PCGS holder with an insert signed by Philip N. Diehl, the U.S. Mint Director in 2000. (#99584)

COMMEMORATIVE SILVER

- 4310 1893 Isabella Quarter MS65 PCGS. CAC.** Though the Columbian half dollar type has a mintage of millions of pieces, the Isabella quarter is comparatively rare. The present emerald-green and cream-gray Gem provides potent luster and refreshingly mark-free surfaces. (#9220)
- 4311 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Rich patina carries the eye appeal for this Select Lafayette dollar. Blue and violet patina at the borders yields to medium-gray interiors, the obverse adding scattered gold overlay.
From The William R. Green Collection. (#9222)
- 4312 1900 Lafayette Dollar MS63 NGC. DuVall 1-A.** A very scarce die variety. Peach-gold peripheries endow this otherwise brilliant silver dollar. The obverse is lustrous and the reverse is satiny. Well struck and attractive with light planchet chatter on Washington's cheek.
From The Dr. Charles Nelson Collection. (#9222)
- 4313 1900 Lafayette Dollar MS64 NGC. DuVall 1-B.** Caramel-gold peripheries frame the ice-blue and stone-gray fields and devices. Lustrous and nicely struck with an impressively unabraded appearance. We note a small area of sea-green toning beneath the branch. (#9222)
- 4314 1900 Lafayette Dollar MS64 PCGS. DuVall 1-A.** The second-rarest die variety, identified by the large leaf at the bottom of the laurel branch. This lustrous near-Gem shows delicate almond-gold toning and a good strike. Minor contact appears on Washington's cheekbone and in the right obverse field. (#9222)
- 4315 1900 Lafayette Dollar MS64 NGC. CAC. DuVall 1-B.** Splashes of autumn-gold, jade-green, and gunmetal-blue encompass this coruscating and well impressed near-Gem. Evaluation beneath a lens locates only a couple of unimportant marks. (#9222)

Smooth Gem 1900 Lafayette Dollar Conditionally Elusive

- 4316 1900 Lafayette Dollar MS65 NGC. DuVall 1-B.** Splashes of orange toning near the rims overlie the stone-gray surfaces of this lustrous commemorative dollar. Well struck and coruscating with immaculate fields and only a couple of unimportant hair-thin marks on the conjoined portraits. Lafayette dollars are generally available in AU55 through MS64 grades but full Gems are elusive. (#9222)
- 4317 1921 Alabama MS65 NGC.** Light caramel-gold and apple-green toning adorns lustrous and lightly marked surfaces. The strike is generally sharp though the eagle's claws and leg feathers show some softness. (#9224)
- 4318 1921 Alabama MS66 NGC.** Chestnut-gold and slate-gray encompass this shimmering Alabama commemorative. The eagle's leg feathers show only slight incompleteness, and the fields are devoid of contact. Census: 75 in 66, 5 finer (7/12). (#9224)

1921 Alabama Half Dollar, MS66 Only Two Numerically Finer Coins at PCGS

- 4319 1921 Alabama MS66 PCGS. CAC.** Both Plain and 2x2 varieties of the Alabama Centennial half dollar were struck in 1921, two years after the event was actually celebrated. This delightful Premium Gem represents the Plain variety and displays well-detailed design elements, satiny mint luster, and accents of light gold toning. Population: 86 in 66 (3 in 66+), 2 finer (7/12). (#9224)
- 4320 1936 Albany MS67 PCGS.** Straw-gold and powder-blue blend throughout this lustrous high grade half dollar. A couple of tiny aqua flecks on the maple leaves are of little import. Population: 93 in 67 (2 in 67+), 1 finer (7/12). (#9227)
- 4321 1935-D Arkansas MS67 PCGS. CAC.** Silver-blue and green-gold overall with amber tints prominent at the right obverse. A smooth Superb Gem, among the finest of this issue of 5,505 pieces. Population: 45 in 67 (6 in 67+), 0 finer (7/12). (#9234)
- 4322 1936-D Arkansas MS67 PCGS.** Luminous medium-gray through the inner obverse with gold and violet elements at the periphery on that side and as overtones through the reverse. Impressively preserved and attractive. Population: 24 in 67, 1 finer (7/12). (#9238)
- 4323 1936-S Arkansas MS67 NGC.** Blue-gray on the interiors with gold-orange aspects on the rims, deeper and more prominent at the reverse. A quality second-year Superb Gem example from an S-mint issue with a four-figure mintage that is a condition rarity at this grade tier. Census: 8 in 67, 0 finer (7/12). (#9239)

4324 1935/34-D Boone MS67 PCGS. The lowest-distribution silver commemorative issue at 2,003 pieces, edging out the 1935/1934-S Boone (2,004) to achieve that honor. The present needle-sharp Superb Gem is immaculate and delicately toned in almond-gold and pearl-gray hues. Population: 53 in 67 (1 in 67+), 7 finer (7/12). (#9263)

4325 1936-S Boone MS67 NGC. Pastel sky-blue and lilac-gray patina graces coruscating and intricately defined surfaces. Pristine save for a tick on the chin of the obverse bust. Census: 33 in 67 (1 in 67+), 1 finer (7/12). (#9268)

4326 1937-D Boone MS67 NGC. Frosty silver overall with only faint suggestions of color. Well-defined and smooth, a gorgeous Superb Gem. The mintage, including assay, amounted to just 2,506 pieces. Census: 25 in 67, 1 finer (7/12). (#9271)

4327 1937-S Boone MS67 PCGS. CAC. Iridescent peach-gold, ruby-red, and apple-green patina graces the peripheries of this pristine and lustrous high grade silver commemorative. E PLURIBUS UNUM is die doubled toward the rim, likely as seen on all examples of the low mintage issue. (#9272)

4328 1936 Bridgeport MS67 NGC. Only 25,015 Bridgeport commemorative half dollars were issued in 1936 and Superb Gem examples are rare today. The present coin displays lustrous surfaces and boldly defined devices with light canary-yellow and antique-gold accents on medium-gray surfaces. Census: 25 in 67, 0 finer (7/12). (#9279)

4329 1925-S California MS67 NGC. This beautiful Superb Gem shows iridescent shades of green, gold, lavender, and amber. The surfaces are lustrous, and the design elements are sharply detailed. Only trivial obverse field grazes limit the grade. (#9281)

Pristine MS67 1925-S California Half

4330 1925-S California MS67 PCGS. CAC. Ocean-blue illuminates the margins while the centers display light caramel-gold and gunmetal-gray toning. Pristine and lustrous with a precise strike. An unusually high grade for the California Diamond Jubilee type, which is most often certified as MS64. Population: 85 in 67, 5 finer (8/12). (#9281)

4331 1936 Cincinnati MS66 PCGS. Caramel-gold and olive-green toning enriches most of this lustrous Premium Gem, though the motifs remain stone-gray. A carefully preserved representative of this very scarce commemorative type. (#9283)

4332 1936 Cincinnati MS66 PCGS. CAC. Gunmetal-blue adorns the obverse along with a wisp or two of peripheral sun-gold. The reverse field is richly patinated in blended peach and apple-green, while the kneeling figure is stone-gray. A high-grade example of this semikey type. (#9283)

4333 1936-D Cincinnati MS66+ NGC. CAC. Iridescent apple-green, lemon-gold, and ruby-red invigorate the reverse periphery, though the remainder of the present Premium Gem is only faintly toned. Lustrous and well preserved with a good strike. A coveted low mintage type. (#9284)

1936-D Cincinnati Half Dollar, MS67 None Certified Finer at NGC

4334 1936-D Cincinnati MS67 NGC. Thomas Melish, the sponsor of the 1936 Cincinnati half dollar, originally requested that the Denver Mint issue number only 2,000 pieces, with the bulk of the authorized 15,000 coins coming from San Francisco and Philadelphia. This plan to create an instant rarity was thwarted by Congress, and the issue was evenly split between the three mints. This spectacular Superb Gem displays well-detailed design elements and lustrous surfaces, with accents of light gold and pink toning. Census: 28 in 67, 0 finer (7/12). (#9284)

Gem 1936 Cleveland Half Dollar 1941 Western Reserve Counterstamp

4335 1936 Cleveland — 1941 Western Reserve Counterstamp — MS65 NGC. Breen-7540. Breen (1988) states 100 pieces were counterstamped in 1941 to celebrate the 20th anniversary of the Western Reserve Numismatic Club. The obverse counterstamp is near the center and replaces the face of Cleveland. The reverse counterstamp is inverted and overlaps the point of the compass. We last offered an example of Breen-7540 in lot 5984 in our 2007 Long Beach Signature.

4336 1936 Columbia MS67 ★ NGC. CAC. An amazing Superb Gem, one of only 74 MS67 examples certified by NGC, with only three finer (7/12). Brilliant ivory luster is visible at the centers, with concentric rings of iridescent toning in the peripheral areas. (#9291)

4337 1893 Columbian MS66+ NGC. Blended jade-green, caramel-gold, and cherry-red augment this satiny and beautifully toned coin. Both sides are remarkably well-preserved, even by Premium Gem standards. An important example of this introductory silver commemorative type. (#9297)

**1893 Columbian Half Dollar, MS67
Only One Finer Coin at NGC**

- 4338 1893 Columbian MS67 NGC.** Olive-green, gunmetal-gray, and fire-red enrich the obverse. Ice-blue and almond-gold consume the reverse. This colorful and lustrous Superb Gem is crisply struck and remarkably unabraded. Although more than 1.55 million pieces were struck, many of these were eventually dumped into circulation. The specialist soon learns the scarcity of high grade examples. Census: 22 in 67, 1 finer (7/12). (#9297)

- 4339 1935 Connecticut MS66 NGC. CAC.** Fire-red, sea-green, and pearl-gray toning ensures the originality. Lustrous and crisply struck with uncommonly clean surfaces. The Charter Oak made a return appearance to commemorative coinage on the 1999 Connecticut Statehood quarter. (#9299)

- 4340 1935 Connecticut MS66 NGC. CAC.** Lightly toned in peach and olive shades. Boldly impressed and highly lustrous with virtually pristine fields and motifs. The large, unadorned eagle on the reverse is an unlikely choice to symbolize the former colony. (#9299)

- 4341 1936 Delaware MS67 NGC. CAC.** Remarkable brick-red and emerald-green toning endows the reverse of this high grade commemorative. The obverse also displays attractive patina, though the blended olive, gray, and tan shades are conventional for the series. (#9301)

- 4342 1936 Delaware MS67 PCGS. CAC.** Pastel apricot-gold, lime-green, and rose-red embrace both sides with the deepest shades on the obverse. Lustrous and well struck with immaculate fields and a remnant of the planchet surface on the lower central sails. Population: 83 in 67 (8 in 67+), 1 finer (8/12). (#9301)

- 4343 1936 Gettysburg MS66 PCGS. CAC.** Grays and golds overall with richer reds at the margins and isolated interior places. Luminous through the patina and an all-around pleasing coin. (#9305)

- 4344 1936 Gettysburg MS66 PCGS. CAC.** Richly toned from gold-gray to amber with crimson partly outlining the reverse margins. Under the toning is a frosty and luminous Premium Gem. (#9305)

- 4345 1922 Grant With Star MS64 NGC.** The luminous obverse has gold and blue overtones across much of that side, while the reverse has only the former color at the margin. A shallow curving cut is noted at the back of Grant's head.
From The William R. Green Collection. (#9307)

- 4346 1922 Grant With Star MS64 PCGS.** Light golden tints appear mainly at the margins of this otherwise silver With Star Grant half dollar. The back of the portrait's head has soft detail, but there are few truly distracting marks.
From The Dr. Charles Nelson Collection. (#9307)

- 4347 1928 Hawaiian AU58 NGC.** A stone-white near-Mint example of the scarcest silver commemorative type. Boldly struck and satiny with surprisingly few marks. A whisper of friction on the cheekbone accounts for the grade. (#9309)

- 4348 1928 Hawaiian MS62 PCGS.** Light gold and green aspects settle over the broadly lustrous surfaces of this Hawaiian half. Wispy abrasions on the obverse account for the grade.
From The William R. Green Collection. (#9309)

**Near-Gem 1928 Hawaii Half Dollar
Low-Mintage Silver Type**

- 4349 1928 Hawaiian MS64 PCGS.** Wisps of honey-gold toning overlie smooth and coruscating cream-gray surfaces. A crisply struck example of the most desirable of all silver commemorative types. The obverse is close to pristine and the reverse has only minor marks. Encapsulated in an old green label holder. (#9309)

**1928 Hawaiian Half Dollar, MS64
Elusive Silver Commemorative Issue**

- 4350 1928 Hawaiian MS64 PCGS.** Among silver commemorative half dollars the 1928 Hawaiian issue is the most difficult coin to locate as a type. The Hawaiian halves were largely distributed to members of the general public in the islands in a small one-year emission of less than 10,000 pieces. This well-detailed Choice example displays lustrous surfaces with only a few minor contact marks.
From The Dr. Charles Nelson Collection. (#9309)

**Choice 1928 Hawaiian Half Dollar
Key Silver Commemorative**

- 4351 1928 Hawaiian MS64 PCGS. CAC.** The 1928 Hawaiian half dollar is one of the key issues in the silver commemorative series, with a distribution total of less than 10,000 pieces. This delightful Choice example exhibits sharply detailed design elements with especially vibrant mint luster. The mostly brilliant surfaces show just an occasional touch of light gold toning. (#9309)

- 4352 1935 Hudson MS64 PCGS.** Though all is forgiven today, many collectors were outraged at the Hudson half in 1935, since it was offered only at a then-exorbitant premium over face. A nicely struck example of the low mintage type. Marks are refreshingly absent, and satin luster swirls about the medium golden-gray surfaces. (#9312)

- 4353 1935 Hudson MS64 PCGS.** Pale silver with broad luster that is uncommonly fine for the issue. Small marks and scrapes appear on the city seal as well as the softly struck ship.
From The Dr. Charles Nelson Collection. (#9312)

4354 1935 Hudson MS66 PCGS. Delicate straw-gold toning embraces the borders of this otherwise untuned Premium Gem. Sharply struck and only faintly marked. Tied with the Spanish Trail as the second lowest mintage silver commemorative type. (#9312)

4355 1935 Hudson MS66 PCGS. CAC. Softly struck as usual, though the luminous gray-toned surfaces with gold and amber edging are remarkably smooth. A solid Premium Gem example of an issue seldom seen finer; PCGS has graded just seven pieces as MS67 or better (7/12). (#9312)

**1935 Hudson Half Dollar, MS67
Among the Finest Certified**

4356 1935 Hudson MS67 NGC. Pleasing shades of champagne-gold and lavender-gray toning enliven the pristine surfaces of this sharply detailed Hudson half dollar. From a small distribution of 10,008 pieces, this popular commemorative is seldom encountered at the Superb Gem level. Census: 28 in 67, 0 finer (7/12). (#9312)

4357 1925 Lexington MS66 NGC. CAC. Variegated peach-gold and blue-gray toning enriches this lustrous and precisely struck Premium Gem. The obverse is unabraded and the reverse displays contact only above the date and northeast of the belfry. (#9318)

4358 1925 Lexington MS66 PCGS. CAC. Delicate honey-gold and sky-gray patina encompasses this satiny and sharply struck Premium Gem. Traces of lavender toning are confined to the obverse rim. Any marks require thorough evaluation to confirm. (#9318)

4359 1925 Lexington MS66 PCGS. CAC. Light to medium sun-gold and stone-gray shades endow this intricately struck and coruscating representative. Only tiny marks are detected. A good value relative to the handful certified finer by PCGS. (#9318)

4360 1925 Lexington MS66+ PCGS. CAC. The butter-gold fields contrast with stone-gray motifs. Lustrous and nearly immaculate with an exemplary strike and impressive eye appeal. One of the few types with a Revolutionary War theme. (#9318)

4361 1925 Lexington MS66+ PCGS. CAC. Ice-blue and almond-gold intermingle across this lustrous and well defined half dollar. A loupe locates only inconsequential imperfections. The Lexington type is rarely encountered any finer. (#9318)

4362 1918 Lincoln MS66+ PCGS. CAC. Brilliant, lustrous, and fully struck. Pristine aside from minor marks on the forehead. The beardless bust of Lincoln was an appropriate choice since he grew out the beard only after his election to the Presidency. (#9320)

**Superb Gem 1936 Long Island Half Dollar
Spectacular Tab Toning**

4363 1936 Long Island MS67 NGC. The obverse of this Long Island Superb Gem has reddish-brown tab toning set against light gray luster. On the reverse, deep blue, violet, and claret-gold hues consume much of the surface. A great example of a commemorative issue seldom found so fine. Census: 52 in 67, 3 finer (7/12). (#9322)

**1936 Long Island Half Dollar, MS67
Only Three Finer Specimens at NGC**

4364 1936 Long Island MS67 NGC. Deep cherry-red and orange peripheral toning surrounds the cream-gray devices. The design elements are well struck and unmarked with remarkable mint frost over each side. An exquisite representative of this tercentenary type. Only a few pieces have been certified above the MS67 level. Census: 54 in 67, 3 finer (7/12). (#9322)

4365 1936 Lynchburg MS67 NGC. Delicate apricot-gold and mint-green toning visits the surfaces of this frosty and highly lustrous Superb Gem. An appealing specimen with few finer certified examples; NGC has registered just three numerically superior pieces (7/12). (#9324)

4366 1934 Maryland MS67 NGC. A lustrous caramel-gold and pearl-gray Superb Gem. Splendidly smooth and boldly impressed. The portrait of Cecil Calvert faces front, unlike his bust left appearance on the rare silver Maryland pieces from the Colonial era. (#9328)

4367 1934 Maryland MS67 PCGS. Light sky-blue and almond-gold toning adorns this nicely struck and thoroughly lustrous Superb Gem. A well preserved and nearly unimprovable representative of a relatively scarce type. Population: 45 in 67 (2 in 67+), 0 finer (7/12). (#9328)

4368 1921 Missouri MS65 NGC. This splendid Gem has medium lilac-gray and apple-green toning. The coruscating surfaces are smooth aside from trivial contact on the left obverse field. A much better silver type. (#9330)

**1921 Missouri Half Dollar, MS65
Popular Plain Variety**

- 4369 1921 Missouri MS65 PCGS. CAC.** An outstanding Gem specimen of the Plain variant of the 1921 Missouri half dollar, with sharply detailed design elements and brilliant unmarked surfaces. This coin displays vibrant mint luster on both sides with abundant eye appeal. Only 10,428 pieces of the Plain variety were distributed. (#9330)

**Gem 1921 Missouri Half Dollar
No '2★4' in Field, Well-Detailed Coin**

- 4370 1921 Missouri MS65 PCGS. CAC.** This impressive Gem represents the Plain variety of the 1921 Missouri half dollar, without the 2★4 notation in the field. The design elements are well-detailed and the lustrous surfaces display shades of dusky bluish-gray toning. PCGS has certified only 30 coins in higher numeric grades (7/12). (#9330)
- 4371 1921 Missouri 2x4 MS65 PCGS. CAC.** The better variety of this scarce statehood type. Dappled russet-brown toning enriches much of the reverse though the obverse displays only delicate olive-gold shades. (#9331)
- 4372 1923-S Monroe MS65 PCGS. CAC.** Sea-green, powder-blue, and autumn-gold toning graces this lustrous and faintly abraded commemorative half dollar. The Monroe type was sold in quantity, but is conditionally scarce, since most pieces show handling or lack eye appeal due to an indifferent strike and scuffy surfaces. (#9333)
- 4373 1938 New Rochelle MS67 NGC. CAC.** Pearl-gray over the central obverse with an arc of blue on the upper right rim of that side. The lower rim shows orange patina that has broader echoes across the reverse. NGC has certified a scant 14 numerically finer examples (7/12). (#9335)
- 4374 1938 New Rochelle MS67 PCGS. CAC.** The surfaces are highly lustrous, lightly toned, and obviously original. The light gray centers gradually deepen toward the margins, and there are no obvious or detracting abrasions on either side. (#9335)

- 4375 1936 Norfolk MS68 PCGS.** Blended sea-green, autumn-gold, and cream-gray toning embraces intricately struck and coruscating surfaces. An immaculate example of the well made Norfolk type, which has the most verbose legends of any in the commemorative series. (#9337)

- 4376 1925 Norse Thin Planchet MS65 PCGS.** A richly toned Thin Planchet example of the octagonal "honorary commemorative" designed by Fraser. Areas of deep sage, green-gold, and coffee patina enrich each side. Population: 36 in 65, 3 finer (8/12). (#9451)

- 4377 1926-S Oregon MS67 PCGS. CAC.** Sun-gold, lilac, and sea-green toning graces the borders. The lustrous surfaces have only a couple of inconspicuous grazes. Well struck with only trivial incompleteness on the back of the wagon. PCGS has certified fewer than ten coins finer. (#9341)

- 4378 1928 Oregon MS67 PCGS Secure.** This sharply struck Superb Gem has a trace of gold patina and vibrant cartwheel sheen. Exceptional preservation further ensures the eye appeal. Population: 68 in 67 (5 in 67+), 1 finer (7/12). (#9342)

- 4379 1915-S Panama-Pacific MS65 NGC.** Semireflective radiance with unusually pale silver interiors and touches of gold-to-orange at the rims. A shallow luster scrape is noted at the larger obverse figure's hip.
From The Dr. Charles Nelson Collection. (#9357)

1915-S Panama-Pacific Half Dollar, MS66

- 4380 1915-S Panama-Pacific MS66 PCGS.** Five coins were issued during the Panama-Pacific Exposition to commemorate the opening of the Panama Canal, including the 1915-S commemorative half dollar, with a distribution of 27,134 pieces. This impressive Premium Gem displays the satiny, slightly granular surfaces seen on all examples of this issue, with well-detailed devices and pleasing gold and pink patina. (#9357)
- 4381 1937 Roanoke MS67 PCGS. CAC.** Pastel straw-gold and steel-gray shades encompass this sharply struck and highly lustrous Superb Gem. Magnificently preserved and surprisingly affordable given the few pieces certified finer. (#9367)

MS66 ★ 1926 Sesquicentennial Half Dollar

- 4382 1926 Sesquicentennial MS66 ★ NGC.** The Sesquicentennial half dollar is commonplace in typical Mint State but becomes very scarce at the MS65 level and rare any finer. The problem that affects most pieces is the strike, which seldom effaces all the planchet abrasions characteristic of the issue. On the present coin, however, flan chatter is visible only on Washington's cheek. Post-strike contact is absent, though we mention as a pedigree marker a cane-shaped lintmark on Washington's shoulder. The surfaces display vivacious luster and pastel apricot-gold, lime-green, and powder-blue patina. Census: 12 in 66, 6 in 66 ★, 1 finer as 66+ ★ (7/12). (#9374)

- 4383 1935 Spanish Trail MS64 PCGS.** Broadly swirling luster is uncommonly rich through a layer of light antique-gold patina. Though small luster scrapes appear in the fields, this coin has great all-around appeal.
From The Dr. Charles Nelson Collection.(#9376)

- 4384 1935 Spanish Trail MS65 PCGS.** This sharply impressed Gem exhibits light straw-gold toning and coruscant luster. Faint marks beneath Texas merit brief mention. Only the Hawaiian and Hudson types have a similarly low mintage.(#9376)

**Superb Gem 1935 Spanish Trail Half Dollar
Key Silver Commemorative**

- 4385 1935 Spanish Trail MS67 PCGS. CAC.** Designed and promoted by L.W. Hoffecker, the 1935 Spanish Trail half dollar is one of the key dates in the silver commemorative series. This impressive Superb Gem displays razor-sharp definition on all design elements, with satiny mint luster and traces of champagne-gold and lavender-gray toning. PCGS has certified only two numerically finer coins (7/12). (#9376)

- 4386 1925 Stone Mountain MS67 PCGS. CAC.** Light green and gold overtones through the centers intensify to orange toward the upper and lower margins on this attractively patinated Superb Gem. Great luster and all-around eye appeal. PCGS has graded just six pieces as MS68 or finer (7/12).(#9378)

**1925 Stone Mountain Half, MS63
ARK 50 Counterstamp**

- 4387 1925 Stone Mountain — Countermarked 'ARK 50' — MS63 NGC.** The state abbreviation ARK. is placed above LIBERTY and the serial number 50 is entered high on the left reverse field. The Stone Mountain Confederate Monumental Association, which helped to distribute the sizeable mintage of this issue, is the source of the counterstamps. Examples are known to represent each of the former Confederate states, with the serial numbers generally unique and independent of an individual state.

**1925 Stone Mountain Half Dollar, AU55
N. CAR 281 Counterstamp**

- 4388 1925 Stone Mountain — Countermarked 'N. CAR 281' — AU55 NGC.** The state abbreviation N. CAR is entered high in the left reverse field and the serial number 281 is entered on the rock beneath the eagle. Toned golden-brown and stone-gray with lightly handled but unmarked surfaces. Breen discusses the various state counterstamps on page 590 of his 1988 *Encyclopedia*.

- 4389 1925 Vancouver MS66 PCGS. CAC.** A pristine representative whose lustrous surfaces display medium jade-green, golden-brown, and steel-blue patina. An outstanding coin that compares favorably with many higher graded examples.(#9399)
- 4390 1925 Vancouver MS66 PCGS. CAC.** Aquamarine, almond-gold, and pearl-gray embrace this crisply struck high grade half dollar. The surfaces teem with luster and show only minor reverse contact. A lower mintage type.(#9399)
- 4391 1927 Vermont MS66 PCGS. CAC.** Powerful, almost flashy luster radiates from the largely untuned surfaces of this Premium Gem. A single near-vertical stripe of golden patina crosses the reverse, which notes that the coin actually celebrates the sesquicentennial of the Battle of Bennington, since the sesquicentennial of Vermont joining the Union would not come until 1941. In a green label holder.
Ex: Central States Signature (Heritage, 5/2007), lot 2632.
From The Dr. Charles Nelson Collection.(#9401)
- 4392 1946 Booker T. Washington MS67 NGC. CAC.** Exquisite cherry-red, jade-green, and dove-gray ensure the desirability of this patinated Superb Gem. The lustrous surfaces are free from any post-strike contact though the cheek retains faint striations from the planchet prior to coinage.(#9404)
- 4393 1946-D Booker T. Washington MS67 NGC. CAC.** Rich cherry-red and orange fields surround the olive-gray devices. This shimmering and sharply struck Superb Gem is immaculate aside from a trace of planchet chatter (as coined) on the cheek.(#9405)
- 4394 1946-D Booker T. Washington MS67 NGC. CAC.** Blended apple-green and sky-blue consume the obverse. Dappled russet-brown and forest-green encompass most of the reverse, although glimpses of stone-white remain. Satiny and nicely struck with a smooth reverse and faint obverse field grazes.(#9405)
- 4395 1946-S Booker T. Washington MS67 ★ NGC. CAC.** Dramatically toned with rich rose-red, forest-green, and orange-gold throughout both sides. Lustrous and well struck with smooth fields and the usual minor planchet striae on the cheek. Census: 26 in 67 ★, 13 finer with a Star designation (7/12).(#9406)
- 4396 1954-D Washington-Carver MS66 PCGS.** Pastel ice-blue and straw-gold toning accompanies satiny and mark-free surfaces. A good strike with incompleteness evident only on Texas and the cheekbone. Population: 31 in 66, 0 finer (7/12).(#9443)
- 4399 1903 Louisiana Purchase/Jefferson MS65 PCGS.** A lovely yellow-orange Gem of this elusive introductory commemorative gold type. A trace of powder-blue residue is seen on reverse letters. The strike is full except for blending on the dentils beneath ST. LOUIS.(#7443)
- 4400 1903 Louisiana Purchase/Jefferson MS63 Prooflike NGC. CAC.** An impressively reflective representative of this scarce early gold commemorative. Highly attractive for the MS63 grade since the canary-gold surfaces are unblemished. Census: 6 in 63 Prooflike, 4 finer (7/12).(#77443)
- 4401 1903 Louisiana Purchase/McKinley MS65 PCGS.** A beautiful lemon-gold Gem with a whisper of lime-green near the rims and a blush of steel-gray near McKinley's ear. The lustrous and smooth surfaces are crisply impressed.(#7444)
- 4402 1903 Louisiana Purchase/McKinley MS66 NGC. CAC.** Well-defined with bright luster and a mix of golds and oranges on each side, including a few small coppery areas at the right reverse rim. Impressive eye appeal for this first U.S. coin issue to depict a person who lived in the 20th century.(#7444)
- 4403 1904 Lewis and Clark MS64 PCGS. CAC.** Bright swirling luster on each side with a touch of green to the gold. Both portraits are well-defined with just a hint of frostiness on the faces.(#7447)
- 4404 1905 Lewis and Clark MS63 PCGS.** A luminous, diffusely reflective example with a significantly patinated obverse but a near-brilliant reverse. The obverse portrait has softer detail than usually seen, but there are immediately apparent faults.(#7448)
- 4405 1905 Lewis and Clark MS63 PCGS.** A lustrous yellow-gold example of this early commemorative type. Glimpses of deep orange are confined to the peripheries. A few faint hairlines near the profile of Clark correspond to the designated grade.(#7448)
- 4406 1905 Lewis and Clark MS64 NGC.** Both sides are semireflective, the obverse moreso. Yellow-gold surfaces show a small coppery area at the R of AMERICA on the reverse. A pleasing second-year Lewis and Clark gold dollar.(#7448)
- 4407 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** Olive-green and apricot-gold compete for territory across lustrous and beautifully preserved surfaces. A boldly impressed example of this popular type. The canal worker depicted is often mistaken for a baseball player by present-day collectors.(#7449)
- 4408 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** A decisively struck khaki-gold Gem of this attractively designed type. Sweeping cartwheel luster brightens immaculate surfaces. Decades in the making, the Panama Canal was a landmark achievement in an era before commercial aviation.(#7449)

**1936 Wisconsin Half Dollar, MS68
None Certified Finer**

- 4397 1936 Wisconsin MS68 NGC. CAC.** Peach-gold, cherry-red, emerald-green, and lilac-gray toning blankets this lustrous and fully struck classic silver commemorative. Only a graze beneath the L in TERRITORIAL precludes numismatic perfection. Those in search of a gorgeously toned Wisconsin need look no further. Census: 23 in 68, 0 finer (7/12). (#9447)

COMMEMORATIVE GOLD

- 4398 1903 Louisiana Purchase/Jefferson MS64 PCGS.** Moderately patinated with a significant peach tint to each side, particularly the obverse. Swirling luster has more flash on the reverse.(#7443)

**1915-S Pan-Pac Quarter Eagle, MS64
Sharply Detailed and Well-Preserved**

- 4409 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** The 1915-S Panama Pacific quarter eagle was produced as part of a five-coin program to commemorate the opening of the Panama Canal at the Panama-Pacific Exposition, with a distribution of 6,749 pieces. This sharply detailed Choice example displays well-preserved orange-gold surfaces, with a few highlights of lilac, and satiny mint luster. (#7450)

**1915-S Panama-Pacific Two and a Half
Bright, Lustrous, High-End MS64**

- 4410 1915-S Panama-Pacific Quarter Eagle MS64 NGC. CAC.** This is a just-miss Gem. The surfaces display exceptional mint luster and are refreshingly clean, with only two exceptions. There is a hairline-thin scratch across the neck of the hippocampus and a pair of tiny divot-like planchet flakes on the extended arm of Liberty. Outstanding quality overall. (#7450)

**1915-S Panama-Pacific Quarter Eagle, MS64
Remarkably Clean Surfaces**

- 4411 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. CAC.** The Pan-Pac quarter eagle has an interesting design on each side. The obverse instructs the viewer about what a hippocampus is, while the reverse is a throwback to an 1879 pattern. This near-Gem has subdued mint luster, clean surfaces, and just a tinge of green intermixed in the orange-gold color. (#7450)

**Gem 1915-S Panama-Pacific Two and a Half
Orange-Gold, Satiny Surfaces**

- 4412 1915-S Panama-Pacific Quarter Eagle MS65 NGC.** This impressive Gem displays bright orange-gold color over satiny mint luster. Each side is largely free from abrasions, certainly any that are worthy of individual mention. The Pan-Pac quarter eagle is one of the keys to the commemorative gold series, and Gems are eagerly pursued by collectors.
From The William R. Green Collection. (#7450)

**1915-S Panama-Pacific Quarter Eagle, MS66
Essentially Mark-Free Surfaces**

- 4413 1915-S Panama-Pacific Quarter Eagle MS66 PCGS.** The obverse of the Pan-Pac quarter eagle is rife with symbolism. Columbia holds a caduceus, which symbolized the victory over yellow fever and malaria, both diseases slowed the completion of the Panama Canal. This wonderful, highly lustrous example is essentially free from abrasions. (#7450)

- 4414 1916 McKinley MS65 PCGS.** Apricot and lime shades enrich this fully struck and satiny example. A single curly lintmark (as issued) is noted on the back of McKinley's neck. Commemorative gold has fallen out of favor in recent years allowing purchase of Gems at comparably low prices. (#7454)

- 4415 1916 McKinley MS65 PCGS.** Reddish-golden and lilac patina covers the frosted surfaces of the obverse, while the reverse is more evenly coated with red color. The strike details are strong and there are only slight abrasions that are visible with a magnifier. (#7454)

- 4416 1917 McKinley MS64 PCGS.** Bold peach tones streak across the obverse, while the reverse is almost uniformly golden. Both sides of this second-year McKinley near-Gem offer bounteous luster. (#7455)

- 4417 1917 McKinley MS65 PCGS.** Pumpkin-gold centers are encompassed by olive-green margins. Lustrous and mark-free with slight inexactness of strike on the center of the memorial. Housed in an old green label holder. (#7455)

- 4418 1922 Grant No Star MS62 NGC.** Deep butter-gold luster has occasional hints of orange. Long, wispy abrasions affect Grant's portrait and the field just to the right. (#7458)

- 4419 1922 Grant No Star MS64 PCGS.** Pleasingly detailed with broad yellow luster and just a hint of apricot accent. This near-Gem Grant gold dollar's eye appeal is anything but "Plain." (#7458)

- 4420 1922 Grant No Star MS65 PCGS.** Orange and aqua shades endow this lustrous and pristine representative. The strike is sharp except for the tree trunk left of the frame house window. Half dollars were struck with similar designs, an unique occurrence within the classic commemorative series. (#7458)

**1922 Grant No Star Gold Dollar, MS66
Only 5,000 Pieces Struck**

- 4421 1922 Grant No Star MS66 NGC. CAC.** Only 5,000 examples were struck with no star in the field, and these pieces were sold for \$3 each at the time of issue. Many are well-preserved; however, the No Star is not encountered that often with surfaces as clean as seen here. The soft, frosted mint luster is reddish-gold overall but there is an even deeper area of red patina in the center of the reverse. (#7458)

4422 1922 Grant With Star MS64 PCGS. The butter-yellow color of this With Star gold dollar has strong luster to light it up and occasional color variations into straw and apricot. A small coppery area is noted at the edge of Grant's forehead, while the hair in the back of his head has above-average detail. (#7459)

4423 1926 Sesquicentennial MS64 PCGS. Rich butter-gold toning, a sharp strike, and unencumbered cartwheel luster ensure the quality of this pleasing example. Splendidly void of marks though we note a small mint-made strike-through on the lower right drapery. The final gold commemorative prior to 1984. (#7466)

4424 1926 Sesquicentennial MS64 PCGS. Uncommonly fiery luster has occasional orange aspects but mostly is blazing yellow-gold. A small dig between the base of the torch and the drapery precludes a finer grade. Housed in a green label holder. (#7466)

4425 1926 Sesquicentennial MS64 NGC. Deep orange-gold at the margins with paler yellow luster through the centers. The obverse has reed marks to the right of the standing figure and a few abrasions in her drapery. From *The William R. Green Collection*. (#7466)

4426 1926 Sesquicentennial MS64 PCGS. Broadly lustrous with a range of golds, this near-Gem displays well with an unusually clean obverse. A scrape under the word TRUST on the reverse accounts for the grade. (#7466)

1926 Sesquicentennial Two and a Half MS66 ★, Rare With NGC Star

4427 1926 Sesquicentennial MS66 ★ NGC. NGC has assigned the Star designation to only five pieces: an MS64, an MS65, and three as MS66 (7/12). Undoubtedly, it is the rich toning pattern that is responsible for the NGC Star. The fields are sea-green and the devices are peach-gold. The strike is intricate throughout. Wispy grazes determine the grade. (#7466)

MODERN ISSUES

4428 1995-W Olympic/Stadium Gold Five Dollar MS70 NGC. Pale gold and technically perfect. The net mintage of business strikes for the issue was just 10,579 pieces. (#9734)

4429 1997-W Jackie Robinson Gold Five Dollar MS69 NGC. With a net mintage of just 5,202 pieces, the Uncirculated Jackie Robinson five dollar coin is a key date in the modern commemorative series. This satiny near-perfect example has even, pale yellow color and a characteristically sharp strike. (#9759)

2000-W Library of Congress Ten, MS70 Gold/Platinum Bimetallic Composition

4430 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS. The 2000-W Library of Congress ten dollar commemorative is the first gold/platinum bimetallic coin ever issued by the United States, with a mintage of just 6,683 pieces. This specimen is a technically perfect coin, with sharply detailed design elements, satiny mint luster, and flawless surfaces. (#9784)

4431 2001-W Capitol Visitor's Center Half Eagle MS69 NGC. The Uncirculated 2001-W Capitol Visitor Center gold five is always in demand due to its limited mintage of 6,761 pieces. This virtually perfect specimen is fully struck and lustrous, with no mentionable flaws. (#9792)

4432 2011-W Eliza Johnson First Strike PR70 Deep Cameo PCGS. Flawless contrast and surface preservation define this technically perfect half-ounce gold piece. Just 103 of these proofs have received the ultimate grade from PCGS (8/12). (#506980)

MODERN BULLION COINS

1987 Silver Eagle, All-Brilliant MS70

4433 1987 Silver Eagle MS70 PCGS. More than 11 million Silver Eagles were struck in business strike format in 1987. Hundreds of examples are available in MS69, but there is a sheer drop-off in availability in MS70 with only 10 pieces certified by PCGS. This is an all-brilliant example that has swirling mint luster and the perfect surfaces one would expect. (#9808)

4434 1987-S Silver Eagle PR70 Ultra Cameo NGC. Darkly reflective fields compare favorably with ice-white legends and devices. This intricately impressed second-year specimen is perfect aside from a pinpoint imperfection beneath the right end of the banner. (#9809)

**1993-P Silver Eagle, PR70 Ultra Cameo
First-Year Proof From Philadelphia**

4435 1993-P Silver Eagle PR70 Ultra Cameo NGC. Struck as a part of the "Philadelphia Set" struck to commemorate the 200th anniversary of the striking of coins in the Philadelphia Mint, this was the first year Silver Eagles were struck as proofs. This is an all-brilliant example, which is noteworthy as many pieces in original holders have toned purple. Starkly contrasted on each side and deeply reflective fields. (#9867)

4436 1994-P Silver Eagle PR70 Ultra Cameo NGC. Thickly frosted motifs display outstanding contrast relative to the mirrored fields. A pristine and needle-sharp example of this lower mintage proof date. Only a tiny percentage of certified pieces have achieved the ultimate grade. (#9877)

**1995-W Silver Eagle, PR69 Deep Cameo
The Undisputed Key to the Series**

4437 1995-W Silver Eagle PR69 Deep Cameo PCGS. The 1995-W is the well-known key to this highly collectible series. On the PCGS CoinFacts website, Jaime Hernandez observes that the Silver Eagle was a bonus coin for customers who ordered the \$999 four-piece gold set, all they had to do was indicate they wanted the free coin. This once-free coin ended up surpassing the values of all four gold coins combined! This marvelous, deeply mirrored and heavily frosted example shows essentially perfect surfaces. (#9887)

**1995-W Silver Eagle, PR69 Deep Cameo
The Undisputed Series Key**

4438 1995-W Silver Eagle PR69 Deep Cameo PCGS. The Silver Eagle series is generally a completable one for the average collector. But even the Silver Eagle series has its stumper. The low, low mintage of only 30,125 proofs makes this the undisputed key to the series. This all-brilliant proof is deeply mirrored with thickly frosted devices. One would be hard-pressed to find what sets this coin apart from one graded PR70. (#9887)

**PR70 Ultra Cameo 1995-W Silver Eagle
All-Brilliant, Starkly Contrasted**

4439 1995-W Silver Eagle PR70 Ultra Cameo NGC. In the proof series of Silver Eagles, most mintages are in the hundreds of thousands. The 1995-W stands out as the key issue with a paltry mintage of only 30,125 pieces. This all-brilliant example has thickly frosted devices and very deep mirrors in the fields. The surfaces do indeed appear perfect, as indicated by the grade. (#9887)

4440 1997-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC. First year of issue for platinum coins, and the 1997-W is very scarce when compared to an almost-perfect PR69 coin (four times as many PR69 coins have been certified). This is a dazzling, strongly contrasted proof with no surface imperfections. (#9751)

4441 1999-W Quarter-Ounce Gold Eagle — Struck from Unfinished Proof Dies — MS69 PCGS. Proof dies in an "in-between" step of preparation were used to strike this piece, which shows a similarly "in-between" appearance that is neither Uncirculated nor proof. The surfaces, whatever they may be, are near-flawless.

4442 1999-W Quarter-Ounce Gold Eagle — Unfinished Proof Dies — MS69 PCGS. Not quite a proof but clearly "something more," this "uncirculated finish" quarter-ounce gold eagle was struck by unfinished proof dies. A near-perfect example of the distinctive error.

4443 2000-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC. Unimprovable white-on-black contrast and an exemplary strike confirm the production quality of this immaculate specimen. A single-year type, as are all proof platinum eagles. (#99782)

4444 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. Struck in 2009 as a reprise of the 1907 variant of the double-thick twenty dollar designed by Augustus Saint-Gaudens, these coins were an immediate hit with collectors and remain so today. This is a bright yellow-gold example that appears to be as perfect as the grade states. (#407404)

4445 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. Perfection is achieved by this intricately impressed high relief modern delicacy. The pristine fields are concave and flashy. Perhaps 2007 would have been a better year for the issue, as that marked the centennial of the Saint-Gaudens design. (#407404)

4446 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC. The concave yellow-gold surfaces are pristine and luminous. A razor-sharp strike confirms perfection. An unusual modern issue championed by former Mint Director Edmund Loy. (#407404)

4447 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS. The concave fields are flashy and flawless. The needle-sharp strike and seamless sun-gold color further confirm the exquisite quality. Struck with the diameter of a ten dollar eagle but on a double-thick flan, inspired by the Judd-1917 pattern held by the Smithsonian. (#506602)

COINS OF HAWAII

4448 1847 Hawaii Cent MS63 Brown PCGS. Medcalf 2CC-2. Crosslet 4. Glimpses of mint red linger in the legends of this mostly medium brown example. Crisply struck, satiny, and void of visible marks. A few minor spots are relegated to obscure locations. A rim cud is noted on the reverse at 4:30. (#10965)

**Gem 1883 Hawaii Half Dollar
Only One Numerically Finer at PCGS**

- 4449 1883 Hawaii Half Dollar MS65 PCGS.** The 1883 Hawaii half dollar claims a mintage of 700,000 pieces and examples in Gem condition are quite rare. This attractive Gem is sharply detailed throughout, with lustrous surfaces that show few signs of contact. Accents of gray and lavender patina visit the surfaces of both sides. Population: 14 in 65 (1 in 65+), 1 finer (7/12). (#10991)

- 4450 1871 Hawaii Wailuku, Narrow Starfish VF20 PCGS. Medcalf 2TE-2.** A medium brown example with minutely granular and striated surfaces. The large die break at 4:30 is usual for the variety. Listed on page 406 of the 2013 *Guide Book*. Population: 4 in 20, 7 finer (7/12).(#600503)

EXPOSITIONS AND FAIRS

- 4451 1962 Seattle World's Fair Gold Space Needle Medal MS65 NGC.** Struck in 14K gold alloy, this crown-sized medal celebrates a modern architectural marvel. The Space Needle features the (then) "world's largest revolving restaurant" at "600 feet in the sky." An unabraded caramel-gold representative with matte fields and mirrored legends.

HARD TIMES TOKEN

- 4452 1837 Feuchtwanger Cent MS65 PCGS. Low-120, HT-268, Breen 6-I, R.1.** A satiny olive-gold and pale tan Gem. Void of marks, and the strike is crisp except for the unavoidable incompleteness on the EN in CENT. A mint-made retained lamination extends from the eagle's body to the 18 in the date. Listed on page 400 of the 2013 *Guide Book*.
Ex: Liberty Collection, Part Three (Heritage, 5/2008), lot 2080, which realized \$1,265.

ERRORS

**Double Denomination 2000 Cent
MS68, Struck on a 2000-P Dime**

- 4453 2000 Lincoln Cent — Struck on a 2000-P Dime — MS68 NGC.** The cent date is bold. The left half of the dime mintmark is clear, though the dime date is very faint. The flame of the torch is near Lincoln's shoulder. Roosevelt's bust is close to inverted relative to the Memorial and he gazes east. Brilliant with booming luster and exquisite preservation.

**2001 Cent on a 2001-P Dime
Double Denomination, MS67**

- 4454 2001 Lincoln Cent — Struck on a 2001-P Dime — MS67 NGC.** This double denomination error has booming luster, a mark-free appearance, and delicate tan-gray toning. The cent date is sharp aside from the 1, which is faint but can be discerned. The dime date is readable on the reverse exergue. Roosevelt's head is nearly parallel to the Memorial and gazes northwest.

**2001 Cent on a 2001-P Dime, MS67
Eleven-Cent Piece**

- 4455 2001 Lincoln Cent — Struck on a 2001-P Dime — MS67 NGC.** The cent date is clear. The dime date and mintmark are faint but discernible above LIBERTY. Relative to the portrait of Lincoln, Roosevelt is nearly inverted and gazes northeast. The flame of the torch is above ONE. Lustrous and smooth with a hint of chestnut toning.

**MS68 2001 Lincoln Cent
Overstruck on a Dime**

- 4456 2001 Lincoln Cent — Struck on a Struck Dime — MS68 NGC.** A double denomination mint error. The dime mintmark is evident near the upper left corner of the Memorial, as is the 2 in the date. The cent date is bold. Roosevelt is nearly inverted relative to the Memorial. Untoned and highly lustrous with ideal preservation.

Choice AU Key Date 1885 Nickel
Struck on a Thin Planchet

- 4457** 1885 Liberty Nickel — Struck on a Thin Planchet — AU55 NGC. 3.31 gm. The 1885 is the key to the Liberty nickel series, but the present pearl-gray example is of interest to error collectors due to its undersized flan. The expected weight is 5.0 gm. Due to the thin planchet, the strike is soft on the stars and forehead curl, but the extent of bright luster corresponds to the Choice AU grade.

1901 Nickel on a Cent Planchet
Uncirculated Details

- 4458** 1901 Liberty Nickel — Struck on a Cent Planchet, Improperly Cleaned — NGC Details. Unc. 3.2 gm. Aligned with the collar at 3:30. The left-side dentils are absent as a few outer star points. The legends are intact. Satiny and unabraded but retoned in lavender, rose, and navy-blue shades. Liberty nickels struck on wrong planchets are decidedly rare.

1974-D Quarter on a Cent Planchet
MS64 Red

- 4459** 1974-D Washington Quarter — Struck on a Cent Planchet — MS64 Red NGC. 3.05 gm. Cherry-red overall with cobalt-blue high points. This off metal error is aligned with the collar at 6:30. The date is bold and the mintmark is evident though blurry. LIBERTY and (appropriately) the denomination are off the flan. No marks are visible, and the slightly oval-shaped surfaces display cartwheel luster.

Gem 1988 One-Ounce Gold Eagle
With Obverse Strike-Through

- 4460** 1988 One-Ounce Gold Eagle — Obverse Struck Through — MS65 NGC. The struck-through object is absent but was most likely a thin piece of plastic film. The strike-through is shallow with the shape of a pea pod and is found at 3 o'clock on the obverse. This butter-gold Gem is crisply struck and coruscating with only unimportant contact.

MS69 Struck Through Obverse
1999 One-Ounce Gold Eagle
Strike-Through Object Included

- 4461** 1999 One-Ounce Gold Eagle — Struck Through Obverse — MS69 PCGS. A fairly large but shallow flag-shaped strike-through affects the left obverse. In virtually all such cases, the struck-through object is lost, but the consignor has attached in a flip the small, thin plastic film that passed between the obverse die and the present coin as the piece was struck. As made with light peach toning on the obverse and rich orange-gold toning on the reverse.

Partial Collar on a 1902-O Morgan, MS66

- 4462** 1902-O Morgan Dollar — Partial Collar — MS66 NGC. The holder allows viewing of the edge, which shows only partial reeding. Reeding is present near the reverse but absent near the obverse. The eagle's breast displays several die scratches, an interesting attribution project for the VAM enthusiast. The almond-gold surfaces are sharply struck and lustrous with smooth fields and only minor facial grazes. Significant mint errors on silver dollars are rare, with high grade examples especially desirable.
Ex: Long Beach Bullet (Heritage, 10/2000), lot 880.

GSA DOLLARS

- 4463 1880/79-CC Reverse of 1878 MS65 NGC. VAM-4.** A Top 100 Variety. A semiprooflike and essentially untuned Carson City Gem with coruscating luster and an exceptionally clean reverse. The obverse exhibits only delicate abrasions. (#7108)
- 4464 1881-CC MS65 NGC. CAC. VAM-2.** The obverse is richly patinated in mauve, forest-green, and walnut-brown toning. The reverse is brilliant. This lower mintage GSA dollar is well struck and has minor grazes on the cheek. Included are the certificate and black box of GSA issue. (#7126)
- 4465 1882-CC MS65 NGC, CAC, untuned and lustrous with a good strike and clean surfaces; 1883-CC MS65 NGC, CAC, VAM-5A,** crisply struck and stone-white with exemplary preservation, the N in IN is clashed; **and an 1884-CC MS65 NGC, CAC,** nearly brilliant with booming luster and light mint-made roller marks on the cheek. Each of the three GSA Carson City dollars retains its certificate and black cardboard GSA box. (Total: 3 coins) (#7134)
- 4466 1883-CC MS65 NGC.** The reverse displays remarkable multicolor toning, with ruby-red, peach-gold, and aquamarine across all but the lower right margin. The obverse has only a wisp of apricot patina on the left obverse field. The black box and certificate of GSA issue accompany the lot. (#7144)
- 4467 1884-CC MS65 ★ NGC. VAM-2.** Splashes of cherry-red, jade-green, powder-blue, and sun-gold dominate most of the obverse, though an area of brilliance persists between 8 o'clock and 12:30. The reverse has only a wisp of peach patina on the upper left margin. The 1 in the date is repunched. The GSA black box and certificate accompany the lot. (#7152)
- 4468 1884-CC MS65 ★ Prooflike NGC. CAC.** Spectacular powder-blue, peach-gold, and rose-red patina endows the left half of the obverse. Similar colors visit the reverse but only on a slender portion of the left margin. The surfaces are flashy and any marks are relegated to toned areas. (#7153)
- 4469 1890-CC MS62 NGC.** This lustrous CC-mint silver dollar shows only a trace of gray patina. The reverse is well preserved though the obverse has scattered abrasions. The black box of GSA issue is included but no certificate is present. (#7198)
- 4470 1891-CC MS61 NGC. VAM-3.** A Top 100 Variety. The familiar "Spitting Eagle" variety. This minimally toned Carson City Morgan possesses dazzling cartwheel luster. Small marks are distributed but unobtrusive for the MS61 level. (#7206)

REDFIELD DOLLARS

- 4471 1883-S MS65 Paramount (MS62 NGC).** Ex: Redfield Collection. The '83-S is conditionally rare, unlike prior San Francisco Morgan issues. The present lustrous example is boldly struck and displays rich rose-red toning at the obverse border. Only lightly abraded though a fingerprint is noted near GOD. (#7148)
- 4472 1886-S MS65 Paramount (MS64 NGC). VAM-2.** Ex: Redfield Collection. A Top 100 Variety. The variety is undesignated on the NGC label. A splendidly preserved near-Gem of this lower mintage issue. Moderate apple-green and russet toning adorns the borders. (#7170)
- 4473 1891-CC MS65 Paramount (MS63 NGC). VAM-3.** Ex: Redfield Collection. A Top 100 Variety. The "Spitting Eagle" variety that constitutes a sizeable portion of the Uncirculated survivors of this popular Carson City issue. A pleasing representative with minor facial marks and peripheral golden-brown and blue-green toning. (#7206)
- 4474 1892-CC MS65 Paramount (MS63 NGC).** Ex: Redfield Collection. This better date silver dollar displays golden-brown and aquamarine peripheral toning. Crisply struck and lustrous with a clean reverse and the expected number of light marks on the left obverse. (#7214)

Choice Redfield 1893-CC Dollar Well-Struck, Attractive Toning

- 4475 1893-CC MS65 Paramount (MS64 NGC).** Ex: Redfield Collection. The final year 1893-CC is among the most valued Carson City Morgan issues. Many examples are softly struck, but the present lustrous near-Gem has an intricate impression. The borders display beautiful forest-green and cherry-red toning. The fields are well preserved, and only moderate facial marks determine the grade. (#7222)

Better Date 1896-S Silver Dollar MS62, Housed in Paramount Holder

- 4476 1896-S MS65 Paramount (MS62 NGC).** Ex: Redfield Collection. This conditionally rare San Francisco silver dollar has a nearly brilliant obverse although the reverse displays chestnut-gold and sea-green shades throughout the margin. Minimally abraded except for a shallow but noticeable diagonal graze on the cheek. (#7244)
- 4477 1899-S MS65 Paramount (MS64 NGC).** Ex: Redfield Collection. Autumn-gold toning is confined to the obverse periphery. Lustrous and attractive with smooth fields and minor facial marks. The strike is good save for blending on the hair above the ear and on the eagle's breast. (#7262)

BOOKS

- 4478 1000 Uncertified. First Ten Editions of the Guide Book and the "Black Cover" Variant of the Blue Book.** An attractive set of the first ten editions of the famous *Guide Book of United States Coins*, including both first and second printings of the first edition and the elusive third and fifth editions. Also included is the rare "Black Cover" variant of the fourth edition of the *Blue Book*. The books are all structurally sound, most have sharp corners, but the gilt lettering on the spine has faded on a couple of editions. (#661000)

PATTERNS

Intermediate Diameter 1854 Pattern Cent
Choice Proof Brown, Judd-161 Original

- 4479** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR64 Brown PCGS. The design is similar to that on production large cents except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in copper with a plain edge. Deep olive-gold and gunmetal-gray embrace nicely struck surfaces. Smooth save for faded marks on the neck. Certified in an old green label holder. (#11663)

1855 Hooked-Neck Eagle Cent Pattern
Judd-168 Original, PR64 Brown

- 4480** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR64 Brown NGC. A Flying Eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar to a large cent. Struck in copper with a plain edge. This pattern is well-known for its absence of original red. While this piece is labeled as Brown, the obverse displays noticeable areas of original red around the margin. The remainder of the coin, both obverse and reverse is blue-brown. Sharply struck on the obverse, a few small contact marks are noted in the reverse fields. From The Dr. Charles Nelson Collection. (#11720)

1858 Flying Eagle, Laurel Wreath Cent
Judd-191, Snow-PT14, PR64

- 4481** 1858 Flying Eagle Cent, Judd-191, Pollock-233, R.5, PR64 PCGS. CAC. Eagle Eye Photo Seal, card not included. Snow-PT14 with five leaf clusters in the wreath. The obverse is from a regular Flying Eagle Small Letters die, while the reverse displays the wreath introduced on the 1859 Indian cent. Struck in copper-nickel with a plain edge. Well struck and satiny with dusky golden toning. Population: 19 in 64, 5 finer (8/12). Ex: Rosemont Central States (Heritage, 4/2008), lot 3146, which realized \$5,750. (#11840)

Judd-211 1858 Indian Cent
Accessible Proof Example

- 4482** 1858 Indian Cent, Judd-211, Pollock-262, Snow-PT26, R.4 — Burnished — NGC Details. Proof. Centered Date, Broad Bust Point. The obverse is an 1858-dated transitional issue similar to the 1858 circulation issue. The reverse bears a heavy oak wreath, different from the more-delicate laurel wreath adopted the next year but not that different from the wreath to be adopted in 1860. Struck in copper-nickel with a plain edge. This burnished example shows a curious mix of orange and tan colors on surfaces with off-kilter luster. (#11893)

**1859 Indian Cent, Ornamental Shield
Judd-227, Copper-Nickel, MS64**

- 4483** 1859 Indian Cent, Judd-227, Pollock-271, Low R.6, MS64 PCGS. A regular 1859-dated cent die was mated with a pattern reverse die displaying a small ornamental shield between the upper points of an oak wreath. ONE CENT, in two lines, fills the central design area. Struck in copper-nickel with a reeded edge. Judd-227 is encountered in both proof and business strike format with approximately equal rarity. The obverse is light tan while the reverse is apricot-gold. A few small spots are scattered over each side. (#11931)

**Proof 1879 Judd-1617 Metric Dollar
Details of XF**

- 4486** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4 — Improperly Cleaned — NGC Details. Proof, “XF.” William Barber’s Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. This example likely was carried as a pocket piece, for the devices show clear wear and medium-gray surfaces show only slight green-gold retoning from a past cleaning. (#61995)

**Longacre 1868 Ten Dollar, PR64 Cameo
Judd-663, Struck in Aluminum**

- 4484** 1868 Ten Dollar, Judd-663, Pollock-736, Low R.6, PR64 Cameo PCGS. CAC. The obverse has a bust of Liberty facing left, wearing a coronet inscribed LIBERTY. Around, 13 stars, and below, the date. On the reverse, a fairly small eagle with spread wings clutches three arrows and an olive branch. A ribbon carries the motto IN GOD WE TRUST. Around, the legend UNITED STATES OF AMERICA, and below, the denomination TEN D. Struck in aluminum with a reeded edge. This is a sharply struck piece with good contrast and a few light hairlines that define the grade. Excellent eye appeal. (#60881)

**Transitional 1882 Liberty Nickel in Copper
Judd-1691, PR64 Brown**

- 4487** 1882 Liberty Head Five Cents, Judd-1691, Pollock-1893, High R.6, PR64 Brown NGC. The obverse appears the same as the regular die of 1883, but it is actually struck from an obverse die with a slightly different arrangement of the stars. The reverse is as the first variety of 1883, the “nickel without CENTS.” Struck in copper with a plain edge. The transitional Liberty nickels form an interesting set of patterns, and several collectors have noticed this in the past. This is a curious striking in copper. When closely examined the brown surfaces still show just the faintest undertone of red. The strike is sharp throughout, the surfaces appear free from contact marks, and there are no obvious carbon spots. (#62096)

**Gem Proof Judd-849 Reeded Edge
1870 Standard Silver Dime**

- 4485** 1870 Standard Silver Ten Cents, Judd-849, Pollock-956, R.5, PR65 NGC. This Standard Silver design shows a bust of Liberty facing right with UNITED STATES OF AMERICA above and IN GOD WE TRUST below. The reverse has 10 CENTS and the date in the center, surrounded by a wreath of cotton and corn with STANDARD above. Struck in silver with a reeded edge. A flashy and crisply struck Gem with light and attractive caramel-gold and sea-green peripheral patina. (#61093)

**Legend Obverse 1883 Liberty Nickel
Choice Cameo Proof, Judd-1710**

- 4488** 1883 Liberty Head Five Cents, Judd-1710, Pollock-1914, R.5, PR64 Cameo PCGS. The obverse is similar to the regular issue 1883 Liberty nickel, but UNITED STATES OF AMERICA substitutes for 13 stars around the periphery. The reverse reads 50 N. / 50 C. within a wreath of corn and cotton, FIVE above and CENTS is below. Struck in nickel with a plain edge. A well struck pearl-gray specimen with nicely mirrored fields and no visible hairlines or contact marks. One fleck on the forehead and the margins exhibit tiny mint-made strike-throughs. (#62127)

**1885 Snowden Dollar, Toned PR62
Judd-1747, Lettered Edge Pattern**

- 4489** 1885 Snowden Dollar, Judd-1747, Pollock-1959, Low R.6, PR62 PCGS. The dies are the regular-issue 1885 Morgan dollar dies, but there is experimental edge lettering as follows: * * * * * E * / PLURIBUS * / UNUM * * * * *. Struck in silver. Significant gray-russet toning covers each side, deep enough to subdue any proof flash in the fields. The color is somewhat deeper around the obverse margin. No obvious contact marks can be found on either side. (#62189)

EARLY HALF DOLLARS

- 4490** 1795 2 Leaves VG8 PCGS. O-105, R.4. The stone-gray fields and devices are bounded by deeper gunmetal toning near the rims. All legends and stars are distinct. The centers display faint hairlines and one slender vertical mark are noted beneath Liberty's jaw. (#6052)
- 4491** 1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-105a, R.4. The radial die crack above the B in LIBERTY indicates the later die state. This cream-gray Flowing Hair type coin is lightly hairlined and has a faded pinscratch in front of the profile. All stars and letters are distinct though the tops of TAT are faint. (#6052)
- 4492** 1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-119, R.4. A steel-gray piece with ample inner hair and wing detail. Mildly granular and a bit luminous with a patch of hairlines near the forehead and a few hair-thin marks on the portrait. (#6052)
- 4493** 1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-124, R.5. Deep dove-gray fields contrast with cream-white motifs. Hairlined and minutely granular, but unmarked aside from a pair of small obverse rim dings at 3 o'clock and 3:30. (#6052)

**Fine 1795 Half Dollar, O-102
Two Leaves Reverse**

- 4494** 1795 2 Leaves Fine 12 PCGS. CAC. O-102, R.4. A medium gray example with lighter ivory toning on the high points. The surfaces have no consequential marks and are minutely granular. All letters and stars are clear and the portrait possesses substantial hair definition. The introductory Flowing Hair type was coined for only two years, and problem-free pieces such as the present coin are always in demand.
From The Dr. Charles Nelson Collection. (#6052)

Toned VF30 1795 Half Dollar, O-104

- 4495** 1795 2 Leaves VF30 NGC. O-104, R.4. A die lump beneath the final star and a radial die crack through the C in AMERICA help attribute this pleasing midgrade Flowing Hair type coin. The fields are golden-brown and the devices are gunmetal-blue. A few moderate adjustment marks on the central reverse are mint-made, as is a small strike-through at the base of Liberty's jaw. Post-strike abrasions are completely inconsequential. (#6052)

1795 O-125 Half Dollar, AU Details

- 4496** 1795 2 Leaves — Repaired, Whizzed — NGC Details. AU. O-125, R.5. Both sides have exceptional design definition, including nearly full breast feathers on the eagle. While the sharpness would qualify this piece for one of the finest known, the surface quality diminishes its census rank. Splashes of toning appear on light silver surfaces with clear evidence of repair and whizzing on both sides. A heavy patch of adjustment marks is located near the right obverse border.
From The Fred Yee Collection.

**1803 O-103 Half, XF45
Nearly Census Level**

- 4497** 1803 Large 3, Large Reverse Stars XF45 NGC. O-103, R.3. Light clash marks appear on both sides, with minuscule die cracks on the obverse. This Choice XF specimen has light gold patina with traces of peripheral blue overtones. Scattered marks on each side are consistent with the grade.
From The Dr. Charles Nelson Collection. (#6066)

**1803 Large 3 O-101 Half, MS62+
Second-Finest Known**

- 4498** 1803 Large 3, Small Reverse Stars MS62+ NGC. O-101, R.3. The finest known 1803 O-101 half dollar is the Eliasberg coin that resold in 2006, where it was graded MS63 PCGS. Only one other Mint State piece, in the Stack's January 2002 auction and graded MS62, has appeared on the market in recent times. The present piece, from an old collection, is likely the second-finest known, slightly nicer than the Stack's coin and only marginally below the Eliasberg specimen. This lovely MS62+ specimen has bold design motifs with full borders. Ivory luster on each side accents the brilliant mint frost with faint peripheral gold toning. Census: 1 in 62 (1 in 62+), 1 finer (7/12).
From The Fred Yee Collection. (#6066)

- 4499** 1805 VF20 PCGS. O-109a, R.3. Rich orange-gold, powder-blue, and gunmetal-gray toning embraces this minimally marked and attractive VF Draped Bust half. The strike is soft on a couple of the stars above the eagle's head. A quality (and yet collectible) representative of the scarce early silver type. (#6069)

**Smooth AU No Stem 1806 Half Dollar
Pointed 6, O-109**

- 4500** 1806 Pointed 6, No Stem AU50 NGC. O-109, R.1. O-109 is the sole Pointed 6, No Stem die variety but is readily obtained by those who collect by *Guide Book* listings. The present butter-gold and slate-gray example exhibits pockets of bright luster and is void of visible abrasions. Evenly struck and lightly circulated with considerable detail on Liberty's hair and the eagle's wings. (#6073)
- 4501** 1806 Pointed 6, Stem — Improperly Cleaned — NGC Details. AU. O-120a, R.5. A large die break atop the vertical shield stripes identifies the scarce terminal die state. This stone-gray example is thickly hairlined but displays significant luster and is evenly struck.

BUST HALF DOLLARS

**Very Fine 'Bearded' Liberty
1807 Half Dollar, O-111b**

- 4502** 1807 Bearded Liberty VF20 NGC. O-111b, R.5. Undoubtedly the most famous die state within the Bust half series. A die crack between Liberty's chin and chest epitomizes the "Bearded Goddess" variety. Though less advanced than sometimes seen, the crack is obvious to the unaided eye. This is a blended stone-gray and chestnut-gold example with pleasing sharpness. One diagonal thin line noted above the eagle's neck.
- 4503** 1807 Large Stars, 50 Over 20 VF35 PCGS. O-112, R.1. The popular *Guide Book* variety with a blundered denomination. Generally pearl-gray and butter-gold with deeper orange, forest-green, and plum-mauve toning at the margins. Pockets of luster are prevalent despite moderate wear on the motifs.
Ex: Stu Keen, Long Beach (1991). (#6086)

**Choice XF Capped Bust 1807 Half
O-113, Sole Small Stars Variety**

- 4504 1807 Capped Bust, Small Stars XF45 PCGS. O-113, R.2.** Intermediate between O-113 and O-113a with a crack along UNITED STATES but none across OF AMER. The die marriage is significant as the sole Small Stars 1807 Capped Bust variety. This minimally abraded example is deep gunmetal-blue and tan-brown and shows incompleteness of strike at the centers. (#6087)

- 4505 1808 AU50 PCGS. O-107, R.3.** Cream-gray, lime-green, and caramel-gold toning alternates across this well defined half dollar. No marks are noticeable aside from a thin line above the eagle's head. Certified in a first generation holder. (#6090)

- 4506 1808 AU58 ANACS. O-105, R.3.** Cobalt-blue, orange-gold, and stone-gray endow satiny surfaces. Void of marks aside from faint hairlines on each side.
Ex: I. Gomer (6/1985); Sheridan Downey (5/1988). (#6090)

- 4507 1809 XXX Edge AU50 PCGS. O-102, R.1.** A widely repunched U in UNITED and toothlike clash marks above the eagle's head combine to provide ready attribution. Rich golden-brown and gunmetal-blue toning encompasses this lightly worn representative. Smooth except for one thin mark near star 9.
Ex: Allstate Coin (1992). (#6093)

- 4508 1811 Small 8 AU58 PCGS. O-105a, R.2.** Light tan-gold and steel-blue toning visits the margins of this unabraded near-Mint half dollar. Lustrous throughout despite a hint of wear on the portrait high points. Housed in an old green label holder. An old collector envelope accompanies and lists the pedigree as James Ruddy, Los Angeles, 1973. (#6097)

Small 8 O-105a 1811 Half Dollar, MS62

- 4509 1811 Small 8 MS62 PCGS. O-105a, R.2.** Designated as O-105 by PCGS but the O-105a die crack described by Overton is present on the upper reverse. Richly toned steel-gray, blue-green, and golden-brown. Void of relevant marks though the luster lacks the vitality of a higher grade.
Ex: James Ruddy, Los Angeles (1973). (#6097)

- 4510 1812/1 Small 8 AU55 NGC. O-102, R.2.** Predominantly stone-gray though the reverse border has hints of peach toning. Bright luster dominates the peripheries, eagle, and hair. Hairlined but free from visible abrasions.
From The Dr. Charles Nelson Collection. (#6101)

- 4511 1812 AU58 PCGS. O-104, R.1.** Powder-blue, olive-green, and stone-gray toning embraces this partially lustrous near-Mint half dollar. A loupe reveals only infrequent minor marks. Overton-104 is defined by a horizontal die line within the left (facing) wing. A collector envelope is included.
Ex: Q. David Bowers, Los Angeles (1977). (#6100)

- 4512 1813 50C Over UNI AU55 PCGS. O-101a, R.4.** This partly lustrous blundered legend half dollar is mostly stone-gray but has blushes of almond-gold toning. The surfaces are clashed and unabraded save for faint hairlines. Liberty's profile is strike tripled. Certified in a first generation holder.
Ex: House of Stuart (1974 ANA). (#6104)

- 4513 1813 AU55 NGC. CAC. O-107a, R.1.** Peach-gold, navy-blue, and lilac-gray embrace this partly lustrous and unmarked Capped Bust half. Both sides display several lengthy die cracks, though the dies must have held up for some time given the number of survivors in the present die state. (#6103)

- 4514 1813 AU58 PCGS. O-106, R.2.** An unabraded example with medium olive-gray toning and substantial cartwheel sheen. The strike is soft near the left scroll end and opposite at the bust tip, characteristic of the Overton variety. Encapsulated in a first generation holder.
Ex: House of Stuart (1975). (#6103)

- 4515 1814/3 AU50 PCGS. O-101, R.2.** The crossbar of the underdigit 3 is obvious. Dusky dove-gray and walnut-brown toning. Lightly circulated but free from any relevant marks. Housed in a first generation holder.
Ex: Sheridan Downey (3/1989). (#6106)

- 4516 1814 — Reverse Improperly Cleaned — NGC Details. AU. O-104a, R.2.** A partly lustrous example that displays only a hint of gold toning. Faint hairlines are noted near the eagle's head, and a cluster of faded thin marks is beneath the left (facing) wing. (#6105)

- 4517 1814 AU58 PCGS. O-102a, R.3.** Luster illuminates the motifs and margins of this unabraded and attractive Borderline Uncirculated Bust half. Toned forest-green, walnut-brown, mauve, and cream-gray. The dies are prominently clashed. (#6105)

Multicolor Choice 1814 Half, O-107

- 4518 1814 MS64 ANACS. O-107, R.2.** Dynamic luster illuminates the iridescent blue-green, golden-brown, and mauve toning. Boldly struck and prominently clashed. Marks are confined to the areas near star 6 and the right scroll end. A highly attractive example of this lower-mintage date.
Ex: John McIntosh (12/1991). (#6105)

**Choice XF 1815/2 Half Dollar, O-101
Sole Die Variety**

- 4519 1815/2 XF45 PCGS. O-101, R.2.** Blended rose-gold margins frame the apple-green and cream-gray centers. The devices exhibit moderate wear but luster brightens the borders. Struck from multiply clashed dies but there is no sign of the ascending crack through the denomination that signifies O-101a. The only die marriage for the date and the key to the Capped Bust series. (#6108)

4520 1817 AU58 PCGS. O-110, R.2. Aquamarine and chestnut-tan toning blends across satiny and sharply struck surfaces. Marks are minimal and the eye appeal is attractive. A die scratch from a fletching corner distinguishes Overton-110. An old collector envelope accompanies the lot.
Ex: Steve Ivy, Dallas (1977). (#6109)

4521 1818 MS60 ANACS. O-112, R.1. Medium olive-gray and golden-brown toning enriches this crisply struck and minimally abraded Bust half. Both sides display ample satin luster. One small obverse spot at 3 o'clock. (#6113)

4522 1820/19 Curl Base 2 AU53 PCGS. O-102, R.1. An obvious overdate, as it appears the Mint made no attempt to efface the underdigits. The obverse is lavender-gray and powder-blue while the reverse displays lighter walnut-brown and cream-gray toning. (#6126)

4523 1820/19 Curl Base 2 — Improperly Cleaned — NGC Details. Unc. O-102, R.1. The sole Curl 2 overdate Overton variety. Lustrous and nicely struck with minor friction on the crest of the wings and the top of the eagle's head. The obverse is lime-green, the reverse is ocean-blue, and both sides are faintly hairlined. (#6126)

4524 1821 AU58 PCGS. O-105a, R.1. Designated as O-105 by PCGS but the upper reverse die crack is present. Lustrous and only lightly abraded. The stars are intricately struck though Liberty's neck curls lack absolute detail. (#6128)

Select 1821 Half Dollar, O-106a

4525 1821 MS63 NGC. O-106a, R.2. A later die state with a small break within the upper half of the N in UNITED. This is a lovely silver-gray Bust half with glimpses of chestnut-gold near the rims. Substantial luster brightens both sides. The strike is sharp and there are no remotely consequential marks. (#6128)

1822 O-105a Half, MS64 Important Late Die State

4526 1822 MS64 PCGS. O-105a, R.3. The fourth edition of the Overton reference introduced a new die state, O-105a, with all of the stars on the right flatly struck, but with no mention of an obverse die crack. This example has the stars on the right sharply defined, but also has a crack through all the stars on the right, from the back of the cap down to the border right of the date. The reverse has the usual crack through the legend.

This Choice Mint State piece is far finer than any others known with the obverse die crack, and it would be a census level specimen even without the crack. Both sides are fully lustrous and sharply defined, with mirrored fields beneath splendid gold and iridescent toning. An extremely important opportunity for the specialist, and possibly R.7 in this die state. (#6129)

4527 1824 AU58 PCGS. O-104, R.2. Lovely apple-green, caramel-gold, and navy-blue patina illuminates this lustrous and refreshingly unabraded Bust half dollar. One tiny spot atop the drapery merits passing mention.
Ex: Steve Ivy, Dallas (1976). (#6137)

Select Mint State 1824/4 Half Dollar, O-110

4528 1824/4 MS63 PCGS. O-110, R.2. Cream-gray and golden-brown toning embraces this satiny and unmarked representative. Well struck aside from the right-side stars. Housed in a first generation holder. O-110 shows a portion of the upright of a secondary 4, while the other 1824/4 variety, O-109, retains the diagonal of the partially effaced digit.
Ex: Getty Collection (Bowers and Ruddy, 5/1977), lot 837. (#6140)

4529 1826 AU58 PCGS. O-118a, R.1. Luster dominates the devices and margins of this attractive near-Mint half dollar. Tobacco-brown and sea-green adorn the borders though the centers remain brilliant. Evenly struck and void of detractors.
Ex: Baltimore Signature (Heritage, 3/2009), lot 8633, which realized \$747.50. (#6143)

4530 1826 AU58 NGC. CAC. O-116a, R.1. Lengthy peripheral die cracks are characteristic of this available Overton marriage. The present momentarily circulated half dollar displays vibrant luster and shows no visible abrasions. Golden-gray toning is relegated to the borders. (#6143)

1826 O-116a Half, MS63 Late Die State

4531 1826 MS63 NGC. O-116a, R.1. Two die cracks connect the date and stars, while another crack joins nearly all of the peripheral reverse elements. Both sides of this satiny Select Mint State piece are mostly brilliant with peripheral toning, blue on the obverse and gold on the reverse.
From The Fred Yee Collection. (#6143)

Near-Gem 1826 Half Dollar, O-110
Excellent Eye Appeal

- 4532** 1826 MS64 PCGS. CAC. O-110, R.2. Repunching on the 8 in the date helps identify the Overton variety of this lustrous and beautifully preserved near-Gem. Light to medium chestnut-gold and silver-gray toning confirms the originality. The stars have soft centers but the overall strike is good. A desirable Choice representative of the popular and attractive Capped Bust type. (#6143)

Gem 1826 Half Dollar, O-118a
Moderate Golden-Brown Toning

- 4533** 1826 MS65 PCGS. O-118a, R.1. Medium golden-gray throughout save for occasional slender bands of ocean-blue at the margins. This coruscating Gem is remarkably free from abrasion and has a pleasing strike with only the uppermost stars lacking a precise strike. Die cracks over the reverse legends correspond to the late Overton die stage. (#6143)
- 4534** 1827/6 AU58 PCGS. O-101, R.2. Substantial luster beckons from this richly toned navy-blue and golden-gray near-Mint half dollar. Well struck aside from the A in STATES. There are no consequential marks. (#6147)
- 4535** 1827/6 AU58 PCGS. O-101, R.2. The first generation holder omits an overdate designation, but the recut C in the denomination confirms the attribution. Dusky apricot-gold and steel-blue toning illuminates lightly abraded and partly lustrous surfaces. Ex: *Stack's* (1982). (#6147)
- 4536** 1827/6 AU58 NGC. CAC. O-102, R.1. A lovely near-Mint overdated Bust half with attractive peripheral golden-brown and sea-green toning. Void of relevant contact. Luster dominates though the top of the eagle's head shows light wear. A minor fingerprint appears near the left (facing) wing. (#6147)

Colorful Uncirculated O-102 1827/6 Half

- 4537** 1827/6 MS61 PCGS. O-102, R.1. Jade-green and honey-gold toning enriches this lustrous Capped Bust half. The strike is incomplete only on the uppermost stars. Both sides appear unabraded aside from faint contact on Liberty's neck. The 1827/6 obverse die was paired with three different reverses. O-102 is confirmed by the presence of a minor die break near the final A in AMERICA. Ex: *Stu Keen*, Long Beach (11/1993). (#6147)

1827/6 O-102 Half Dollar, MS63
Bold Overdate

- 4538** 1827/6 MS63 NGC. O-102, R.1. The loop of the previous 6 is clearly visible at the right side of the 7. Light clash marks are noted, and the stars are drawn to the border on this Select Mint State specimen. The surfaces are frosty and fully lustrous, with ivory and iridescent toning that deepens along the borders. Census: 11 in 63, 12 finer (8/12). (#6147)
- 4539** 1827 Square Base 2 AU55 NGC. CAC. O-104, R.1. Medium cream-gray toning fills the fields and devices but cedes to iridescent powder-blue and honey-gold near the rims. Liberty's cheek and bust show light wear, but plentiful luster brightens design elements. (#6144)
- 4540** 1827 Square Base 2 AU58 PCGS. O-107, R.3. Cartwheel luster is vibrant, although slight wear atop the eagle's head precludes a Mint State assessment. The strike is crisp at the centers, yet the stars are inexact brought up. Encased in an old green label holder. (#6144)
- 4541** 1827 Square Base 2 AU58 NGC. CAC. O-135, R.3. Dappled almond-gold toning adorns this Borderline Uncirculated half dollar. No marks are remotely consequential, and copious luster illuminates the motifs and margins. The strike is crisp aside from the star centers. (#6144)
- 4542** 1828 Square Base 2, Large 8 MS63 NGC. O-109, R.3. Medium dove-gray and almond-gold toning encompasses this lustrous and well struck Bust half. Marks are inconsequential aside from a few faint lines at the base of the throat. An underrated *Guide Book* variety. (#6150)

**1828 O-110 Half Dollar, MS64
Square 2, Small 8, Large Letters**

4543 1828 Square Base 2, Small 8, Large Letters MS64 PCGS. CAC. O-110, R.2. This sharply detailed Choice Mint State piece has gorgeous original gray patina over satiny silver surfaces that exhibit lovely peripheral gold and blue-green toning. Population: 28 in 64 (2 in 64+), 10 finer (7/12). (#6151)

4544 1829/7 AU53 PCGS. O-101, R.1. Light honey toning graces the borders of this briefly circulated example. Luster glimmers from design elements, and neither side has any consequential marks. O-101 and O-102 share the same overdated obverse but have a different shape on the flag of the 5 in 50C. (#6155)

4545 1829/7 AU53 NGC. CAC. O-102, R.2. The base of the 7 is clear within the 9, and the irregular flag of the 5 in 50C confirms the attribution. Golden-gray toning dominates though the margins also offer navy-blue. A briefly circulated but partly lustrous representative. Nicely struck and minimally abraded. (#6155)

4546 1829/7 AU58 PCGS. O-101, R.1. Lustrous and well preserved with only a whisper of tan toning. The curls near LIBERTY show slight friction, and peripheral elements display occasional minor incompleteness of strike. Housed in a first generation holder. Ex: Long Beach (1974). (#6155)

4547 1830 Small 0 AU53 NGC. CAC. O-116, R.2. Caramel-gold and aquamarine tints enrich the borders, while the interiors are stone-gray. This lightly circulated representative displays ample luster and only moderate and inconspicuous marks. (#6156)

4548 1830 Small 0 AU55 NGC. CAC. O-107, R.2. The 1 in the date is repunched north. Ample luster illuminates this Choice AU representative. Golden-brown toning fills the borders. The portrait high points show slight rub but no abrasions are apparent. (#6156)

**1830 Small 0 O-108 Half Dollar, MS64
Recut 8**

4549 1830 Small 0 MS64 PCGS. CAC. O-108, R.3. The 8 is recut, visible within the upper loop of that digit, a characteristic also seen on O-109. The O-108 reverse has the middle line of the rightmost vertical stripe extending far below the shield border. This sharply detailed piece has natural gray-gold patina with delicate blue and iridescent toning near the borders. A highly attractive Choice Mint State half dollar, possibly at the low end of the condition census. (#6156)

4550 1830 Large 0 AU58 NGC. CAC. O-123, R.1. This lustrous near-Mint Capped Bust half displays golden-brown and forest-green toning near the rims. Free from remotely relevant marks. Crisply struck and attractive. (#6157)

4551 1833 AU58 NGC. CAC. O-114, R.2. This near-Mint half dollar exhibits pleasing cartwheel sheen along with a hint of almond-gold toning. Free from relevant contact. Liberty's profile is lightly strike doubled, and the borders display die wear, as made. (#6163)

4552 1834 Large Date, Small Letters AU58 NGC. CAC. O-105, R.1. Autumn-gold and aquamarine visit the peripheries of this partly lustrous and lightly abraded Borderline Uncirculated half dollar. The cheek and other high points are stone-gray. (#6165)

4553 1834 Large Date, Small Letters MS62 NGC. O-105, R.1. Repunching on the 4 in the date and the second S in STATES identify the Overton pairing. Lustrous and smooth with a suitable strike and peripheral golden-brown toning. From The Fred Yee Collection. (#6165)

4554 1834 Small Date, Small Letters MS63 NGC. O-109, R.1. The broad recutting on star 10 is diagnostic. Gold-orange overtones are prominent at the margins, while the interiors have a touch of blue to the overall gray. A deep spot is noted where the tailfeathers meet the olive branch. (#6166)

4555 1835 AU58 NGC. CAC. O-106, R.1. Moderate walnut-tan and apple-green patina embraces the peripheries. Lustrous and minimally abraded with a pleasing strike. The repunched 5 in the date allows prompt attribution. (#6168)

4556 1835 AU58 NGC. CAC. O-101, R.1. Golden-brown and forest-green toning embraces the margins of this lustrous and nicely struck near-Mint half dollar. The fields display minor marks but there are no obtrusive abrasions. (#6168)

4557 1835 MS62 NGC. O-107, R.1. A singular pairing of a "horn-top" or prominently curving 5 on both obverse and reverse. Bluntly struck but with pleasing luster under pink-gray, violet, and blue patina. (#6168)

**1835 O-103 Half, MS64+
Near Census Level**

4558 1835 MS64+ NGC. CAC. O-103, R.2. Several diagonal die lines appear in the spaced between vertical stripes on the shield. This important near-Gem has satiny silver luster beneath blue-green, rose, and gold toning. A few curls and other elements are bluntly defined. Although a common variety, this example is nearly a census level specimen. (#6168)

4559 1836 Lettered Edge, Beaded Reverse AU55 NGC. CAC. O-106, R.1. Between O-106 and the final die state of O-106a with a broad intermittent die crack through the upper two arrowheads and nearby wingtip. Rich gunmetal-gray and sea-green embraces the margins. (#6169)

4560 1836 Lettered Edge AU58 NGC. CAC. O-114, R.2. This lustrous half dollar exhibits medium caramel-gold toning at the borders. Marks are inconsequential save for a single slender line beneath the left (facing) wing. A good strike with softness confined to the upper left stars and the RI in PLURIBUS. (#6169)

- 4561** 1836 Lettered Edge, 50 Over 00 AU58 NGC. O-116, R.2. The popular *Guide Book* variety with a mint-blundered denomination. Light autumn-gold toning enriches the borders of this lustrous and attractive near-Mint half dollar. Marks are negligible aside from a single hair-thin line beneath Liberty's jaw. (#6170)

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, AU53 First Steam-Powered Coinage

- 4562** 1836 Reeded Edge AU53 NGC. The first Reeded Edge half dollar features a modified Capped Bust design with a slightly reduced diameter, struck on the new steam-powered coin press installed at the Philadelphia Mint. This example has satin luster beneath gray-gold and blue toning with a few splashes of steel on the obverse. (#6175)
- 4563** 1837 AU55 NGC. CAC. Golden-brown and gunmetal-gray toning encompasses this well struck and problem-free Choice AU half dollar. The 50 CENTS type was struck for only two years, and the 1836 is scarce. (#6176)
- 4564** 1837 AU58 NGC. CAC. This lustrous half dollar is kept from Mint State by slight friction on Liberty's cheek. Marks are absent though the strike shows softness on the shoulder curls and eagle's neck. Each side displays slender but distinctive arc-shaped die cracks. (#6176)
- 4565** 1837 MS63 NGC. A frosted Select example of the more collectible Reeded Edge, 50 CENTS design, mostly silver-white with touches of green-gold. A bold reverse die crack runs from the N in CENTS through the olive branch and up into the IT of UNITED. From *The Fred Yee Collection*. (#6176)

1837 Reeded Edge Half Dollar, MS64 Popular Type Issue

- 4566** 1837 MS64 PCGS. The Reeded Edge half dollar with 50 CENTS on the reverse is a popular type issue, only struck during 1836 and 1837. Since the 1836 is a scarce date, the 1837 is the favorite choice of type collectors. This attractive Choice example features sharply detailed design elements and pleasing golden-brown and bluish-gray patina. Population: 76 in 64 (2 in 64+), 25 finer (7/12). From *The Fred Yee Collection*. (#6176)

1837 Reeded Edge Half, MS66 Short-Lived Type

- 4567** 1837 MS66 NGC. The change from the 50 CENTS reverse of 1836-37 to the HALF DOL. reverse of 1838 created a distinct two-year type for the first steam-power halves, and while the 1836 has a minuscule mintage, the 1837 is much more available and the issue of choice for type collectors. Even though a number of examples were saved and Mint State pieces appear on the market with some regularity, the presence of a Premium Gem such as this is a far less frequent event. Sharply struck with powerful luster, this captivating, slightly satiny coin displays warm reddish-tinged orange patina over most of the fields. Small untuned sections further enliven the appearance of the piece. An immensely desirable coin and an exquisitely preserved, tangible memento of an exciting chapter in Mint history. Census: 8 in 66 (1 in 66+), 3 finer (7/12). Ex: *Milwaukee ANA Signature* (Heritage, 8/2007), lot 1685; *FUN Signature* (Heritage, 1/2008), lot 2875. (#6176)

- 4568** 1839 AU55 NGC. CAC. Pockets of bright luster emerge from the cream-gray and tan-gold surfaces. One slender area of ocean-blue and rose-red on the upper obverse margin. Unabraded aside from minor marks near Liberty's jaw. (#6179)

SEATED HALF DOLLARS

1839 No Drapery Half, MS63 Scarce One-Year Transitional Type

- 4569 1839 No Drapery MS63 PCGS.** The 1839 No Drapery is an important transitional type that was minted for only a single year, the only coin in the series that displays Christian Gobrecht's original design for the Seated Liberty half dollar. The lack of drapery folds at Liberty's shoulder, as well as small letters around the reverse periphery, allowed for considerable open field space on both sides. Despite its significance at the time of issue, relatively few pieces were spared from circulation, and perhaps only a few dozen Uncirculated coins are extant. This desirable Mint State representative is notable for its fresh, original appearance, fully lustrous beneath splashes of copper-gold and blue iridescence. The strike is generally well-executed, although there is noticeable deficiency on the eagle's left (facing) leg and talons. Population: 11 in 63, 11 finer (7/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 7028.
From The Fred Yee Collection. (#6230)

- 4570 1846 6 Over Horizontal 6 XF45 NGC. CAC. WB-104, FS-301.** The "lazy" 6 on its side near the prominent 6 ranks as one of the more awkward Mint blunders of the era. A late die state with a retained die break over the NI in UNITED. Toned deep dove-gray with unobtrusive field marks. (#6254)
- 4571 1853 Arrows and Rays AU55 NGC. CAC.** Dusky dove-gray and chestnut-gold toning embraces this lightly circulated single-year type coin. Free from any visible marks. Sharply struck at the centers with minor softness on peripheral elements. (#6275)
- 4572 1853 Arrows and Rays AU58 NGC. CAC.** Tan-gold toning is nearly comprehensive though the upper obverse margin is apple-green. Void of consequential contact, and luster rolls across all but the open obverse field. (#6275)
- 4573 1853 Arrows and Rays MS61 NGC.** A sharply detailed, lustrous example of the popular short-lived Arrows design, with mostly brilliant surfaces that display a few accents of champagne-gold. An extensive network of die cracks connects all the obverse stars.
From The Fred Yee Collection. (#6275)
- 4574 1854 Arrows MS62 NGC.** A frosty silver-white piece with great flash that was struck from clashed dies. Overall detail is quality, though the strikes on the stars are uneven.
From The Fred Yee Collection. (#6279)
- 4575 1855/54 Arrows AU55 NGC. WB-102, FS-301.** A pearl-white example of this scarce and well known *Guide Book* variety. The crossbar of an underdigit 4 is apparent within the final 5 in the date. Smooth except for one thin curved mark on the right obverse field. (#6282)
- 4576 1855-S Arrows VF20 PCGS.** Gold and violet overtones grace the faintly luminous gray surfaces on this midrange S-mint Arrows half dollar. A few scattered digs are as expected. Despite the grade level, this issue is a borderline condition rarity any better. Population: 6 in 20, 36 finer (8/12). (#6284)
- 4577 1856 AU58 NGC. CAC.** Caramel-gold toning drapes this partially lustrous half dollar. Marks are absent except for a thin line near stars 3 to 5 and a bright area on the obverse rim at 2 o'clock. Conditionally scarce despite a fairly plentiful mintage. (#6287)
- 4578 1856-O MS64 NGC.** The light golden overtone crossing each side is a trifle stronger on the obverse. Swirling luster has a subtly frosted appearance. Great all-around appeal. Census: 28 in 64, 19 finer (8/12).
From The Fred Yee Collection. (#6288)
- 4579 1856-O MS64 PCGS. CAC.** This well-detailed Seated Liberty half dollar shows just a touch of softness on the stars and eagle's claws, and the well-preserved surfaces radiate vibrant mint luster on both sides. A few accents of light gold toning enhance the considerable visual appeal. Population: 37 in 64 (2 in 64+), 8 finer (8/12). (#6288)
- 4580 1859 AU58 NGC. CAC.** Luster fills the devices and borders of this moderately abraded and well impressed Borderline Uncirculated half dollar. Hints of olive-gray and honey-gold toning enrich the peripheries. (#6296)
- 4581 1859-O MS62 NGC.** Peach, pink, violet, and blue patina is dappled on the obverse but more concentric on the reverse. Great underlying luster and all-around eye appeal. Census: 8 in 62, 40 finer (8/12). (#6297)
- 4582 1871-CC — Improperly Cleaned — NGC Details. XF.** A sharp example of this early and surprisingly scarce Carson City issue. The NGC Census lists 40 pieces with a median grade of VF30. The present piece is boldly defined with light straw-gold and ice-blue patina. We note a thin mark near the left scroll end and a granular area near the left (facing) wingtip. (#6331)

**MS63+ Arrows 1873-CC Half Dollar
Brilliant and Mark-Free**

- 4583 1873-CC Arrows MS63+ NGC.** Small CC. This essentially untuned half dollar is virtually devoid of contact and displays vigorous cartwheel luster on the reverse. The obverse is satiny and only slightly too subdued to secure the next higher grade. Well struck with sharp definition throughout, though the eagle's left (facing) ankle and Liberty's forehead curls lack absolute detail. The Carson City Mint struck Arrows half dollars only in 1873 and 1874, and since the latter issue has a mintage of just 59,000 pieces, collectors turn to the 1873-CC when forming a type set from the legendary Western facility. Census: 6 in 63 (3 in 63+), 7 finer (7/12). (#6344)

- 4584 1875 MS63 NGC.** Semireflective with even a hint of contrast, though the luster swirls too much for a proof and the strike, while quality, is not up to proof standards. Skeins of gold, orange, and violet patina drape parts of the otherwise silver surfaces. From The Fred Yee Collection. (#6349)

Patinated 1876 Half Dollar, MS65

- 4585 1876 MS65 PCGS. CAC.** Type One Reverse. Deep golden-brown, rose-red, sea-green, and gunmetal-blue patina encompasses this coruscating high grade Seated type coin. The obverse is well struck while the eagle's neck and left (facing) ankle shows incompleteness. Population: 19 in 65 (2 in 65+), 2 finer (8/12). (#6352)
- 4586 1877-CC MS63 NGC.** Type Two Reverse. Medium CC. A pleasing, well-struck example of this affordable Carson City half dollar. Lightly toned and showing strong underlying mint frost. Census: 39 in 63, 65 finer (7/12).
Ex: FUN Signature (Heritage, 1/2005), lot 7355. (#6356)

Still-Reflective VF30 1878-S Half Dollar

4587 1878-S VF30 PCGS. The San Francisco Mint struck more than 4.1 million Trade dollars and over 9.7 million Morgan dollars in 1878, but only 12,000 half dollars. From 1879 to 1883, no branch mint struck any minor silver coinage, and even Philadelphia's output never exceeded a token mintage. The 1878-S half dollar, then, marks a turning-point in U.S. silver coinage history, but not only that, it is the key date among Seated half dollar issues that can be found on the open market. (The extremely rare 1853-O No Arrows, unique proof 1866 No Motto, and supposedly struck but never-seen 1873-S No Arrows are the date's only challengers.)

Like many other key dates, the 1878-S half dollar has been a target of counterfeiters and alterers, but this midrange VF30 example has all the right diagnostics. On the obverse, the date is right-oriented and the space above Liberty's drapery has a wavy die line. The reverse has the correct mintmark, small and tilted to the left, as well as the diagnostic die chip tucked between the left rim of the shield and the first set of vertical stripes.

Though moderately worn, this coin retains considerable reflective luster, mirrored on the obverse and watery on the reverse. Gold-orange and blue overtones enrich each side, and while small abrasions pepper the devices and the nearby fields, the overall eye appeal is rock-solid. The 1878-S half dollar is rare regardless of condition, and this is a coin that can enter any collection of Seated halves, no matter how high-grade, without apology. Population: 2 in 30, 16 finer (7/12). (#6360)

4588 1889 XF45 PCGS. CAC. A quietly luminous piece with light gray wear spots that stand out from the prevailing green and violet overtones. Scattered small marks are as expected on a worn coin, though that status itself is something of a rarity for this issue of 12,000 business strikes. (#6371)

4589 1890 MS62 PCGS. At first glance this gently toned specimen appears to be a proof, but slight strike weakness and clash marks indicate otherwise. Minor hairlines and trivial marks limit the grade. Population: 13 in 62, 79 finer (8/12). (#6372)

PROOF SEATED HALF DOLLARS

4590 1862 PR62 PCGS. Strongly reflective with robust detail and attractive golden-tan patina. The obverse fields are a touch clouded at the bottom, where the coin's grade-defining hairlines are more hidden. (#6416)

1865 Seated Half, Final No Motto Issue Concentrically Toned PR67

4591 1865 PR67 NGC. It is seldom that one sees a Seated Liberty proof half dollar of such an early post-1858 vintage in such high quality. This Superb Gem proof 1865 is certain to gain collector attention long before it crosses the auction block. The Mint reported 500 proofs struck of this last issue of the No Motto type, but time and attrition have taken a devastating toll; NGC reports six submissions at this grade level, with a single one finer (8/12). Each side displays beautiful concentric rings of patina that fail to impede the bright proof mirrors flashing strongly through. The strike is pinpoint-sharp, and there are no visible flaws. (#6419)

4592 1868 — Altered Surfaces — PCGS Genuine. Proof, Unc Details. A fully struck and unmarked stone-white specimen. The motifs are frosty but the fields are lackluster. A mere 600 proofs were issued. *From The Fred Yee Collection.*

4593 1869 PR62 NGC. A faint golden cast adds to the eye appeal of this reflective, semicontrasted Seated dollar, one of 600 proofs for its issue. A number of fine hairlines in the obverse fields account for the grade.

From The Dr. Charles Nelson Collection. (#6427)

1873 Seated Half, PR65 No Arrows, Closed 3

4594 1873 No Arrows PR65 PCGS. CAC. Only 600 proof Seated Liberty half dollars were struck with the No Arrows design in 1873, all with a Closed 3 in the date. Examples in Gem condition are quite rare today. This delightful Gem displays well-detailed design elements and brightly reflective surfaces under shades of champagne-gold and cerulean-blue patina. Population: 17 in 65, 11 finer (8/12). (#6431)

4595 1874 Arrows PR62 NGC. Green-gold and orange patina graces the rims, while the interiors gleam silver. Lightly contrasted but heavy on arm's-length eye appeal, this coin shows grade-defining hairlines on closer inspection.

From The Fred Yee Collection. (#6435)

Richly Toned Gem Proof 1875 Half Dollar

4596 1875 PR65 NGC. An impressively preserved Gem specimen with both considerable reflectivity and rich patina. Greens and golds are prominent at the margins, while the fields show blue hues. The devices show hints of contrast with their surroundings, a suggestion that this coin once had a cameo effect. One of 700 specimens struck. Census: 22 in 65, 13 finer (7/12). (#6436)

1880 Seated Half, PR65 Cameo Popular Low-Mintage Date

4597 1880 PR65 Cameo NGC. The fields are nicely mirrored and set up deep contrast against the frosted devices. The interiors are brilliant with golden-russet and blue around the obverse margin and just a hint of golden around the reverse. Popular, low total-mintage date. Census: 22 in 65 (3 in 65+) Cameo, 14 finer (7/12). (#86441)

**Multicolored Superb Gem Proof 1883 Half
Sole Finest at PCGS**

4598 1883 PR67 PCGS. CAC. Rare as a proof or business strike, the 1883 Seated half saw a production of 1,039 examples of the former and 8,000 of the latter, a run of low mintages that would persist until 1891. This Superb Gem proof trumps every other submission at PCGS as the sole finest certified of the issue (8/12). An off-center oval of brilliance appears on each side, bright and sparkling on the reverse, more muted on the obverse. The remainder of each side displays lovely, bright, multicolored patina. The surfaces are deeply reflective and sharply defined throughout, showing no mentionable sign of contact. (#6444)

**1887 Seated Half, PR65 Cameo
Only One Finer at PCGS**

4599 1887 PR65 Cameo PCGS. The razor-sharp motifs of this Gem Cameo yield strong contrast against the mirrored fields. Soft reddish-gold color clings to the margins, leaving the central areas color free. Magnification brings out some fine hairlines in the fields. Population: 14 in 65 Cameo, 1 finer (7/12). (#86448)

PR64 Cameo 1890 Half Dollar

4600 1890 PR64 Cameo PCGS. A lovely near-Gem, this sharply detailed Seated half dollar has full mirrors around lustrous devices, all beneath delicate gold and wispy bluish-violet toning that intensifies near the borders. Population: 13 in 64 (1 in 64+) Cameo, 16 finer (8/12). (#86451)

BARBER HALF DOLLARS

1892-S Barber Half, Toned Near-Gem

4601 1892-S MS64 PCGS. Unlike its Philadelphia counterpart, the 1892-S appears to have been little saved for a newly designed coin with more than a million pieces struck. The soft, frosted mint luster retains much brilliance with patches of deep gray-russet scattered over each side. Well struck. Population: 33 in 64, 16 finer (7/12). (#6464)

**1894-S Half Dollar, Gem Uncirculated
Scarce Early Issue**

4602 1894-S MS65 PCGS. CAC. Despite the mintage of more than 4 million pieces, the 1894-S Barber half dollar is one of the most elusive dates of the series in high grade. This delightful Gem exhibits sharply detailed design elements, satiny mint luster, and hints of pale gold and amber toning. Population: 5 in 65, 5 finer (7/12). (#6470)

- 4603 1900-S MS62 PCGS.** Boldly toned sky-blue and gray through much of each side. The obverse has peripheral patches of charcoal, while the reverse is green-tinged along much of its border-zones. Population: 5 in 62, 47 finer (8/12). (#6488)
- 4604 1904 MS64 NGC.** Sage, green-gold, and muted orange patina enriches each side of this near-Gem. Though close to 3 million business strikes were produced, the date is a condition rarity so fine. Census: 33 in 64, 9 finer (8/12). (#6498)
- 4605 1904-S VF20 PCGS.** A subtly luminous midrange example of this lower-mintage issue. Green-gold and peach peripheral touches affect otherwise light gray surfaces with wear just starting to reach the letters in LIBERTY. (#6500)
- 4606 1910 MS64 PCGS. CAC.** Light wheat-gold and powder-blue toning. A lower mintage Barber half that boasts cartwheel luster and well preserved fields. One tick on the cheek is all that limits the grade. Population: 34 in 64, 29 finer (7/12). (#6519)

**1912-D Barber Half Dollar, MS66
No Numerically Finer Coins at PCGS**

- 4607 1912-D MS66 PCGS. CAC.** A substantial mintage of 2.3 million Barber half dollars was achieved at the Denver Mint in 1912, and this impressive Premium Gem is one of the finest survivors. The design elements are well-detailed and the surfaces are blanketed in shades of golden-gray and powder-blue toning, with vibrant satiny mint luster. Population: 15 in 66 (1 in 66+), 0 finer (7/12). (#6525)
- 4608 1914 AU50 PCGS.** Silver-gray and gold-gray on the interiors with dots of crimson at the borders that are far more prevalent on the reverse. Lightly worn with a few small nicks on the face consistent with light circulation. One of just 124,300 business strikes produced. (#6530)
- 4609 1915-S MS64 PCGS. CAC.** This sharply detailed Choice specimen exhibits vibrant satiny mint luster on both sides, with attractive accents of lavender and gold patina. Population: 87 in 64, 50 finer (8/12). (#6534)

PROOF BARBER HALF DOLLARS

- 4610 1893 PR64 NGC.** Blue and violet overtones grace gleaming fields, while the frosted metallic-silver devices supply unacknowledged contrast. A few small hairlines and stuttering contacts to the right to the portrait account for the grade. *From The Dr. Charles Nelson Collection. (#6540)*
- 4611 1893 PR64+ Cameo PCGS.** A second-year Barber specimen that has smooth eye appeal and almost Deep Cameo contrast. A faint veil of gold-to-gray patina partly obscures the few faint hairlines that affect the grade. Population: 19 in 64 (1 in 64+) Cameo, 37 finer (8/12). (#86540)

**1893 Barber Half, Dazzling PR66 Cameo
Starkly Contrasted**

- 4612 1893 PR66 Cameo NGC.** The deeply mirrored fields and thickly frosted devices would make this a desirable choice for a type coin in any year. In such an early year as 1893, this coin takes on even more significance. Each side is brilliant. The obverse is fully struck, and there is just a bit of striking softness on the reverse. Census: 19 in 66 Cameo, 11 finer (7/12). *From The Fred Yee Collection. (#86540)*

**1899 Barber Half Dollar, PR64+
Intense Deep Cameo Contrast**

- 4613 1899 PR64+ Deep Cameo PCGS.** A nominal mintage of 846 proof Barber half dollars was accomplished in 1899, and few survivors are known with the Deep Cameo surfaces of the present coin. This high-end Choice example exhibits sharply detailed frosty devices and deeply mirrored fields, with intense cameo contrast. Population: 1 in 64 (1 in 64+) Deep Cameo, 3 finer (7/12). (#96546)

PR65+ Cameo 1900 Half Dollar

- 4614 1900 PR65+ Cameo PCGS.** Ex: Teich Family Collection. The portrait and eagle are frosty and demonstrate ready contrast with the glassy fields. Peach-gold toning visits the borders of this otherwise silver-gray Gem proof. A good strike with incompleteness confined to the fletchings and right shield corner. *Ex: Adolphe Menjou Collection, Part II (Kreisberg-Schulman, 1/1957), lot 1175; Teich Family Collection (Stack's-Bowers, 11/2011), lot 5230. (#86547)*

**1905 Half Dollar, PR64 Cameo
Rare Contrasted Proof**

- 4615** 1905 PR64 Cameo NGC. As proof coinage production began within the third mint building at Philadelphia, officials decided that cameo contrast on proof coins was undesirable. As a result, those beautiful coins are extremely rare today. This half dollar is fully brilliant with untuned silver surfaces and excellent contrast between the satiny devices and mirrored fields. Census: 2 in 64 Cameo, 11 finer (8/12). (#86552)

Gem Cameo Proof 1905 Barber Half

- 4616** 1905 PR65 Cameo PCGS. CAC. Unlike most proofs of this era, the sharply detailed design elements of this delightful Gem are richly frosted, providing intense cameo contrast with the deeply mirrored fields. Attractive hints of lime-green and turquoise toning are evident at the peripheries. Population: 6 in 65 Cameo, 3 finer (7/12). (#86552)

EARLY DOLLARS

- 4617** 1795 Flowing Hair, Three Leaves — Damaged — NGC Details. VG. B-5, BB-27, R.1. This early silver type coin is lightly hairlined and somewhat bright from cleaning and displays four slender scratches on the obverse field. A collectible example of the briefly coined Flowing Hair design. (#6852)

**Fine 1795 Flowing Hair Dollar
B-5, BB-27, Three Leaves Reverse**

- 4618** 1795 Flowing Hair, Three Leaves Fine 12 PCGS. B-5, BB-27, R.1. Readily attributed by the broad die line or "bar" behind the highest neck curl. Deeply toned in blended sea-green, gunmetal-blue, and almond-gold shades. Evenly worn and generally smooth though we note thin marks near the upper left stars and UNITED. Ex: *Long Beach Signature* (Heritage, 2/2007), lot 3585, which realized \$4,312.50.. (#6852)

**VF Details 1795 Flowing Hair Dollar
Three Leaves Reverse, B-5, BB-27**

- 4619** 1795 Flowing Hair, Three Leaves — Improperly Cleaned — NGC Details. VF. B-5, BB-27, R.1. The narrow "bar" behind Liberty's portrait is diagnostic of the variety. A cream-gray and almond-gold example of this popular early crown-sized type. Parallel hairlines are prominent on both sides but there are no other detractors. The left wing shows considerable plumage detail. (#6852)

**1795 B-5, BB-27 Dollar
XF Details**

- 4620** 1795 Flowing Hair, Three Leaves — Obverse Scratched, Improperly Cleaned — NCS. XF Details. B-5, BB-27, R.1. The obverse has several fine scratches and hairlines, with artificial steel-blue color. The reverse is similar, although with fewer scratches. A small reverse rim bump is noted at 10 o'clock. From *The Dr. Charles Nelson Collection*. (#6852)

**XF Details 1795 Flowing Hair Dollar
B-5, BB-27**

- 4621** 1795 Flowing Hair, Three Leaves — Repaired — NGC Details. XF. B-5, BB-27, R.1. Bowers-Borckardt Die State II. This richly detailed Flowing Hair type coin has steel-gray borders and stone-white centers. Whizzed and cleaned to conceal areas of tooling, most notably on the obverse center and right field, but also on the reverse field beneath the wings and on the exergue. (#6852)

**1795 B-6, BB-25 Dollar, AU55+
Blundered Obverse Die
E Over R in LIBERTY**

- 4622** 1795 Flowing Hair, Three Leaves AU55+ NGC. B-6, BB-25, R.3. The usual reverse die state with a cluster of four leaves below the ST in STATES. The obverse die was mistakenly engraved LIBRRTY, then corrected with an E punched over the errant R. Remnants of the original R punch remain. This lovely Choice AU specimen has nearly full luster, especially visible near the borders, with pewter-gray surfaces and delicate gold, blue, and lavender toning on each side. A small cut on the reverse affects the fourth wing feather right of the eagle's body, into the field below. Otherwise, the surfaces are virtually flawless. Only about a half dozen similar or finer examples of this variety are known. *From The Fred Yee Collection. (#6852)*

**1795 Draped Bust Dollar, VF Details
B-14, BB-51, Off-Center Bust**

- 4623** 1795 Draped Bust, Off Center — Improperly Cleaned — NGC Details. VF. B-14, BB-51, R.2. Bowers-Borckardt Die State I. Powder-blue margins frame lilac-tinged fields and devices. Hairlined and somewhat glossy but some inner hair detail is present. A narrow diagonal lamination (as made) is noted behind Liberty's shoulder curl. Believed to be the very first Draped Bust variety because of the mint-blundered uncentered position of the bust device.

**1795 B-14, BB-51 Dollar, AU55
Draped Bust, Set Left**

- 4624** 1795 Draped Bust, Off Center AU55 NGC. B-14, BB-51, R.2. Two varieties have the Draped Bust centered, or left of center, as on this example. NGC describes the variety as "Draped Bust, Set Left" and PCGS calls it the "Off-Center Bust," the latter term suggesting an error coin. This remarkable Choice AU specimen has exceptional eye appeal. The obverse is fully lustrous and boldly detailed with light gold toning over its satiny silver brilliance, showing myriad vertical dark toning streaks. The reverse has light silver-gray mint brilliance with attractive splashes of light gold. A splendid specimen. Census: 26 in 55, 51 finer (7/12), for both varieties. *From The Fred Yee Collection. (#96858)*

**1796 B-4, BB-61 Dollar, XF40
Small Date, Large Letters**

- 4625 1796 Small Date, Large Letters XF40 PCGS. B-4, BB-61, R.3.** An early die state before the obverse was relapped, here showing complete curls at the top of the head and behind the shoulder. A small die dot just below the shoulder loop and centered over the 1 immediately identifies this obverse, used here with a Large Letters reverse, and on BB-62 with a Small Letters reverse.

A few scattered marks appear on each side of this lovely early dollar. In our opinion, this still lustrous pewter-gray and gold toned specimen deserves a higher grade. Although a few scattered marks appear on the obverse, the surfaces are exceptional and the presentation is wholly original. (#6860)

- 4626 1797 10x6 Stars, Large Letters — Improperly Cleaned — NGC Details. VF. B-3, BB-71, R.2.** Bowers-Borckardt Die State III. An almond-gold and stone-gray example of the short-lived Small Eagle type. Both sides are cloudy from hairlines and devices display a few faint slide marks. (#6865)

- 4627 1797 10x6 Stars, Large Letters — Damaged — NGC Details. VF. B-3, BB-71, R.2.** Bowers-Borckardt Die State III. A low-mintage early dollar, this coin shows a couple of deep punch marks at 6 o'clock on the reverse, with extensive repair in the corresponding area on the obverse. Much original design detail remains intact, with pleasing gray and blue-steel patina.

**XF 10x6 Stars 1797 Dollar
Large Letters, B-3, BB-71**

- 4628 1797 10x6 Stars, Large Letters XF40 NGC. B-3, BB-71, R.2.** Bowers-Borckardt Die State III. Deep powder-blue and stone-gray toning encompasses this better grade Small Eagle dollar. The hair and wings display glimmers of luster, as do peripheral design elements. Adjustment marks (as made) are intermittent across the reverse and clash marks (also mint-made) are in front of the profile but the sole mentionable mark is a small rim tick at 6 o'clock on the reverse. (#6865)

- 4629 1797 9x7 Stars, Large Letters — Tooled — NGC Details. XF. B-1, BB-73, R.3.** The obverse field is extensively smoothed with fine pinscratches, but this well defined early dollar appears attractive to the unaided eye. Deep steel-gray, sea-green, and rose-red toning cedes to pearl-gray high points. (#6863)

**B-1, BB-73 1797 Dollar, AU53
9x7 Stars, Large Letters**

4630 1797 9x7 Stars, Large Letters AU53 PCGS. B-1, BB-73, R.3. Bowers-Borckardt Die State III, multiply cracked through Liberty's hair ribbon, but without the cracks in STATES marking later die evolution. All three varieties of 1797 dollar have their own *Guide Book* listings, increasing all-around demand; the 9x7 Stars, Large Letters is the middle rarity of the three, scarce regardless of grade. Smooth and still-lustrous surfaces are largely blue-gray with olive, gold, and rose touches. Scattered small marks and a couple of old pinscratches are as expected for a large silver coin more than two centuries old. (#6863)

4631 1798 Large Eagle, Pointed 9 Fine 15 PCGS. B-27, BB-118, R.3. Bowers-Borckardt Die State II. All major design elements and some interior detail remains intact on this problem-free early dollar. The pleasing gray and blue-steel surfaces show the expected number of minor abrasions. (#6873)

4632 1798 Large Eagle, Pointed 9 VF20 NGC. B-24, BB-124, R.2. Bowers-Borckardt Die State IV. The stone-gray motifs and chestnut-gold fields are bounded by deep sea-green margins. The strike is soft only on a few stars northeast of the eagle. (#6873)

4633 1798 Large Eagle, Pointed 9 VF30 NGC. B-12, BB-120, R.4. Bowers-Borckardt Die State IV. Toned stone-gray, powder-blue, and autumn-gold. The well-detailed design elements are moderately worn, but they retain all major detail, and the surfaces are lightly abraded. However, a series of cross-hatched adjustment marks is evident in the area of the reverse stars. (#6873)

**Very Scarce XF B-31, BB-115
1798 Heraldic Eagle Dollar**

4634 1798 Large Eagle, Pointed 9 XF40 PCGS. B-31, BB-115, R.5. Bowers-Borckardt Die State IV with the reverse die cracked and sinking northeast of the eagle's head. An impressively detailed early dollar whose glossy surfaces display deep tan-brown and gunmetal-blue toning. No marks are evident. A very scarce variety, likely because the reverse die failed unexpectedly early. (#6873)

**1798 B-27, BB-113 Dollar, AU58
'Workhorse' Obverse Die**

4635 1798 Large Eagle, Pointed 9 AU58 NGC. CAC. B-27, BB-113, R.2. This is the first use of a "workhorse" obverse die that outlasted six reverse dies before its final use with a seventh reverse, used for BB-113 through BB-119. The obverse die on this example is perfect with no trace of a crack from the rim to the 9, and the reverse die has a delicate crack from the border over ES to OF, the wing tip, and the first A in AMERICA. The central obverse and reverse of this lustrous near-Mint dollar are toned in gold, slightly deeper on the reverse, with lovely peripheral violet and blue. A splendid aesthetic presentation.
From The Fred Yee Collection. (#6873)

- 4636** 1798 Large Eagle, Pointed 9, Wide Date — Improperly Cleaned — NGC Details. XF. B-23, BB-105, R.3. Bowers-Borckardt Die State III. A scarcer late die state of this early dollar, with some incomplete hair detail on Liberty's portrait, due to lapping. Both sides show mottled bluish-gray and golden-brown patina.

**Very Rare Early Die State
B-11, BB-161 7x6 Stars 1799 Dollar**

- 4637** 1799 7x6 Stars PCGS Genuine. B-11, BB-161, R.3. Bowers-Borckardt Die State I. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. **From an unbroken reverse die**, and the first example known to us as such. B-11 dollars invariably (except for the present piece) have a heavy die crack between the rim and banner near the D in UNITED. The autumn-gold and stone-gray surfaces are thickly hairlined but display substantial design detail.

- 4638** 1799 7x6 Stars — Reverse Damage — NGC Details. Fine. B-21, BB-169, R.3. Bowers-Borckardt Die State IV. This tan-brown and gunmetal-blue Heraldic Eagle dollar has a roundish dig above the arrowheads that corresponds to the NGC designation and causes a small bulge behind the hair ribbon. A small obverse rim ding is at 5:30. (#6878)

- 4639** 1799 7x6 Stars — Improperly Cleaned — NGC Details. VF. B-10, BB-163, R.2. Bowers-Borckardt Die State IV, with light crack down through the TES of STATES. Moderately worn but with a past cleaning obvious everywhere but the narrow bands of deep blue at the margins. A rim bump is noted under the date. (#6878)

- 4640** 1799 7x6 Stars — Improperly Cleaned — NCS. VF Details. B-5, BB-157, R.2. Bowers-Borckardt Die State IV. The slate-gray surfaces display glimpses of golden-brown toning in design recesses. This early dollar is devoid of consequential abrasions though hairlines emerge when the piece is rotated beneath a light. *From The Dr. Charles Nelson Collection.* (#6878)

**Bolender-17 7x6 Stars 1799 Dollar
Choice VF, BB-164**

- 4641** 1799 7x6 Stars VF35 ANACS. B-17, BB-164, R.2. Bowers-Borckardt Die State IV with several interesting reverse cracks. Medium brown and gunmetal-blue toning encompass most of this attractively detailed Bust dollar. The portrait high points are cream-white. A small obverse rim ding is at 1:30, and the obverse displays delicate hairlines. *From The Dr. Charles Nelson Collection.* (#6878)

- 4642** 1799 7x6 Stars — Obverse Scratched, Rim Damaged — NGC Details. XF. B-12, BB-160, R.3. Bowers-Borckardt Die State III. Both obverse and reverse rims show obvious damage in several places, but much original detail remains intact and the surfaces display pleasing shades of dove-gray and steel-blue patina. A long scratch across Liberty's neck and cheek is the most obvious surface flaw. (#6878)

- 4643** 1799 7x6 Stars — Improperly Cleaned — NGC Details. XF. B-8, BB-165, R.3. Bowers-Borckardt Die State I. This lightly worn early dollar shows only minor abrasions and most design detail remains intact, with a little softness on the central reverse. The surfaces show a mix of blue-steel and golden-brown toning. (#6878)

**Choice XF 1799 Dollar
Nicely Toned B-21, BB-169**

- 4644** 1799 7x6 Stars XF45 PCGS. B-21, BB-169, R.3. Bowers-Borckardt Die State IV. Star 2 is repunched and evidence of die rust is apparent near star 1 identifying the BB-169 variety. BB-169 is a slightly scarce variety, rarely encountered in AU or Mint State grades. This lightly worn Choice XF specimen retains much of its original luster and design detail, with pleasing gold, gray, and lavender patina. (#6878)

**Choice XF 7x6 Stars 1799 Dollar
B-5, BB-157, Middle Die State**

- 4645** 1799 7x6 Stars XF45 PCGS. B-5, BB-157, R.2. Bowers-Borckardt Die State III. Splashes of peach-gold accompany the borders of this lightly toned silver dollar. Mint luster is considerable and illuminates design elements. Marks are minimal save for a few subtle field abrasions near the profile. A desirable representative of the popular Heraldic Eagle type. The reverse displays lengthy die cracks but lacks the terminal vertical crack through the first T in STATES. (#6878)

- 4646** 1800 — Improperly Cleaned — NGC Details. VF. B-13, BB-193, R.2. Bowers-Borckardt Die State I. One of the less-available die states. All major design features remain intact and much interior detail is present. The surfaces display uniform violet-gray patina. (#6887)

4647 1800 — Polished — NGC Details. VF. B-16, BB-187, R.2. Bowers-Borckardt Die State IV. Peripheral golden-brown and aquamarine toning. All letters in E PLURIBUS UNUM are clear but the surfaces are bright and glossy from cleaning. One thin vertical mark beneath the hair ribbon. (#6887)

4648 1800 — Improperly Cleaned — NGC Details. XF. B-8, BB-188, R.4. Bowers-Borckardt Die State III. Much intricate detail remains intact on Liberty's hair and drapery and the surfaces show only minor abrasions. A few minor rim nicks are evident on both sides. (#6887)

4649 1800 12 Arrows — Improperly Cleaned — NGC Details. VF. B-17, BB-196, R.1. Bowers-Borckardt Die State I without clash marks and rare as such. Most B-17 dollars are Die State IV. This is a well defined example whose cream-gray and ice-blue surfaces are a bit glossy from cleaning. The reverse has small rim dings at 2, 3, and 6 o'clock.
From The Norva Collection.

4650 1801 — Scratched, Cleaned — ANACS. VF20 Details. B-3, BB-213, R.3. Bowers-Borckardt Die State II. The obverse of this Heraldic Eagle dollar is slate-gray and bright from cleaning. A few pinscratches are noted near the left-side stars. The reverse shows mottled russet-brown and gunmetal toning and is only mildly luminous.
From The Dr. Charles Nelson Collection. (#6893)

4651 1802 Narrow Date VF25 NGC. B-6, BB-241, R.1. The so-called Narrow Date is better described as the Divided Date, with the 18 and 02 close, and the 80 apart. Hints of luster remain in the peripheral areas of this modestly worn early dollar. A few handling marks are noted on each side, and the surfaces host light champagne toning. (#6895)

4652 1802 Narrow Date — Cleaned — ANACS. XF40 Details. B-6, BB-241, R.1. Bowers-Borckardt Die State III. This stone-gray example is hairlined and mildly bright but retains substantial design detail. Luster emerges from the stars, wings, and shield.
From The Dr. Charles Nelson Collection. (#6895)

1803 Draped Bust Dollar, VF25 Large 3, B-6, BB-255

4653 1803 Large 3, VF25 NGC. B-6, BB-255, R.2. Bowers-Borckardt Die State I. The large, thick-topped 3 in the date identifies the BB-255 variety, the most available variety of the year in terms of total number of coins known. The pleasing surfaces of this moderately worn specimen are darkly toned in shades of gray, gold, and crimson (#6900)

4654 1803 Large 3 VG8 NGC. B-6, BB-255, R.2. Bowers-Borckardt Die State I. All major design elements remain intact, at least in outline, and some interior detail remains on the central devices. The surfaces are patinated in shades of dove-gray and amber. (#6901)

GOBRECHT DOLLARS

1836 Judd-60 Gobrecht Dollar Die Alignment I, XF Details

4655 1836 Name on Base, Judd-60, Pollock-65, R.5 — Obverse Rim Filed — NGC Details. XF. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). The diagonal clash mark is clearly evident above the upper wing, indicating this is one of the coins believed struck in late December 1836. The fields still retain moderate reflectivity in spite of the numerous handling marks. The rim filing mentioned on the insert is seen on the upper portion of the obverse rim. The light gray surfaces display slight golden-brown patina that deepens around the margins.

**1836 Original Gobrecht Dollar, PR61
Judd-60, Die Alignment I, Deeply Toned**

- 4656** 1836 Name on Base, Judd-60 Original, Pollock-65, R.5, PR61 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). The faint diagonal die scratch above the eagle's wing is readily apparent with a loupe, a sure indicator of a later December striking. This piece is mislabeled as Restrike. Restrikes are not found in Die Alignment I. Each side is deeply toned in charcoal gray with a thin outline of golden around the devices. The surfaces are so deeply patinated that the shallow mirroring in the fields is almost completely subdued (but this same depth of color also subdues the light hairlines). The strike details are complete in all areas, even including full detail on Liberty's foot.
From The Fred Yee Collection. (#11225)

SEATED DOLLARS

**1840 Silver Dollar, AU58
First Seated Liberty Issue**

- 4657** 1840 AU58 NGC. The Philadelphia Mint produced a reported total of 61,005 silver dollars in 1840, the first year of the Seated Liberty design. High-grade specimens are seldom encountered in today's market. This attractive near-Mint specimen is sharply detailed throughout, and the lightly marked surfaces are blanketed in shades of bluish-gray and golden-brown patina. Census: 41 in 58, 63 finer (8/12). (#6926)

- 4658** 1841 AU55 NGC. The mintage for the 1841 silver dollar was a substantial 173,000 pieces, but almost all entered circulation. This briefly handled piece has numerous small abrasions scattered over each side, the only ones of note are located above the eagle's head on the reverse. Light gray patina is the dominant color with peripheral golden also present. Sharply struck. (#6927)

- 4659** 1842 AU55 PCGS. CAC. This Choice AU Seated dollar shows a little flatness on the stars and Liberty's head, but only a trace of actual wear is present. The lightly marked surfaces are darkly toned in shades of slate-gray and amber. (#6928)

**1842 Seated Liberty Dollar, MS62
Conditionally Scarce in Mint State**

- 4660** 1842 MS62 PCGS. Among No Motto Seated dollars, the 1842 is encountered far less often in Mint State than the Treasury-hoarded 1859-O and 1860-O. This piece has the finish usually seen on dollars from the 1840s, that is, semiprooflike rather than frosted. The fields show obvious die striations that impart the bright sheen seen on this piece. Well-struck in general, although there is a bit of softness noted on the top of the eagle's left wing. Moderately abraded for a coin of this grade, and the surfaces are generally brilliant. Population: 19 in 62, 38 finer (7/12). (#6928)

- 4661** 1843 AU53 PCGS. An attractive example for the grade, this piece displays generally well struck design elements that show just a bit of weakness on the eagle's neck and the top of Liberty's head. Essentially untuned, with traces of mint luster near the devices. The highpoints are modestly worn, and there are scattered small abrasions over each side. (#6929)

- 4662** 1843 AU55 NGC. This well-detailed Choice AU specimen exhibits lustrous, lightly marked surfaces that are toned in attractive shades of champagne-gold and lavender. Eye appeal is quite strong for the grade.
From The William R. Green Collection. (#6929)

- 4663 1844 XF40 PCGS.** Faintly luminous through gold-gray and blue-gray patina that shows broad streaks of charcoal. Well-defined with only a few digs, a great example from an issue of just 20,000 pieces. (#6930)

**AU58 1844 Silver Dollar
Low-Mintage 1840s Issue**

- 4664 1844 AU58 NGC.** A brilliant and moderately prooflike example of this early and better date. Luster dominates Liberty and the eagle and fills the legends. As expected of the grade, the fields display faint scuffs from its short stint in circulation, but the cheek, knee, and other high points show only slight wear. The obverse shield is die doubled, as always for the 1844 business issue. One tiny reverse rim nick occurs at 4:30.

From The William R. Green Collection. (#6930)

Prooflike Near-Mint 1844 Dollar

- 4665 1844 AU58 Prooflike ANACS.** LIBERTY and the obverse shield are nicely die doubled, characteristic of this challenging low-mintage date. The mostly untoned surfaces are unmarked except for a slender tick on the right obverse field and a slight obverse rim ding at 4 o'clock. Certified in a small-sized holder.

From The William R. Green Collection. (#6930)

**Mint State 1844 Seated Dollar
Only 20,000 Pieces Struck**

- 4666 1844 MS61 NGC.** A very scarce date with a mintage of just 20,000 pieces. Business strikes are identified by prominent die doubling on Liberty's shield and coarse die lines on the reverse field near the center. The present representative is satiny and displays milky cream-gray, lime-green, and rose-gold toning. The fields display scattered small marks consistent with the grade. Census: 7 in 61, 12 finer (7/12).

From The William R. Green Collection. (#6930)

- 4667 1845 XF45 ANACS.** Still-luminous surfaces persist despite light wear across the high points. The obverse is largely silver with pale blue and gold overtones, those shades deepening on the reverse. Two small reed marks appear above the eagle's head. (#6931)

- 4668 1846-O AU50 NGC.** The 1846-O is the first branch-mint silver dollar, with a reported mintage of 59,000 pieces. This lightly circulated example is attractively toned in shades of golden-tan, violet-blue, and gray. (#6933)

- 4669 1847 AU55+ NGC.** Though lightly rubbed, this Seated dollar remains amply lustrous and even flashy when its silvery surfaces are tilted into the light. Gold and blue overtones are faint but more visible on the reverse. (#6934)

- 4670 1847 AU58 PCGS.** The 1847 Seated Liberty dollar is more elusive in high grade than the mintage of 140,750 pieces suggests. This well-detailed near-Mint specimen retains much original mint luster, with hints of golden-tan and amber patina. Population: 41 in 58, 61 finer (7/12). (#6934)

**Choice AU 1848 Seated Dollar
Popular Date, 15,000 Pieces Struck**

- 4671 1848 AU55 PCGS.** The 1848 dollar has an impressively low mintage of only 15,000 pieces, and as such is a collector favorite. This mostly gray example displays a slight accent of iridescent color on each side. There are few handling marks, the only one worthy of mention being a scrape in the left obverse field. The strike is a bit soft over the high points, most noticeably on the head of Liberty. Population: 20 in 55, 43 finer (7/12). (#6935)

**1849 Seated Dollar, MS62
Rare Issue in High Grade**

- 4672 1849 MS62 NGC.** From a nominal mintage of 62,600 pieces, the 1849 Seated Liberty dollar is an elusive date in Mint State grades. This pleasing MS62 example displays well-detailed design elements and a dusky patina of gray, gold, and blue. A scattering of minor contact marks on both sides explains the grade. Census: 17 in 62, 36 finer (8/12). (#6936)

- 4673 1850 — Cleaning — Genuine PCGS. AU Details.** A tiny mintage of 7,500 pieces ensures the rarity of this well defined Seated dollar. Bright from a cleaning but the typically abraded fields were likely prooflike before the impairment. (#6937)

**1850 Seated Liberty Dollar, AU58
Sought-After Low-Mintage Issue**

- 4674 1850 AU58 PCGS.** An extremely low business-strike mintage of 7,500 Seated Liberty dollars was accomplished in 1850, making the date scarce-to-rare in all grades today. This remarkable near-Mint specimen shows just the slightest trace of high-point wear on the well-detailed design elements and retains much satiny mint luster, mixed with prooflike reflectivity in some areas. Population: 20 in 58, 34 finer (8/12). (#6937)

**1853 Seated Liberty Dollar, MS62
Scarce Issue in Mint State Grades**

- 4675 1853 MS62 PCGS.** The 1853 Seated Liberty dollar claims a mintage of 46,110 pieces, not a large total, even by the standards of the time. This attractive MS62 specimen is well-detailed, with slightly subdued mint luster and surfaces that show only minor signs of contact. A few minor rim bruises are evident on the reverse. Population: 19 in 62, 44 finer (8/12). (#6941)

**1859-O Seated Dollar, MS62
Excellent Mint Luster, Mostly Brilliant**

- 4676 1859-O MS62 NGC.** Found in quantities in government vaults in 1962 and paid out at face value, there were nowhere near enough 1859-O and 1860-O dollars stored away for all the collectors who wanted one. And that is still the case today. This piece shows the normally seen mint frost that is only interrupted by occasional abrasions from a century of storage. Most of each side is brilliant with an edging of reddish-golden around the margins. *From The Fred Yee Collection.* (#6947)

- 4677 1860-O MS61 NGC.** Rich olive, sage, and blue toning over most of each side with windows into luminous silver. This antebellum Seated dollar is housed in a prior-generation holder. (#6950)

**1865 Seated Dollar, AU58
Seldom-Seen Date in the Series**

- 4678 1865 AU58 NGC.** The Philadelphia Mint coined 46,500 Seated dollars in 1865 but few of those coins survive, due to hoarding and melting activities shortly after they were struck. A delightful near-Mint specimen, this piece has considerable luster with light gray surfaces and delicate gold toning. The strike is soft on the reverse. Census: 6 in 58, 28 finer (7/12). (#6955)

- 4679 1869 AU55 PCGS.** Only a trace of high-point wear is evident on the well-detailed design elements, and the smooth surfaces are toned in attractive shades of golden-brown and lavender-gray. Population: 24 in 55, 58 finer (7/12). *From The William R. Green Collection.* (#6962)

- 4680 1870-CC — Holed / Plugged — PCGS Genuine. XF Details. Variety 2-E.** Holed, plugged, and repaired at 12 o'clock on the obverse and 6 o'clock on the reverse, affecting the E in ONE and the top of Liberty's head. The deep steel-gray surfaces are cleaned and the field above the arrowheads is smoothed. A rare first-year Carson City dollar. *From The Norva Collection.*

**Choice XF 1870-CC Dollar
Scarce Carson City Type Coin**

- 4681 1870-CC XF45 PCGS. Variety 1-C.** The first year Carson City silver dollar is a bit more available than suggested by its meager mintage of 12,462 pieces. Perhaps a number were set aside as souvenirs by proud local residents, though this theory conflicts with the median certified grade of XF40. The present coin exhibits rich dove-gray toning with pockets of bright luster in design recesses. Minor marks are present but of little consequence. (#6964)

Borderline Uncirculated 1870-CC Dollar

- 4682** 1870-CC AU58 NGC. Variety 3-D. A surprising number of die marriages are known for the introductory Carson City issue despite a reported mintage of only 12,462 pieces. Three obverse and five reverse dies were used. The reverse die (not included) used to strike the present coin was cancelled by the Mint but has survived and appeared as lot 5976 in our 2004 Portland Signature. Deep ocean-blue, orange-gold, and lavender toning endows this momentarily circulated but satiny example. The obverse field displays only light hairlines beneath the toning, and the reverse is minimally abraded aside from a minor rim mark at 2:30. (#6964)

1871-CC Dollar, VF Details Only 1,376 Minted

- 4683** 1871-CC — Environmental Damage — PCGS Genuine. VF Details. Both sides have deep gray surfaces and even deeper steel-gray toning, apparently too dark for PCGS to grade. The surfaces show the usual handling marks that are expected at the VF grade level. *From The Norva Collection.*

1872 Seated Liberty Dollar, MS63 Elusive Date in Higher Grades

- 4684** 1872 MS63 NGC. The 1872 Seated Liberty dollar was produced in large numbers, but the issue is seldom encountered in high grade today. This pleasing Select example exhibits well-detailed design elements, with a touch of softness on the banner. The surfaces show only a few minor contact marks under light pink and gold patina. Census: 15 in 63, 26 finer (7/12). (#6968)

PROOF SEATED DOLLARS

AU Details Proof-Only 1858 Silver Dollar

- 4685** 1858 — Smoothed — PCGS Genuine. Proof, AU Details. Little if any actual circulation wear is present, but the stone-gray and almond-gold surfaces have been smoothed, most evident on the left obverse and upper reverse fields. A couple of spots are tooled near Liberty's feet. 1858 was the first year that proofs were made available for collector sale, and it is estimated that 300+ proofs were struck. The 1858 is rarer than any proof date from 1859 to the end of the series, though it is more available than any earlier proof date. The 1858 is also the sole proof-only date of the series.

1859 Seated Dollar, PR60 Popular Early Proof Issue

- 4686** 1859 PR60 PCGS. The 1859 proof Seated Liberty dollar claims a mintage of 800 pieces, but it is likely that no more than 450 examples were actually distributed. The present coin displays razor-sharp definition on all design elements and brightly reflective fields with a few accents of light gold toning. A few minor contact marks and hairlines explain the grade. (#7002)

**1859 Seated Dollar, PR62
Vivid Peripheral Toning**

- 4687 1859 PR62 NGC.** The proof 1859 Seated Liberty dollar is much more elusive than its reported mintage of 800 pieces would suggest. The present coin is an attractive PR62 example, with razor-sharp definition throughout and pleasing reflective fields. The frosty ivory devices stand out boldly against vivid rose toning in the fields, giving the obverse a distinctive cameo appearance.
From The William R. Green Collection. (#7002)

**1861 Seated Dollar, PR61
Even Gray Patina**

- 4688 1861 PR61 NGC.** The 1861 has a deceptively high mintage of proofs. Records show that 1,000 proofs were struck, but many were melted at year's end as unsold. Hairlines have slightly dulled the proof flash in the fields, but the devices show pinpoint striking definition. Light, even gray patina covers each side.
From The Fred Yee Collection. (#7004)

Elusive PR62 1861 Seated Dollar

- 4689 1861 PR62 PCGS.** The 1861 proof Seated Liberty dollar is an elusive issue, due to both a small distribution total and a low survival rate. This attractive PR62 example is sharply detailed throughout, with brightly reflective surfaces that display pleasing highlights of champagne-gold toning. Population: 29 in 62, 63 finer (8/12).
From The William R. Green Collection. (#7004)

Select Proof 1862 Silver Dollar

- 4690 1862 PR63 ANACS.** This Civil War date has a scant proof emission of 550 pieces. The present fully struck Select specimen is mostly medium silver-gray although the peripheries display splashes of powder-blue and tan-gold. Detrimental contact is absent aside from a small obverse rim nick at 7:30.
From The William R. Green Collection. (#7005)

**1864 Seated Dollar, PR64 Cameo
Deeply Reflective Fields**

- 4691 1864 PR64 Cameo NGC.** The later Civil War date 1864 is seldom available as a business strike or proof. This impressive Choice Cameo proof exhibits deeply mirrored fields and noticeably frosted devices. This date is rarely seen with contrast. Both services have only certified a total of 13 coins in PR64 Cameo, and eight are finer (7/12).
From The Fred Yee Collection. (#87007)

**Choice Proof 1865 Seated Dollar
Last Civil War Issue**

- 4692 1865 PR64 NGC.** A small mintage of 500 proof Seated Liberty dollars was achieved in 1865, the last year of the Civil War. The deeply mirrored surfaces of this attractive Choice example are blanketed in pleasing shades of champagne-gold, cerulean-blue, and gray toning, and the design elements are sharply detailed throughout. Census: 37 in 64, 40 finer (8/12).
From The William R. Green Collection. (#7008)

1867 Seated Liberty Dollar, PR63
Only 625 Pieces Struck

- 4693 1867 PR63 PCGS.** Only 625 proof Seated Liberty dollars were struck in 1867, all distributed with the silver proof sets. This remarkable Select specimen exhibits razor-sharp definition on all design elements, with brightly reflective fields that show a few minor hairlines and contact marks. Accents of light gold toning enliven the pleasing surfaces. Population: 70 in 63, 79 finer (8/12).
From The William R. Green Collection. (#7015)

1868 Seated Dollar, PR62
Rare Cameo Example

- 4694 1868 PR62 Cameo NGC.** The design elements of this attractive PR62 specimen are sharply detailed and richly frosted, creating bold cameo contrast with the deeply reflective fields. A few highlights of gold toning enliven the pleasing surfaces, which show only minor hairlines and contact marks. Census: 2 in 62 Cameo, 22 finer (7/12).
From The Fred Yee Collection. (#87016)

1869 Seated Liberty Dollar, PR61
Only 600 Examples Minted

- 4695 1869 PR61 NGC.** The 1869 proof Seated Liberty dollar boasts a meager mintage of just 600 pieces, making the issue scarce-to-rare in all grades today. This sharply detailed specimen displays reflective surfaces that are enlivened by attractive shades of golden-brown patina. The pleasing surfaces show only grade-consistent hairlines and contact marks.
From The Fred Yee Collection. (#7017)

-
- 4696 1870 — Improperly Cleaned — NGC Details. Proof.** Sharply detailed in most areas, this remarkable Seated Liberty dollar shows a little softness on the eagle's leg. The surfaces are brightly reflective throughout, but the devices lack mint frost, probably due to the noted cleaning.
From The Fred Yee Collection. (#7018)

1870 Seated Liberty Dollar, PR63
Lightly Toned Surfaces

- 4697 1870 PR63 NGC.** The 1870 proof Seated Liberty dollar claims a mintage of 1,000 pieces, but the issue is more difficult to locate than this fairly generous figure would suggest. This impressive Select specimen is sharply detailed and deeply mirrored, with a few minor hairlines in the field that explain the grade. The considerable visual appeal is enhanced by highlights of champagne-gold toning. Census: 43 in 63, 75 finer (8/12).
From The William R. Green Collection. (#7018)

Patinated PR62 1871 Silver Dollar

- 4698 1871 PR62 PCGS.** Butter-gold toning graces boldly struck and undisturbed surfaces. The fields are flashy, though the attractive patina precludes Cameo status. Mildly granular near star 3. Very scarce as only 960 proofs were issued, many of which were undoubtedly eventually spent. Housed in a first generation holder.
From The William R. Green Collection. (#7019)

1871 Silver Dollar, PR62
Borderline Cameo

- 4699 1871 PR62 PCGS.** A lovely proof dollar, this brilliant example is untoned, with fully mirrored fields around satiny, lustrous devices. Faint hairlines prevent a higher grade. A borderline Cameo proof, perhaps deserving that designation.
From The Dr. Charles Nelson Collection. (#7019)

White 1872 Seated Dollar, PR62

- 4700 1872 PR62 PCGS.** Fully struck and close to untuned, though the lower reverse border shows light apricot patina. Cameo contrast is evident, particularly on the reverse, though the green label holder precedes any such designation for Seated dollars. Minor strike-throughs (as made) are near the first two stars. IN GOD WE TRUST is strongly die doubled, likely as seen on each of the 950 proofs issued.

From The William R. Green Collection. (#7020)

TRADE DOLLARS

Choice 1873 Trade Dollar Attractive First-Year Type Coin

- 4701 1873 MS64 PCGS.** Unlike most short-lived series, the Trade dollar did not see its greatest level of production in the first year of issue. In fact, in 1874, both Carson City and San Francisco produced more Trade dollars than all mints combined coined in the prior year. This piece is softly lustrous beneath deep, pleasing violet and reddish-orange patina. Well struck with small, scattered marks and a spot of charcoal toning above the F in FINE. Population: 45 in 64 (1 in 64+), 14 finer (7/12). (#7031)

- 4702 1873-CC — Cleaning — PCGS Genuine. AU Details.** The dusky lavender-gray surfaces are subdued by cleaning but the devices show only light wear. Moderate field marks are scattered. A key Carson City issue, as is the 1878-CC.

From The Norva Collection.

1873-CC Trade Dollar, AU55 Better Carson City Issue

- 4703 1873-CC AU55 NGC. CAC.** Trade dollars were intended for export to the Orient, and relatively few examples of this introductory Carson City issue were spared chopmarks and foreign circulation. But the present Choice AU representative has only light wear, and the cream-gray surfaces are only moderately abraded save for a small reverse rim ding at 8:30. Housed in a prior generation holder. (#7032)

- 4704 1873-S Chop Mark MS62 PCGS.** A chop mark with an oval border is beneath the eagle's belly, and a second, deeply entered chop is on Liberty's extended arm. Lustrous and lightly toned with minor marks beneath the reverse banner. Population: 6 in 62, 2 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2010), lot 4386, which realized \$1,955. (#87033)

- 4705 1874-CC Chop Mark AU58 PCGS.** Micro CC. No period after FINE. Two simple chopmarks are placed close together near 9 o'clock on the obverse. A slender depression beneath Liberty's right (facing) shoulder is a lamination. Medium golden-brown, rose-red, and aquamarine toning. The upper left reverse is moderately abraded. (#7035)

- 4706 1874-S Chop Mark MS62 PCGS.** Minute S. No period after FINE. Two chopmarks are on the obverse field near the knee and a second pair is located beneath Liberty's legs. These chops cause a granular texture opposite near the left scroll end and the left (facing) wingtip. Lightly toned. Population: 11 in 62, 12 finer (7/12). (#87036)

- 4707 1875 AU58 NGC. CAC.** Type Two Reverse. This low mintage Borderline Uncirculated Trade dollar has satin luster and dusky gunmetal-gray toning. Wear is minor and the fields display moderate thin marks. (#7037)

- 4708 1875-CC Chop Mark AU58 PCGS.** Type One Reverse. A solitary chop mark on the left obverse field causes a slight bulge opposite above the arrow heads. The obverse has a few faint hairlines, but marks are generally minor. Golden-brown and dove-gray with good luster and a whisper of highpoint friction.
Ex: Phoenix ANA (Heritage, 3/2008), lot 850, which realized \$833.75. (#87038)

Patinated MS63 1875-CC Trade Dollar

- 4709 1875-CC MS63 PCGS. CAC.** Type One Reverse. An attractive Carson City Trade dollar with satin luster and medium caramel-gold and powder-blue toning. The strike is generally crisp, though Liberty's hair is lightly brought up and portions of the lower right reverse display mint-made roller marks. Consequential post-strike contact is confined to the upper right obverse field. Population: 56 in 63, 27 finer (7/12). (#7038)

- 4710 1875-S Chop Mark MS61 PCGS.** Type One Reverse. Large S. An ornate and deeply entered chop mark at the arrowheads causes a slight bend and creates a granular area opposite near star 3. Lustrous and only lightly abraded with chestnut-gold toning at the borders. (#87039)

- 4711 1875-S Chop Mark MS62 PCGS.** Type Two Reverse. Large S. An anchor-shaped chop mark is at Liberty's waist and a deeply entered chop overlaps the eagle's neck. Lustrous and minimally abraded with light to medium silver-gray toning. Population: 36 in 62, 23 finer (7/12). (#87039)

- 4712 1875-S MS63 PCGS.** Type One Obverse, Type One Reverse. This well-detailed Select specimen shows a little softness on the upper obverse and the eagle's leg. The satiny surfaces display pleasing golden-tan patina. (#7039)

- 4713 1875-S/CC Chop Mark AU55 PCGS. FS-501.** Two conjoined chop marks, one of which is incused, are placed above TRUST and affect the opposite area near the beak. A few small digs near the knees are not chops. The reverse field is heavily pinscratched near 8 o'clock. Well defined with deep multicolor toning. An early die state without any cracks. (#87040)

- 4714 1876 MS62 NGC.** Type One Obverse, Type One Reverse. Attractive shades of lavender and purple toning grace the lightly marked surfaces of this sharply detailed Trade dollar. Satiny mint luster adds to the considerable visual appeal.
From The Fred Yee Collection. (#7041)

**Chop Marked Choice AU
1876-CC Trade Dollar**

- 4715 1876-CC Chop Mark AU55 PCGS.** Type Two Reverse. Tall CC. A large and deeply entered chop is located beneath the left (facing) claw. This chop causes a bulge on the field near Liberty's profile. Smaller chop marks are noted beneath the branch stem, on the left half of the eagle's waist, and before OF on the reverse. A conditionally scarce Carson City issue. Population: 3 in 55, 5 finer (7/12). (#87042)

- 4716 1876-S Chop Mark MS62 PCGS.** Type One Obverse and Reverse. Large S. The obverse has five distributed chop marks. The reverse has a single chop on the eagle's head. Lustrous with attractive light golden-brown toning. Moderate parallel roller marks (as made) are prominent across much of the reverse. Population: 18 in 62, 15 finer (7/12). (#87043)

- 4717 1876-S MS63 PCGS.** Type One Obverse and Reverse. Large S. Faint tan toning visits the margins of this lustrous and lightly abraded Select Trade type coin. A crisply struck and attractive souvenir of our Centennial year.
From The Dr. Charles Nelson Collection. (#7043)

- 4718 1877-CC Chop Mark AU58 PCGS.** This lustrous Carson City Trade dollar has six chop marks on the reverse, one of which has incised symbols. The obverse has a single small chop at the knees and a roundish dig near star 11. Population: 9 in 58, 6 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2010), lot 9969, which realized \$2,070. (#87045)

- 4719 1877-S Chop Mark MS62 PCGS.** Large S. A single chop mark is unobtrusively placed beneath the eagle's right (facing) shoulder. The chop causes a granular texture near Liberty's lowered hand. Lustrous with light to medium caramel-gold toning. Population: 23 in 62, 6 finer (7/12). (#87046)

- 4720 1877-S MS61 NGC.** Well-defined with a semireflective obverse and cartwheel reverse, both silvery. Scattered shallow marks and abrasions have little individual impact but combine to account for the grade.
From The Dr. Charles Nelson Collection. (#7046)

- 4721 1878-S MS61 NGC.** This well-detailed Mint State example shows just a touch of softness on the eagle's leg and the pleasing surfaces are toned in shades of golden-brown and lavender-gray. A few minor contact marks explain the grade.
From The Fred Yee Collection. (#7048)

PROOF TRADE DOLLARS

- 4722 1874 PR62 NGC.** This richly toned second-year Trade dollar proof has peach, violet, and blue patina draping liquid mirrors. Light hairlines and a few contact marks appear on each side, most notably at Liberty's knees. (#7054)

**Select Proof 1875 Trade Dollar
Type Two Reverse**

- 4723 1875 PR63 PCGS.** Type Two Reverse. Proofs are approximately evenly divided between the two different reverses, distinguished by the presence or absence of a berry beneath the right (facing) claw. A razor-sharp strike and consistent field reflectivity confirm the proof status of this scarcer date Trade dollar. Dusky forest-green and steel-gray toning blanket the dappled but unmarked surfaces. A scant 700 proofs were issued. (#7055)

1875 Trade Dollar, PR62 Cameo

- 4724 1875 PR62 Cameo PCGS.** Type Two Reverse. The left obverse margin is cherry-red, the left reverse border is orange-gold, and the remainder of this scarce and fully struck proof type coin is pearl-gray. Obverse white-on-black contrast is evident between the luminous motifs and flashy fields. Wispy obverse hairlines determine the grade. (#87055)

**Choice Cameo Proof 1878 Trade Dollar
Ex: Richmond Collection**

- 4725 1878 PR64 Cameo NGC.** Ex: Richmond Collection. The Richmond Collection featured a nearly complete collection of U.S. coins, including both the 1884 and 1885 proof Trade dollars. The present first-year specimen displays exceptional cameo contrast and has only a trace of golden toning near the rims. The strike is intricate and there are no consequential detractors.
Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1562. (#87058)

- 4726 1879 PR61 Cameo NGC.** The sharply detailed frosty design elements contrast boldly with the mirrored fields on this attractive proof-only issue. The surfaces display a light golden patina, with the expected number of minor contact marks for the grade. (#87059)

**Select Proof 1879 Trade Dollar
Lightly Toned Cameo Example**

- 4727 1879 PR63 Cameo PCGS.** No business-strike Trade dollars were produced in 1879, but the Philadelphia Mint struck a generous proof mintage of 1,541 pieces. This pleasing Select specimen displays deeply mirrored fields and starkly contrasted frosty design elements, with a light champagne-gold patina. Population: 27 in 63 (2 in 63+) Cameo, 65 finer (7/12). (#87059)

- 4728 1880 PR61 NGC.** Pleasingly reflective with appreciable contrast on each side and layered violet and blue toning with a touch of green near the rims. Slide marks and contact are not obvious under the patina but nonetheless define the grade. (#7060)

**1880 Trade Dollar, PR64 Cameo
Popular Proof-Only Date**

- 4729 1880 PR64 Cameo NGC.** A series-record proof mintage of 1,987 Trade dollars was achieved in 1880, in response to a short-lived speculation-fueled boom in collecting this denomination, which had not been produced in business-strike format for several years. The present coin is an attractive Choice example, with frosty design elements that contrast boldly with the deeply mirrored fields. A touch of softness is apparent on the upper obverse, as often seen on this issue. Census: 56 in 64 (1 in 64+) Cameo, 70 finer (7/12). (#87060)

**1881 Trade Dollar, PR64
Dark Multicolor Toning**

- 4730 1881 PR64 PCGS.** A sharply detailed Choice Trade dollar, from a proof-only mintage of just 960 pieces, this delightful specimen is darkly toned in shades of cobalt-blue and champagne-gold, over deeply reflective fields. The surfaces show only a few minor hairlines and contact marks. Population: 98 in 64, 49 finer (8/12). (#7061)

**Gem Proof 1881 Trade Dollar
Spectacular Multicolor Toning**

- 4731 1881 PR65 NGC.** The 1881 Trade dollar claims a proof-only mintage of just 960 pieces, and examples in Gem condition are quite elusive. This delightful Gem is spectacularly toned in shades of greenish-gray, champagne-gold, and cobalt-blue over deeply reflective fields. The design elements are sharply detailed throughout. Census: 36 in 65, 28 finer (7/12). (#7061)

**1881 Trade Dollar, PR64+ Cameo
Toned and Exceptionally Attractive**

- 4732 1881 PR64+ Cameo PCGS. CAC.** The 1881 is a collector-favorite. It is a proof-only issue and was limited to only 1,987 pieces. This upper-end PR64 represents especially good value for the collector as it has almost all the attributes and eye appeal of a Gem at a substantial savings. The fields are deeply reflective and each side has rose centers that are surrounded by light blue margins. The devices are noticeably frosted and present strong contrast against the deeply mirrored fields. Population: 27 in 64 (2 in 64+) Cameo, 34 finer (7/12). (#87061)

**1881 Trade Dollar, PR64+ Cameo
Sought-After Proof-Only Issue**

- 4733 1881 PR64+ Cameo NGC. CAC.** The 1881 Trade dollar is a popular proof-only issue from a generous mintage of 1,987 pieces. This high-end Choice example has most of the attributes of a Gem, with razor-sharp definition on the design elements and only a few minor hairlines in the deeply mirrored fields. The field/device contrast is profound and a light gold patina adds to the impressive eye appeal. Census: 33 in 64 (1 in 64+) Cameo, 42 finer (7/12). *From The Fred Yee Collection.* (#87061)

**Choice Proof 1882 Trade Dollar
Impressive Cameo Specimen**

4734 1882 PR64 Cameo PCGS. The sharply detailed design elements of this impressive Choice Trade dollar are richly frosted, providing noticeable cameo contrast with the deeply reflective fields. Mottled shades of green, blue, and gray toning visit both sides, and only minor signs of contact are evident. Population: 39 in 64 (1 in 64+) Cameo, 13 finer (7/12). (#87062)

4735 1883 PR61 PCGS. A sharply detailed example of this proof-only date, with deeply mirrored fields under attractive shades of golden-brown and violet patina. A few minor hairlines and contact marks on both sides explain the grade. (#7063)

**Select Proof 1883 Trade Dollar
Important Proof-Only Issue**

4736 1883 PR63 PCGS. Discounting the clandestine 1884 and 1885 issues, the 1883 Trade dollar is the last date of the series, making it an important issue for date and type collectors. The 1883 was only produced in proof format, and this coin displays the sharply detailed devices and brightly mirrored fields expected of a high-quality proof. The surfaces are blanketed in attractive shades of champagne-gold and cobalt-blue patina. (#7063)

**1883 Trade Dollar, PR63
Final Collectible Date of the Series**

4737 1883 PR63 PCGS. The 1883 Trade dollar is the last collectible date of the series, from a proof-only mintage of 979 pieces. This attractive Select specimen is spectacularly toned in shades of greenish-gray and cobalt-blue, over deeply reflective fields. The design elements are sharply detailed and the pleasing surfaces show few signs of contact. (#7063)

**1883 Trade Dollar, PR64+ Cameo
Last Official Issue**

4738 1883 PR64+ Cameo NGC. CAC. The Trade dollar denomination was essentially retired after 1883, discounting the clandestine issues of 1884 and 1885. This high-end Choice specimen features sharply detailed design elements throughout and attractive shades of golden-brown toning. The frosty devices contrast dramatically with the deeply mirrored fields. Census: 24 in 64 (1 in 64+) Cameo, 41 finer (7/12). (#87063)

GOLD DOLLARS

4739 1849 No L MS64 PCGS. An attractive first-year example with Open Wreath and without the designer's monogram. Though unevenly struck, this coin has luster to spare on butter-yellow surfaces. (#7501)

4740 1849 Open Wreath MS64 PCGS. Breen-6002. Distant stars subtype. The star near 5 o'clock is sharply repunched. The green-gold surfaces are lustrous and minimally abraded. The portrait is fully struck though a few stars are lightly impressed. (#7502)

4741 1849 Open Wreath MS64 ★ NGC. Breen-6002. Distant stars, star at 5 o'clock repunched. The obverse is highly prooflike, undoubtedly the reason this coin has received a Star designation. The reverse displays cartwheel luster. Precisely struck and minimally abraded. (#7502)

**Choice AU 1849-C Gold Dollar
Closed Wreath Reverse**

4742 1849-C Closed Wreath AU55 NGC. The first collectible Charlotte Mint issue, since the 1849-C is extremely rare. A good strike with minor blending at the center of the portrait. The mildly prooflike surfaces display small marks, and a minor obverse retained lamination is noted near 3 o'clock. Census: 18 in 55, 52 finer (7/12).

From The William R. Green Collection. (#7505)

Near-Mint 1849-C Closed Wreath Gold Dollar

4743 1849-C Closed Wreath AU58 PCGS. Variety 1. Sole dies for the Closed Wreath variety (the Open Wreath of this year, of course, being an extreme rarity). This apricot-laced yellow-gold example has diffuse reflectivity through flashy fields. The delicate details of the hair and stars are better-defined than usual but show telltale evidence of friction. (#7505)

4744 1849-D XF45 PCGS Secure. Variety 1-A. Orange-gold borders gradually cede to sun-gold centers. A minimally abraded example of this scarce Dahlonega issue. Liberty's hair near the ear shows wear but the remainder of the design is sharp. (#7507)

4745 1851-O MS62 ★ NGC. Variety 1. The present lot is the only 1851-O gold dollar to secure the Star designation from NGC. Both sides are moderately prooflike, though perhaps to a degree insufficient to be labeled as such by NGC. Fully struck and flashy with no detrimental marks. (#7516)

4746 1853 MS64 PCGS. CAC. Intricately detailed with deep peach-gold luster that swirls under the light. A delicately sparkling piece with understated charm, ideal for the type collector who appreciates subtle elegance. (#7521)

1853 Gold Dollar, MS65+ Ideal Type Coin

4747 1853 MS65+ PCGS. The 1853 gold dollar was produced in large quantities and is probably the favorite choice of type collectors seeking an example of the Type One design. This high-end Gem features sharply detailed design elements and lustrous yellow and rose-gold surfaces, with no mentionable distractions. (#7521)

Mint State 1853-D Gold Dollar Vibrant Luster

4748 1853-D MS61 NGC. Variety 5-G. From a mintage of 6,583 pieces, the 1853-D gold dollar is one of the most challenging issues of the series in Mint State. Doug Winter estimates a surviving population of just 110-120 specimens in all grades. This well-detailed example displays vibrant mint luster over lightly marked yellow-gold surfaces. Census: 10 in 61, 21 finer (8/12). (#7523)

Choice XF 1854-D Gold Dollar Low-Mintage D-Mint Issue

4749 1854-D XF45 PCGS. Variety 6-H. The 1854-D gold dollar is an elusive issue from a mintage of just 2,935 pieces. Doug Winter estimates the surviving population at 85-95 specimens in all grades, with most examples seen in the XF-AU range. This lightly worn piece displays orange-gold surfaces with attractive accents of rose. Population: 4 in 45, 39 finer (8/12). (#7526)

Near-Mint 1854-D Gold Dollar Minimally Abraded Surfaces

4750 1854-D AU58 NGC. The final Type One Dahlonega gold dollar issue is extremely scarce, as suggested by its minute mintage of 2,935 pieces. This pale gold representative shows moderate softness of strike at the centers, as is common for the variety, but no abrasions are consequential, and luster fills the legends and outlines the wreath. Census: 24 in 58, 23 finer (7/12). (#7526)

4751 1854 Type Two MS61 PCGS. A delicate frosty character is this Type Two gold dollar's greatest asset. The obverse was struck from a buckled die, but the reverse's intricate detail is remarkable. (#7531)

1855 Gold Dollar, MS62 Important Type Two Issue

4752 1855 MS62 NGC. CAC. As the second year of the short-lived Type Two design, the 1855 gold dollar is extremely important for type purposes. This well-detailed MS62 survivor shows dramatic clash marks on both sides, with light yellow and rose-gold surfaces that exhibit only minor contact marks. (#7532)

**AU Details 1855-C Gold Dollar
Only Charlotte Type Two Issue**

- 4753 1855-C — Bent — NGC Details. AU. Variety 2.** A wave affects the lower obverse and upper reverse. Ample luster is evident across the minimally abraded honey-gold surfaces. Minor strike-throughs (as made) are near the tip of the headdress and the 1 in the denomination. The sole Charlotte issue of the briefly coined Type Two design. (#7533)

- 4754 1855-D — Mount Removed, Cleaned — NGC Details. VF. Variety 7-I.** The sun-gold surfaces are harshly cleaned and a repair may be present near the A in STATES. A short scratch is concealed on the headdress. The only Dahlonega issue of the Type Two design. Two die varieties are known despite a tiny mintage of 1,811 pieces. (#7534)

**Near-Mint 1857-D Gold Dollar
Much Prooflike Luster**

- 4755 1857-D AU58 PCGS.** Substantial prooflike honey-gold luster illuminates this unmarked Borderline Uncirculated rare date Dahlonega gold dollar. The 1857-D has a mintage of just 3,533 pieces and is desirable this close to Mint State. The present piece is lightly brought up on the headdress and the knot of the wreath but is otherwise exceptional for the grade. Population: 17 in 58, 15 finer (7/12). (#7546)

- 4756 1860-D — Mount Removed, Brushed — NGC Details. XF.** This rare date Dahlonega dollar has been extensively whizzed. A small repair and discoloration near the left ribbon end suggests removal from jewelry. The portrait displays minute granularity. (#7556)

- 4757 1860-S AU58 ANACS.** Well-defined with bright yellow-gold luster and just a touch of rub crossing the high points. The few marks on each side are minor aside from a small cut under the ST of STATES on the obverse. (#7557)

- 4758 1862 MS64 PCGS. CAC.** Bright and swirling luster dominates the eye appeal for this well-defined near-Gem from the Civil War era. Luster grazes at the lower portrait account for the grade. Housed in a green label holder. (#7560)

- 4759 1862 MS65 NGC. CAC.** A well-defined Civil War-era gold dollar with swirling yellow-gold luster. This Gem has two areas of uncommonly bright “die burn” shine at the lower obverse, adding to its charm. (#7560)

**Uncirculated Details 1875 Gold Dollar
Just 400 Pieces Struck**

- 4760 1875 — Improperly Cleaned — NGC Details. Unc.** The 1875 gold dollar has a business strike mintage of 400 pieces. A double eagle with such a minute production would trade for up to six figures, but the lesser number of gold dollar collectors allows a reasonable price for the present rarity. The NGC Census lists 30 examples in all grades, a figure undoubtedly inflated by resubmissions over the past quarter century. Hairlined and a bit glossy with peach-gold toning and a bold strike. Void of relevant abrasions. (#7576)

- 4761 1881 MS67 PCGS. CAC.** The 1881 was saved in significant numbers relative to its impressively low mintage, making it a perfect coin for type purposes. The surfaces on this example are luminous and glow with bright yellow-gold mint luster. The strike is complete and there are no obvious abrasions. (#7582)

- 4762 1883 MS64 PCGS. CAC.** This affordable gold dollar exhibits reddish-tinted surfaces with generous mint luster. The strike is strong throughout and there are numerous, but small abrasions on each side that account for the grade. (#7584)

- 4763 1883 MS66 PCGS.** Bright and swirling luster emphasizes the circulation-finish character of this yellow-gold Premium Gem. Great strike and all-around eye appeal. (#7584)

- 4764 1887 MS66 PCGS.** A beautiful apricot-gold and sea-green Premium Gem of this late and low mintage date. The strike is full except for trivial softness on the N in UNITED. Population: 64 in 66 (1 in 66+), 24 finer (7/12). (#7588)

- 4765 1887 MS66 NGC.** Gorgeous swirling luster is uncommon for the issue but pleasing. The high-grade preservation of the yellow-gold surfaces is more typical. Census: 45 in 66, 19 finer (8/12). (#7588)

- 4766 1889 MS63 Prooflike NGC. CAC.** Strongly reflective with pale yellow-gold surfaces that show a hint of green. A boldly struck Select Prooflike piece from the final business strike gold dollar regular issue, mintage 29,000 pieces. Census: 7 in 63 Prooflike, 30 finer (7/12). (#77590)

PROOF GOLD DOLLAR

1876 Gold Dollar, PR65 ★ Ultra Cameo
Exceptional Eye Appeal

4767 1876 PR65 ★ Ultra Cameo NGC. CAC. The 1876 gold dollar issue is rare either as a proof, of which 45 pieces were struck, or a business strike, with 3,200 examples made. It is easy to see why the present piece has received the Star designation from NGC, as the eye appeal is exceptional. The motifs glow with frost and display unimprovable contrast with the glassy fields. The strike is crisp though Liberty's hair but has faint roller marks, as made, and traces of the planchet surfaces are retained east of the 1 in the denomination. This Gem proof is essentially pristine, appearing the same today as it was when made during the U.S. Centennial. Census: 1 in 65 ★ Ultra Cameo, 4 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2007), lot 3172. (#97626)

EARLY QUARTER EAGLES

1798 BD-2 Quarter Eagle, VF Details
Five Berries Reverse

4768 1798 Five Berries — Damaged — NGC Details. VF. Breen-6117, BD-2, R.5. Among 18th century quarter eagles, 1797 is the rarest issue, followed by 1796 With Stars. Most collectors incorrectly think that 1796 No Stars is the third rarest, when in fact, it is the most plentiful of the four issues. The 1798 quarter eagles are clearly rarer than the No Stars of 1796.

This green-gold example is conditionally challenged. It has been cleaned, bent, scratched, and abraded. However, it is a rare 1798 quarter eagle that retains considerable charm and importance.

**Choice AU 1802/1 Two and a Half, BD-3
Appealing Example of This Early Type**

- 4769** 1802/1 AU55 NGC. BD-3, R.5. Bass-Dannreuther Die State b/b. The 1802-dated quarter eagles were the first struck since those bearing the date 1798 (despite the overdate no 1801s are known), using three different die pairings. The BD-3 is rare but somewhat less so than the BD-2. All three varieties share the same obverse die, so the date 1802 is sufficient for that side. The reverse of the BD-3 is distinguished by recutting on the first star, and the upright of the E in STATES is just about centered between cloud spaces. (This reverse was also used to coin silver dimes dated 1802 and 1803.) The present Choice AU example shows antique-gold coloration overall with a few diagonal planchet adjustment marks in the central obverse, along with some small planchet indents, as made. The strike is correspondingly weak on the upper eagle's neck on the reverse, but there are few mentionable contact marks on either side. A nice, lightly circulated example of this early type. (#7650)

**AU Details 1807 Two and a Half
BD-1, Only Dies**

- 4770** 1807 — Surface Damage — PCGS Genuine. AU Details. BD-1, R.3. The sole dies for this scarce date. The *Guide Book* mintage is 6,812 pieces. The present peach-gold example has a small dig above the olive branch that causes a bend on the right obverse field. The obverse also has a minor rim nick at 1:30. Luster is plentiful, and the strike is good despite some softness at the centers.

CLASSIC QUARTER EAGLES

**Block 8 1836 Quarter Eagle
MS62 Example of Variety 15**

- 4771** 1836 Block 8 MS62 NGC. Second Head of 1837, Breen-6144, Variety 15, R.2. A pale golden example of this most available 1836 quarter eagle die pair, softly struck as usually seen but with no evidence of true wear. Occasional green and orange hints visit the radiant fields. Scattered minor abrasions and a shallow pinscratch from the corner of Liberty's mouth account for the grade. (#97694)
- 4772** 1839 XF45 ANACS. Breen-6148, Variety 21, R.3. The sole dies for this low mintage issue. The 9 is recut, which caused some to regard this variety as an overdate, but this is disavowed in recent editions of the *Guide Book*. Toned peach-gold with good definition and a few thin marks beneath the left (facing) wing. (#7698)

**AU50 1839-C Quarter Eagle
Popular Obverse Mintmark**

- 4773** 1839-C AU50 PCGS. Breen-6150, Variety 2 or 22, R.4. The obverse with mintmark centered over the 83 in the date and a die crack down through the latter digit. Further die cracks appear on the reverse. Yellow-gold luster remains rich on lightly worn surfaces, though two significant pinscratches affect the left side of Liberty's portrait. (#7699)

**1839-C Quarter Eagle, AU53
Partial Mint Luster**

- 4774 1839-C AU53 NGC. Breen-6150, Variety 22, R.4.** An olive-gold example of the final Charlotte Classic issue. The date is boldly repunched, and both sides display lengthy die cracks. Luster shimmers across the devices and margins. Small abrasions are prevalent but never distract. The strike is bold save for the star centers. The obverse rim is unusually high near 1:30, perhaps due to misalignment of the collar die.
From The William R. Green Collection. (#7699)

**Choice AU 1839-O Two and a Half
Only Classic New Orleans Issue**

- 4775 1839-O AU55 PCGS. Breen-6152, Variety 27, R.3.** The High Date, Wide Fraction variety, one of two known for this low mintage (17,781 pieces) production. The sole Classic New Orleans issue, since that facility did not strike half eagles until 1840. The present example is crisply struck and displays ample orange luster at the borders. Neither side has any relevant abrasions. (#7701)

LIBERTY QUARTER EAGLES

- 4776 1840-O XF40 PCGS. CAC. Variety 1.** This almond-gold New Orleans two and a half displays the luster associated with a higher grade but is softly struck at the centers. One hair-thin mark near the bust tip is of little import. Scarce due to a mintage of 33,580 pieces. (#7720)

- 4777 1841-C VF20 PCGS. CAC.** A collectible and problem-free orange-gold example of a surprisingly rare Charlotte Mint issue. The production of 10,281 pieces suggests a moderate number should be available in high grade, but only a single Mint State example has been certified by PCGS. (#7721)

- 4778 1844-D VF25 PCGS. Variety 5-H.** A golden-brown Dahlonega example with well struck stars and softly impressed centers. Marks near star 12 and OF are consistent with the grade. Housed in a green label holder.
From The William R. Green Collection. (#7736)

- 4779 1846 AU58 NGC. Breen-6181.** The date is lightly repunched, and the 6 shows interesting die fill. The consensus is that 1846 date punches had defects, given the number of proposed overdates from that year (Breen-4787, Breen-4795, Breen-4796, Breen-6186, Breen-6875). A well struck orange-gold example with peripheral luster and a smooth appearance. Census: 43 in 58, 20 finer (8/12). (#7740)

- 4780 1847 AU58 NGC. CAC.** The lower-mintage 1847 is a better P-mint from the early years of this design type. This example displays rich reddish patina in the fields with lilac toning over the central devices. The only mark of note is in the lower left obverse field. (#7744)

**1847-C Quarter Eagle, XF45
The Usual Choice for a C-Mint Type Coin**

- 4781 1847-C XF45 PCGS.** The 1847-C quarter eagle is the most frequently encountered Charlotte issue in the series, and it is also the issue most likely to be found in higher grades. That is good news for type collectors as so many issues are generally unavailable. This Choice XF example has another feature in its favor: original surfaces. Significant portions of each side display significant lilac and reddish-gold color intermixed. The only marks worthy of mention are an angling abrasion on the lower part of the profile of Liberty and a circular planchet flake out of the neck. (#7745)

**Choice AU 1848-D Quarter Eagle
Smooth and Partially Lustrous**

- 4782 1848-D AU55 PCGS. Variety 10-M.** A mintage of 13,771 pieces ensures the scarcity of this Choice AU Dahlonega quarter eagle. The caramel-gold fields and devices are refreshingly unabraded. Luster fills design elements, and an even strike contributes further to the eye appeal. Population: 19 in 55, 45 finer (8/12). (#7751)

Rare 1849-D Quarter Eagle, AU53

- 4783 1849-D AU53 PCGS. Variety 11-M.** The more obtainable obverse variety of this difficult Dahlonega issue. The pale olive-gold fields and devices are devoid of marks save for faded abrasions beneath the hairbun. A good strike with blending of detail mostly relegated to the eagle's neck. Population: 18 in 53, 31 finer (8/12). (#7754)

- 4784 1850-C XF45 NGC. Variety 2.** The rarer of the two known varieties, though any 1850-C quarter eagle is highly elusive. A green-gold Choice XF Charlotte example with a sharp strike at the borders though the centers are typically brought up. Smooth aside from a thin diagonal mark beneath the eagle's neck. (#7756)

- 4785 1851 MS64+ PCGS. CAC.** A butter-yellow piece with understated luster, struck during the height of the California Gold Rush at the mother Mint across the continent. Liberty's portrait is well-defined, though the feathers on the eagle's legs show softness. Population: 35 in 64 (1 in 64+), 4 finer (7/12). (#7759)

**1852-D Quarter Eagle, AU53
Variety 15-M, Only Known Dies**

- 4786 1852-D AU53 PCGS. CAC. Variety 15-M.** The only known die combination for 1852-D quarter eagles, from a small mintage of just 4,078 coins. This piece is finer than the typical VF or XF specimen, showing light rose toning over green-gold surfaces. Marks are minimal on the still lustrous surfaces. Population: 6 in 53, 29 finer (8/12). (#7765)

**1852-O Quarter Eagle, MS62
Only Four Finer at NGC**

- 4787 1852-O MS62 NGC. Variety 2.** Breen-6219, his "extra heavy O" variety, which he considered very rare but makes up a significant portion of the issue. The mintmark is unusually thick and tall, reminiscent of the 1854-O "Huge O" quarter which is believed to have been entered by hand into the die. This is a moderately prooflike example with a pleasantly unmarked appearance. The strike is precise except on the eagle's left (facing) leg. Census: 7 in 62, 4 finer (8/12). (#7766)

**1854-C Quarter Eagle, XF45
Variety-1, the Only Dies**

- 4788 1854-C XF45 PCGS. CAC. Variety-1.** The only known variety from a mintage of only 7,295 coins. This scarce date enjoys strong demand in all grades, and the present Choice XF specimen has pleasing green-gold surfaces, retaining traces of luster on each side. The strike is weak at the centers as usual. Population: 18 in 45, 39 finer (8/12). (#7770)

**1854-C Two and a Half, MS61
Low-Availability, Low-Mintage Date**

- 4789 1854-C MS61 NGC. Variety-1.** From a low mintage of 7,295 pieces, the 1854-C Liberty quarter eagle is scarce-to-rare in all grades, with a single variety known for the date. Doug Winter estimates no more than 105-145 examples remain extant in all grades, and most specimens seen grade no better than XF. This is an attractive MS61 piece, with well-detailed design elements that show a little softness on Liberty's hair and the central reverse. The greenish-gold surfaces show a scattering of minor contact marks, with significant amounts of original mint luster. Census: 8 in 61, 10 finer (7/12). (#7770)

- 4790 1856-C VF35 NGC.** An orange-gold Choice VF representative of this challenging Charlotte issue. The plumage and hair show moderate wear but no marks are detracting. Shallow strike-throughs (as made) are above the arrowheads and the eagle's neck. A meager 7,913 pieces were struck. (#7778)

**AU 1857-D Two and a Half
Only 2,364 Pieces Struck**

- 4791 1857-D AU50 NGC.** An apricot-gold example of this rare Dahlonega issue. The remaining luster is moderately prooflike and surrounds peripheral elements. The fields are surprisingly void of abrasions, and the portrait displays only minor contact. Well struck aside from minor blending on the eagle's neck plumage. From *The William R. Green Collection*. (#7783)

**Choice AU 1857-D Two and a Half
Substantial Bright Luster**

- 4792 1857-D AU55 PCGS.** A band of bright luster fills the borders of this attractive orange-gold Choice AU Dahlonega quarter eagle. The strike is sharp on the motifs and legends though the reverse dentils are softly brought up. Free from noticeable marks. A mere 2,364 pieces were struck. Population: 16 in 55, 28 finer (7/12). (#7783)

- 4793 1857-S AU58 NGC.** Pale golden luster has touches of green. Just a touch of friction affects the high points of this well-struck quarter eagle from early in San Francisco's coinage history. Census: 57 in 58, 20 finer (8/12). (#7785)

**1861 Quarter Eagle, MS65
Type Two Reverse**

- 4794 1861 New Reverse, Type Two MS65 NGC. CAC.** The Type Two Reverse design has long, slender arrowheads that are in no danger of touching each other, a much different appearance from the Type One Reverse. This amazing Gem is sharply defined with frosty yellow luster, pristine surfaces, and splendid light green and rose toning. Census: 21 in 65, 4 finer (8/12). (#7794)

- 4795 1874 AU58 NGC.** Light yellow-gold in the centers with partial watery reflectivity and orange elements at the obverse margins. Wear is minor but plain on the high points. One of just 3,920 business strikes produced. Census: 41 in 58, 27 finer (8/12). (#7821)

**1876 Quarter Eagle, MS64
Low Mintage of Only 4,176 Business Strikes**

- 4796 1876 MS64 NGC.** Just 4,176 business strikes were minted, and that production ranks as the fifth-lowest mintage of any quarter eagle struck in the 1870s. Although often overshadowed by the 1875 rarity, the 1876 is an extremely important date and, when found at all, is found in lower grades. This is only the 17th Mint State example that we have offered in our auctions since January 1993, when we began our archives. Prior to the present coin, the best that crossed our desks graded just MS62. Altogether, 105 examples of this issue in our sales have an average grade of 52.

It is hard to emphasize clearly enough the importance of this issue. This near-Gem is fully brilliant with intense orange-gold luster and satiny surfaces. Only a few trivial marks on the obverse prevent an even higher grade. Census: 3 in 64, 1 finer (7/12). Ex: *Stamford Signature* (Heritage, 10/2010), lot 4644. (#7824)

- 4797 1877 AU58 PCGS.** Semireflective fields with a bold yellow-gold gleam and mint-green accents in the reverse fields. Sharply struck devices are surrounded by minor abrasions. Just 1,632 business strikes were produced. Population: 12 in 58, 20 finer (8/12). (#7826)

**1877 Quarter Eagle, MS61
Just 1,632 Minted**

4798 1877 MS61 NGC. A minuscule mintage of only 1,632 business strike quarter eagles came out of the Philadelphia Mint in 1877, an average of just four coins per day. The low mintage means that prooflike coins are normal for this issue, and the present reflective Mint State piece has light greenish-gold color with scattered marks. Census: 6 in 61, 15 finer (8/12). (#7826)

4799 1879 MS61 Prooflike NGC. Pronounced reflectivity and mild contrast are key to this Philadelphia quarter eagle's eye appeal. A pinscratch over Liberty's head accounts for the grade. Census: 2 in 61 Prooflike, 4 finer (7/12). (#77830)

**1880 Quarter Eagle, MS64
Semiprooflike**

4800 1880 MS64 NGC. Although there are exceptions to every rule, the Philadelphia Mint usually had low mintages of quarter eagles, such as the 2,960 business strikes produced in 1880. This Choice Mint State example is boldly defined with prooflike surfaces and satin luster. A stunning example for the connoisseur. Census: 6 in 64, 4 finer (8/12). (#7832)

**1881 Quarter Eagle, AU50
Only 640 Examples Struck**

4801 1881 AU50 PCGS. Deep russet hues add character to the bright surfaces of this boldly struck and well-detailed example. One of the premier rarities in the series with an extremely low business strike mintage of just 640 pieces, along with 51 proofs. The few known survivors are invariably prooflike and often well circulated. Hints of the once-prooflike surfaces are seen in the protected areas as is a bit of verdigris at the lower portion of the reverse. A fully pleasing example of this coveted issue. Population: 6 in 50, 42 finer (7/12). Ex: FUN Signature (Heritage, 1/2008), lot 3906; Long Beach Signature (Heritage, 2/2008), lot 2381. (#7833)

**1884 Quarter Eagle, MS63
Only Nine Finer at PCGS**

4802 1884 MS63 PCGS. CAC. Eight of the 10 quarter eagle issues struck in the 1880s had mintages under 10,000 coins, including the 1884 with a production limited to 1,950 business strikes. This Select Mint State piece approaches the finest available grade, with brilliant yellow luster and peripheral mint-green accents. A small splash of orange appears on the reverse. Population: 7 in 63, 9 finer (8/12). (#7836)

4803 1902 MS65 PCGS. This lustrous green-gold type coin is precisely struck and attractive despite wispy field grazes and a small mark on Liberty's jaw. In 1862, mintages of quarter eagles at Philadelphia exceeded the combined production of eagles and double eagles, an infrequent outcome given the market preference for large denominations. (#7854)

4804 1903 MS65 PCGS. This is a highly lustrous type coin that is completely original. The surfaces show no detracting marks, and there are a few alloy spots present, the most obvious are a couple on the reverse. Sharply struck. (#7855)

**Superb Gem 1903 Quarter Eagle
None Finer at PCGS**

4805 1903 MS67 PCGS. CAC. The 1903 Liberty quarter eagle enjoyed a substantial mintage of 201,000 pieces, but the date is quite elusive at the MS67 level. This magnificent Superb Gem displays razor-sharp definition on all design elements, with incredibly vibrant mint luster and virtually pristine yellow-gold surfaces. A few tiny alloy spots are visible on the obverse rim. Population: 52 in 67, 0 finer (7/12). (#7855)

PROOF LIBERTY QUARTER EAGLE

Deep Cameo Gem Proof 1894 Quarter Eagle Impressive Contrast

- 4806** 1894 PR65 Deep Cameo PCGS. With a mintage of 122 proofs and a generous survival rate, the 1894 quarter eagle is among the more accessible 19th century proof gold issues of its denomination. Few specimens, however, can match either the preservation or contrast of this Deep Cameo Gem. Saturated lemon-yellow luster gleams gold or black in the fields, depending on the angle to the light, and the frost over the decisively struck portrait is absolute. Carefully kept and charmingly appealing, this is an ideal selection for the high-end collector of proof gold. Population: 4 in 65 Deep Cameo, 4 finer (7/12). (#97920)

INDIAN QUARTER EAGLES

- 4807** 1908 MS64+ PCGS. CAC. Better-defined than usual for this initial Indian quarter eagle issue. Yellow-gold luster is broad but has a subtle swirl on the obverse. (#7939)
- 4808** 1909 MS64 PCGS. Rich peach toning dominates this near-Gem Indian type coin, though glimpses of olive-green are also present. Void of noticeable marks, and the strike is uncommonly sharp, particularly on the headdress. Certified in a green label holder. *From The Fred Yee Collection.* (#7940)
- 4809** 1909 MS64 PCGS. CAC. Unlike the first-year 1908, this second-year issue shows complete definition all the way to the top of the eagle's wing. The lustrous reddish-gold surfaces show no individually distracting abrasions. (#7940)
- 4810** 1910 MS64 PCGS. CAC. Deep peach patina adorns this sharply impressed and satiny Choice Indian type coin. Marks are absent save for a single line beneath the I in LIBERTY. Certified in a green label holder. *From The Fred Yee Collection.* (#7941)

1911-D Quarter Eagle, Weak D, Choice AU

- 4811** 1911-D Weak D AU55 NGC. Now, this is really a weak D. Held just right under a light, the outline of the mintmark becomes apparent. The diagnostic wire rim around the right margin on the obverse further reinforces the branch mint origin of this key issue. Light high-point rub is seen on each side, and the surfaces bright yellow-gold. (#7954)

AU Details 1911-D Two and a Half

- 4812** 1911-D — Improperly Cleaned — NGC Details. AU. The Denver mintmark is bold. The reverse is hairlined and the obverse is moderately glossy. The borders display a band of light gray dirt, presumably from its former holder. The lower headdress shows wear but the eagle's plumage is relatively sharp. (#7943)

AU Sharpness 1911-D Quarter Eagle

- 4813 1911-D — Cleaning — PCGS Genuine. AU Details.** A Strong D example with a clear, sharp mintmark. This apricot and tan-gold key date quarter eagle displays faint hairlines on the left obverse when the coin is tilted at obtuse angles. A trace of struck-in grease is on the first 1 in the date. A nice strike with minor inexactness on the lower portion of the headdress.

AU Details 1911-D Quarter Eagle

- 4814 1911-D — Improperly Cleaned — NGC Details. AU.** The Denver mintmark is slightly faint but well outlined. The briefly circulated straw-gold surfaces are hairlined and we note a pair of curved marks on the left obverse field. Design definition is considerable. Thousands of collectors attempt to complete the Indian quarter eagle series and the '11-D is the stopper. (#7943)

AU Sharpness 1911-D Quarter Eagle

- 4815 1911-D — Altered Surfaces — PCGS Genuine. AU Details.** A Strong D example of this key Indian quarter eagle issue. The sharply struck devices exhibit only a trace of wear but the apricot-gold surfaces are luminous and microgranular. There are no remotely noticeable abrasions. A bold yet affordable example of the uncontested series key.

**Near-Mint 1911-D Quarter Eagle
Sought-After Key Date**

- 4816 1911-D AU58 NGC.** An attractive near-Mint representative of this famous key, the rarest issue in the Indian quarter eagle series, this coin exhibits sharply detailed design elements, with just a touch of high-point wear. The lemon-gold surfaces are brightly lustrous, with strong eye appeal for the grade. (#7943)

**Unc Details 1911-D Quarter Eagle
Uncommonly Sharp Strike**

- 4817 1911-D — Improperly Cleaned — NGC Details. Unc.** This sharply struck 1911-D quarter eagle with uncommonly bold mintmark has no trace of wear. The artificial uniformity of the luster, more visible on the yellow-gold obverse, is regrettable, but the coin retains a decent overall appearance. This coin will be a bargain for the right collector. (#7943)

**1911-D Two and a Half, MS63
Rich Reddish Patina, Strong Mintmark**

4818 1911-D MS63 PCGS. The Indian Head quarter eagles are a compact, 15-coin set that can be completed far more readily than any other from the classic era of U.S. gold coinage, which officially concluded in 1933 with President Roosevelt's Gold Recall. The last Indian Head quarter eagle issue, the 1929, was made four years earlier. Save for the 1911-D key at 55,680 pieces, every other date saw a production in the six figures, ranging on the low side from the 1914 at 240,000 coins to the 1913, the high-mintage leader at 722,000 examples. The average mintage figure among the 15 issues is 483,350 pieces.

It is interesting that the second-lowest mintage, that of the 1914, is 50% of the average, while the highest-mintage 1913 is 50% above the average. These factors make it unsurprising that the 1911-D is the sole issue to achieve real notoriety in the series. Each side displays rich reddish-gold color with occasional glimpses of lilac interspersed. The strike is strong throughout with especially noteworthy definition on the mintmark. The surfaces show numerous small to medium-sized abrasions on each side.

From The Fred Yee Collection. (#7943)

**Select 1911-D Quarter Eagle
Boldly Impressed Mintmark**

4819 1911-D MS63 PCGS. Without consulting any of the standard references, we wrote a definition that we believe describes a "type" coin: "A coin that normally trades at lower prices compared to other members of a set due to a lack of market differentiation." Going to PCGS' website gives us theirs, "A representative coin, usually a common date, from a particular issue of a specific design, size, or metallic content."

Both encapsulate the essence of a type issue, ours focusing more on price and market factors, PCGS on the "representative" character of a type coin. The 1911-D quarter eagle is the only key coin in the Indian Head series, one that is hugely popular as such. The other issues in the series trade largely interchangeably as type issues, with little market or price differentiation below Mint State. Note, for example, that the 2013 *Guide Book* gives a price for every issue in the series of \$400 in MS60 save for the 1911-D, at \$10,000 in the same grade. More differentiation is seen in MS63, but the price difference between the 1911-D and second place (the 1914) is still fourfold. This particular piece is even more desirable than the "average" coin in this grade because of the sharpness of strike on the mintmark. The surfaces are softly frosted and exhibit even reddish-gold color with no singularly distracting abrasions. (#7943)

- 4820 1912 MS63 NGC.** Sun-yellow luster prevails with a few apricot and canary accents. This well-defined Select coin has several shallow luster scrapes in the upper reverse zones. (#7944)
- 4821 1912 MS63 PCGS.** A lovely orange-gold Select example of this scarcer Indian quarter eagle issue. The strike is sharp and there are no detractors. Housed in a green label holder.
From The Fred Yee Collection. (#7944)
- 4822 1913 MS64 PCGS. CAC.** Yellow-gold and apricot aspects blend into each other on this lustrous near-Gem. Central detail is solid, and only the leftmost pendant of the necklace shows softness. (#7945)
- 4823 1913 MS64 PCGS. CAC.** An unusual but pleasing blue undertone is faint but insistent in the fields of this near-Gem. Yellow-orange surfaces have a touch of frostiness and strong central detail. (#7945)
- 4824 1913 MS64 NGC. CAC.** Lighter gold through the centers with a deepening toward yellow-orange at the edges. All of the pendants on the necklace are visible, though soft. (#7945)
- 4825 1914 MS62 NGC.** Delicate apricot-gold luster is this lightly abraded piece's greatest asset. A few ruby-copper areas at the bottom of the reverse add personality to that side. (#7946)

**Select 1914 Indian Quarter Eagle
Second-Rarest Issue in Series**

- 4826 1914 MS63 PCGS.** The 1914 Indian quarter eagle is the second-rarest issue of the series, from a mintage of 240,000 pieces. This sharply detailed Select example displays vibrant mint luster over pleasing orange-gold surfaces that show accents of rose. Housed in a green label holder.
From The Fred Yee Collection. (#7946)

**1914 Indian Quarter Eagle, Frosted MS65
Condition Rarity in the Series**

- 4827 1914 MS65 PCGS.** It is perhaps the lack of a mintmark that has kept this issue from wide recognition, but the 1914 Philadelphia quarter eagle is actually among the rarest of the entire series at the Gem level, third behind the 1911-D and 1914-D. The Gem level is about as good as its gets for the 1914-D at PCGS, which has seen 50 submissions in MS65 (1 in MS65+) with only two in MS66 and one in MS67 (7/12). The frosted surfaces on this piece boast thick mint luster over antique-gold surfaces. The surfaces are quite clean overall, including the Indian's cheek and the exposed fields on the reverse. Nab this Gem before your Registry Set competition does. (#7946)

**1914-D Quarter Eagle, MS64
Conditionally Rare in Higher Grades**

- 4828 1914-D MS64 PCGS.** The 1914-D Indian quarter eagle is a prime condition rarity in grades of MS65 and above, making impressive Choice specimens, like the present coin, especially attractive. This well-detailed orange-gold example displays vibrant mint luster and shows few signs of contact.
From The Fred Yee Collection. (#7947)

**1914-D Quarter Eagle, MS64
Rarely Finer**

- 4829 1914-D MS64 PCGS. CAC.** A beautiful Choice Mint State example, this Denver-Mint quarter eagle has brilliant honey-gold luster with peripheral rose toning, mostly on the obverse, and inconsequential surface marks on each side. PCGS has only certified 40 finer examples (8/12). (#7947)

**Choice 1914-D Quarter Eagle
Challenging Date in High Grade**

- 4830 1914-D MS64 PCGS. CAC.** Despite the mintage of 448,000 pieces, the 1914-D Indian quarter eagle is among the most challenging dates in the series to locate in high grade. This impressive Choice example exhibits well-detailed design elements, with attractive copper-gold surfaces and vibrant mint luster. (#7947)

- 4831 1915 MS64 PCGS. CAC.** Largely sun-gold with minor paling of the yellow toward the centers, this near-Gem has bright luster. The obverse is clean for the grade, though an abrasion is noted off the G of GOD on the reverse. (#7948)

- 4832 1925-D MS64 PCGS.** Lovely pumpkin-orange toning is nearly comprehensive across this satiny near-Gem, though glimmers of sea-green emerge here and there. Encapsulated in a green label holder. *From The Fred Yee Collection.* (#7949)

- 4833 1926 MS64 NGC.** Lustrous surfaces range from yellow-gold to apricot and orange. A touch of violet overtone settles on the left reverse, where a few small marks contribute to the grade. (#7950)

- 4834 1926 MS64 NGC.** Light yellow-gold luster has a few touches of richer apricot and peach. Modestly marked overall, though a small nick affects the portrait's jawline. *From The Fred Yee Collection.* (#7950)

- 4835 1926 MS64 PCGS. CAC.** A well preserved khaki-gold representative of this available Philadelphia date. Radiant and nicely struck with unencumbered cartwheel sheen. Certified in a green label holder. *From The Fred Yee Collection.* (#7950)

- 4836 1926 MS65 PCGS.** Olive-gold overall with a few deep red freckles on the eagle's legs. Well preserved and satiny with a crisp impression on the headdress. A costly acquisition any finer. Encased in an old green label holder. (#7950)

- 4837 1927 MS64 PCGS.** An orange-gold and apple-green Choice quarter eagle that demonstrates a sharp strike and coruscating luster. The fields show only minor marks. Encased in a green label holder. *From The Fred Yee Collection.* (#7951)

- 4838 1928 MS64 PCGS.** Rich peach patina embraces this shimmering and minimally abraded near-Gem. The headdress is sharply defined, as is the remainder of the design. Certified in a green label holder. *From The Fred Yee Collection.* (#7952)

- 4839 1929 MS64 PCGS.** A lime-green and straw-gold example with minor inexactness of strike on the headdress and a few wispy field grazes on each side. Encapsulated in a green label holder. *Ex: Long Beach Bullet (Heritage, 9/1996), lot 590. From The Fred Yee Collection.* (#7953)

- 4840 1929 MS64+ NGC.** Shimmering wheat-gold luster has a touch of frost. Though softly struck, this final-year quarter eagle is just a few reverse luster scrapes away from a finer designation. (#7953)

- 4841 1929 MS64 PCGS. CAC.** This final-year Indian quarter eagle has an above-average strike and mildly flashy yellow luster with sun-gold accents. A modestly marked near-Gem with strong eye appeal. (#7953)

- 4842 1929 MS64+ PCGS. CAC.** From yellow to apricot-gold, this final-year quarter eagle shimmers with luster. Decently struck for the date with quality all-around eye appeal and surfaces that fall just shy of the Gem standard. (#7953)

THREE DOLLAR GOLD PIECES

- 4843 1854 AU53 PCGS.** This still-lustrous first-year three dollar piece has light yellow-gold centers that deepen to orange at the margins. A pinscratch is noted at Liberty's forehead but there are few other flaws to affect the grade. *From The Dr. Charles Nelson Collection.* (#7969)

- 4844 1854 AU58 NGC.** A lovely apricot-gold Borderline Uncirculated example of the single-year Small Letters subtype. The curls show slight wear but vibrant luster fills the legends, wreath, and headdress. (#7969)

- 4845 1854 AU58 NGC.** Pale green-gold luster prevails on this lightly rubbed first-year three dollar gold piece. A handful of pinpoint abrasions have minimal impact on the eye appeal. *From The Dr. Charles Nelson Collection.* (#7969)

**1854 Three Dollar, MS62
First Year of Denomination**

- 4846 1854 MS62 PCGS.** The 1854 three dollar gold piece is extremely important for type purposes, as it represents the first date of the denomination. This well-detailed MS62 specimen was struck from clashed dies. The light orange-gold surfaces retain much satiny mint luster and show only minor contact marks. (#7969)

**1854 Three Dollar, MS62
Highly Collectible First Year of Issue**

- 4847 1854 MS62 PCGS.** The 1854 three dollar is one of the most frequently encountered dates in the series. It would be a collector favorite because it is relative availability, but its popularity is enhanced even more because it is the first year of issue for this odd denomination. This piece represents excellent value as the mint luster is complete and there are just a couple of small to medium-sized abrasions. The most obvious mark is a shallow scrape in the right reverse field to the right of the date. (#7969)

**Choice VF 1854-D Three Dollar
Prized First-Year Dahlonega Gold Issue**

- 4848 1854-D VF35 PCGS.** The 1854 Dahlonega gold three dollar issue is one that collectors treasure in any grade. The primitive, already-antiquated Dahlonega Mint managed to eke out 1,120 examples of the issue, one that numismatists prize equally for the D mintmark on the reverse and because of its first-year-of-type status. The present Choice Very Fine example displays deep reddish-golden surfaces that offer much underlying brightness. As can be expected for a coin with 25 points of wear, there are numerous small abrasions peppered over each side, yet none are individually distracting. The shallow dentilation on both sides is typical of the issue, seen on all examples. (#7970)

**AU53 1854-O Three Dollar
Southern Gold Type Coin**

- 4849 1854-O AU53 NGC. Variety 2.** The dies are lapped, most prominently on the wreath ribbon. Actually a late die state of Variety 1. Just 24,000 pieces were struck for the sole New Orleans issue of the denomination. Pockets of luster emerge from the unmarked wheat-gold surfaces. Minor strike-throughs (as made) are noted near the U, I, and D in UNITED. (#7971)

**Scarce 1854-O Three Dollar, AU53
Lapped Late Die State**

- 4850 1854-O AU53 NGC. Variety 2.** The lapped dies variant of the 1854-O, a latter die state of Variety 1 which has identical date and mintmark locations. The sole New Orleans issue of the denomination and scarce due to a production of just 24,000 pieces. This is an almond-gold representative with moderate high point wear and only a single visible mark, found near the D in UNITED. (#7971)

- 4851 1855 AU50 NGC.** A distinctly peach cast settles over faintly luminous surfaces on this second-year three dollar gold piece. A light abrasion crosses under Liberty's eye. (#7972)

- 4852 1855-S VF25 NGC.** San Francisco was the last branch mint to start producing three dollar gold coins, making its first issue in 1855 after all other branch mints had stopped doing so. This yellow-orange piece remains glossy with coppery effects outlining the peripheral devices. (#7973)

- 4853 1856 XF45 NGC.** Subtly orange-gold with prominent crimson-copper outlining much of the obverse lettering. Both sides are luminous despite light wear, though a small cluster of abrasions is noted to the left of the base of the neck. (#7974)

- 4854 1856-S VF30 NGC.** Faint flickers of orange-gold luminosity enliven this midrange S-mint three dollar coin. Minimally marked for the level of wear seen and a pleasing example from an issue of 34,500 pieces. (#7975)

- 4855 1856-S XF45 PCGS Secure.** Lightly rubbed but with pools of luster remaining in protected areas. This Choice XF example is largely yellow-gold with orange aspects and a few tiny coppery areas at the reverse rim. (#7975)

- 4856 1856-S — Improperly Cleaned — NGC Details. AU.** Medium S. A scarce San Francisco type coin with honey-gold color and noticeable remnants of luster. The forehead and hair show moderate wear, and the surfaces are mildly glossy from cleaning. (#7975)

Mint State 1856-S Three Dollar

4857 1856-S MS61 NGC. Medium S. This sun-gold and apricot San Francisco three has substantial luster and shows incompleteness of detail only on the high points of the hair and eyebrow. The reverse appears unabraded, and the obverse is also smooth save for a faint hair-thin diagonal line across the jaw. Census: 10 in 61, 12 finer (7/12). (#7975)

4858 1857 AU55 NGC. Broad yellow-gold and sun-gold luster has persisted through minor wear. A few sharp marks affect the surfaces, most visibly to the left of the wreath, but the obverse displays well.
From The Dr. Charles Nelson Collection. (#7976)

Mint State 1857 Three Dollar Scarce Issue in High Grade

4859 1857 MS61 NGC. Despite the reported mintage of 20,891 pieces, a large emission for this denomination, the 1857 three dollar gold piece is seldom encountered in high grade. This pleasing Mint State example is well-detailed, with satiny mint luster and light orange-gold surfaces. Interesting clash marks are prominent on both sides. Census: 44 in 61, 57 finer (8/12). (#7976)

1858 Three Dollar Gold, AU53 Limited Mintage of 2,133 Pieces

4860 1858 AU53 NGC. The 1858 three dollar gold piece is the rarest issue of the 1850s, from a mintage of just 2,133 pieces. The 1858 is usually seen in VF grades, with AU examples seldom encountered and not more than 6-8 specimens still extant in Mint State. The present coin shows a trace of wear on the well-detailed devices, with lustrous orange-gold surfaces that exhibit prooflike reflectivity in sheltered areas. Census: 14 in 53, 51 finer (7/12). (#7978)

1858 Three Dollar, AU55 Low-Production Issue

4861 1858 AU55 PCGS. This Choice AU example, housed in a green-label PCGS holder, represents a low-mintage issue, surviving from a business strike production of only 2,133 coins. Only a trace of wear appears on the high points of this light yellow specimen, with reflective fields and minimal marks. Population: 17 in 55, 21 finer (8/12). (#7978)

Choice AU 1858 Three Dollar Low-Mintage Early Series Date

4862 1858 AU55 PCGS. CAC. A limited mintage of 2,133 three dollar gold pieces was accomplished in 1858, making the date scarce-to-rare in all grades. This impressive Choice AU example shows just a touch of wear on the well-detailed design elements, and the lightly abraded fields show traces of prooflike reflectivity around the devices. Population: 17 in 55, 21 finer (8/12). (#7978)

1859 Three Dollar, MS61 Early Die State

4863 1859 MS61 NGC. An early strike without clash marks. Just over 15,000 three dollar gold pieces were minted at Philadelphia in 1859, and survivors are frequently seen in circulated grades, less frequently in Mint State. This piece has frosty and brilliant yellow luster with trivial marks and good eye appeal. (#7979)

**Choice AU 1860 Three Dollar
Seldom Seen in High Grade**

- 4864 1860 AU55 NGC.** The 1860 three dollar gold piece is a scarce issue in high grade, from a mintage of 7,036 pieces. The vivid orange-gold surfaces of the present coin display a few highlights of rose, and the well-detailed design elements show just a touch of high-point wear. Satiny mint luster adds to the visual appeal. (#7980)

**1860-S Three Dollar, AU55
Elusive S-Mint Issue**

- 4865 1860-S AU55 NGC.** The 1860-S three dollar gold piece boasts a low mintage of just 7,000 pieces, and few examples were saved for numismatic purposes. This impressive Choice AU specimen displays well-detailed design elements and light greenish-gold surfaces with a few highlights of rose. Prooflike reflectivity is evident in sheltered areas. Census: 15 in 55, 23 finer (8/12). (#7981)

**1861 Three Dollar, AU53
Lightly Circulated Civil War Issue**

- 4866 1861 AU53 NGC.** The 1861 three dollar gold piece claims a low mintage of 5,959 pieces, struck during the first year of the Civil War. This lightly circulated example exhibits well-detailed design elements with a touch of high-point wear, and lightly abraded greenish-gold surfaces that retain much original mint luster. (#7982)

**1862 Three Dollar Gold, AU53
Well-Detailed and Lustrous**

- 4867 1862 AU53 NGC.** An underrated issue from a mintage of just 5,750 pieces, the 1862 three dollar gold piece is scarce-to-rare in all grades. This lightly worn example displays well-detailed design elements and lustrous surfaces with only minor signs of contact. The surfaces display light orange-gold patina with highlights of rose. (#7983)

**1863 Three Dollar, AU53
Elusive Issue, Interesting Clash Marks**

- 4868 1863 AU53 NGC.** Despite the low mintage of just 5,000 pieces, the elusive nature of the 1863 three dollar gold piece is often overlooked. Perhaps the issue has been overshadowed by its more famous quarter eagle counterpart. This lightly circulated example displays well-detailed design elements and greenish-gold surfaces that show prooflike reflectivity around the devices. Struck from clashed dies. (#7984)

**1864 Three Dollar, AU50
Considerable Luster**

- 4869 1864 AU50 NGC.** Myriad marks appear on both sides of this lightly worn but still lustrous example. Both sides have light yellow surfaces with strong design definition. A rare Civil War issue from a mintage of only 2,630 coins, the 1864 enjoys considerable demand in all grades. (#7985)

1865 Three Dollar Gold, AU53
Only 1,140 Minted

4870 1865 AU53 PCGS. The mintage was a low 1,140 coins for the year. This lovely green-gold Civil War-era three dollar piece is housed in a green-label PCGS holder. Both sides are semiprooflike with light orange overtones. The surfaces show myriad marks, consistent with the grade. Population: 11 in 53, 36 finer (8/12). (#7986)

4871 1866 AU50 NGC. One of just 4,000 business strikes produced in the first true post-Civil War issue of three dollar coins. Yellow-orange surfaces retain considerable luster, especially the semireflective obverse. (#7987)

1867 Three Dollar Gold, AU53
Underrated Low-Mintage Issue

4872 1867 AU53 NGC. An underrated date in the series, the 1867 three dollar gold piece claims a low mintage of 2,600 pieces. This lightly circulated example displays a touch of high point wear on the well-detailed design elements but shows no large or distracting abrasions. The light greenish-gold surfaces exhibit prooflike reflectivity in sheltered areas. Census: 9 in 53, 94 finer (8/12). (#7988)

4873 1868 AU53 NGC. Peach-gold overtones blossom on this post-Civil War three dollar piece that swirls with luster despite light wear. Well-defined with minor violet field accents on the obverse. (#7989)

1868 Three Dollar Gold Piece, MS62
Only 14 Finer Coins at NGC

4874 1868 MS62 NGC. There are many low-mintage issues in the three dollar gold series, including almost every date struck in the 1860s and 1870s. This issue had a business strike mintage of 4,850 coins, with an additional 25 proofs. Both sides of this splendid example are brilliant and lustrous with greenish-gold color. The fields are satiny and the devices frosty. A faint scratch is visible in the left obverse field, and both sides have light abrasions. Census: 23 in 62, 14 finer (8/12). (#7989)

4875 1869 VF35 NGC. Though the obverse is worn down into the VF range, ample reflective luster remains in orange-kissed yellow-gold fields. A copper spot is noted at the E of UNITED. (#7990)

4876 1870 XF45 NGC. Surprisingly radiant, almost glossy in spite of the perceptible wear on the high points. Long, wispy abrasions cross the yellow-gold obverse fields. One of 3,500 business strikes. (#7991)

4877 1871 XF45 PCGS. Rich orange-gold with accents in yellow and violet, a broadly reflective piece despite the wear to the high points. Just 1,300 business strikes were produced. Housed in a green label holder. (#7993)

1871 Three Dollar Gold, AU55
Business-Strike Mintage of 1,300 Pieces

4878 1871 AU55 PCGS. Although the 1871 three dollar gold piece is a scarce issue, it is easier to locate than the extremely low mintage of 1,300 pieces would suggest. This Choice AU example is well-detailed, with slight wear showing on the ribbon bow and Liberty's hair. The semiprooflike greenish-gold surfaces show only minor signs of contact. Population: 26 in 55, 82 finer (8/12). (#7993)

4879 1872 AU50 NGC. Yellow-orange luster clings to the fields, though the devices show light, even wear. A pleasing circulated business strike from an issue of just 2,000 pieces. (#7994)

Choice AU 1872 Three Dollar
Underrated Low-Mintage Date

- 4880 1872 AU55 NGC. CAC.** Only 2,000 business-strike three dollar gold pieces were struck in 1872 and high-quality examples are seldom encountered in today's market. This attractive Choice AU example exhibits just a touch of high-point wear on the well-detailed design elements. The pleasing greenish-gold surfaces display areas of prooflike reflectivity around the devices. Census: 29 in 55, 92 finer (7/12). (#7994)

1873 Three Dollar Gold, XF40
Closed 3

- 4881 1873 Closed 3 XF40 PCGS.** The existing detail clearly suggests the XF40 grade, although the surfaces of this green-label PCGS coin suggest a higher grade. Both sides have light yellow-gold surfaces with considerable field reflectivity and numerous marks, none of consequence. (#7995)

- 4882 1874 AU50 NGC.** Pools of reflectivity cling to the protected peripheral areas, though the rest of the piece is luminous, even yellow-gold with wear across the high points. (#7998)

- 4883 1874 AU55 NGC.** Rich apricot-gold luster has balancing hints of yellow and peach, the latter most obvious at the margins. Lightly worn on the high points but with few marks, this is a quality coin for the type collector seeking better circulated pieces. *From The Dr. Charles Nelson Collection.* (#7998)

- 4884 1874 AU55 PCGS Secure.** A softly struck example of the popular type issue that has only modest wear, judging by the ample luster remaining in the fields. Largely yellow-gold surfaces turn toward orange at the margins. (#7998)

Key 1877 Three Dollar, Choice AU
Lightly Abraded, Top-Notch for the Grade

- 4885 1877 AU55 NGC. CAC.** The mintage of the 1877 three dollar gold was minimal to begin with, at 1,468 pieces, and unlike some of the later low-mintage issues from the 1880s it appears not to have been saved in any significant numbers. Today it is among the keys to the series, with Q. David Bowers estimating in his series reference that no more than 100 examples survive in all grades, "plus a dozen or fewer in Mint State." NGC shows three examples in Mint State, two in MS61 and one in MS63; PCGS shows one, five, three, and one in MS60, MS61, MS62, and MS64, respectively, giving 13 submissions at both services combined. This Choice AU example displays the expected bright, semireflective fields over surfaces that are yellow-gold with a slight hint of reddish patina. There are obvious signs of handling in the form of light chatter on both sides, but no overt or distracting abrasions appear. Census: 7 in 55, 14 finer (8/12). (#7999)

- 4886 1878 AU55 PCGS.** Yellow and orange hues prevail on this lightly worn example with ample remaining luster. The 1878 is the last of three dates commonly collected as three dollar type issues. *From The Dr. Charles Nelson Collection.* (#8000)

- 4887 1878 AU55 NGC.** Lightly but plainly worn across the high points, though the orange-infused yellow-gold luster remains surprisingly intact on this type coin. A copper spot appears within the lower loop of the 3 on the reverse. (#8000)

1880 Three Dollar Gold Piece, AU58
Just 1,000 Minted

4888 1880 AU58 PCGS. CAC. A splendid near-Mint specimen, this 1880 three dollar gold piece has exceptional eye appeal. Housed in a green-label PCGS holder, it retains fully mirrored fields and satiny devices with noticeable cameo contrast. A small scratch is noted below the chin, the only mark of any consequence. (#8002)

1880 Three Dollar Gold, MS62
Only 1,000 Pieces Struck

4889 1880 MS62 NGC. CAC. From a low business-strike mintage of just 1,000 pieces, the 1880 three dollar gold piece is an elusive date in Mint State grades. Thomas Elder did much to popularize the issue in the early 20th century, and he may have been instrumental in preserving many of the examples known to numismatists today. This attractive MS62 specimen is sharply detailed, with semiprooflike yellow-gold surfaces that show only minor signs of contact. (#8002)

1881 Three Dollar Gold, AU55
Meager Mintage of 500 Coins

4890 1881 AU55 PCGS. With a reported mintage of only 500 coins, the 1881 is an important rarity among three dollar gold pieces. This piece, housed in a green-label PCGS holder, is typical as the average certified grade is just 57. Delicate blue toning appears on the high points of the obverse, with the prooflike surfaces exhibiting rich orange color. Population: 27 in 55, 49 finer (8/12). (#8003)

1882 Three Dollar, AU58
Repunched 2

4891 1882 AU58 NGC. CAC. The repunched 2 is only found on business strikes. A lovely example surviving from a 1,500 coin mintage, this near-Mint specimen is typical as the 1882 has an average certified grade of 58. Both sides are highly lustrous with light yellow surfaces, sharp details, and minimal marks. The obverse is prooflike and the reverse is reflective. (#8004)

AU 1883 Three Dollar
Scarce Late-Series Date

4892 1883 AU50 NGC. Celebrated for its low mintage, the 1883 three dollar gold piece is a sought-after late-series issue. This attractive AU piece displays only minor signs of circulation, with well-detailed design elements and prooflike reflectivity in sheltered areas. The light greenish-gold surfaces show a few orange highlights. (#8005)

1883 Three Dollar, MS61
Mint State Rarity

4893 1883 MS61 NGC. The 1883 is one of the rare three dollar issues from a mintage of less than 1,000 coins, in this case just 900. Both sides have brilliant yellow luster with splashes of dark toning. The obverse is satiny and the reverse is reflective. Census: 12 in 61, 44 finer (8/12). (#8005)

**1883 Three Dollar Gold, MS61
Sought-After Low-Mintage Issue**

- 4894 1883 MS61 PCGS Secure.** Always in demand because of its extremely low mintage of just 900 pieces, the 1883 three dollar gold piece enjoys a surprisingly high survival rate. A number of examples surfaced in the 1930s, possibly coming from Virgil brand's holdings, as he was quite fond of the denomination. This attractive Mint State example is well-detailed and lustrous with prooflike orange-gold surfaces that show highlights of green and lilac. Population: 14 in 61, 86 finer (8/12). (#8005)

**1883 Three Dollar Gold, MS63
Only 900 Pieces Struck**

- 4895 1883 MS63 NGC.** The 1883 three dollar gold piece boasts an extremely low mintage of just 900 pieces. Fortunately, a surprising number of Mint State examples was saved by collectors over the years. This attractive Select specimen features well-detailed design elements and prooflike greenish-gold surfaces. A few minor contact marks on both sides explain the grade. Census: 11 in 63 (1 in 63+), 20 finer (7/12). (#8005)

**MS64 1883 Three Dollar
Brightly Reflective Surfaces**

- 4896 1883 MS64 PCGS Secure.** The 1883 three dollar gold has a memorably low mintage even this series replete with such issues, a meager 900 "business strikes," although most of the certified survivors show scant evidence of actual circulation. The low mintage below 1,000 coins make the issue stand out even in this exceptional series, even though several other late-series entries boast similar totals.
- The fields on this near-Gem are brightly reflective and show little of the often-seen cartwheel luster that is found intermixed on many threes. The strike is sharp throughout both sides, although each has a few small abrasions, the most noticeable a small patch in the left obverse field. The even reddish-gold color is a plus. Population: 20 in 64 (1 in 64+), 6 finer (7/12). (#8005)

**1884 Three Dollar, MS61
Only 1,000 Minted**

4897 1884 MS61 PCGS. CAC. Although both sides of this green-label certified example show myriad marks, the brilliant yellow surfaces of this prooflike specimen provide excellent eye appeal. This issue boasts a small mintage of only 1,000 coins, and only a fraction of those survive today. Population: 1 in 61, 74 finer (8/12). (#8006)

**Near-Mint 1886 Three Dollar
Conditionally Rare in Higher Grades**

4898 1886 AU58 NGC. A sharply detailed near-Mint example, with just a touch of high-point rub on the devices, this coin displays lustrous greenish-gold surfaces with no large or distracting abrasions. The 1886 three dollar gold piece is a scarce-to-rare issue in all grades, from a mintage of just 1,000 pieces. Census: 43 in 58, 40 finer (8/12). (#8008)

**1888 Near-Gem Three Dollar
Lovely Color and Clean Surfaces**

4899 1888 AU58 PCGS. Positioned near the end of the series, the 1888 is one of the more available dates from the 1880s, even though only 5,000 pieces were produced. This is an exceptionally nice example that has nearly complete mint luster. Both sides display a lovely mixture of reddish-golden and lilac patina, and there are no mentionable abrasions. Very nice for the grade. (#8010)

**Mint State 1888 Three Dollar
Collectible Low-Mintage Issue**

4900 1888 MS61 PCGS. A peach-gold example with bold design definition and a few moderate field marks. Luster illuminates design elements. A scant 5,000 pieces were struck though a number were set aside by dealers local to Philadelphia. As always on business strikes, UNITED is nicely die doubled. Certified in a green label holder. (#8010)

**1889 Three Dollar, AU58
Series Ending Issue**

4901 1889 AU58 NGC. CAC. Although called near-Mint at NGC, there is no immediately obvious wear on either side of this example. The design elements are sharp and the surfaces are prooflike, with a crescent of light violet toning along the right side of the obverse. The final year of the denomination. (#8011)

4902 1889 — Reverse Improperly Cleaned — NGC Details. Unc. The reverse displays patches of hairlines throughout while the obverse remains original. The apricot-gold surfaces are mildly prooflike and boldly struck. Just 2,300 pieces were issued.

PROOF THREE DOLLAR GOLD PIECE

Proof-Only 1876 Three Dollar
Mintage of 45 Pieces, AU Details

- 4903** 1876 — Smoothed — PCGS Genuine. Proof, AU Details. The 1876 is a proof-only date with a mintage of 45 pieces. Examples are out of reach for most collectors, but the present coin may provide an exception. Designated as Smoothed by PCGS; the specimen is polished and has a bright and glossy appearance. Nonetheless it is an important opportunity since such affordable examples rarely appear at auction.

EARLY HALF EAGLES

Very Rare BD-3 1799 Half Eagle
AU Details, Small Stars Reverse

- 4904** 1799 Small Stars Reverse — Repaired — NGC Details. AU. BD-3, R.7. A very rare die variety, BD-3 is readily attributed by the bold diagonal die crack beneath UNUM. The Bass-Dannreuther reference states “6-8 Known.” Nonetheless, four different die states are described, with the present piece matching d/c as it lacks the large break seen on the Smithsonian example. Nicely defined, but the sun-gold surfaces are glossy from cleaning. A suspicious area is noted beneath the fletchings and on the opposite side between the LI in LIBERTY. (#8081)

1805 Close Date Five Dollar, BD-2, MS62
Unabraded and Lustrous

- 4905** 1805 MS62 PCGS. CAC. Close Date, BD-2, R.4. The 1805 BD-2 half eagle is one that fascinated die-state specialist Harry W. Bass, Jr., who owned seven examples of it. John Dannreuther writes that Bass’ fascination with it was “no doubt due to the fact that this hardy reverse die was used for *four* more varieties and the obverse die shattered.” The present MS62 example shows a die state (or stage) intermediate between those of Bass-Dannreuther Die States f/c and g/d, with some later cracks barely visible, some not at all (a reminder that the many planchet anomalies that occurred on early Mint gold do not always appear in the generally accepted order). The obverse of this yellow-gold MS62 specimen is remarkably free of abrasions, while both sides display abundant luster. A few planchet adjustment marks appear in the upper-left quadrant of the reverse and in the shield lines, but this coin displays blatant eye appeal. This is a splendid example of this still-scarce issue. (#8088)

**Bust Left 1807 Half Eagle, BD-8
Uncirculated Details**

4906 1807 Bust Left — Cleaning — Genuine PCGS. Unc. Details. BD-8, R.2. Only mildly cleaned, and the faint field hairlines are unobtrusive. The luster is diminished on the open fields but the motifs display excellent detail with slight gray toning on the extremities of the wings. Apricot-gold overall with a hint of sea-green on the reverse margin. There are no noticeable marks. (#8101)

**1812 Five Dollar, Problem-Free MS63
Wide 5D, BD-1**

4907 1812 MS63 NGC. Wide 5D, BD-1, R.3. Bass-Dannreuther Die State a/a. The dies are unclashed and uncracked on each side, giving the prime die state. The two varieties of 1812 half eagles, struck to the extent of some 45,000 to 60,000 coins according to Bass-Dannreuther, share a common obverse, with the two reverses distinguished by the spacing of the 5D denomination, the Wide 5D (BD-1) and Narrow 5D (BD-2). The BD-1 is seen far more frequently than the BD-2, with Bass-Dannreuther estimating that 300 to 450 examples survive of the former, at R.3, and 80 to 100 of the latter, at High R.4. This BD-1 shows attractive greenish-gold surfaces that are free of major marks, although the “curious *die lines*” that Bass-Dannreuther refer to appear on the reverse, one from the rim at 2 o'clock through the right (facing) wing, a second curving through the horizontal shield lines and terminating in the left wing. Moderate horizontal planchet adjustment marks cross the obverse at Liberty's mouth, cheek, and ear area. Census: 26 in 63, 33 finer (7/12). (#8112)

CLASSIC HALF EAGLES

Choice AU 1834 Classic Head Five
Challenging Crosslet 4 Variety

4908 1834 Crosslet 4 AU55 PCGS. Second Head, Breen-6503, McCloskey 5-D, R.4. The scarcest of the *Classic Guide Book* listings for the Philadelphia Mint, the Crosslet 4 is very rare in Uncirculated grades and merely rare in AU. The present Choice AU example is sharply struck with smooth green-gold surfaces. Luster fills the eagle, hair, and legends. Population: 11 in 55, 17 finer (8/12). (#8172)

4909 1835 AU58 NGC. First Head, Breen-6504, McCloskey 1-B, R.3. An earlier state of the reverse with the traditional "die break" between the two lower arrowheads a mere crack. Radiant yellow-gold with decidedly above-average detail and only a touch of friction. (#8173)

4910 1836 AU53 NGC. Breen-6509, McCloskey 4-D, R.2. A Second Head, Large Date variety. A wheat-gold representative with attractive surfaces despite a thin mark beneath star 8. Bright luster fills the motifs and legends. An even strike with light wear on the curls. (#8174)

1836 Second Head Five Dollar, MS63
Underrated Type, Seldom Seen Finer

4911 1836 MS63 PCGS. Second Head, Large Date, Breen-6509, McCloskey 4-D, R.2. The eye appeal is blatant on this Select Gem Classic Head five, one of the more frequently encountered varieties of the 1836, although most collectors only choose to pursue a single nice example for the type; few pursue a complete variety set. Nine varieties are documented for the 1836 Classic Head fives according to the John McCloskey classification scheme, and yet the *Guide Book* lists no varieties at all. The Classic Head series is one with many rewards and many challenges. After the Mint reduced the net gold content of coinage and introduced the new design signifying the change, mintage figures increased dramatically over the old Capped Head half eagles. The 1836 was struck to the extent of 553,000-plus pieces, less than the 1834 Classic Head and more than the 1835s. Nonetheless, most Mint State pieces are in the lower Uncirculated grades. This honey-gold Select example has bright, semiprooflike fields, and the surfaces show only light field chatter that determines the grade, with few overt marks. The strike is sharper through the centers than often seen on the type, with minor softness confined to the eagle's left (facing) wing and the shield border. Population: 11 in 63, 19 finer (7/12). (#8174)

1838-D Half Eagle, AU53
One of the Keys to the Classic Series

- 4912 1838-D AU53 PCGS. McCloskey 1-A, R.3.** The 1838-D is more available than often acknowledged, but of the 300-350 pieces believed known few are AU or Uncirculated. The most recent estimate is only 42-65 examples are known in AU. This piece is well struck and displays light yellow-gold color with just a tinge of reddish patina. Numerous small abrasions are scattered over each side, but the only one of note is a scrape in the right obverse field. (#8178)

LIBERTY HALF EAGLES

AU 1839-D Half Eagle
Final Obverse Mintmark Issue

- 4913 1839-D AU50 PCGS. Variety 2-A.** A well struck AU example with lightly abraded straw-gold surfaces. The usual dies for this elusive early Dahlonega issue. The second and final year of obverse mintmark location for the denomination. The portrait is unique to 1839-dated pieces since Liberty has a more alert appearance beginning in 1840. Population: 12 in 50, 27 finer (8/12). (#8193)

- 4914 1840-D Tall D PCGS Genuine Secure. Variety 3-B.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. A well struck almond-gold example that approaches Mint State in terms of wear but is coated with fine hairlines. No bagmarks are present.

- 4915 1841-C VF30 PCGS.** Rich peach toning embraces this well defined but hairlined Charlotte Mint representative. A scant production of 21,467 pieces ensures the rarity. Certified in a green label holder. *From The William R. Green Collection. (#8203)*

- 4916 1844-O AU58 NGC. Variety 3.** Five die pairs are confirmed for this New Orleans No Motto type issue. The present Borderline Uncirculated green-gold representative has plentiful luster and original surfaces. A good strike despite blending on the shield. (#8222)

- 4917 1847-C XF40 PCGS. Variety 1.** The sole acknowledged dies for the year, though the stated mintage of more than 84,000 pieces makes the use of a single die pair unlikely. This softly struck example has clear wear across the high points but also ample remaining luster in moderately abraded fields. (#8233)

AU 1849-C Five Dollar
Popular Charlotte Issue

- 4918 1849-C AU50 PCGS. Variety 1.** This Charlotte type coin with a radial crack near the U in UNITED, usual for the die pair. Sun-gold overall with glimpses of tan on the fields. Marks are distributed but none merit individual mention. Border elements are well struck though the lower half of the eagle shows softness. Housed in a green label holder. *From The William R. Green Collection. (#8241)*

AU50 1849-C Half Eagle
Reverse Die Crack

- 4919 1849-C AU50 NGC. CAC. Variety 1.** The usual later die state with prominent crack from the olive branch to the rim. The still-luminous surfaces are largely orange-gold with a coppery area centered at the word OF on the reverse. Scattered minor to moderate abrasions combine to account for the grade. Overall, an appealing example from the year inextricably linked to the California Gold Rush on the other side of the continent from Charlotte. (#8241)

AU53 1849-C Half Eagle
Scarcer Variety 2

- 4920 1849-C AU53 NGC. Variety 2.** The scarcer die pair, identified by the rough vertical lines at the back of Liberty's neck. This is a surprisingly radiant, almost flashy example, lightly abraded overall with a few deeper marks at the center and left obverse. Well-defined devices show the light rub that signals an AU coin. (#8241)

Still-Lustrous AU53 1849-D Half Eagle

- 4921 1849-D AU53 PCGS. Variety 22-L.** On the reverse, the mintmark's curve not only touches the olive branch, its top serif also nearly touches the fletchings. A light orange cast to the yellow-gold reverse morphs into a rich peach interior on the reverse. Lightly worn on the high points but still appealing, a modestly abraded Dahlonega five. Population: 12 in 53, 25 finer (7/12). (#8242)

- 4922 1852 MS62 NGC.** A lustrous and well struck canary-gold No Motto type coin with smooth surfaces despite a graze beneath the ES in STATES. Housed in a former generation holder. Census: 52 in 62, 36 finer (7/12). (#8250)

Two-Toned Select 1852 Half Eagle Boldly Struck and Minimally Abraded

- 4923 1852 MS63 PCGS. CAC.** Despite the high mintage approaching 600,000 business strikes, Mint State examples of the 1852 half eagle are scarce, and Choice pieces are rare. This Select coin exhibits deep orange-gold color at the centers melding into lilac accents at the rims, a stunning piece with much eye appeal, boldly struck and minimally abraded for the grade. Population: 20 in 63, 9 finer (7/12). (#8250)

Near-Mint 1853-D Half Eagle

- 4924 1853-D Large D AU58 NGC. Variety 29-V.** Vibrant luster fills the plumage, hair, and legends of this Dahlonega type coin. Yellow-gold overall with glimpses of peach on the reverse margin and a drop or two of tan residue above the upper arrowhead. Well struck except for the left-side borders. Housed in a former generation holder. From *The William R. Green Collection*. (#8255)

Borderline Uncirculated 1854-C Five Variety 2, Weak C

- 4925 1854-C Weak C AU58 NGC. Variety 2.** The mintmark is lightly entered and has low relief but most of its outline is apparent when viewed beneath a loupe. All examples struck by this die pair qualify as Weak C though many reside in undesignated holders. The straw-gold surfaces are free from individually relevant marks. The strike is crisp at the borders though the fletchings, claws, and forehead curls are softly brought up. (#98257)

Choice AU 1854-D Five Dollar Large 'Heavy' D

- 4926 1854-D Large D AU55 NGC. CAC. Variety 30-?** The mintmark location does not match any of Winter's descriptions, although this die combination is seen relatively often among examples of this scarce Dahlonega issue. A partly lustrous and nicely struck butter-gold Choice AU example with lightly marked and mildly bright surfaces. Housed in a former generation holder. (#8258)
- 4927 1854-D Weak D AU55 NGC.** No portion of the mintmark is readily apparent, but the Dahlonega source is confirmed by the obverse die, Variety 31, used to strike both Medium and Large D examples. The canary-gold surfaces are smooth aside from wispy marks on the field near the denomination. (#98258)
- 4928 1854-O AU58 NGC.** A very scarce New Orleans issue due to its small mintage of 46,000 pieces. The light yellow-gold surfaces are free from noticeable marks and display ample flashes of luster. Census: 38 in 58, 11 finer (7/12). (#8259)

1856-D Half Eagle, XF40 Variety 33-BB, the Only Dies

- 4929 1856-D XF40 PCGS. Variety 33-BB.** The only known die pair for the 1856-D half eagle. This green-gold specimen began as a weak strike, then received only slight wear, giving the false appearance of a lower grade. Considerable luster remains and there are no mentionable abrasions on either side. Population: 14 in 40, 78 finer (8/12). (#8268)

Partly Lustrous AU53 1857-C Five

- 4930 1857-C AU53 PCGS.** Just one die pair is known for this scarce and later Charlotte issue. The present representative has lemon-gold toning with olive-green and ice-blue shadings where luster persists. Mildly granular on the field behind the eagle's neck but noticeable marks are absent. A good strike despite the usual incompleteness on the lovelock and neck feathers. (#8272)

Mint State 1857-C Half Eagle

- 4931 1857-C MS61 PCGS.** An orange-gold Mint State example of this elusive Charlotte date. One die variety is known from the reported mintage of 31,360 pieces, and PCGS has yet to certify any examples above the MS63 level. The present suitably struck MS61 half eagle has bright luster at the borders and a couple of thin marks near the profile. Population: 8 in 61, 7 finer (7/12).
Ex: Orlando FUN (Heritage, 1/2009), lot 5433. (#8272)

- 4932 1857-D PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. The obverse is straw-gold while the reverse has hints of peach toning. Both sides are somewhat bright but there are no obtrusive abrasions.

Choice XF 1861-C Five Dollar Final Charlotte Mint Issue

- 4933 1861-C XF45 NGC.** The final Charlotte issue of any denomination, struck during the year that North Carolina seceded from the Union, joined the Confederacy, and went to war. Examples were struck both before and after the Charlotte Mint was seized by the state. The present piece has rich peach toning at the margins while the portrait and fields are straw-gold. Minor marks are distributed and a shallow strike-through (as made) is beneath the eagle's beak.
From The William R. Green Collection. (#8289)

Still-Luminous XF40 1861-D Half Eagle End of the Southern Gold Era

- 4934 1861-D XF40 PCGS. Variety 39-EE.** Sole dies for the year. The Southern Gold era ended with the secession of North Carolina, Georgia, and Louisiana from the Union, when the U.S. Mints went under state and then Confederate control and mintages stalled due to a lack of bullion. This remarkably luminous XF40 example, one of the last half eagles struck in Dahlonega, has broadly gold-orange surfaces with blue overtones in the obverse fields. Though lightly worn with digs under Liberty's eye and just left of her nose, this coin has great eye appeal for the grade and strong relative detail as well. It is housed in a green label holder. Population: 5 in 40, 49 finer (7/12).
From The William R. Green Collection. (#8290)

- 4935 1863-S — Improperly Cleaned — NGC Details. XF.** This Civil War issue has a mintage of only 17,000 pieces, none of which have been encapsulated by NGC as Mint State. The present survivor is bright and glossy from cleaning, but the orange-gold surfaces lack consequential marks. (#8295)

1865-S Five Dollar, AU53
Conditionally Elusive S-Mint Issue

4936 1865-S AU53 NGC. The 1865-S five dollar is more frequently encountered in low grades. At one time, there were no Uncirculated coins known (before the salvage of the *S.S. Brother Jonathan*). An AU53, such as this coin, is still one of the finer examples obtainable and is close to the lower end of the Condition Census. The surfaces on this piece are reddish-gold with noticeable traces of mint luster surrounding the devices. Numerous small to medium-sized abrasions are peppered over each side. (#8299)

4937 1866 — Polished — NGC Details. AU. The first Motto issue has a mintage of just 6,700 pieces and is seldom seen regardless of grade. The present honey-gold example is bright and unnaturally prooflike due to a thorough wipe. Actual circulation wear is minimal. (#8311)

1871-CC Half Eagle, AU53
Early Carson City Issue

4938 1871-CC AU53 NGC. Variety 1-A. Even though the mintage of the 1871-CC half eagle, at 20,770 coins, is nearly three times as large as its illustrious predecessor, most of the certified survivors today have circulated down to the range of VF30 or thereabouts; gold coinage was in high demand in Old West commerce. The surfaces show light orange-gold toning and minor, even wear over the device high points. Small abrasions are scattered about, none of singular importance. Census: 5 in 53, 20 finer (7/12). (#8323)

Choice VF 1873-CC Five Dollar
Evenly Worn Memento of Old West

4939 1873-CC VF35 PCGS. CAC. Variety 2-B. The early gold issues from the legendary Carson City Mint filled a crucial need, the vacuum created by a lack of sufficient gold and silver coinage in the burgeoning State of Nevada. The downside to filling the vacuum is that most of those early issues were sucked into circulation and today are found in well-circulated condition. The 1873-CC five dollar coins were struck to the extent of only 7,416 pieces, and the average grade of certified survivors is VF30. This Choice VF example displays muted surfaces with some smoke-gray coloration. There are no singular abrasions, with wear evenly distributed over each side. A nice example for the grade from this historic mint. Population: 7 in 35, 24 finer (8/12). (#8331)

4940 1875-CC Fine 12 NGC. Variety 1-B. Peach-gold toning outlines the design elements of this rare date Carson City half eagle. Light hairlines are present but relevant marks are relegated to a small pinscratched K on the cheek. (#8337)

**AU 1878-CC Five Dollar
Rare Low-Mintage Date**

4941 1878-CC AU50 NGC. A low survival rate and a minimal mintage of 9,054 pieces ensures the rarity of this Carson City emission. The typical example grades XF, and AU50 and better pieces are condition rarities. The present representative is straw-gold with smooth and slightly luminous surfaces. A lint mark over the branch stem is of mint origin, and the only two remotely mentionable abrasions are cheek of Liberty and the back of her neck. The strike is good by the standards of the Western facility, though the eagle's neck and Liberty's neck display incompleteness. Census: 5 in 50, 15 finer (7/12). (#8346)

4942 1880 MS64+ PCGS. Better-defined than often seen with only a few merged strands of hair. Scattered orange aspects add interest to the otherwise yellow-gold surfaces. Population: 81 in 64 (6 in 64+), 10 finer (7/12). (#8351)

4943 1881 MS64+ PCGS. CAC. Swirling luster is largely apricot-gold to peach with occasional suggestions of caramel. Above-average detail with a tiny copper spot hidden in the feathers just to the left of the eagle's shield. (#8354)

4944 1882-CC AU50 PCGS. Softly struck on the high design elements with minor but plain wear visible there. Several violet coppery areas appear to the left of Liberty's yellow-gold face. (#8359)

**Near-Mint 1884-CC Half Eagle
Low-Mintage Carson City Issue**

4945 1884-CC AU58 NGC. Considerable bright luster brightens the borders of this peach-gold near-Mint Motto five. Sharply defined though slight rub is present on the eagle's neck plumage. Neither side has any noticeable marks aside from an obverse rim tick at 10 o'clock. A mere 16,402 pieces were struck, which is a low mintage even by Carson City standards. (#8365)

4946 1885 MS64 PCGS. The obverse is highly prooflike while the reverse displays cartwheel sheen. The peach-gold surfaces are well struck and the fields have only moderate marks. In a green label holder. Population: 70 in 64 (5 in 64+), 2 finer (8/12). (#8367)

4947 1885-S MS64+ NGC. CAC. Well-defined with rich and swirling gold-orange luster that has a few paler aspects. If not for a few small marks near the corner of Liberty's mouth, this would be a no-questions Gem. (#8368)

4948 1885-S MS64+ PCGS. CAC. The 1885-S five dollar is a popular type coin. This is a highly lustrous example that displays rich reddish-lilac color over each side. Minimal abrasions are present and none are of singular note. (#8368)

**Unmarked 1890-CC Five, MS63
Rich Orange-Gold Color**

4949 1890-CC MS63 NGC. A radiant pumpkin-gold example of this low mintage but collectible Carson City issue. Impressively devoid of abrasions, and the strike is generally crisp with some merging seen on the eagle's neck and on the curls near Liberty's ear. Census: 44 in 63, 29 finer (7/12). (#8376)

Select 1891-CC Half Eagle
Attractive Color and Surfaces

- 4950 **1891-CC MS63 PCGS. Variety 1-A.** The more prevalent of the two known die pairs. This well struck half eagle boasts booming luster and pleasing surfaces for the MS63 level. The khaki-gold toning is attractive. Perhaps the most prevalent Carson City gold issue in Mint State, but nonetheless subject to substantial type demand. (#8378)
- 4951 **1893-O MS62 NGC. Variety 1.** A lustrous caramel-gold example that boasts a sharp strike and a smooth reverse. The obverse field exhibits the expected number of minor abrasions. A scarce New Orleans issue. Census: 87 in 62, 19 finer (8/12).(#8385)
- 4952 **1895 MS64 NGC.** Swirling, creamy luster dominates this near-Gem with largely pale yellow luster but also a few deeper butter and even amber hues. The overall detail is pleasing, though the strike is a trifle blunt in places.(#8390)
- 4953 **1899 MS64 NGC.** A canary-gold Choice Liberty type coin that exhibits a good strike and sweeping luster. All marks are minimal aside from a single short line above the E in LIBERTY.(#8398)
- 4954 **1899 MS64+ NGC. CAC.** Orange-gold surfaces have considerable satin to their luster. Excellent detail for this late 19th century issue and generally smooth surfaces that fall just shy of Gem status. (#8398)
- 4955 **1904 MS64 NGC.** Well-defined with swirling yellow-gold and apricot luster that shows a few coppery dots to the right of the portrait. A shallow horizontal mark under the eagle's beak accounts for the grade.(#8409)
- 4956 **1904 MS65 PCGS.** Pale yellow at the centers with richer orange-to-peach hues at the margins. This Gem is a trifle blunt on the central detail but impressively preserved. Housed in a green label holder. Population: 54 in 65, 19 finer (8/12).(#8409)
- 4957 **1907 MS65 NGC.** Rich and satiny peach-gold luster swirls on this penultimate-issue Liberty half eagle. Pleasingly detailed and impressively smooth, this is an ideal type selection.(#8416)
- 4958 **1908 MS64 NGC.** This near-Gem has quality interior detail, especially on the reverse. Light apricot-gold luster has a subtle cartwheel sheen on generally smooth surfaces.(#8418)

PROOF LIBERTY HALF EAGLES

The Eliasberg 1869 Five Dollar, PR65 ★ Cameo Tied for Numerically Finest Known

4959 1869 PR65 ★ Cameo NGC. Ex: Eliasberg. This piece was formerly lot 519 in the Louis E. Eliasberg “U.S. Gold” Collection (Bowers and Ruddy, 10/1982), where the cataloger described it thusly:

“Twenty-five struck; apparently not all distributed. Walter Breen notes the location of eight specimens, including two impaired and two institutionalized. Probably 10 to 12 are known totally.

“Another ‘rarest of the rare’ issue, the desirability of which is compounded by the related low business strike mintage of only 1,760 pieces.”

“Believed to be from the John H. Clapp Collection, 1944. Earlier from the Chapman brothers, 1896.”

As is usual for many early proof gold issues, with the advent of certified grading, there are perhaps a few more pieces known to survive than when the description above was written, although two remain impounded in the Smithsonian and ANS collections; duplications in the certified populations are also certain. PCGS estimates 15 to 20 pieces surviving, showing nine submissions of the 1869 proof five in all grades (none above PR65) and contrast levels. NGC adds five grading events to the total, of which the present PR65 ★ Cameo is tied for the numerically finest, as well as the only example awarded the Star designation for exceptional eye appeal.

The surfaces are deeply reflective, with the expected mint frost providing considerable contrast over the devices. The surfaces display rich reddish-gold color with a slight flecking of lilac noticeable on the obverse, only under a loupe. The fields show only faint evidence of the orange-peel texture that appears on many later-date gold proofs. There are no mentionable defects on either side, aside from the upside-down U lint mark along the jawline of Liberty. A PR65 Cameo PCGS example in our Central States Platinum Night (Heritage, 4/2012), lot 5272, brought \$69,000. Census: 1 in 65 ★ Cameo, 0 finer (7/12).

Ex: Louis E. Eliasberg Collection (“U.S. Gold,” Bowers and Ruddy, 10/1982), lot 519, which brought \$9,900, a remarkably strong price at the time; possible earlier provenance above. (#88464)

1903 Liberty Head Five, PR67 Cameo
Tied for Numeric Finest at PCGS
Seldom Seen With Cameo Devices

4960 1903 PR67 Cameo PCGS. CAC. This Liberty Head five dollar proof was struck in the year after the Mint revised its method of proof coin production, changing from an ideal coinage showing deeply mirrored fields and thickly frosted, contrasting devices to a format with little to no contrast, one that Walter Breen memorably calls “semi-brilliant.” The change involved basically polishing the (lowered) devices in the dies used to strike proof coinage, as well as the fields of the dies. In this way, any mint frost remaining on the devices was the result of happenstance rather than planning, likely occurring before any subsequent die repolishings might remove any trace of frostiness.

The 1903 proof half eagle was struck in the amount of 154 pieces, only about four dozen fewer than the 1903 quarter eagle, yet it is seen far less often. The certified populations are rife with duplications — likely to obtain Cameo designations as well as to attempt a finer numeric grade. This piece, certified PR67 Cameo by PCGS, is tied with one other submission at PCGS, and if they are duplicates it is the numerically finest known at that service, as there are no PR67s in either non-Cameo or Deep Cameo (unsurprisingly).

As much as collectors treasure (today) the matte proofs of the Saint-Gaudens and Pratt designs, many proof gold aficionados show affinity for the old Liberty Head format — and far more so when they can obtain a nice high-grade Cameo example such as the present piece. This golden-yellow example boasts an impeccable strike on both sides, and the field-device contrast is more obvious on the reverse than on the obverse. This piece might bear serious consideration among proof gold specialists and type collectors alike. (#88498)

INDIAN HALF EAGLES

1908 Half Eagle, MS64+ Popular First-Year Type Coin

4961 1908 MS64+ PCGS. CAC. Prized by both date and type collectors, the 1908 half eagle represents the first year of the innovative incuse Indian design. This high-end Choice specimen displays sharply detailed design elements, vibrant mint luster, and lightly marked orange-gold surfaces, with green highlights. (#8510)

4962 1908-S AU55 PCGS. Quality orange-gold luster with blue overtones across much of the fields. A modestly worn example of this issue with a five-figure mintage. (#8512)

4963 1909-D MS63 NGC. CAC. Broadly lustrous with lightly abraded sun-yellow surfaces. Though softly struck, this Select example of the highest-mintage Indian half eagle issue has solid all-around appeal. (#8514)

4964 1909-D MS63 PCGS. CAC. A peach-gold Select Indian type coin that boasts a bold strike and coruscating luster. Only a tiny percentage of examples bear a CAC seal. Moderate marks near the date preclude a higher grade. (#8514)

4965 1910 MS63 PCGS. CAC. Yellow-gold overall with coppery touches, including orange and blue, along the margins. A wispy abrasion crosses under the L in LIBERTY but there are few other overt flaws. (#8517)

4966 1910-S MS61 NGC. CAC. Rich orange-gold with considerable violet elements dappled through the fields on each side. Long marks near E PLURIBUS UNUM on the reverse contribute to the grade. (#8519)

1910-S Half Eagle, MS62 Scarce Issue in Mint State

4967 1910-S MS62 NGC. Despite the substantial mintage of 770,200 pieces, the 1910-S Indian half eagle is a scarce date in Mint State. This attractive MS62 example exhibits well-detailed design elements, with lustrous copper and rose-gold surfaces that show only minor signs of contact. Census: 87 in 62 (3 in 62+), 34 finer (8/12). (#8519)

1913-S Indian Five Dollar, MS63 Elusive in Any Mint State Grade

4968 1913-S MS63 ANACS. The 1913-S is a challenging half eagle to locate in mint condition, especially the better grades. This is an attractive coin that displays deep reddish patina with slight lilac accents over the high points. The devices are well struck overall, and there are minimal abrasions present. (#8526)

4969 1914-S MS60 NGC. San Francisco Indian tens are scarce in Mint State regardless of mintage, since examples were typically spent in West Coast commerce. The present green-gold representative is only lightly abraded for the grade though the strike is a bit soft on the lower portion of the headdress. (#8529)

1915 Indian Half Eagle, MS64 Challenging Issue in Higher Grades

4970 1915 MS64 NGC. CAC. The 1915 Indian half eagle is not difficult to locate in Choice condition, but Gems are very scarce, and the issue is unknown above the MS65 level. This sharply detailed Choice specimen offers vibrant mint luster and attractive orange and rose-gold surfaces, with outstanding eye appeal. (#8530)

Choice AU 1929 Half Eagle
Curious Depression-Era Mint Issue

4971 1929 AU55 NGC. The 1929 half eagle issue is a curious one, struck during the year that the Great Depression began its decadelong stranglehold on the American economy, an unusual denomination to produce at a time when the theme song (written a couple of years later) was “Buddy, can you spare a dime?”

Most certified examples are found in Mint State, usually around the MS62 level, clearly indicating an issue that failed to circulate in any meaningful way. The surfaces on this Choice AU example are remarkably clean for the grade; the few abrasions are small and scattered over the reverse. The strike is strong except for the lowest feather in the headdress, not an uncommon occurrence for the issue or the series. Slight friction over the design high points accounts for the grade, with light, reddish-tinted surfaces showing excellent eye appeal. (#8533)

PROOF INDIAN HALF EAGLE

1912 Matte PR66 Indian Five Dollar
Rich Color and Lovely, Sparkling Surfaces

4972 1912 PR66 NGC. The 1912 half eagle proofs, even though struck with a matte surfaces, normally show lighter-colored surfaces than the 1908- and 1911-dated issues that precede them. Seldom are examples finer than the present Premium Gem available. The surfaces on this piece are deep mustard-gold, showing the typical crisply detailed strike and fine-grained texture that creates a subtle sparkle. A thin (almost undetectable) hairline runs down from the D is the grade-determining factor, although there are several light luster grazes present on each side. Census: 13 in 66, 19 finer (7/12). (#8543)

EARLY EAGLES

**AU Sharpness BD-4 1797 Large Eagle Ten
Third Reverse Variety for the Year
Very Scarce 'Long Thick Neck' Type**

- 4973 1797 Large Eagle — Repaired, Improperly Cleaned — NCS. AU Details. BD-4, High R.4.** Bass-Dannreuther Die State d/a. All four varieties of 1797 ten dollar are very scarce to rare, whether of the Small Eagle (BD-1) or Large Eagle (BD-2 through BD-4) types. All three Large Eagle tens share a common obverse die with stars arranged 10 and 6, but the BD-4 is characterized by a long, thick neck on the eagle. Stars 7-9 are aligned, and one arrowhead extends nearly to the N in UNITED. This piece shows hairlines from the noted cleaning, and smoothing appears in the left obverse field, as well as on Liberty's face and neck. The color overall is an even yellow-gold. The center obverse is a bit weakly struck, while the reverse is fully struck on the eagle's feathers and shows no sign of repair. No obvious or detracting marks appear. This piece may represent an excellent compromise between price and condition for early gold aficionados. (#8559)

**BD-10 1799 Eagle, VF Details
Large Stars Obverse**

- 4974 1799 Large Stars Obverse — Damage — PCGS Genuine. VF Details. BD-10, R.3.** Well defined for the VF level with wear most apparent on the drapery and cap. The green-gold surfaces are subdued but are free from any singularly distracting marks. Myriad minuscule abrasions account for the PCGS designation, though many collectors may find the surfaces more than acceptable for an affordable example of this coveted early gold type.

LIBERTY EAGLES

- 4975 1841 AU53 NGC.** A luminous and lightly worn example of this important early Coronet eagle issue. Lightly abraded gold-orange surfaces also show a pinscratch behind Liberty's head. Census: 27 in 53, 59 finer (7/12). (#8582)
- 4976 1843-O AU55 PCGS. Variety 3.** A rare die marriage identified by lapped tail feathers on the eagle. The sharply struck yellow-gold surfaces are a bit bright and display scattered marks. Conditionally rare this nice; PCGS has certified 216 examples but most are in VF or XF grades. Population: 14 in 55, 9 finer (7/12). (#8589)

**1846 Liberty Ten, AU50
Pre-Gold Rush Issue**

- 4977 1846 AU50 NGC.** A lovely green-gold example of this scarce date, surviving from a mintage of just 20,095 pieces coined prior to the start of the California gold rush. Mintages of most issues increased dramatically once gold was discovered "out West." The surfaces of this example are lightly abraded, yet still show most of the reflective luster that was imparted by the dies over 160 years ago. Census: 15 in 50, 28 finer (8/12). (#8594)

Near-Mint 1846-O Ten Dollar
So-Called Overdate

4978 1846-O AU58 NGC. Variety 3. This remarkable New Orleans gold piece has brilliant green-gold surfaces with reflective fields and lustrous, sharply detailed design motifs. Myriad marks are nearly all of little consequence, showing a single small edge nick over TE of UNITED. Die marks inside the 6 give the impression of an overdate, although most students have dismissed the 1846/5-O notation. Census: 9 in 58, 1 finer (8/12). (#8595)

4979 1856-S AU50 NGC. Medium S. Luster is broadly flashy despite light wear. Yellow-orange surfaces have scattered abrasions, contributing to the grade. The stars are softly struck, though the interiors have better detail. (#8621)

4980 1857-O — Rim Filing — NGC Details. XF. Both rims are filed, most clearly between 11 and 4 o'clock on the obverse and near 12 and 4 o'clock on the reverse. Solder residue is noted on the vertical shield stripes and the coin is bright from cleaning. A rare New Orleans issue with a mintage of 5,500 pieces. (#8623)

Rare Choice XF 1857-O Ten

4981 1857-O XF45 PCGS. PCGS has graded only a total of 58 examples of this scarce No Motto issue, none as Mint State. A meager 5,500 pieces were minted, since shipments of West Coast gold bullion to the New Orleans port dwindled after the opening of the San Francisco Mint. The present yellow-gold representative is well defined and has only one mentionable mark, a thin diagonal line on the upper reverse field. (#8623)

1858 Eagle, XF45
Only 2,521 Pieces Struck

4982 1858 XF45 PCGS Secure. Only 2,521 Liberty eagles were struck in 1858, making the date rare in all grades. This attractive Choice XF example is lightly worn, with well-detailed design elements and still-lustrous yellow-gold surfaces that show a few rose highlights. Population: 11 in 45, 14 finer (8/12). (#8625)

1861-S No Motto Ten, AU53
Finer Than Usual

4983 1861-S AU53 NGC. CAC. An exceptional example of a scarce issue, from a mintage of only 15,500 coins and a low survival rate. Most examples entered circulation where they received extensive wear if they survived at all. The average grade of certified examples is only 47. This pleasing AU specimen has lovely honey-gold surfaces with wisps of light blue, mostly on the obverse. Census: 16 in 53, 39 finer (8/12). (#8634)

4984 1862 — Obverse Repaired — NGC Details. AU. A low mintage Civil War date with a production of 10,960 pieces. This yellow-gold example is cleaned and displays subtle smoothing on Liberty's jaw and the field near the beak. Scattered small to moderate marks is consistent with light circulation. (#8635)

4985 1866 — Improperly Cleaned — NGC Details. XF. The initial Motto issue is rare as only 3,750 pieces were issued. NGC has certified 51 in all grades, excluding Details examples such as the present hairlined and typically abraded orange-gold representative. (#8649)

AU Sharpness 1876-CC Ten
Rare Carson City Issue

4986 1876-CC — Improperly Cleaned — NGC Details. AU. A rare Carson City issue with a mintage of only 4,696 pieces. Approximately 200 examples have survived in all grades. The present coin has substantial luster at the margins though the centers show occasional softness of strike. Careful rotation reveals parallel hairlines. Scattered small marks are consistent with a brief stint in Western commerce. (#8675)

Very Rare 1879-CC Eagle, VF30

- 4987 1879-CC VF30 PCGS.** The 1879-CC is the lowest mintage Carson City issue of any gold denomination. Needless to say, there are few survivors from the production of 1,762 pieces. PCGS has certified a total of 37 pieces, not much more than the 31 pieces certified by PCGS for the vastly more costly 1870-CC double eagle. The present '79-CC ten is sharper than expected for the VF30 grade and displays occasional glimpses of mint luster. One moderate mark is noted beneath star 9. Housed in a green label holder. (#8684)

Mint State 1881-CC Ten Dollar

- 4988 1881-CC MS60 NGC.** The flag of the first 1 in the date is lightly repunched. The present peach-gold example has the expected smattering of small abrasions but the strike is good and bright luster dominates the reverse and the obverse periphery. The 1881-CC has a mintage of just 24,015 pieces yet is collectible at the cusp of Mint State. However, only a single coin has been certified above MS62. (#8692)

**1882 Liberty Eagle, MS64
Only One Finer PCGS Coin**

- 4989 1882 MS64 PCGS. CAC.** Produced in large numbers, the 1882 Liberty eagle circulated extensively, making the date a condition rarity in high grade. This spectacular Choice example displays sharply detailed design elements and lustrous orange-gold surfaces with outstanding eye appeal. Population: 34 in 64, 1 finer (8/12). (#8695)

**1882-O Liberty Ten, MS61
Only One Finer Coin at PCGS**

- 4990 1882-O MS61 PCGS. Variety 1.** The 1882-O Liberty eagle is an underrated issue from a mintage of just 10,820 pieces. The surviving population probably numbers 200-250 specimens in all grades, thanks to a couple of small European holdings that surfaced in the 1990s. This attractive Mint State example displays vivid green and orange-gold prooflike surfaces, with the expected number of minor contact marks. Population: 6 in 61, 1 finer (8/12). (#8697)

- 4991 1885 MS63 PCGS.** Well-defined with quality yellow-gold luster and occasional hints of apricot and orange. Though a handful of small digs appear on and near the portrait, the fields have a cleaner overall look than what is seen on the usual MS63 example of the issue. Population: 40 in 63, 13 finer (7/12). (#8706)

- 4992 1887 MS61 NGC.** Pale gold overall with strong cartwheel luster. The lightly abraded obverse seems clean for the grade, though a vertical line of reed marks is noted under the eagle's left (facing) wing. Census: 56 in 61, 25 finer (7/12). (#8710)

- 4993 1887-S MS63 PCGS.** Well-defined overall with orange-gold aspects to an otherwise more apricot-gold piece. A few long, light abrasions and shorter marks near the portrait account for the grade. Population: 81 in 63 (1 in 63+), 2 finer (8/12). (#8711)

- 4994 1887-S MS63 NGC.** Well-defined with largely apricot-gold luster that makes occasional detours into yellow or peach. Numerous fine abrasions affect the technical grade far more than the eye appeal. Census: 63 in 63, 10 finer (8/12). (#8711)

- 4995 1890 MS62 NGC.** Well-defined with a mix of rich orange-gold and peach shades. Quality interior detail, though a reed mark on Liberty's chin precludes Select status. Census: 55 in 62, 7 finer (8/12). (#8717)

- 4996 1891 MS63 PCGS.** Better-defined than usually seen; while the centers of the obverse stars are not perfectly struck, they are far clearer than usual. Peach-laced gold luster swirls across each side. Abrasions are mostly light, though reed marks appear behind Liberty's neck. Population: 44 in 63, 3 finer (7/12). (#8719)

- 4997 1891-CC — Reverse Spot Removed — NGC Details. Unc. Variety 1-A.** A narrow rose streak on the reverse near the U in UNITED is pinscratched from an attempt at removal. Otherwise, this is an attractive Carson City type coin with unbroken cartwheel luster and a bold strike. (#8720)

- 4998 1891-CC MS62 NGC. CAC. Variety 1-A.** Well-defined overall with touches of peach to the yellow-gold luster. The interior devices show a few minor glimmers of frost. A pleasing Carson City ten. (#8720)

- 4999 1893-CC — Obverse Damage — NGC Details. AU.** Two small digs are inauspiciously placed on the cheek and jaw. The olive-gold surfaces are otherwise appealing for the grade. Scarcer than its immediate Carson City predecessors due a mintage of only 14,000 pieces. (#8726)
- 5000 1893-O MS61 PCGS. CAC.** A single die pair is known from the low New Orleans mintage of 17,000 pieces. The present canary-gold ten displays unbroken cartwheel sheen and has a good strike. One bagmark behind the nose limits the grade. (#8727)
- 5001 1894 MS64 PCGS.** This apricot-gold near-Gem exhibits sweeping luster and good eye appeal. One mark noted on the TE in STATES. The strike is precise except on the final star. Certified in a green label holder and a rarity any finer. (#8729)
- 5002 1897 MS64+ PCGS. CAC.** Light apricot-gold luster has unusual frosty qualities across both fields and devices. A striking piece with bold interior detail and eye appeal in spades. PCGS has graded just seven examples as MS65 or better (8/12). (#8737)
- 5003 1898 MS64 PCGS.** Both sides have generous orange-gold aspects, though only the reverse has that color over the entire surface area. Interior detail is bold, though the stars are weak at the centrils. Population: 65 in 64 (2 in 64+), 9 finer (7/12). (#8740)
- 5004 1898-S MS63 PCGS.** Rich orange-gold luster has a more yellow cast in the centers. Strong cartwheel luster is the defining attribute of this lightly abraded but attractive S-mint ten. Population: 35 in 63, 9 finer (7/12). (#8741)
- 5005 1898-S MS63 PCGS.** Well-defined with shimmering cartwheel luster that shifts between apricot and peach. Scattered light abrasions appear on each side, but not one has a defining impact on the eye appeal. Population: 35 in 63, 9 finer (8/12). (#8741)
- 5006 1899 MS64 NGC.** Rich orange-gold luster with a touch of paler yellow at the interior obverse. This near-Gem is generally well-defined with quality all-around eye appeal.
From The Dr. Charles Nelson Collection. (#8742)
- 5007 1899 MS65 NGC.** A peach-gold Liberty type coin with dynamic luster and a precise strike. The portrait is splendidly preserved and the fields display only moderate grazes. Among the more available issues but only a minute portion of examples attain the present grade. (#8742)
- 5008 1901-S MS64+ NGC. CAC.** Strongly struck in the centers, if a trifle blunt on certain stars. Cartwheel luster ranges from yellow-gold to orange-kissed. A few small, scattered abrasions preclude Gem status. (#8749)
- 5009 1902-S MS64 PCGS.** Flashy fields have watery reflectivity at the pale yellow-gold centers, while the margins have a deeper hue that is closer to orange. Modestly abraded but with eye-popping visual appeal. (#8751)
- 5010 1903 MS63 PCGS.** Softly frosted mint luster is seen over each side of this orange-gold type coin. Although used for type, the mintage is on the low-ish side and the 1903 is slightly better than a common type coin. The design is sharply struck, and there are numerous small abrasions scattered over each side. (#8752)
- 5011 1903-O MS63 PCGS. Variety 1.** This butter-gold New Orleans ten provides the initial appearance of a Gem, though a single small roundish mark near the shoulder tip limits the grade to the Select level. Well struck and relatively low mintage. (#8753)

1905 Ten Dollar, MS65
Beautiful Color and Thick Mint Luster

- 5012 1905 MS65 PCGS.** This sharply defined Gem displays spectacular mint luster. Most of each side is reddish-gold, but the center of the obverse has pronounced lilac patina. The 1905 is curiously unavailable in the finest grades. PCGS has only certified 14 pieces in MS65 with 10 finer (7/12). (#8757)
- 5013 1906-D MS64 PCGS. CAC.** A well struck honey-gold near-Gem. The obverse displays only faint grazes, and the reverse is pristine except for a glimpse of aqua residue near the wingtips. The date is lightly repunched. (#8760)
- 5014 1906-S — Discovery Piece — MS61 ANACS. MPD-001.** Designated by ANACS on the insert as the discovery piece for the variety. Careful inspection locates the curve of an errant digit in the dentils beneath the space between the 0 and 6. One spot noted west of the mintmark. A scarce issue in Mint State. (#8762)
- 5015 1907 MS64 PCGS.** A well-defined final-year Coronet eagle with a considerable orange component to sun-gold luster. Great cartwheel eye appeal despite several luster scrapes. (#8763)
- 5016 1907 MS64 PCGS.** Rich orange-gold luster is semifrosted with a considerable cartwheel effect. The overall detail is strong, though a couple of obverse stars are weak. PCGS has graded 16 examples as MS65 or better (7/12). (#8763)

1907 Liberty Ten Dollar, MS65
Two-Toned Surfaces

- 5017 1907 MS65 NGC.** Remarkably few high-grade 1907 tens are known, relative to the mintage of 1.2 million pieces. This Gem has an interesting appearance. The interiors are bright yellow-gold and significantly deeper reddish patina surrounds the margins, a sure indication of untampered originality. The strike is strong throughout, and there are only small abrasions scattered over each side. Census: 85 in 65 (1 in 65+), 5 finer (7/12). (#8763)
-

PROOF LIBERTY EAGLES

Possibly Unique 1854 Proof Eagle, PR55 Cameo Unmistakable Proof Striking

5018 1854 PR55 Cameo NGC. This piece may very well represent a unique coin, as it is the first certified proof 1854 Liberty Head eagle known, an issue of which Garrett and Guth write in the second edition of their *Gold Coin Encyclopedia*:

"Mintage: Unknown (Unique?)

"The existence of a Proof 1854 eagle is highly doubtful. Apparently, a set of Proof coins was presented to the city of Bremen [Germany] in July 1854 in exchange for a group of coins (presumably from Bremen). According to Walter Breen, the set was liberated in 1945 and broken up, but this information remains unsubstantiated. Although various 1854 Proof \$1, \$2.50, and \$3 coins are known, none can be tied to that set, nor have any 1854 Proof half eagles, eagles, or double eagles ever been seen. The Smithsonian does not have a Proof example of this date."

Well, as the saying goes, "Seeing is believing," and one look at this coin will remove any doubt. The full strike, deeply reflective fields, profound contrast, and mint frost remaining on the devices are all *clearly* characteristic of a proof impression. There are numerous contact marks on each side, the most obvious and largest on the obverse below Liberty's nose and in the left field. The fields are bright yellow-gold with a bit of reddish tint.

Although we can find no provenance information for this coin, it appears to be a recently graded piece, and the sole proof 1854 eagle graded at either NGC or PCGS. If this is indeed the Bremen coin, it only begins to solve the mystery of what happened to the other coins, and in any case it is a fascinating specimen in its own right. Possibly unique — a phrase we *seldom use*. (#88790)

**Near-Gem Proof 1902 Ten Dollar
First of the Brilliant-Era Issues**

- 5019 1902 PR64 PCGS.** The year 1902 marks a famous “break-point” in U.S. proof coinage, where the previous default to a cameo effect yielded to a deliberate change toward all-around brilliance. This near-Gem proof from that year’s eagle issue (mintage 113 pieces) has an orange-tinged yellow-gold gloss and only hints of field-device contrast, as the devices themselves share the fields’ gleam. Light but distinct patina has settled over parts of the obverse fields, giving a slightly clouded appearance. Shallow pin scratches between stars 3 and 4 and stars 9 and 10 account for the grade and also may serve as future pedigree markers. Population: 17 in 64, 7 finer (7/12). (#8842)
-

INDIAN EAGLES

**First-Year 1907 Ten Dollar Indian
No Motto Type, MS63**

- 5020 1907 No Periods MS63 PCGS.** The 1907 is known as a well-produced first-year coin, and as such it is often used for type purposes and is popular in all grades. This is a brightly lustrous example whose only flaw are a number of small to medium-sized abrasions scattered over each side. Rich orange-gold mint luster. (#8852)
-

**Choice 1907 Indian Eagle
No Periods Variant**

- 5021 1907 No Periods MS64 PCGS.** Vivid shades of orange-gold and lilac blanket the surfaces of this attractive Choice example. The well-detailed design elements are complemented by exceptionally vibrant mint luster, to produce terrific eye appeal. The 1907 eagle is always in demand as the first year of the popular Indian design. (#8852)
-

**1907 No Motto Ten, MS64
Subtle Color, Bright Mint Luster**

- 5022 1907 No Periods MS64 NGC.** This well-produced ten dollar Indian demonstrates why the 1907 is so popular for type purposes. Each side exudes bright mint luster and variegated yellow-gold and reddish-gold color. The devices are sharply struck and there are minimal abrasions for the grade.
From The William R. Green Collection. (#8852)
-

**1907 No Periods Eagle, MS64+
Important First-Year Type Coin**

- 5023 1907 No Periods MS64+ PCGS. CAC.** The 1907 No Periods Indian eagle is the first date of the short-lived No Motto design type. This high-end Choice example possesses outstanding eye appeal, with especially vibrant mint luster and vivid yellow and greenish-gold surfaces. As usually seen on this issue, Liberty's curls show just a touch of softness. (#8852)

**With Motto 1908 Ten Dollar, MS64+
Sparkling Yellow-Gold Surfaces**

- 5024 1908 Motto MS64+ PCGS. CAC.** First year of the Motto type, the 1908 is a relatively available date and certainly a popular one for type purposes. This is a bright, sparkling example that has finely granular surfaces. The only mark that deserves mentioning is a diagonal one across the high point of the Indian's cheekbone. (#8859)

**1908-S Eagle, MS63
Mint State Rarity**

- 5025 1908-S MS63 ANACS.** A few tiny marks on each side include a small scrape in the eagle's wing. Otherwise, this frosty Select Mint State piece is exceptional, and at first glance appears a couple points finer. Both sides are sharply detailed with impressive eye appeal. This scarce date had a mintage of 59,850 coins, all with the motto IN GOD WE TRUST on the reverse. (#8861)

**MS66 1908-S Indian Head Ten
Flashy Surfaces With Thick Mint Frost**

- 5026 1908-S MS66 NGC.** The 1908-S Indian Head eagle is one of five issues for the year that can be collected between Philadelphia, Denver, and San Francisco and the No Motto and Motto types, since San Francisco struck only the latter, in the meager amount of 59,850 pieces. Since there were no branch-mint productions of the first-year 1907 Indian tens, it appears that some savvy collectors in and around San Francisco must have hung onto some of the new-design coins of the 1908 vintage, as there are some remarkably high-grade survivors for such a low mintage.

The present Premium Gem boasts the thick, fabulous mint frost typically seen on 1908-S fives, tens, and twenties, over surfaces that are deep reddish-gold. One short horizontal mark on the cheek is the only noticeable flaw, and the surfaces are sharply struck throughout. Census: 5 in 66, 5 finer (7/12). (#8861)

**1909-D Indian Ten, MS63
Low-Mintage Early Series Issue**

- 5027 1909-D MS63 PCGS.** Unlike its half eagle counterpart, the 1909-D ten is a low-mintage issue. This is an attractive lemon-gold Indian ten that has booming luster and an absence of obtrusive marks. The strike is bold, and the eye appeal is impressive despite a pair of small gray spots on the reverse exergue. Encased in a green label holder. (#8863)

**1909-S Eagle, Elusive MS65
Well-Struck and Pleasing**

- 5028 1909-S MS65 PCGS.** Despite the discovery of a hoard of 60 coins around 1977, the 1909-S Indian eagle is still elusive in Gem condition, as most of the examples populating the treasure were in lower grades. Mike Fuljenz ranks the issue eighth overall within the series, calling it "rare" in Gem condition. This piece is one of 19 submissions at PCGS, which has seen seven finer (8/12). The surfaces boast deep, pleasing orange-gold color with gleaming luster and a notable absence of abrasions; the Indian's cheek and the exposed open fields on each side show no overt marks. The strike is equally top-notch, full on the eagle's uppermost feathers, which are sometimes problematic, even though some of the headdress details are on the soft side. An excellent example of the issue. (#8864)

- 5029 1911-D XF45 NGC.** Lightly worn on the high points but with broad apricot-gold radiance. Just 30,100 pieces were struck for this issue, one of the lowest business strike totals of the 20th century. (#8869)
- 5030 1911-D AU50 NGC.** Softly struck with broad, even wear that nonetheless is not deep. Ample yellow-and-orange luster shines across both sides. The obverse presents well for an AU50, though the reverse has deeper cuts. (#8869)

**1911-D Ten Dollar, MS63
Key, Low-Mintage Issue**

- 5031 1911-D MS63 PCGS.** The 1911-D Indian Head eagle has the lowest business strike mintage of the series, at 30,100 pieces (not counting the experimental 1907 Wire Rim and Rolled Edge issues). David Akers considers the 1911-D the leading condition rarity of the series. Select examples are definitely rare and the issue is prohibitively rare at the Gem level.

The present coin is an attractive Select specimen, with crisp detail on all design motifs. The pleasing orange-gold surfaces exude satiny mint luster, and overall eye appeal is excellent. A few insignificant nicks on Liberty's jaw explain the grade. This example is housed in an old green label holder. Population: 29 in 63, 16 finer (7/12). Ex: Summer FUN Signature (Heritage, 7/2010), lot 4801. (#8869)

- 5032 1911-S AU58 PCGS.** Lightly rubbed on the high points but with considerable remaining wheat-gold luster. Mark totals are low, the eye appeal high. One of 51,000 pieces struck. (#8870)

**1911-S Ten Dollar, MS61
Scarce in Mint Condition**

- 5033 1911-S MS61 NGC.** The 1911-S, like most of the early S-mints, is conditionally challenging, especially in mint condition. This fully lustrous example has numerous small abrasions sprinkled over each side, plus a couple of medium-sized marks also. Reddish patina overall and generally well struck except for the top of the eagle's wing. (#8870)

**1911-S Indian Ten, MS63
Elusive Low-Mintage Issue**

- 5034 1911-S MS63 NGC.** The 1911-S Indian eagle is an elusive issue, from a small mintage of 51,000 pieces. This attractive Select specimen features sharply detailed design elements and lustrous orange-gold surfaces, with rose highlights. Only a few minor contact marks are evident. Census: 7 in 63, 25 finer (7/12). (#8870)

**1912-S Eagle, MS62
Vivid Color and Vibrant Luster**

- 5035 1912-S MS62 NGC.** The 1912-S Indian eagle is known as a poorly produced issue, and few examples seen possess the vivid orange-gold color and vibrant mint luster of this attractive MS62 piece. The design elements are also unusually sharp for this issue, adding to the considerable eye appeal. (#8872)

-
- 5036 1913 MS63 PCGS. CAC.** Yellow-gold overall with few variations. Broadly lustrous surfaces have several short cuts and a few luster scrapes. Housed in a green label holder. (#8873)

**1913 Eagle, MS64
Challenging in Finer Grades**

- 5037 1913 MS64 PCGS. CAC.** Despite a fairly large mintage and substantial current populations in Mint State grades, relatively few 1913 Indian tens have been graded MS64, and PCGS has only certified 68 finer examples (7/12). This Choice Mint State specimen has frosty mint luster with brilliant yellow surfaces and traces of delicate orange overtones. Exquisite surfaces reveal only faint contact marks on each side. (#8873)

Uncirculated 1914-S Ten Dollar

- 5038 1914-S MS61 NGC.** The 1914-S is scarce in Uncirculated grades, as are most S-mint tens from this series. This bright yellow-gold example displays impressive mint luster in spite of the numerous small to medium-sized abrasions that are scattered across each side. The strike details are just a bit on the weak side, most evident at the top of the eagle's wing. (#8877)

**Near-Mint 1915-S Ten Dollar
Bright Remaining Mint Luster**

- 5039 1915-S AU58 PCGS.** The shining surfaces of this bright straw-gold example show few marks overall, though a small dig appears to the right of star 3 on the obverse. Minor but distinct friction is evident on the portrait and the highest edges of the eagle's wing and leg. One of only 59,000 pieces struck.
Ex: Dallas Signature (Heritage, 11/2007), lot 2219. (#8879)

- 5040 1915-S — Reverse Scratched — NGC Details. Unc.** This scarce and low mintage S-mint Indian ten has booming luster and full design detail. Upon first glance it appears to merit a high grade, though thorough study locates a few faint hair-thin marks on the reverse, the most evident beneath the R in TRUST. (#8879)

**Scarce 1915-S Ten Dollar
Uncirculated Details**

- 5041 1915-S — Improperly Cleaned — NGC Details. Unc.** A scant 59,000 pieces were issued for this elusive San Francisco issue. The present Indian ten possesses unencumbered cartwheel luster and lacks friction on the eagle's shoulder or Liberty's forehead curls. There are no noticeable marks and the cleaning is mild. Most collectors would appreciate the value provided by the present coin relative to a five-figure example with similar eye appeal. (#8879)
- 5042 1916-S AU58 NGC.** Coppery areas on the high points indicate rub, but the yellow-gold surfaces retain blossoming luster elsewhere. A lightly abraded but attractive piece that is housed in a prior-generation holder. (#8880)
- 5043 1916-S MS61 NGC.** The yellow-gold of this moderately abraded piece is pale with just a hint of green. The top of the eagle's wing shows minor striking softness. (#8880)

**1920-S Indian Eagle, Series Key
Top-Notch Choice AU Example
Few Survive in Any Grade**

- 5044 1920-S AU55 PCGS.** The 1920-S eagles are series keys, behind the notable 1933 and 1907 Rolled Rim varieties. The 1920-S was the first issue produced in the Indian Head eagle series since the 1916-S four years earlier and, clearly, most of the coins slipped unnoticed into circulation. Only 126,500 pieces were produced, and any collectors who own an example in any grade today can count themselves among the fortunate few. This Choice AU PCGS-certified example is a nice coin for the grade, displaying subtle lilac color in the centers with reddish-gold border accents. The cheek of the Indian shows a few of the more prominent handling marks, and a shallow, curved scratch occurs on the reverse below the eagle's beak. For many collectors this piece will offer many of the charms of a Mint State piece at a far more obtainable price point. Population: 11 in 55, 33 finer (8/12). (#8881)
- 5045 1926 MS64 NGC.** Swirling apricot-gold luster is a great asset to this near-Gem from the popular 1926 type issue. Small digs on Liberty's cheek and to the left of her lips account for the grade. (#8882)

Low-Mintage 1930-S Eagle, AU58
Seldom Seen Lightly Circulated

5046 1930-S AU58 NGC. The striking of an excess of 1 million examples of the 1926 Indian eagle meant that no more were needed for a while, and San Francisco's output of 96,000 coins for the 1930-S issue was minimal. Apparently few circulated, as there was still a glut of earlier examples of the denomination, and the Gold Recall of 1933 was right around the corner. The average grade of certified survivors is close to the near-Gem level. This near-Mint State piece is exceptional, displaying bright orange-gold color with noticeable traces of luster surrounding the devices on each side. The remarkably clean surfaces and excellent strike put this piece into "keeper" territory. (#8883)

5047 1932 MS64 PCGS. A charming khaki-gold Indian type coin. Lustrous and sharply struck with distributed minor grazes on both sides. The left reverse legends exhibit minor strike doubling. The only readily obtained gold issue from the 1930s. (#8884)

LIBERTY DOUBLE EAGLES

1850 Double Eagle, XF45
Typical First Year Specimen

5048 1850 XF45 PCGS. CAC. Noticeable wear appears on the high points of this green-gold example with traces of light orange toning. Both sides have myriad marks that are consistent with the grade. An important first year double eagle that is typical of surviving specimens, having an average certified grade of 48. (#8902)

**1850-O Double Eagle, Bright AU
In-Demand First-Year Branch Mint Issue**

- 5049 1850-O AU50 NGC. Variety 1.** The James Longacre double eagle design was introduced for circulation in 1850, but the opening of the San Francisco branch mint was still four years in the future. New Orleans and Philadelphia were the only mints to strike double eagles in 1850. The combination of the popular New Orleans O mintmark and the first-year-of-issue status make this 1850-O an unbeatable combination in many collectors' eyes — including many for whom an 1854-O or 1856-O twenty will be forever out of reach. The bright surfaces on this AU example retain traces of luster with medium orange-gold color. The surfaces are peppered with abrasions throughout, mostly on the small side, with mentionable marks on the obverse including a long, vertical scratch on the neck of Liberty. (#8903)

**Choice AU 1851-O Double Eagle
Scarce New Orleans Mint**

- 5050 1851-O AU55 PCGS Secure. CAC. Variety 2.** Three die pairs are known for this early and collectible New Orleans issue. The wheat-gold surfaces lack any consequential marks and display a pleasing percentage of luster. The CAC seal is highly elusive in the present grade, with a census of just four pieces. Population: 32 in 55, 20 finer (8/12). (#8905)

-
- 5051 1864-S XF40 PCGS.** A luminous, though appreciably worn example of this Civil War-era S-mint issue, orange-gold with blue overtones through the fields. Minor abrasions are as expected. (#8942)

**Lustrous MS62 1865 Twenty Dollar
From the S.S. Republic**

- 5052 1865 MS62 NGC. CAC. Ex: S.S. Republic.** The tumultuous year of 1865 included the end of the Civil War and the assassination of President Lincoln. The sinking of the S.S. Republic on October 25 of that year is a lesser known event, since most passengers survived, but the cargo of \$400,000 face value in gold coins was lost. The wreck was located in 2003 by Odyssey Marine Exploration, and a number of 1865 double eagles were among a mixture of dates recovered. The present double eagle has dazzling cartwheel luster and a precise strike. The surfaces exhibit occasional butter-gold toning. The reverse is well preserved and the left obverse displays only moderate marks for the MS62 level. (#8943)

Seldom-Seen AU 1866-S No Motto Twenty
S-Mint Issue Second in Rarity
Only to the 1861-S Paquet Reverse

5053 1866-S No Motto AU50 NGC. In terms of absolute and conditional rarity, the 1866-S No Motto twenty is, overall, likely the second-rarest issue within the entire series of S-mint Liberty double eagles, the 1861-S Paquet Reverse being the rarest. Far fewer survive than the mintage of 120,000 coins would suggest, and most of those survivors are well-circulated and often heavily abraded. At the time this issue was minted, collecting coins by design subtype and/or mintmark was still decades into the future; like the 1861-S Paquet, the 1866-S No Motto twenties appear to have largely suffered some sort of mass extinction event, perhaps after the Gold Recall of the 1930s.

This AU specimen displays bright yellow-gold surfaces that show numerous small abrasions scattered over each side, yet traces of mint luster can still be seen around the devices. The strike is weak on the left-side obverse stars as well as the letters in UNITED on reverse, indicating an impression from misaligned dies. (#8945)

Uncirculated Details 1867 Double Eagle
Gorgeous Reverse

5054 1867 — Obverse Planchet Flaw — NGC Details. Unc. This Type Two Philadelphia double eagle displays no trace of wear. While the obverse has several immediately visible planchet voids at Liberty's chin and lips, the effusively lustrous apricot-and-yellow reverse has no such faults, making this an ideal coin for showcasing a Type Two reverse.

Uncirculated 1867 Twenty
One of the More Available Type Two Issues

5055 1867 MS61 NGC. The 1867 is a hoard date that was found in Europe, and as such it is one of the few Type Two twenties available in mint condition. As always, the mint luster is especially impressive. The surfaces display a number of small to medium-sized abrasions, most of which are seen on the obverse. (#8951)

**1868-S Twenty
Eye-Appealing Uncirculated Example**

5056 1868-S MS61 PCGS. Despite a copious mintage that exceeded 837,000 pieces, the 1868-S twenty dollar issue seldom appears in Mint State grades, as most examples of the issue clearly circulated in the Old West. Garrett and Guth write that the “best Harry W. Bass Jr. could muster in his years of searching” was an AU58 coin. This MS61 example is among the few to cross the Mint State threshold, showing generous luster over apricot-gold surfaces that show no trace of rub but do display scattered contact marks on each side, in keeping with the grade. The eye appeal is nonetheless nicer than might be expected for the grade and issue. Population: 10 in 61, 1 finer (7/12). (#8954)

5057 1870-S AU53 NGC. A butter-gold example of the conditionally elusive Type Two design. Typically abraded but the high points display only minor friction. Luster brightens design recesses. (#8959)

**MS62 1871-S Type Two Twenty
Rich Reddish-Gold Color, Two Finer at PCGS**

5058 1871-S MS62 PCGS Secure. Like other S-mint Type Two double eagles of the late 1860s-early 1870s, the 1871-S twenty is usually seen well-circulated, while Mint State examples appear seldom, and anything at the Select level or higher is a major conditional rarity. This MS62 specimen is remarkably abrasion-free for the grade. The luster is a trifle on the thin side, but rich reddish-gold color and bright fields compensate. The strike is typical for a Type Two issue, somewhat soft on the obverse high points but stronger on the reverse. PCGS has seen 19 submissions in this grade, with only two finer (7/12). (#8962)

5059 1872 AU50 NGC. A peach-gold example with plentiful luster for the AU50 level, especially on the reverse. Wear is minimal and noticeable marks are confined to the cheek and a thin line in front of the mouth. (#8963)

**1873 Closed 3 Twenty Dollar, MS62
Highly Elusive in Mint State**

- 5060 1873 Closed 3 MS62 PCGS.** The overlarge mintage of 1873 double eagles was split between the Closed 3 and Open 3 varieties, with the Closed 3 far rarer, but distinguishing between them is difficult. Gordon Wrubel writes on PCGS' CoinFacts site that "[On the Open 3] the diameter of the ball is about the same size as the opening and would just pass through it. On the Closed 3, the lower ball would not pass through the constricted opening." This MS62 example is one of the few Mint State coins certified, with surfaces that are problem-free overall complementing deep reddish-gold color and lovely cartwheel luster. The strike is sharp throughout. Population: 2 in 62, 0 finer (7/12). (#8966)

- 5061 1873 Open 3 AU55 PCGS.** This green-gold Type Two representative displays more luster than is usual for the AU55 level, though we note a minor obverse rim ding at 5:30 and the expected number of scattered small abrasions. (#8967)

**1873 Open 3 Twenty, MS62
Excellent Type Coin**

- 5062 1873 Open 3 MS62 PCGS. CAC.** The 1873 Liberty double eagle, with the Open 3 in the date, is probably the number one choice of type collectors seeking a Type Two example of the denomination. This attractive MS62 specimen offers a better-than-average strike and lustrous orange-gold surfaces, with a few highlights of rose. Both sides show the expected number of minor contact marks for the grade. (#8967)

**1873-S Double Eagle, MS61
Popular Type Two Issue, With Closed 3**

- 5063 1873-S Closed 3 MS61 PCGS.** The 1873-S Liberty double eagle was produced in two varieties, with most of the coins featuring a Closed 3 in the date. This sharply detailed Mint State example displays vivid green and rose-gold surfaces with vibrant mint luster. A scattering of minor contact marks on both sides explains the grade. (#8969)

**Mint State 1874 Double Eagle
Impressive Type Two Date**

5064 1874 MS60 NGC. Like all Type Two Liberty double eagles, the 1874 is scarce in Mint State condition and rare in finer grades. This well-detailed specimen displays lustrous yellow-gold patina with accents of rose. The pleasing surfaces show the expected number of minor contact marks, mostly scattered over the obverse. (#8970)

5065 1874-CC — Improperly Cleaned — NGC Details. AU. Variety 2-A. This Carson City type coin shows substantial design definition and luster is prevalent at the borders and devices. The coin has been wiped and is somewhat bright. Abrasions are moderate given its short stint in Old West commerce. (#8971)

**Mint State 1874-S Double Eagle
Scarce Type Two Design**

5066 1874-S MS61 PCGS. Broad S mintmark. Block S pieces are also known for the issue. A lustrous canary-gold example of the conditionally scarce Type Two design. The moderately abraded cheek has lighter lime patina along with a thin diagonal mark. The reverse is well preserved for the MS61 level. A costly acquisition any finer. (#8972)

**1875 Double Eagle, MS62+
Vibrant Mint Luster**

5067 1875 MS62+ NGC. A relatively modest mintage of 295,740 Liberty double eagles was accomplished at the Philadelphia Mint in 1875. Like most Type Two twenties, the 1875 is seldom encountered in high grade. This high-end MS62 specimen displays well-detailed design elements and lustrous yellow-gold surfaces, with accents of rose. (#8973)

**1875 Double Eagle, MS62
Popular Type Two Issue**

5068 1875 MS62 PCGS. CAC. The 1875 Liberty double eagle is a scarce issue in Mint State grades, and it benefits from association with the other gold denominations of the year, which are all celebrated rarities. This well-detailed example displays vivid orange-gold surfaces with bright mint luster. A scattering of minor contact marks on both sides explains the grade. (#8973)

**Prooflike Mint State 1876 Twenty
Light Motto Reverse**

5069 1876 MS61 Prooflike NGC. Light Motto Reverse, a subtype seen only on 1876 Philadelphia twenties, though the facility also struck Heavy Motto pieces that year. This sun-gold double eagle has impressively mirrored fields and a bold strike. As expected of the MS61 level, there are a number of distributed abrasions. Census: 10 in 61 Prooflike, 3 finer (8/12). (#78976)

Scarce AU55 1877-CC Twenty Dollar

5070 1877-CC AU55 NGC. Variety 3-A. All Carson City double eagle issues are low mintage when compared with their San Francisco brethren. For example, the 1877-S has a mintage of 1,735,000 pieces, while the 1877-CC production was only 42,565 pieces. Nonetheless, a number of die pairs are known for the '77-CC, suggesting sporadic small coinages throughout the year. This is a lightly worn peach-gold example that lacks obtrusive marks and has a hint of struck-in grease left of the eagle's tail. (#8983)

5071 1877-S MS61 PCGS. CAC. This issue marks the S-mint debut of the Type Three Liberty double eagle. The gold-orange obverse has a number of light to moderate abrasions, but the reverse has a cleaner appearance and slightly stronger cartwheel luster. (#8984)

**Uncirculated 1880-S Double Eagle
Conditionally Scarce Issue**

- 5072 1880-S MS61 PCGS.** Small Squat S, one of two mintmark styles in use for this issue. Nicely struck and moderately prooflike with typically abraded butter-gold surfaces. AU examples currently trade for little over melt, but Uncirculated pieces are scarce, and the issue becomes a major rarity in MS63 and better grades. (#8993)

**Choice XF 1882-CC Double Eagle
Unblemished Surfaces**

- 5073 1882-CC XF45 NGC. CAC. Variety 1-B.** The usual dies for this scarce Carson City issue, though a different and rare reverse is known. The present Choice XF twenty has pockets of shimmering luster that are evident on the obverse and more prevalent on the reverse. A loupe fails to locate any remotely consequential marks. (#8997)

- 5074 1883-CC — Improperly Cleaned — NGC Details. AU. Variety 2-A.** Though minor marks are scattered, this straw-gold Carson City twenty has only one remotely relevant abrasion, a small rim ding on the reverse at 12:30. The piece was in Western commerce only briefly but is moderately bright from cleaning. (#8999)

**1884-CC Liberty Twenty, MS60
Vivid Color**

- 5075 1884-CC MS60 PCGS. Variety 1-A.** The 1884-CC Liberty double eagle was produced in large numbers and the issue is relatively plentiful in today's market, making it an important coin for type purposes. This attractive Mint State example features well-detailed design elements and lustrous orange-gold surfaces, with accents of rose. (#9001)

**Mint State 1884-CC Twenty
Popular Type Issue**

- 5076 1884-CC MS61 PCGS. Variety 1-A.** From a mintage of 81,139 pieces, the 1884-CC Liberty double eagle is a relatively available date and a popular choice of type collectors. This impressive Mint State example displays sharply detailed design elements with lustrous yellow and rose-gold surfaces. Population: 95 in 61, 46 finer (8/12). (#9001)

1885 Twenty Dollar, MS61
Rare, Key Date With Only 751 Business Strikes Produced

5077 1885 MS61 PCGS. The 1885 double eagle is on the short list of the United States' lowest mintage gold coins that were actually produced as business strikes rather than in proof-only format. The 1885 twenties have an impossibly low mintage of 751 coins, although its foundational rarity is somewhat overshadowed by the 1882 double eagle, which has an even lower production, recorded at 571 pieces.

Despite the incredibly low business strike production, the issue may be somewhat underrated, even today. Garrett and Guth posit the following in their gold *Encyclopedia*:

"The availability of Proof examples is the only thing keeping this issue from being extremely expensive. The Smithsonian collection lacks a circulation-strike example of the date for this reason. It is estimated that there are fewer than 100 known in all grades. Most of the 1885 double eagles seen by the authors have been in circulated condition. There are a few examples known at the Choice level."

What Garrett and Guth allude to here is the 19th century preference (of the few well-heeled collectors who could afford to dabble in twenty dollar gold pieces) for proof coins over business strikes, no matter how low the mintage. Of course, the desirability and costly nature of high-grade proof Liberty Head gold coinage from the 19th century only reinforces how difficult, elusive, and desirable the business-strike 1885 double eagles truly are.

In MS61 this coin is one of two so certified at PCGS, with five coins finer (7/12). This example offers splendid eye appeal throughout the orange-gold surfaces. A few ticks on the obverse are noted, along with a couple of others on the reverse shield. But it is probably two small obverse digs, between stars 4 and 5, that preclude an even higher grade. The coin nonetheless radiates eye appeal in considerable quantities.

Why were so few double eagles produced of this date and mint? For much of the 1880s, the San Francisco Mint had churned out double eagles by the millions each year; perhaps there was simply little need for P-mint twenties. 1885 was a year of great contrasts overall: Millions of dollars, cents, and dimes were produced in Philadelphia, yet three cent nickels, quarters, and halves were all made in tiny amounts — and the 1885 quarter eagle's mintage is nearly as low as the double eagle, 800 coins. (#9003)

1888-S Twenty Dollar, Red-Orange MS64

- 5078 1888-S MS64 NGC.** Even among the Type Three S-mint Liberty Head double eagles, which are far more common than their Type One or Type Two counterparts overall (some shipwreck recoveries, such as the 1857-S Type Ones, the obvious exceptions), most Mint State survivors top out at the MS62 level. Select and Choice specimens are seen far less often, and collectors vie eagerly for nice examples such as the present coin when they appear at auction. This 1888-S in near-Gem condition is one of 31 submitted to NGC in this grade, with a sole example finer (8/12). Bountiful luster runs across the deep reddish-orange surfaces on each side, with a sharp strike and excellent eye appeal. Only a few marks on Liberty's cheek and chiefly in the obverse fields account for the grade. (#9009)
-

1889-CC Twenty Dollar, AU53

- 5079 1889-CC AU53 NGC.** A mere 30,945 pieces were struck for this Carson City issue, struck after the facility resumed coinage following the election of Republican President Benjamin Harrison. This is a briefly circulated honey-gold representative that possesses a bold strike and only moderate marks. The upper right reverse displays a number of tiny aqua spots. (#9011)
-

Near-Mint 1889-CC Twenty Dollar

- 5080 1889-CC AU58 PCGS.** A Borderline Uncirculated pumpkin-gold double eagle with substantial cartwheel luster and a sharp strike. Light wear on the highpoints of LIBERTY and the curls are all that denies a Mint State assessment. Marks are moderate though a number are located near the first obverse star. Liberty's ear is lightly die doubled, as always on this scarce Carson City emission. (#9011)
-

**1890-CC Double Eagle, AU58
Die Doubled Reverse**

- 5081 1890-CC AU58 PCGS. Variety 1-A.** A well struck Carson City type coin with pleasing cartwheel luster and light honey-gold toning. Minimally abraded for the MS62 level aside from reed impressions on the cheekbone. The usually seen late die state with partially lapped tail feathers. The reverse is lightly die doubled, most evident on the first letters in PLURIBUS and the tops of TWENTY. (#9014)
-

1892-CC Double Eagle, Semiprooflike MS62
Popular Carson City Issue in High Grade

- 5082 1892-CC MS62 NGC. CAC.** The 1892-CC Liberty double eagle was formerly considered a major series rarity, although the overseas discoveries and subsequent repatriations have not been limited to the Saint-Gaudens double eagles, even though more emphasis is likely placed on those. The 1892-CC is nonetheless “less rare than previously,” but high-grade Mint State examples remain elusive. This semiprooflike MS62 specimen shows few marks for the assigned grade, with frosty orange-gold surfaces showing traces of deeper reddish color near the rims, more prominently on the reverse. The strike is bold in the center, although some of the peripheral stars are weak. The eye appeal is excellent. Census: 39 in 62, 5 finer (7/12). (#9020)
-

- 5083 1894-S MS63 NGC.** Semireflective fields add to the charm of this yellow-gold Select Type Three S-mint double eagle. Lightly abraded surfaces also show a line of reed marks to the left of the bridge of Liberty’s nose. (#9026)
- 5084 1906-S MS63 NGC. CAC.** Strong cartwheel luster flashes at the correct angle to the light. Well-defined in the centers, if soft on the stars, with a grade-defining cut in the horizontal stripes of the shield. (#9051)
- 5085 1907 MS64 PCGS.** Splashes of peach and lime toning grace this lustrous final-year Liberty type coin. The strike shows only minor incompleteness at the centers. The reverse is well preserved and the cheek displays faint marks. (#9052)
-

1907-S Liberty Twenty, MS64
Conditionally Rare
Only Six Finer at PCGS

- 5086 1907-S MS64 PCGS.** This near-Gem, housed in a green-label PCGS holder, has frosty light yellow surfaces with splashes of lemon-yellow toning on each side. The strike is bold and the design features show only minimal marks. A condition rarity, PCGS has only certified six Gem examples (8/12). (#9054)
-

PROOF LIBERTY DOUBLE EAGLES

1897 PR67 Cameo Double Eagle
The Finest Known of This Scarcer Date

5087 1897 PR67 Cameo NGC. Gold proofs of the 1890s provide collectors with an unbeatable combination of absolute rarity, historic interest, and aesthetic beauty. The Philadelphia Mint had perfected the techniques of proof coinage by the late 1890s, and proofs of that era are comparable to the best products of the U.S. Mint today. The 1897 proof Liberty double eagle is the rarest twenty dollar gold piece of that remarkable period, and the coin offered here is the single finest certified example of this elusive date.

Noted gold specialist David Akers gave his thoughts about the 1897 proof twenty when he described the remarkable coin in lot 1171 of the John Jay Pittman Collection (Akers, 10/1997):

“In Proof, the 1897 is the rarest Liberty Head Double Eagle from 1895-1907, although one would not be able to discern this from the mintage figures. However, as I have stated before, number minted does not necessarily equate to number distributed, and it is probable that a substantial portion of the 76 Proof 1897 Double Eagles minted were never sold and thus later melted. Today, only about 18-22 can be accounted for, many of which have varying degrees of impairments, unlike this example which is actually quite close to perfection.”

Current research indicates there were actually 86 proof double eagles minted in 1897, rather than the 76 pieces stated by Akers, but his estimate of the rarity of this date, and the surviving population, has held up well over the years. Writing in 2006, Jeff Garrett and Ron Guth confirmed much of what Akers said a decade earlier:

“There are just 20-25 coins known in all grades. The population numbers are higher, but these do not take into account resubmissions. There are also several mishandled examples represented in the population reports. After 1897, Proof double eagles become much more available. The 1897 issue is underrated.”

As noted by Garrett and Guth, the population data from the grading services does indicate a slightly larger number of coins still extant. NGC and PCGS have combined to certify a total of 41 examples of the proof 1897 double eagle in all grades and designations (3/12). As stated above, many of these submission events are the result of coins being submitted on different occasions, because the owners have a preference for one grading service over the other, or in hopes of securing a higher grade. Reviewing auction records over the last few decades, we believe the population estimates of the experts quoted above are more accurate than the accumulated population data.

The present coin is important for its high numerical grade, but is equally notable for its aesthetically pleasing appearance. Like all coins, whether they are proofs or business strikes, gold or otherwise, eye appeal or aesthetic appearance is equally important as technical grade. This Superb Gem Cameo proof could arguably qualify as an Ultra Cameo example, with richly frosted deep yellow-gold devices that float on deeply mirrored greenish-gold fields. The fields on both sides have the usual orange-peel texture seen on many 19th century proofs. A tiny lintmark extends from the inside point of star 5 and should serve as a pedigree marker for future researchers. This coin would be a welcome addition to the finest gold collection or Registry Set. Census: 1 in 67 Cameo, 0 finer (7/12).

Ex: Dallas Signature (Heritage, 6/1989), lot 2245, Elite Coin & Jewelry Auction (Superior, 4/2003), lot 444; Pittsburgh ANA Auction (Heritage, 8/2004), lot 7700, realized \$69,000. (#89113)

HIGH RELIEF DOUBLE EAGLES

High Relief MCMVII Double Eagle Uncirculated Details

5088 1907 High Relief, Wire Rim PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen that has been cleaned. This lot could be a bargain for the astute bidder, since the well struck green-gold surfaces are only mildly luminous and lack any obtrusive hairlines. The eye appeal is exceptional for a genuine holder example. The obverse rim is shelf-like between 1 and 3 o'clock.

Wire Rim 1907 Twenty, MS64 Original, Unperturbed Surfaces

5089 1907 High Relief, Wire Rim MS64 PCGS. The High Relief twenty is the most affordable compromise between Saint-Gaudens' original artistic vision and the subsequent realities of "modern" coinage production. The sculptor's original concept for a circulating, large-denomination gold coin was the Ultra High Relief. That coin stretched the limits of the Mint's capabilities to produce such a coin, and in the end it had to be struck as a medal would. The wire rim on the present example is visible on the obverse from 8 o'clock moving clockwise to 4 o'clock, and on all of the reverse. Were it not for a couple of stray marks on Liberty's breast and torso, this piece might have merited a Gem grade, as it certainly has the eye appeal elsewhere. The fields are smooth and unperturbed, the strike is bold (of course), and the color is a beautiful yellow-gold with just a tinge of reddish patina as usually seen. A lot of coin for the grade.
Ex: Central States Signature (Heritage, 5/2007), lot 2388. (#9135)

1907 Flat Rim High Relief Twenty

- 5090** 1907 High Relief, Flat Rim PCGS Genuine. PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The surfaces are unnaturally bright from the cleaning and there is just a bit of high-point friction over the devices. The contact marks on each side are minimal and do not merit individual mention. This is still a magnificent example of this popular, well-designed one-year type coin; it is also a scarcer variant with the flat rim feature.

SAINT-GAUDENS DOUBLE EAGLES

- 5091** 1908 No Motto, Wells Fargo Nevada MS66 PCGS. Short Rays Obverse. A precisely struck orange-gold Premium Gem from this famous holding. Free from any noticeable marks. Though Wells Fargo allowed their name used for marketing, the sizeable and high quality hoard originated elsewhere. (#99142)
- 5092** 1908 No Motto, Wells Fargo Nevada MS66 PCGS. Short Rays obverse. A beautiful butter-gold Premium Gem that possesses exemplary preservation and bountiful cartwheel luster. The strike is precise except for soft definition on Liberty's nose. Certified in a green label holder. (#99142)

**1908 No Motto MS68 Double Eagle
From the Wells Fargo Hoard
Sparkling Surfaces With Bright Luster**

- 5093** 1908 No Motto, Wells Fargo Nevada MS68 PCGS. Short Rays Obverse. Even among the realms of the many coin collectors who dream of treasure — or those who go out and prospect for it — the Wells Fargo Nevada Hoard stands out as the stuff of legend. The 19,900 pieces that comprised the hoard, all 1908 No Motto twenties, made that issue the single most common No Motto entry in the Saint-Gaudens series.

Although most of the coins were sent to NGC and PCGS and were in remarkably high grade overall, there were 10 coins from the hoard that originally came back as MS68. Time, “gradeflation” and certain resubmissions have added to those totals, and today PCGS shows 10 pieces in MS69. (For comparison, 6,000-plus and 1,700-plus coins from the hoard graded MS66 and MS67, respectively.) Needless to say, the surfaces on this piece are amazingly clean, sparkling with bright mint luster. Both sides are yellow-gold with slightly deeper reddish margins. All the pillars on the Capitol building are complete, but Liberty’s nose is slightly flattened. (#99142)

**Gem No Motto 1908-D Twenty Dollar
Exceptionally Clean Surfaces**

- 5094 1908-D No Motto MS65 PCGS. CAC.** Long Arrows Obverse. A caramel-gold Gem that boasts remarkably clean surfaces in addition to comprehensive cartwheel luster. The strike is intricate on Liberty's face though her knee and chest lack absolute detail. Much scarcer as a Gem than its Philadelphia No Motto counterpart. (#9143)

**1908 Saint-Gaudens Twenty, MS64
First Year With Motto**

- 5095 1908 Motto MS64 NGC.** The design of the Saint-Gaudens double eagle was modified in 1908 to include the motto IN GOD WE TRUST. This important type issue can be located in MS64 condition with a little patience, but finer grades are very scarce. The present coin displays well-detailed design elements, with lustrous yellow and rose-gold surfaces. NGC has graded only 27 numerically finer specimens (7/12). (#9147)

**1908 Motto Twenty, Near-Gem Example
First Year of the Modified Type**

- 5096 1908 Motto MS64 PCGS.** Unlike its No Motto counterpart (4,271,551 coins produced), the 1908 Motto double eagle is a scarce issue from a low mintage (156,258 pieces). This attractive near-Gem is lustrous and attentively struck, with uniformly bold details on each side. A few minor marks and luster grazes prevent a higher grade, but the coin retains a substantial degree of overall eye appeal. Ex: *Summer FUN* (Heritage, 7/2007), lot 3150. (#9147)

**1908-S Twenty, Lustrous AU58
Impressively Low Mintage**

- 5097 1908-S AU58 PCGS.** The 1908-S is consistently popular with collectors in all grade ranges because of its remarkably low mintage of only 22,000 pieces. This example retains substantial mint luster, and each side is lightly abraded. The usually seen reddish patina is evident on this near-Mint twenty. (#9149)

- 5098 1911 MS63+ PCGS.** Yellow-orange luster with coppery areas at Liberty's knee and to the left of her figure. Lightly abraded on the obverse with a few deeper cuts hidden in the eagle's feathers. (#9157)

- 5099 1911-D MS66 PCGS Secure.** This magnificent Premium Gem exhibits rich apricot and olive-green shades. Full struck save for slight incompleteness on the raised knee. Marks are essentially absent aside from a trivial rim flaw at 7 o'clock on the reverse. (#9158)

**1913-S Twenty, MS63
Popular, Low-Mintage Issue**

- 5100 1913-S MS63 NGC.** Only 34,000 pieces were struck of the 1913-S twenty, and many are lacking in eye appeal. This is a reddish-gold example that does not show any of the often-seen alloy spots. The strike details are strong and there are numerous small, but individually insignificant abrasions present. (#9163)

- 5101 1914-D MS65 PCGS.** A virtually mark-free Gem of this collectible Denver issue. Rich peach-gold toning is predominant except on Liberty's raised knee and the eagle's breast. An excellent value relative to those few examples graded finer. (#9165)

**1914-D Double Eagle, MS65+
Elusive in Finer Grades**

5102 1914-D MS65+ PCGS. CAC. An exceptional Gem with brilliant yellow luster and frosty mint surfaces. Like most examples, this piece is sharply defined and boasts outstanding eye appeal resulting from wispy blue and rose patina. PCGS has only certified 62 finer examples (8/12). (#9165)

5103 1915-S MS65 PCGS. The 1915-S Saint-Gaudens double eagle is an available date in Gem condition, making it a favorite with mintmark type collectors. This delightful piece features sharply detailed design elements with rich greenish-gold surfaces that show strong orange highlights and vibrant mint luster. (#9168)

**1922 Double Eagle, MS65
Rarely Finer**

5104 1922 MS65 PCGS. The Philadelphia Mint double eagles from 1924 to 1928 are recognized as the common dates in the series, although the 1922 is frequently encountered as well. However, rarely are examples found in grades finer than this piece. In fact, PCGS has only certified seven coins better than MS65 (8/12). A highly lustrous Gem, both sides have frosty yellow-gold surfaces with minimal marks and exceptional eye appeal. (#9173)

5105 1923 MS64+ PCGS. CAC. Yellows and apricots prevail on this strongly lustrous piece that puts the “near” in “near-Gem.” The left reverse shows a subtle coppery streak that adds character to that side. (#9175)

5106 1924 MS65 PCGS. Attractive caramel-gold toning blankets this well struck and lustrous double eagle type coin. Marks on the sun and obverse field preclude assessment at a finer level. (#9177)

5107 1924 MS66 PCGS. CAC. A distinct orange-gold cast settles over the interiors on this Premium Gem. The strike is flat at the top of the torch but other details are decent or better. Housed in a green label holder. (#9177)

5108 1924 MS66+ PCGS. CAC. Apricot-gold overall with shifts to yellow and blue as a result of copper effects. A well-defined coin that is just a couple of luster scrapes away from being a Superb Gem. (#9177)

**1924-D Twenty, AU58
Few Known in Circulated Grades**

5109 1924-D AU58 PCGS. The 1924-D was apparently a heavily melted issue as more than 3 million pieces were struck and probably less than a thousand survive today in all grades. Few were actually released into circulation, but this piece shows evidence of light handling. Almost complete mint luster remains, and abrasions are few. The most notable marks are two X-shaped intersecting scratches in the upper-right obverse field. (#9178)

**1924-D Double Eagle, AU58
Over 3 Million Minted
Majority Melted**

5110 1924-D AU58 PCGS Secure. CAC. Perhaps a decade after they were minted, most 1924-D double eagles remained in Treasury vaults awaiting their turn in the melting pot. Only a few thousand were released, those mostly for export to Europe. Although both sides of this example show slight wear on the high points, along with myriad surface marks, nearly full luster remains on the yellow-gold surfaces. Hints of light pink adds to the eye appeal. (#9178)

Gem 1924-D Double Eagle
Condition Rarity, Three Finer at PCGS

5111 1924-D MS65 PCGS. There was a time, a bit more than 50 years ago, when the 1924-D was considered an important rarity within the Saint-Gaudens series, although it was not in the forefront. David Akers wrote in the Duckor Collection catalog (Heritage, 1/2012), lot 4636, that the first tier of rarities included the 1924-S, 1926-D, and 1926-S, of which the 1924-S was generally considered the rarest issue; the second tier comprised the 1921, 1927-S, and 1931-D; the third tier, still quite rare, comprised the 1925-D, 1927-D, and 1930-S; and the fourth tier included the 1922-S, 1929, 1931, 1932, 1920-S, 1908-S, and 1924-D, “more or less in that descending order.”

The subsequent discovery of some European hoards, of course, has resulted in periodic reassessments of the absolute and conditional rarities of those issues, as first one, then another would appear in small handfuls to be assimilated into the numismatic market. Nonetheless, Akers commented on the Duckor MS66 1924-D:

“It is interesting to note that every one of the above issues so highly regarded more than a half century ago is still considered rare today. The order has changed to be sure and for some the rarity is now highly condition dependent, but they are still rare in some context and definitely key and important issues in the series.”

Today the 1924-D is known to the extent of hundreds of Uncirculated pieces, yet Gem and finer specimens remain quite rare. This piece is one of only eight so certified at PCGS, with three finer including the Duckor and Simpson MS66 pieces (7/12). Akers pegs the total surviving population in Gem or finer “in the 12-15 range, possibly fewer.”

The present Gem shows the weakness near the rims that is typical of the issue, but otherwise is sharply defined throughout. Profound, frosted mint luster prevails over surfaces that show remarkably deep, even reddish color. The only mentionable mark appears on the shin of Liberty’s right (facing) leg. (#9178)

1924-S Double Eagle, AU58
Almost Complete Mint Luster

- 5112 1924-S AU58 PCGS.** The 1924-S is another heavily melted issue from the 1920s, as indicated by the mintage of 2.9 million pieces and the low number of survivors. This is a bright yellow-gold example that displays nearly complete mint luster. Just the slightest trace of friction can be made out over the high points of the design. Lightly abraded. (#9179)

1925-D Double Eagle, AU55

- 5113 1925-D AU55 PCGS.** Although nearly 3 million 1925-D double eagles were minted, the number of examples actually released is unknown, but was doubtless extremely small. A comparison of mintages and certified populations will tell the story. PCGS has only graded 378 examples of this issue. Alternatively, the same service has graded more than 44,000 1925 double eagles, and that Philadelphia issue has a lower mintage. A trace of wear appears on the high points of this Choice AU example that retains nearly full luster and only inconsequential marks. This piece will interest the budget minded collector, as only two coins are PCGS certified in lower grades. (#9181)

1925-S Twenty, About Uncirculated
An Affordable Alternative

- 5114 1925-S AU50 PCGS.** A few pieces were released into circulation of the 1925-S, but today probably less than half the known survivors grade less than MS60. The surfaces on this piece show even wear over the high points and clear evidence of mint luster surrounding the devices. Minimally marked. (#9182)
- 5115 1926 MS66 PCGS.** An attractive Premium Gem example of an issue with a sub-million mintage that seldom gets its due. Quality all-around detail with a few tiny coppery flecks that stand out from the pale yellow of the surfaces. PCGS has graded just three pieces as MS67 or better (8/12). (#9183)

1926-D Double Eagle, MS62
Softly Frosted Surfaces

- 5116 1926-D MS62 PCGS.** The 1926-D double eagle is no longer considered the “rarest of the rare” the way it once was, but it remains today a melt rarity nonetheless, as do many of the later mintmarked series issues. The present MS62 is a typical grade for survivors of the issue, displaying excellent bright, softly frosted mint luster over surfaces that are evenly colored a light orange-gold. The grade derives from numerous small- to medium-sized abrasions on each side, most significantly a cluster in the far right obverse field. The strike is passable in most areas but a bit soft on Liberty’s foot and nose. (#9184)

- 5117 1926-S — Cleaning — PCGS Genuine. Unc Details.** The recorded mintage is more than 2 million pieces, but only a minute percentage of that production escaped the Mint and eventual Treasury melting. The present lustrous honey-gold survivor displays delicate obverse hairlines and has minor abrasions on the upper left obverse field.

Superb Gem 1927 Twenty

- 5118 1927 MS67 NGC.** This gorgeous Superb Gem displays a sharply defined obverse and reverse design and fully lustrous orange-gold surfaces. The 1927 double eagle is a common date, although the Superb Gem MS67 grade represents the finest available quality. None have ever received a higher grade. Census: 48 in 67, 0 finer (7/12). (#9186)

1927-S Twenty Dollar, MS64
One of the Scarcest Dates From the 1920s

5119 1927-S MS64 NGC. Once considered to be among the rarest Saint-Gaudens issues, the 1927-S is today still viewed as a key date in the series, if not in the “virtually impossible” category of the 1927-D and the (so far) near-uncollectible 1933-dated coins. Over the years Heritage has been privileged to offer quite a number of 1927-S double eagles. The finest we have ever offered was the MS67 NGC specimen that came from the Museum of Connecticut History (6/1995, lot 6027), one that brought \$181,500 back in 1995, a phenomenal price for that time (for a phenomenal coin) that was the finest certified. More recently that same 1927-S, crossed to an MS67 PCGS holder, brought \$345,000 in our auction of the Phillip H. Morse Collection (11/2005, lot 6698).

The 1927-S has always been a popular issue as well due to its association with the celebrated 1927-D double eagle, one of the rarest gold coins of the 20th century. We have also handled the 1927-D MS66 PCGS example from the Museum of Connecticut History (and others) on more than one occasion, most recently in our FUN auction where it brought \$1.4 million (1/2010, lot 2331). That coin was eclipsed by the Morse PCGS MS67 that brought a staggering \$1.8 million.

While this near-Gem 1927-S is not quite in the same otherworldly class of those above, it is still extremely elusive at the MS64 grade level. This coin would fit well into a mostly Gem set with no apology. The total certified population in MS64 at NGC and PCGS combined is 22 coins, with 19 finer — and both totals are certain to represent a few duplications.

The 1927-S as a rule comes sharply struck, and this example is no exception. The strike is uniformly bold throughout. Bright, radiant mint luster is the order of the day. Although a few small surface marks prevent a Gem grade, a glass is needed to detect them. A marvelous, lustrous example of this issue, one that is justly celebrated today. Census: 17 in 64, 11 finer (7/12). (#9188)

- 5120** 1928 MS65 PCGS. Butter-yellow luster is bold and radiant. This Gem has few marks, though one on each side has depth; the first is under Liberty's outstretched arm, the second on the eagle's body just below the neck. (#9189)

TERRITORIAL GOLD

- 5121** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Surface Damage — PCGS Genuine. AU Details. K-24, R.3. This yellow-gold private gold dollar has been bent and straightened. The fields display occasional patches of pinscratches. Listed on page 374 of the 2013 *Guide Book*.
- 5122** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Obverse Damage — NGC Details. AU. K-24, R.3. A small dig northeast of the star and a flattened portion of the G in 27 G combine to cause a bend on this partly lustrous olive-green and wheat-gold Bechtler type coin. Listed on page 374 of the 2013 *Guide Book*. (#10040)

Choice AU 30 Grains K-1 C. Bechtler Gold Dollar

- 5123** (1831-34) C. Bechtler Dollar, 30G. AU55 PCGS. CAC. K-1, R.4. The earliest of the Bechtler family gold dollar varieties, struck prior to the 1834 Federal devaluation of the dollar relative to gold. The present lightly abraded example is original and has caramel-gold fields accompanied by sea-green and cherry-red patina where luster persists. Struck from rotated dies. Listed on page 372 of the 2013 *Guide Book*. (#10064)

Borderline Uncirculated Clark, Gruber 1861 Two and a Half, K-5

- 5124** 1861 Clark, Gruber & Co. Quarter Eagle AU58 NGC. K-5, R.4. The respected private minter of Clark, Gruber, & Company struck the four major denominations of gold coins in both 1860 and 1861, imitating corresponding Federal types except for the volcanic Pikes Peak motif on the 1860 ten and twenty dollar pieces. Like all Clark, Gruber gold coins, excluding the rare off-metal die trials, the 1861 quarter eagle is scarce but collectible. As always, the centers are somewhat softly impressed but the remainder of the design is sharp. The tan-gold surfaces retain ample luster and are unmarked, aside from moderate roughness on the lower right reverse rim. Listed on page 391 of the 2013 *Guide Book*.
Ex: Dallas Signature (Heritage, 11/2005), lot 2505, which realized \$6,612.50. (#10139)

AU 1851 Humbert Fifty, 880 Thous., K-5 Reeded Edge, Even Orange-Gold Color

- 5125** 1851 Humbert Fifty Dollar, 880 Thous. AU50 NGC. K-5, Low R.5. The octagonal Humbert fifty dollar gold pieces dated 1851 were struck in either Lettered Edge (date on the edge) or Reeded Edge versions, with fineness 880 THOUS. or 887 THOUS. The K-5 shows the date below the eagle close to the rim, with the peripheral lettering reading clockwise from left of the date around the eight sides, AUGUSTUS / HUMBERT / UNITED / STATES / ASSAYER / OF GOLD / CALIFORNIA. As is often seen on AU and lower-graded examples of this issue, the present piece is heavily abraded, yet most of the abrasions are small. The obverse marks are more apparent than those on the reverse, with its busy engine-turned design. Portions of the peripheral legends are faint, nearly unreadable, also typical for the issue. The surfaces are orange-gold in color accented by significant reddish patina. Wear is evenly distributed over the high points. Listed on page 377 of the 2013 *Guide Book*. (#10211)

**Assay Office 1852 Ten Dollar, K-12a, AU53
Bold Design Definition**

- 5126** 1852 Assay Office Ten Dollar AU53 PCGS. K-12a, R.4. The Strong Beads early die state. This well struck yellow-gold example displays ample luster on the motifs and legends. High point wear is minor, and there are no mentionable marks, which can seldom be said about Assay Office gold coins. Mildly bright but certainly desirable. Listed on page 379 of the 2013 *Guide Book*. (#10001)

**K-1a 1854 Kellogg Twenty Dollar, XF40
Green Label Holder**

- 5127** 1854 Kellogg & Co. Twenty Dollar XF40 PCGS. K-1a, R.4. Centered Kellogg & Co. name on the obverse, short arrows on reverse. This yellow-gold example retains a surprising amount of luster for an XF40 coin, though a number of abrasions are present and a pinscratch runs from star 3 to Liberty's lips and beyond. Housed in a green label holder. Listed on page 378 of the 2013 *Guide Book*. (#10222)

CALIFORNIA FRACTIONAL GOLD

- 5128** 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS62 PCGS. A peach and pale gold representative. Boldly struck and mildly prooflike. Small peripheral spots include one near the bust tip. Population: 38 in 62, 16 finer (8/12).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7832, which realized \$1,035. (#10507)
- 5129** 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS66 PCGS. This high grade olive-gold octagonal quarter exhibits a bold strike and pristine fields. The reverse has a slightly concave appearance, as made. An ideal California small denomination gold type coin. Population: 21 in 66, 4 finer (8/12). (#10544)
- 5130** 1873 Liberty Octagonal 25 Cents, BG-728, R.3, MS66+ NGC. Though undesignated as Prooflike, the fields of this wheat-gold example are nicely mirrored. Crisply struck and as made. A very high grade for the California small denomination gold series. Census: 9 in 66 (1 in 66+), 2 finer (7/12). (#10555)
- 5131** 1881 Indian Octagonal 25 Cents, BG-7990, Low R.4, MS66 NGC. A moderately prooflike and immaculate canary-gold Premium Gem. The obverse is well struck and the reverse shows only minor incompleteness. The dies are widely rotated. (#10641)

**MS67 Prooflike Round Indian
BG-887 1881 Quarter**

- 5132** 1881 Indian Round 25 Cents, BG-887, R.3, MS67 Prooflike NGC. Dazzling field reflectivity and radiant canary-gold color combine with immaculate preservation and a good strike. The reverse die also coined several other Breen-Gillio varieties of various dates, but the obverse die struck only BG-887. Census: 2 in 67 Prooflike, 2 as 67 Deep Prooflike, none finer (7/12). (#710748)

**Superb Gem BG-940 Octagonal
Indian 1872 Half Dollar**

- 5133** 1872 Indian Octagonal 50 Cents, BG-940, R.4, MS67 NGC. A pristine sun-gold Superb Gem. Struck several degrees off center toward 10:30 with the upper stars tight against the rim. Portions of the borders are lightly brought up. The maker engraved the date by hand on the obverse die though the reverse legends were entered with well-prepared punches. Census: 1 in 67, 1 in 67 Prooflike, none finer (7/12). (#10798)

- 5134 1868 Indian Round 50 Cents, BG-1074, R.6, MS64 NGC.** As of (7/12), NGC has certified only a single example of BG-1074, found in the present lot. A concave reverse contributes to incompleteness of strike at the centers, but the honey-gold surfaces are unmarked. (#10903)
- 5135 1868 Liberty Octagonal 1 Dollar, BG-1105, High R.4, MS62 PCGS.** A moderately prooflike pumpkin-gold Period Two octagonal dollar that shows the usual incompleteness of strike at the centers, due to the high relief of the portrait. Certified in an old green label holder. Population: 12 in 62, 18 finer (8/12). (#10916)
- 5136 1875 Indian Octagonal 1 Dollar, BG-1112, High R.5, MS60 NGC.** A scarcer variety Indian octagonal dollar with chestnut-gold toning and a precise strike. Delicately hairlined but unworn and free from visible marks. NGC has certified seven pieces in all grades (8/12). (#10923)
- 5137 1873/2 Indian Octagonal 1 Dollar, BG-1121, Low R.7, AU58 NGC.** A lightly handled khaki-gold example. From the same die pair as the BG-1120 1872, but the maker altered the obverse die to craft a crude 3 from the 2. The effort was likely soon abandoned after a small number of strikes, since the BG-1123 1873 has a normal date. A total of only two examples have been certified by NGC (8/12). (#10932)

NUGGET

S.S. Central America 21-Gram Gold Nugget Excellent Display Piece

- 5138 California Placer Gold Nugget.** Ex: *S.S. Central America*. 21.00 gm. Of bulbous shape with two long flanges and a test cut where one flange meets the main mass, about half an inch deep, three-quarters of an inch wide, and nearly an inch long. Among the first *S.S. Central America* artifacts auctioned, from the insurers' portion of the recovered treasure.
Ex: *Sotheby's* (6/2000), lot 128. A photocopy of the lot description from that catalog is included with the lot.

SESSION FOUR

HERITAGE Live!®, Internet, Fax, and Mail Only Session

Saturday, September 8, 2012 | 10:00 AM CT | Dallas, Texas | Lots 7001 - 8858

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

To view full descriptions, enlargeable images and bid online, visit HA.com/1174

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through HERITAGE Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

COLONIALS

- 7001** 1722 Hibernia Halfpenny, Type One, Harp Left XF40 NGC. NGC Census: (2/15). PCGS Population (3/47). (#167)
- 7002** 1723 Hibernia Halfpenny AU50 PCGS. PCGS Population (29/243). NGC Census: (6/101). (#180)
- 7003** 1787 Connecticut Copper, Draped Bust Left — Bent — PCGS Genuine. Good Details. NGC Census: (4/191). PCGS Population (7/569). (#370)
- 7004** 1787 Connecticut Copper, Draped Bust Left Fine 12 NGC. NGC Census: (21/117). PCGS Population (36/462). (#370)
- 7005** 1786 New Jersey Copper, Narrow Shield — Improperly Cleaned — NGC Details. Fine. NGC Census: (2/50). PCGS Population (9/165). (#496)
- 7006** 1786 New Jersey Copper, Wide Shield VG8 PCGS. PCGS Population (2/48). NGC Census: (1/4). (#498)
- 7007** 1787 New Jersey Copper, Outlined Shield VF30 PCGS. PCGS Population (33/132). NGC Census: (6/23). (#503)
- 7008** 1783 Nova Constellatio Copper, Pointed Rays, Small US — Environmental Damage — NGC Details. AU. NGC Census: (6/9). PCGS Population (16/39). (#801)
- 7009** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Environmental Damage — PCGS Genuine. VF. NGC Census: (18/275). PCGS Population (56/972). (#883)
- 7010** (1792-94) Kentucky Token, Plain Edge AU50 PCGS. PCGS Population (48/188). NGC Census: (5/71). (#614)

HALF CENTS

- 7011** 1794 — Burnished, Corrosion — NGC Details. Fine. NGC Census: (13/130). PCGS Population (23/277). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$1,375. (#1003)
- 7012** 1794 — Environmental Damage — NGC Details. VF. NGC Census: (8/108). PCGS Population (25/215). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$2,000. (#1003)
- 7013** 1794 — Corroded — ANACS. VF30 Details. NGC Census: (13/90). PCGS Population (26/158). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$3,140. (#1003)
- 7014** 1800 VF25 PCGS. PCGS Population (15/174). NGC Census: (4/126). Mintage: 202,908. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$332. (#1051)
- 7015** 1803 VF25 PCGS. CAC. PCGS Population (17/136). NGC Census: (5/91). Mintage: 92,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$428. (#1060)
- 7016** 1804 Plain 4, No Stems XF40 NGC. NGC Census: (46/640). PCGS Population (65/445). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$275. (#1063)
- 7017** 1804 Plain 4, No Stems — Whizzed — NGC Details. AU. NGC Census: (40/535). PCGS Population (80/289). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$500. (#1063)
- 7018** 1804 Plain 4, No Stems AU50 PCGS. CAC. PCGS Population (80/289). NGC Census: (40/535). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$500. (#1063)

- 7019** 1804 Plain 4, No Stems — Improperly Cleaned — NGC Details. Unc. C-13. NGC Census: (2/216). PCGS Population (10/108). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$840. (#1063)
- 7020** 1804 Plain 4, Stems — Improperly Cleaned — NGC Details. XF. C-6. Spiked Chin Variety. NGC Census: (9/55). PCGS Population (6/14). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,300. (#1066)
- 7021** 1804 Crosslet 4, No Stems XF40 PCGS. PCGS Population (9/66). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$375. (#1072)
- 7022** 1804 Spiked Chin — Rim Damage — NGC Details. XF. C-6. NGC Census: (11/141). PCGS Population (42/141). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$400. (#1075)
- 7023** 1804 Spiked Chin AU50 NGC. NGC Census: (26/93). PCGS Population (34/69). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$660. (#1075)
- 7024** 1805 Small 5, No Stems VF20 PCGS. PCGS Population (13/124). NGC Census: (8/184). Mintage: 814,464. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$195. (#1081)
- 7025** 1805 Large 5, Stems XF40 PCGS. PCGS Population (10/32). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$425. (#1090)
- 7026** 1805 Large 5, Stems — Cleaned, Graffiti — ANACS. AU50 Details. C-4. NGC Census: (0/0). PCGS Population (4/18). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$725. (#1090)

- 7027 1806 Small 6, No Stems — Improperly Cleaned — NGC Details. XF. C-1.** NGC Census: (38/713). PCGS Population (72/275). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$355. (#1093)
- 7028 1806 Small 6, No Stems — Improperly Cleaned — NGC Details. AU.** NGC Census: (37/636). PCGS Population (55/179). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$525. (#1093)
- 7029 1806 Small 6, Stems Fine 15 PCGS.** PCGS Population (4/20). NGC Census: (3/82). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$840. (#1096)
- 7030 1806 Large 6, Stems VF35 PCGS. CAC.** PCGS Population (8/103). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$256. (#1099)

LARGE CENTS

7066 1794 Head of 1794 Good 4 PCGS PCGS Population (17/530). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$450. (#901374)
From The Norva Collection.

7067 1794 Head of 1794 VG10 NGC. S-61. NGC Census: (0/0). PCGS Population (24/468). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$700. (#901374)
Ex: Dr. Charles Ruby, Part III (Superior, 2/1975), lot 57; Darwin Palmer (4/1997). From The Phillip Clover Collection of U.S. Large Cents.

7068 1794 Head of 1794 — Environmental Damage — PCGS Genuine. Fine Details. S-28. NGC Census: (0/0). PCGS Population (34/434). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$885. (#901374)

7069 1794 Head of 1794 — Environmental Damage — NGC Details. VF. NGC Census: (0/0). PCGS Population (54/341). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,975. (#901374)

7070 1794 Head of 1794 — Damaged, Surfaced Tooled — PCGS Genuine. VF Details. S-61. NGC Census: (0/0). PCGS Population (54/341). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,975. (#901374)

7071 1794 Head of 1795 AG3 NGC. S-22. NGC Census: (0/416). PCGS Population (12/461). Mintage: 918,521. (#1365)

7072 1795 Plain Edge Fair 2 NGC. NGC Census: (5/139). PCGS Population (13/375). Mintage: 501,500. (#1380)

7073 1795 Plain Edge Fine 15 PCGS. CAC. PCGS Population (22/223). NGC Census: (12/92). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$1,019. (#1380)

7074 1795 Plain Edge — Edge Damaged — NGC Details. VF. NGC Census: (4/88). PCGS Population (26/197). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,425. (#1380)

7075 1796 Liberty Cap — Double Struck — Good 6 PCGS. S-87. PCGS Population (7/134). NGC Census: (4/85). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$488. (#1392)

7076 1796 Liberty Cap — Environmental Damage — PCGS Genuine. Fine Details. S-91. NGC Census: (10/63). PCGS Population (14/94). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$925. (#1392)

7077 1796 Draped Bust, Reverse of 1796 Good 4 PCGS. PCGS Population (2/74). NGC Census: (0/56). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$300. (#1401)
From The Norva Collection.

7078 1796 Draped Bust, Reverse of 1796 — Corroded — NGC Details. Fine. NGC Census: (3/45). PCGS Population (8/49). Mintage: 363,375. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$850. (#1401)

7079 1797 Reverse of 1795, Grippped Edge Good 4 PCGS. PCGS Population (2/34). NGC Census: (1/5). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$275. (#1416)

7080 1797 Reverse of 1796, Plain Edge — Off-Centered, Damaged — NGC Details. Good. NGC Census: (0/3). PCGS Population (0/14). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$140. (#1419)
From The Phillip Clover Collection of U.S. Large Cents.

7081 1797 Reverse of 1797, Stems Good 6 NGC. S-139. NGC Census: (3/125). PCGS Population (8/214). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$267. (#1422)

7082 1797 Reverse of 1797, Stems — Damaged — NGC Details. VG. S-139. Counterstamped, from Puerto Rico per our consigner. NGC Census: (7/118). PCGS Population (7/207). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$325. (#1422.30)
Purchased from Doug Bird (11/2003). From The Phillip Clover Collection of U.S. Large Cents.

7083 1797 Reverse of 1797, Stems VG10 NGC. S-140. Late die state. NGC Census: (5/113). PCGS Population (8/199). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$421. (#1422)
Ex: Lanham, Maryland Coin Show (12/1982); Jack H. Robinson (Superior, 1/1989), lot 285. From The Phillip Clover Collection of U.S. Large Cents.

7084 1797 Reverse of 1797, Stems Fine 12 NGC. S-139. NGC Census: (8/105). PCGS Population (19/180). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$600. (#1422)
Ex: Kleinman (4/1983); Jack H. Robinson (Superior, 1/1989), lot 282. From The Phillip Clover Collection of U.S. Large Cents.

7085 1797 Reverse of 1797, Stems Fine 15 NGC. S-126. Late Die State. NGC Census: (7/98). PCGS Population (14/166). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$766. (#1422)
Ex: Long Beach Coin Show (1/1986); Jack H. Robinson (Superior, 1/1989), lot 242. From The Phillip Clover Collection of U.S. Large Cents.

7086 1797 Reverse of 1797, Stems — Double Struck — Fine 15 NGC. S-138. NGC Census: (7/98). PCGS Population (14/166). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$766. (#1422)
Ex: Jim McGuigan (9/1982); Jack H. Robinson (Superior, 1/1989), lot 277. From The Phillip Clover Collection of U.S. Large Cents.

7087 1797 Reverse of 1797, Stems VF20 NGC. S-126. Perfect obverse die. NGC Census: (6/92). PCGS Population (17/149). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,075. (#1422)
Ex: A vest-pocket dealer (1954 ANA, 8/1954); C. Douglas Smith; Ray Chatham; Robinson S. Brown, Jr. (Superior, 9/1986), lot 179. From The Phillip Clover Collection of U.S. Large Cents.

7088 1798 First Hair Style — Obverse Planchet Flaw — NGC Details. VF. S-161. NGC Census: (8/158). PCGS Population (12/167). Mintage: 1,841,745. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$225. (#1431.81)
Purchased from Tom Reynolds (1/2000). From The Phillip Clover Collection of U.S. Large Cents.

7089 1798 Second Hair Style — Smoothed — PCGS Genuine. VF Details. S-181, B-42, R.3. NGC Census: (4/74). PCGS Population (26/170). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$725. (#1434)
From The Phillip Clover Collection of U.S. Large Cents.

7090 1798 Second Hair Style — Environmental Damage — NGC Details. VF. S-185. NGC Census: (4/74). PCGS Population (26/170). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$725. (#1434)

Sunday, September 9, 2012 | 1:00 PM CT | Dallas, Texas | Lots 8859 - 10262

A 17.5% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1174

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through HERITAGE Live®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

MORGAN DOLLARS

8859 1878 8TF MS62 NGC. NGC Census: (1518/4894). PCGS Population (1932/6503). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$135. (#7072)

8860 1878 8TF MS63 NGC. NGC Census: (2607/2287). PCGS Population (3640/2863). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7072)

8861 1878 8TF MS63 NGC. NGC Census: (2607/2287). PCGS Population (3640/2863). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7072)

8862 1878 8TF MS63 PCGS. PCGS Population (3653/2867). NGC Census: (2611/2288). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7072)

8863 1878 8TF MS63 PCGS. PCGS Population (3653/2867). NGC Census: (2611/2288). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7072)

8864 1878 8TF MS63+ PCGS. PCGS Population (3653/2867). NGC Census: (2611/2288). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7072)

8865 1878 8TF MS63+ PCGS. VAM 5. Doubled RIB. Top 100. PCGS Population (3653/2867). NGC Census: (2611/2288). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7072)

8866 1878 8TF MS64 PCGS. PCGS Population (2349/514). NGC Census: (1918/369). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. (#7072)

8867 1878 8TF MS63 Prooflike ANACS. NGC Census: (213/107). PCGS Population (236/128). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$350. (#7073)

8868 1878 8TF MS64 Prooflike ANACS. NGC Census: (98/9). PCGS Population (117/11). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. (#7073)

8869 1878 8TF MS61 Deep Mirror Prooflike ANACS. NGC Census: (0/12). PCGS Population (22/141). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$167. (#97073)

8870 1878 7/8TF Strong MS63 PCGS. PCGS Population (2363/1609). NGC Census: (1470/1090). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$240. (#7078)

8871 1878 7/8TF Strong MS64 PCGS. PCGS Population (1387/221). NGC Census: (998/92). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#7078)

8872 1878 7/8TF Strong MS64 PCGS. PCGS Population (1388/221). NGC Census: (997/92). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#7078)

8873 1878 7/8TF Strong MS64+ PCGS. PCGS Population (1388/221). NGC Census: (998/92). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#7078)

8874 1878 7/8TF Weak MS63 PCGS. PCGS Population (1126/888). NGC Census: (0/0). Mintage: 544,000. (#7070)

8875 1878 7TF Reverse of 1878 MS62 ANACS. NGC Census: (1839/8267). PCGS Population (1875/6800). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$68. (#7074)

8876 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3431/496). PCGS Population (2457/501). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8877 1878 7TF Reverse of 1878 MS64 PCGS. PCGS Population (2457/501). NGC Census: (3431/496). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8878 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3432/496). PCGS Population (2460/502). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8879 1878 7TF Reverse of 1878 MS64 PCGS. PCGS Population (2460/502). NGC Census: (3432/497). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8880 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3432/497). PCGS Population (2460/502). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8881 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3431/496). PCGS Population (2457/501). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8882 1878 7TF Reverse of 1878 MS64 NGC. NGC Census: (3432/497). PCGS Population (2460/502). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8883 1878 7TF Reverse of 1878 MS64 PCGS. CAC. PCGS Population (2457/501). NGC Census: (3431/496). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#7074)

8884 1878 7TF Reverse of 1878 MS63 Prooflike PCGS. PCGS Population (342/203). NGC Census: (261/269). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$180. (#7075)

8885 1878 7TF Reverse of 1878 MS62 Deep Mirror Prooflike PCGS. CAC. PCGS Population (93/213). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$190. (#7075)

8886 1878 7TF Reverse of 1879 MS63 PCGS. PCGS Population (1728/1552). NGC Census: (1482/1309). Mintage: 4,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7076)

8887 1878 7TF Reverse of 1879 MS64 PCGS. PCGS Population (1216/336). NGC Census: (1112/197). Mintage: 4,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7076)

8888 1878 7TF Reverse of 1879 MS64 PCGS. PCGS Population (1221/336). NGC Census: (1113/197). Mintage: 4,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7076)

8889 1878 7TF Reverse of 1879 MS64 PCGS. PCGS Population (1221/336). NGC Census: (1113/197). Mintage: 4,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7076)

8890 1878 7TF Reverse of 1879 MS64 PCGS. CAC. PCGS Population (1216/336). NGC Census: (1112/197). Mintage: 4,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7076)

8891 1878-CC MS61 NGC. Ex: Fitzgerald Collection. NGC Census: (753/13444). PCGS Population (753/18982). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$215. (#7080)

8892 1878-CC MS61 NGC. Ex: Fitzgerald Collection. NGC Census: (753/13444). PCGS Population (753/18982). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$215. (#7080)

8893 1878-CC MS62 NGC. NGC Census: (2679/10765). PCGS Population (3501/15481). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$250. (#7080)

8894 1878-CC MS63 NGC. NGC Census: (4812/5798). PCGS Population (7586/7867). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$285. (#7080)

8895 1878-CC MS63 PCGS. PCGS Population (7586/7867). NGC Census: (4812/5798). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$285. (#7080)

8896 1878-CC MS63 PCGS. CAC. PCGS Population (7578/7836). NGC Census: (4803/5791). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$285. (#7080)

8897 1878-CC MS64 PCGS. PCGS Population (6076/1802). NGC Census: (4395/1456). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7080)

8898 1878-CC MS64+ PCGS. PCGS Population (6076/1802). NGC Census: (4395/1456). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7080)

8899 1878-CC MS64 NGC. CAC. NGC Census: (4351/1447). PCGS Population (6066/1801). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7080)

8900 1878-CC MS64 PCGS. CAC. PCGS Population (6066/1801). NGC Census: (4351/1447). Mintage: 2,212,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7080)

8901 1878-CC MS63 Prooflike PCGS. PCGS Population (525/541). NGC Census: (448/415). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$430. (#7081)

8902 1878-CC MS64 Prooflike NGC. NGC Census: (317/97). PCGS Population (420/121). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. (#7081)

8903 1878-CC MS62 Deep Mirror Prooflike ANACS. NGC Census: (45/287). PCGS Population (64/304). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$400. (#7081)

8904 1878-S MS65 NGC. NGC Census: (3916/505). PCGS Population (3566/584). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8905 1878-S MS65 NGC. NGC Census: (3916/505). PCGS Population (3571/586). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8906 1878-S MS65 PCGS. PCGS Population (3563/575). NGC Census: (3907/504). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8907 1878-S MS65 PCGS. PCGS Population (3571/586). NGC Census: (3916/505). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8908 1878-S MS65 PCGS. CAC. PCGS Population (3566/584). NGC Census: (3916/505). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8909 1878-S MS65 NGC. CAC. NGC Census: (3916/505). PCGS Population (3566/584). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8910 1878-S MS65 NGC. CAC. NGC Census: (3916/505). PCGS Population (3571/586). Mintage: 9,774,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$230. (#7082)

8911 1879 MS64 PCGS. PCGS Population (3304/1027). NGC Census: (3682/765). Mintage: 14,807,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$115. (#7084)

8912 1879 MS65 PCGS. PCGS Population (914/107). NGC Census: (663/102). Mintage: 14,807,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. (#7084)

8913 1879 MS65 NGC. NGC Census: (663/102). PCGS Population (920/108). Mintage: 14,807,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. (#7084)

8914 1879 MS65+ PCGS. PCGS Population (914/107). NGC Census: (663/102). Mintage: 14,807,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. (#7084)

8915 1879 MS65 PCGS. CAC. PCGS Population (920/108). NGC Census: (663/102). Mintage: 14,807,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. (#7084)

8916 1879-CC PCGS Genuine. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#7086)

8917 1879-CC — Obv Damage — NGC Details. VF. NGC Census: (44/1746). PCGS Population (113/3311). Mintage: 756,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$255. (#7086)

8918 1879-CC — Cleaned — ANACS. XF45 Details. NGC Census: (130/1340). PCGS Population (165/2559). Mintage: 756,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$947. (#7086)

8919 1879-CC Capped Die Fine 15 NGC. VAM-3. Capped CC. Top 100. NGC Census: (22/1271). PCGS Population (49/2001). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$197. (#7088)

8920 1879-CC Capped Die VF30 NGC. VAM-3. Capped CC. Top 100. NGC Census: (33/1185). PCGS Population (72/1827). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$405. (#7088)

8921 1879-CC Capped Die — Improperly Cleaned — NGC Details. XF. Top 100, VAM-3. NGC Census: (67/1092). PCGS Population (99/1640). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$600.

8922 1879-CC Capped Die XF40 ANACS. VAM-3. NGC Census: (67/1091). PCGS Population (99/1636). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$600. (#7088)

8923 1879-CC Capped Die XF45 PCGS. PCGS Population (121/1519). NGC Census: (94/998). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$880. (#7088)

8924 1879-O MS63 PCGS. PCGS Population (3121/2200). NGC Census: (2008/1463). Mintage: 2,887,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$175. (#7090)

8925 1879-O MS63 ANACS. NGC Census: (2006/1461). PCGS Population (3113/2199). Mintage: 2,887,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$175. (#7090)

8926 1879-O MS63 NGC. CAC. NGC Census: (2006/1461). PCGS Population (3113/2199). Mintage: 2,887,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$175. (#7090)

8927 1879-O MS64 NGC. NGC Census: (1307/154). PCGS Population (1900/299). Mintage: 2,887,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7090)

8928 1879-O MS64 PCGS. CAC. PCGS Population (1900/299). NGC Census: (1307/154). Mintage: 2,887,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#7090)

8929 1879-S Reverse of 1878 MS61 ANACS. NGC Census: (141/1040). PCGS Population (386/1960). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$130. (#7094)

8930 1879-S MS64 PCGS; (2)1880-S MS64 PCGS; 1881-S MS64 PCGS and an 1886 MS64 PCGS. (Total: 5 coins)

8931 1879-S MS65 PCGS. Gold CAC. PCGS Population (22651/8047). NGC Census: (20959/8963). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$125. (#7092)

8932 1879-S MS65 PCGS. CAC. PCGS Population (22653/8052). NGC Census: (20982/8967). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$125. (#7092)

8933 1879-S MS66 NGC. NGC Census: (6872/2091). PCGS Population (6736/1311). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$280. (#7092)

8934 1879-S MS66 NGC. NGC Census: (6873/2094). PCGS Population (6738/1314). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$280. (#7092)

8935 1879-S MS66 PCGS. PCGS Population (6738/1314). NGC Census: (6873/2094). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$280. (#7092)

8936 1879-S MS66 PCGS Secure. PCGS Population (6738/1314). NGC Census: (6873/2094). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$280. (#7092)

8937 1879-S MS66 ★ NGC. CAC. NGC Census: (6873/2094). PCGS Population (6738/1314). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$280.

8938 1879-S MS67 NGC. NGC Census: (1950/140). PCGS Population (1219/80). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$540. (#7092)

8939 1879-S MS67 NGC. NGC Census: (1950/140). PCGS Population (1219/80). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$540. (#7092)

8940 1879-S MS67 ★ NGC. NGC Census: (1954/140). PCGS Population (1234/80). Mintage: 9,110,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$540.

8941 1879-S MS64 Prooflike PCGS. CAC. PCGS Population (1765/1379). NGC Census: (1936/1345). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$135. (#7093)

8942 1879-S MS64 Prooflike PCGS. CAC. PCGS Population (1765/1379). NGC Census: (1936/1345). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$135. (#7093)

8943 1879-S MS65 Prooflike PCGS. PCGS Population (1053/326). NGC Census: (985/360). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$245. (#7093)

8944 1879-S MS64 Deep Mirror Prooflike NGC. NGC Census: (228/138). PCGS Population (299/199). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. (#7093)

8945 1880 MS64 PCGS. PCGS Population (3691/1041). NGC Census: (4350/720). Mintage: 12,601,355. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$115. (#7096)

8946 1880 MS65 PCGS. PCGS Population (932/98). NGC Census: (681/39). Mintage: 12,601,355. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$570. (#7096)

9480 1934-D MS64 NGC. Top 50, VAM-3 Large D DDO Motto. NGC Census: (744/271). PCGS Population (1208/464). Mintage: 1,569,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. (#7376)

9481 1934-D MS64 PCGS. PCGS Population (1203/462). NGC Census: (744/271). Mintage: 1,569,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. (#7376)
From The Aberg Collection.

9482 1934-S AU50 NGC. NGC Census: (169/1907). PCGS Population (255/2734). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$350. (#7377)

9483 1934-S — Improperly Cleaned — NGC Details. AU. NGC Census: (169/1907). PCGS Population (254/2729). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$350.

9484 1934-S AU50 PCGS. PCGS Population (254/2727). NGC Census: (169/1903). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$350. (#7377)

9485 1934-S — Obverse Scratched — NGC Details. AU. NGC Census: (169/1907). PCGS Population (255/2734). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$350.

9486 1934-S AU58 NGC. NGC Census: (363/1127). PCGS Population (369/1885). Mintage: 1,011,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$850. (#7377)

9487 1935-S AU58 NGC. NGC Census: (189/2456). PCGS Population (259/3729). Mintage: 1,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$110. (#7379)

9488 1935-S MS63 PCGS. CAC. PCGS Population (1034/2088). NGC Census: (587/1367). Mintage: 1,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$300. (#7379)

9489 1935-S MS64 NGC. NGC Census: (887/480). PCGS Population (1357/731). Mintage: 1,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. (#7379)

9490 1935-S MS64 PCGS. CAC. PCGS Population (1357/731). NGC Census: (887/480). Mintage: 1,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. (#7379)

EISENHOWER DOLLARS

- 9491 1971-S Silver MS67 PCGS.** PCGS Population (377/2). NGC Census: (81/1). Mintage: 2,600,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$220. (#7408)
- 9492 1973-D MS66 PCGS.** PCGS Population (273/10). NGC Census: (62/2). Mintage: 2,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$190. (#7413)
- 9493 1974-S Silver MS68 PCGS.** PCGS Population (909/3). NGC Census: (135/1). Mintage: 1,900,156. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS68: \$120. (#7417)
- 9494 1976-S Silver MS68 PCGS.** PCGS Population (427/0). NGC Census: (71/0). Mintage: 11,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS68: \$340. (#7422)

PROOF SUSAN B. ANTHONY DOLLARS

- 9495 1979-S Type Two PR70 Deep Cameo PCGS.** PCGS Population (141). NGC Census: (67). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$440. (#99590)
- 9496 1979-S Type Two PR70 Ultra Cameo NGC.** NGC Census: (67). PCGS Population (141). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$440. (#99590)
- 9497 1981-S Type Two PR70 Ultra Cameo NGC.** NGC Census: (18). PCGS Population (99). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: \$1,250. (#99595)

GOLD DOLLARS

- 9498 1849 No L MS61 NGC.** NGC Census: (42/254). PCGS Population (23/231). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$620. (#7501)
From The R.M. Phillips Collection, Part Two.
- 9499 1849 Open Wreath AU58 ANACS.** NGC Census: (179/1232). PCGS Population (101/864). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$260. (#7502)
- 9500 1849 Open Wreath AU58 PCGS Secure.** PCGS Population (101/867). NGC Census: (179/1234). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$260. (#7502)

- 9501 1849 Open Wreath MS60 NGC.** NGC Census: (30/1202). PCGS Population (26/838). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$360. (#7502)
From The R.M. Phillips Collection, Part Two.
- 9502 1849 Open Wreath MS62+ PCGS Secure.** PCGS Population (245/492). NGC Census: (387/550). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$605. (#7502)

- 9503 1849 Open Wreath MS63 NGC.** NGC Census: (255/294). PCGS Population (247/242). Mintage: 687,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$845. (#7502)
From The R.M. Phillips Collection, Part Two.
- 9504 1849 Closed Wreath AU55 PCGS.** PCGS Population (16/178). NGC Census: (7/404). (#7503)
- 9505 1849-D — Polished, Repaired — NGC Details. AU.** NGC Census: (9/227). PCGS Population (34/149). Mintage: 21,588. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,100.
- 9506 1849-O Open Wreath — Improperly Cleaned — NGC Details. AU.** NGC Census: (16/587). PCGS Population (21/253). Mintage: 215,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$260.
- 9507 1850 AU50 PCGS Secure.** PCGS Population (14/310). NGC Census: (6/451). Mintage: 481,953. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$200. (#7509)
- 9508 1850 MS62 NGC.** NGC Census: (105/122). PCGS Population (65/94). Mintage: 481,953. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$605. (#7509)
From The R.M. Phillips Collection, Part Two.

- 9509 1851 — Improperly Cleaned — NGC Details. AU.** NGC Census: (19/3921). PCGS Population (82/2340). Mintage: 3,317,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$200.
From The R.M. Phillips Collection, Part Two.
- 9510 1851 AU50 PCGS. CAC.** PCGS Population (82/2348). NGC Census: (19/3930). Mintage: 3,317,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$200. (#7513)
- 9511 1851 — Obverse Damaged — NGC Details. Unc.** NGC Census: (88/3179). PCGS Population (74/1633). Mintage: 3,317,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$350. (#7513)
- 9512 1851-O AU58 NGC.** NGC Census: (252/372). PCGS Population (54/174). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$310. (#7516)
From The R.M. Phillips Collection, Part Two.
- 9513 1851-O — Improperly Cleaned — NGC Details. Unc.** NGC Census: (16/358). PCGS Population (2/176). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$615. (#7516)
- 9514 1852 MS61 NGC.** NGC Census: (787/2089). PCGS Population (195/1130). Mintage: 2,045,351. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$595. (#7517)
- 9515 1852 MS61 NGC.** NGC Census: (785/2085). PCGS Population (195/1125). Mintage: 2,045,351. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$595. (#7517)
From The R.M. Phillips Collection, Part Two.
- 9516 1852-O AU55 NGC.** NGC Census: (64/296). PCGS Population (29/87). Mintage: 140,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$370. (#7520)
From The R.M. Phillips Collection, Part Two.
- 9517 1853 — Improperly Cleaned — NGC Details. Unc.** NGC Census: (235/7590). PCGS Population (160/3462). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$350. (#7521)
- 9518 1853 MS61 NGC.** NGC Census: (2187/5395). PCGS Population (498/2968). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$595. (#7521)

- 9519 1853 MS62 PCGS.** PCGS Population (1272/1684). NGC Census: (3091/2293). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$605. (#7521)
- 9520 1853 MS62 NGC.** NGC Census: (3091/2293). PCGS Population (1272/1684). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$605. (#7521)
From The R.M. Phillips Collection, Part Two.
- 9521 1853 MS62 NGC.** NGC Census: (3098/2297). PCGS Population (1279/1689). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$605. (#7521)
- 9522 1853 MS63 PCGS.** PCGS Population (954/735). NGC Census: (1233/1064). Mintage: 4,076,051. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$845. (#7521)
- 9523 1853-O AU50 PCGS.** PCGS Population (26/508). NGC Census: (18/1139). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$200. (#7524)
- 9524 1853-O AU53 PCGS.** PCGS Population (29/479). NGC Census: (29/1110). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$225. (#7524)
- 9525 1853-O — Improperly Cleaned — NGC Details. Unc.** NGC Census: (21/667). PCGS Population (16/253). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$540. (#7524)
- 9526 1854 Type One AU58 NGC.** NGC Census: (390/2970). PCGS Population (481/1244). Mintage: 855,502. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$225. (#7525)
From The R.M. Phillips Collection, Part Two.
- 9527 1854-S — Cleaned, Repaired — NGC Details. Unc.** NGC Census: (0/53). PCGS Population (4/35). Mintage: 14,632. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$2,125.
From The R.M. Phillips Collection, Part Two.
- 9528 1854 Type Two AU58 NGC.** NGC Census: (2179/1556). PCGS Population (520/1155). Mintage: 783,943. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$700. (#7531)
From The R.M. Phillips Collection, Part Two.

- 9529 1855 AU53 NGC.** NGC Census: (308/4299). PCGS Population (284/2181). Mintage: 758,269. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$470. (#7532)
From The R.M. Phillips Collection, Part Two.
- 9530 1855 AU55 NGC.** NGC Census: (879/3439). PCGS Population (524/1666). Mintage: 758,269. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$520. (#7532)
- 9531 1855-O — Reverse Damage — NGC Details. AU.** NGC Census: (36/363). PCGS Population (54/181). Mintage: 55,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,550.
From The R.M. Phillips Collection, Part Two.

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on, Currency, US Coin, and World & Ancient Coin Auctions Lots. Beginning with Auctions closing after July 31, 2012 the Buyer's Premium in Currency, US Coin, and World & Ancient Coin Auctions will be 17.5%.
 - Nineteen and one-half percent (19.5%) on Americana & Political, Arms & Armor, Civil War & Militaria, Comic, Manuscript, Movie Poster, Space Exploration, Sports Collectibles, Texana, Wine, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - For lots in all other categories not listed above, twenty-five percent (25%) on the first \$50,000 (minimum \$14), twenty percent (20%) of any amount between \$50,000 and \$1,000,000, and twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

Current Bid.....	Bid Increment	Current Bid.....	Bid Increment
<\$10	\$1	\$20,000 - \$29,999	\$2,000
\$10 - \$29	\$2	\$30,000 - \$49,999	\$2,500
\$30 - \$49	\$3	\$50,000 - \$99,999	\$5,000
\$50 - \$99	\$5	\$100,000 - \$199,999	\$10,000
\$100 - \$199	\$10	\$200,000 - \$299,999	\$20,000
\$200 - \$299	\$20	\$300,000 - \$499,999	\$25,000
\$300 - \$499	\$25	\$500,000 - \$999,999	\$50,000
\$500 - \$999	\$50	\$1,000,000 - \$1,999,999	\$100,000
\$1,000 - \$1,999	\$100	\$2,000,000 - \$2,999,999	\$200,000
\$2,000 - \$2,999	\$200	\$3,000,000 - \$4,999,999	\$250,000
\$3,000 - \$4,999	\$250	\$5,000,000 - \$9,999,999	\$500,000
\$5,000 - \$9,999	\$500	>\$10,000,000	\$1,000,000
\$10,000 - \$19,999	\$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payments:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: <http://coins.ha.com/c/ref/sales-tax.zx> for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.

Terms and Conditions of Auction

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and/or arising out of the Auction, participation in the Auction, award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administered by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature- Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 1-800-872-6467 or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 10-10-11

The Business Climate is Perfect at Long Beach.

Reserve Your Waterfront Table Today • September 6 - 8, 2012

Located within sight of star attractions like the Queen Mary and the Aquarium of the Pacific in beautiful Long Beach, California, the Expo brings together more than 10,000 dealers and collectors three times each year. The weather is great, and so is the business climate on our 100,000-square-foot bourse floor!

As the pre-eminent coin and collectibles show on the West Coast, the Long Beach Expo is considered a must-go-to show by many of the country's top dealers. There are literally hundreds of collectors of all levels walking the floor searching for key pieces to add to their collections.

- Many dealers have been exhibiting at Long Beach for decades
- The bourse floor is loaded with U.S., World and Ancient coins for every type of collector, dealer or investor
- Pre-show and live in-show auctions of millions of dollars worth of coins and paper money
- On-site coin grading by PCGS and NGC

So brush the sand off of your feet, and join us at the Long Beach Expo, September 6-8, 2012. For more information or to reserve your booth space, call **(888) 743-9316** or email lbexpo@collectors.com.
